The screenshots below clearly demonstrate that the noise report numbers are being altered between midnight and the rooster's crow, seemingly in an attempt to conceal these changes from the affected communities. This raises serious concerns about transparency and accountability in the reporting process.

I kindly request an explanation for these actions and how they align with fair practices.

Postal Service: If Ms Connelly is concerned about the services provided by Canada Post, she has the option to choose from a wide range of private businesses that offer mail and parcel delivery services.

Health Canada: If the GTAA adheres to Health Canada's sleep recommendations, then their actions demonstrate a clear awareness that they are knowingly causing harm to the affected communities. By failing to address the disruptions caused by excessive noise, they are disregarding the established guidelines for healthy sleep, thereby putting the well-being of residents at risk.

Subject: Re: Continued Malfunction of the Noise Complaint Form
Hello Fabio,

[redacted] called me this afternoon which was wonderful, and we spoke about the airplane noise. I asked her about the monthly updates provided by Pearson Airport regarding noise complaints for the different electoral ridings. These updates are supposed to be listed on the 5th day of every month, but they are now almost three months behind. She informed me that Cynthia has been working on it with others, and it should be updated by the end of next week. They are also working on dealing with the automated complaints they had received.

I mentioned that one of the months listed had been revised, and the number of people who complained had been reduced, as you had noted. She was unaware of this revision. Perhaps you can show her your record and let her handle it. Once the noise complaints are posted it should be allowed to be revised.

I asked her again if she could please mail instructions on how to file noise complaints with Pearson Airport to residents in flight path areas at least twice a year. She told me that the GTAA and Pearson Airport would not do this because she lacks confidence in the postal system - the GTAA businesses do not lack confidence in this mailing system. She believes that the current method, which involves the Pearson Airport website and voice messaging for those who sign up, is sufficient, along with the meetings they hold. I let her know once again that you and I had asked many people in the summer whether airplane noise bothers them and if they know how to file a noise complaint with Pearson Airport. Nearly everyone we asked said they did not know how to file a complaint. I argued this point, but she refused to change her stance. I even invited her to come out to conduct a survey with me in our neighbourhood on the weekend, but she declined.

[redacted] did inform me that NAV Canada, along with the Federal Government, has airplane noise restrictions. I am not familiar with these noise restrictions based on what I've found through Google searches. It would be helpful if Robyn could provide us with more information on this. We have planes flying over our house at 70-80 decibels, and she is well aware of this. She let me know her blow dryer makes 45 decibels of noise and it is okay and the 70-80 decibels that we hear is okay. I wonder if Robyn leaves her blow dryer on at night when she is trying to sleep? Maybe it would be good for her to try so she gets a better understanding of what we have to try and sleep through at night. Deborah Flint can try it too.

I also brought up the health concerns related to airplane noise. I asked her if she had read the numerous documented medical health reports you sent by email this past

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

summer. She responded that Health Canada allows the planes to fly and that the GTAA is only concerned with what they say is healthy. Federal Liberal Minister of Health Canada, Mark Holland, has not replied to any of our questions or concerns in the many emails we copied and sent to him directly. MP Judy Sgro of Humber River - Black Creek never tried to get in touch with him to come to our defence. I wonder if Ya'ara Saks, the Federal Minister of Mental Health and Addictions of Canada, can look into the matter of airplane noise for us. If we are getting less than seven hours of sleep because of airplane traffic, it is not healthy. It's disappointing!

Regarding soundproofing homes around Pearson Airport, [redacted] told me that no such program has ever been implemented anywhere in Canada. From what I understand, she does not believe the GTAA should be responsible for soundproofing homes in the flight path areas around Pearson Airport. [redacted] can correct me if I misunderstood her position.

Please read the articles here. Why doesn't the GTAA and Pearson Airport make it mandatory for all A320 planes using the airport to have this vortex system installed? This technology has been available since 2014. It should be the responsibility of the GTAA and Pearson Airport to ensure that planes flying over our houses are as quiet as possible.

https://www.cbsnews.com/boston/news/logan-airport-airplane-noise-flight-path-warren-markey/

Lawmakers Push Airlines To Reduce Airplane Noise Around Logan Airport

Loud planes have long been a problem for many communities in the Logan flight paths.

www.cbsnews.com

Here's a revised version with grammatical corrections and improved clarity:

[redacted] listened to me speak for a long time which was nice, and as the conversation went on, she seemed to grow tired of hearing about my frustrations. We interrupted each other often as we discussed having to live with the airplane noise, being ignored, and no one really addressing the issue of improving the situation. She ended our conversation by telling me that I live in a flight path area, that the planes will continue to get busier, and that's just how it's going to be. She also mentioned that increased plane traffic is good for economic growth for the GTAA. I told her that it was terrible and disgusting, and that the number of planes should be capped at Pearson Airport, then I hung up on her.

Before our conversation ended, [redacted] did let me know that she plans to talk about scheduling another community meeting in the new year. I asked her if she could mail out invitations to the community, but she said no. The meeting will likely be in late winter or early spring, so another few months will go by with nothing being done about the airplane noise. It is terrible!

Take care,

[redacted]

Note: The GTAA phone number is 416-776-3000 if you would like to call [redacted] cannot be reached at this phone number I tried. It would great if more people called [redacted] to discuss airplane noise with her.

Subject: Re: Continued Malfunction of the Noise Complaint Form
Hello Fabio,

Hopefully [redacted] will reply to your email today. It becomes frustrating when we do not receive a response.
I have called and left numerous messages for [redacted] from the GTAA over the past few days to complain about the airplane noise, inquire about soundproofing our homes, and ask her to have the GTAA and Pearson Airport mail out instructions on how to file an airplane noise complaint. [redacted] is well aware that many people living in flight path areas are unaware of how to file a noise complaint with Pearson Airport.
We never agreed to the increase in airplane traffic. The situation will worsen significantly over the years with CEO of the GTAA Deborah Flint target goal of 85,000,000 flights per year is met. Pearson Airport, the GTAA, and our federal government—led by the Liberal party—are all well aware of the health issues here, yet they don't seem to care because money is being generated by businesses associated with the GTAA.
Thank you for all of your time and effort you have given to help reduce the airplane noise.
Take care,
[redacted]
Note: GTAA phone number is 416-776-3000 if you would like to call [redacted] I have not tried to call [redacted] yet.

Warning: This message is from an EXTERNAL SENDER - be CAUTIOUS, particularly with links and attachments.
Attention: Ce message provient d'un EXPÉDITEUR EXTERNE - soyez PRUDENT, en particulier avec les liens et les pièces jointes.

It's heartbreaking to witness the silence or hostility of institutions that are meant to protect. When the state withdraws or turns against its own people, we are left with no choice but to remember that self-defense is not only a right, but a necessity.

This is not rhetoric. It is grief, sharpened by experience and shaped by a growing sense that something foundational is breaking. I am writing not out of anger, but out of sorrow—and a hope that we still have the strength to name what is happening and stand for what's right.

Best,
Fabio Ovettini

Yahoo Mail: Search, Organize, Conquer

On Thu, May 8, 2025 at 16:23, [redacted] wrote:

Hello Fabio,

[redacted] and Minister of Transport Chrystia Freeland should be responding to your concern regarding the critical failure in air traffic data. It is unacceptable that they continue to ignore this issue. It seems we are dealing with the same Federal Liberal government that existed under Trudeau—one that does not respond to us.

[redacted] informed you that she would no longer respond to your concerns about airplane noise because she was tired of hearing from you. What exactly are her job responsibilities then because I thought she is supposed to be handling airplane noise concerns? She should be addressing your concerns. Instead, she organizes tours of Pearson Airport. [redacted] told me that air traffic at Pearson will only get busier, and there's nothing we can do about it—that's just how it's going to be.

And what about MP Judy Sgro for Humber River - Black Creek? The election is over. She should be investigating your concern about the critical failure in air traffic data. Neither she nor her office has responded to you.

It looks like we need to visit the offices of these individuals in groups and demand answers from them. You have been polite and direct in your emails to them and they ignore you like you are a nobody that they could care less about.

Take care,

[redacted]

Subject: Critical Failure in Air Traffic Data – GTAA Accountability

[redacted] Ms. Freeland,

We are once again experiencing a failure in accessing essential air traffic data, with systems down and no clear resolution in sight. This disruption highlights a deeper issue: the GTAA's ongoing inability to operate at the standard expected of a major piece of Canadian infrastructure.

These persistent failures not only compromise public trust and safety but may also constitute a breach of the GTAA's lease obligations with Transport Canada. Yet, Transport Canada continues to look the other way.

This level of dysfunction is unacceptable and should raise serious concerns about oversight, accountability, and the future of airport governance in this country.

We will continue documenting these failures and strongly urge that this matter be escalated.

Sincerely,
Fabio Ovettini

I wanted to bring to your attention the response I received from [redacted] regarding the recent delay in noise event processing. This was her response:

"Noise events are typically processed within 24 hours. We have tested WebTrak and noise events and there are no issues with processing."

This response does not address the fact that, in this case, the system took a full week to sync. If no one on your team can explain why this happened, then no one can confidently claim the system is functioning properly.

What's more concerning is the alarming display of incompetence from the people I've had to deal with at the GTAA. Not only has there been no explanation for the delay, but there is also no recognition that a problem even existed. If a problem isn't acknowledged, it isn't understood. And if it isn't understood, it isn't fixed. This means the same issue will happen again—because how could it not? No system can be maintained by people who do not know why it fails.

I need a real answer: Why did this happen? What, if anything, was done to correct it? And how do you know it won't happen again?

Sincerely,
Fabio Ovettini

I hope this message finds you well. I am writing to escalate an ongoing issue regarding **delays in WebTrak data syncing**, which has significantly impacted our ability to track timely updates.

Initially, WebTrak used to update within **approximately two hours**, but recently, updates have sometimes taken up to **a week**. I raised this concern with your team, specifically with Cynthia, but I received a response that failed to address the core question clearly.

I asked for clarification on whether the new **extended update time is a permanent change** or if there is an **underlying issue causing the delay**. Unfortunately, the response I received did not provide sufficient clarity on this matter.

Additionally, I'm concerned about the **limitation in the staff's ability to comprehend the issue** and provide appropriate answers. It's crucial that this issue is properly understood and addressed to ensure smooth operations going forward.

I would appreciate your assistance in:

1. Clarifying whether this **new delay is expected** moving forward, or if it's a temporary issue.
2. Ensuring that your team is able to **provide clear, direct, and accurate answers** regarding this and future inquiries.

I look forward to your response and resolution of this matter.

Sincerely,
Fabio Ovettini

Hi [redacted]

Thanks for your response. I want to clarify my question because I'm asking specifically about **how long it takes for WebTrak to sync** new data.

Before: WebTrak used to update within **about two hours**.
Now: It sometimes takes **up to a week**.

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

Can you confirm:

1. **Is this the new expected update time?**
2. **Or is there an issue causing this delay?**

I appreciate your help in clarifying this.

Sincerely,
Fabio Ovettini

Thank you for your response.

Based on my extensive experience with WebTrak, the system has typically synchronized within a delay of no more than two hours. If synchronization is now taking up to a week, that suggests an issue.

Could you please provide a timeframe for how long we should expect the system to be in sync moving forward?

Looking forward to your clarification.

Sincerely,

Fabio Ovettini

Critical Malfunction in WebTrak System

I am writing to formally bring to your attention a critical malfunction in your systems that has yet to be addressed.

WebTrak has stopped displaying events, and this issue appears to have started approximately a week ago.

Please check the attached screenshots displaying the issue below.

Corruption and incompetence are not just administrative failures—they have real consequences. Attempting to cover up corruption only fuels more corruption and incompetence, creating a cycle that ultimately leads to systemic failure.

I am requesting that this issue be fixed immediately. Please confirm receipt of this email and provide a timeline for when the WebTrak system will be fully restored.

Sincerely,

Fabio Ovettini

Deputy Minister Thangaraj,

The recent update to the noise complaint form is a clear example of how the GTAA is attempting to suppress the voices of those raising concerns about airplane noise. The new form now demands more personal information, including an email address, and requires users to refill **all** their information with each new submission—previously, this data was saved. Additionally, the inclusion of both visible and invisible CAPTCHAs seems designed to prevent individuals from automating the process, especially for those who would otherwise need to spend up to 14 hours a day filing complaints manually

Please find below my response to [redacted] email addressed to [redacted] It will give you a clear understanding of how the GTAA is managing airport operations—by inflicting abuse and terrorizing a large number of communities.

Fabio Ovettini

[redacted]

Your organization seems to justify an outdated approach to business, suggesting that high demand alone is enough to do whatever it takes to meet it, regardless of the consequences.

[redacted] there is a high demand for many things in this world, including cheap labour. Does that mean we should start raiding small villages in Africa and shipping people around the world to satisfy this demand?

Countries like the United States, Canada, and others in the free world are implementing regulations on developing nations to prevent the abuse of their people if they wish to continue trading with us. Yet, your organization appears to take the stance that as long as there is demand, it justifies any means, even if it involves torturing or abusing people.

Similarly, just because there is a huge demand for oil, it doesn't mean we should allow oil companies to contaminate the Earth. Meeting demand should never come at the expense of the environment, human health, or the well-being of our planet. Responsible practices, stringent regulations, and a commitment to sustainability are essential to ensuring that economic goals do not lead to irreparable harm. Companies must be held accountable for minimizing their negative impact. When minimizing that impact isn't possible, they should be required to compensate for the damage caused and invest in restorative initiatives to mitigate the harm done.

In 1972, foreseeing the adverse effects caused by Pearson Airport, policymakers purchased land in Pickering to build a new airport. Now, the GTAA has two options:

1. Move the airport to Crown land, where it can have a buffer of 50 kilometres of forests around it, connected to major city centres via bullet trains.
2. Appropriate the land surrounding Pearson Airport.

When you proudly announce reductions in your organization's carbon footprint, do you consider the traffic bottlenecks you create on Highway 401? Countless cars and trucks are stuck there, idling for hours.

And when you calculate net profit, do you factor in the costs you impose on our healthcare system? Empirical evidence shows that people living near airports suffer from poorer health, with a higher rate of hospitalizations compared to areas without airplane traffic.

Finally, when you calculate net profit, do you consider the vast number of children whose academic potential you are hindering? This not only impacts their futures but also affects the future of all Canadians.

Sincerely,
Fabio Ovettini

Sincerely,
Fabio Ovettini

On Saturday, September 28, 2024 at 08:44:45 a.m. EDT, [redacted] wrote:

Deputy Minister Thangaraj,

[redacted] response is unsatisfactory and basically she told me to go stuff it for lack of better words. **Transport Canada must stop being absent and acknowledge the community impacts that are no longer sustainable, acceptable or reasonable as they are extending far beyond the AOA, NEF and federal regulated zoning area of the airport.**

Please provide the legislation that permits GTAA to operate as of right using a variance when running DEDICATED departures eastbound from 05/23?

This variance has fundamentally shifted where planes turn and make noise. IT HAS NOT ALWAYS BEEN THIS WAY, IT IS A SIGNIFICANT SHIFT AS A RESULT OF AN OPERATION DECISION MADE BY NAVCAN TO RUN DEDICATE DEPARTURES AND ARRIVALS. This is a change that was made in the absence of any updates to the NEF, AOA, federal zoning by-law, locations of noise monitors or any other documentation that would identify, document or try to limit the impacts of the GTAA operations on local communities. THERE IS ZERO WAY THAT I COULD HAVE KNOWN IN 1019 WHEN I PURCHASED MY HOME, THAT PLANES WOULD TURN NON-STOP IN THE VICINICITY OF MY HOME BECAUSE THE VARIANCE ISN'T REFLECTED ON ANY APPROVED INFORMATION SHARED WITH THE PUBLIC ABOUT NOISE. Plus departures do not have approved flight paths, so there is nothing documenting where, how many, how often they turn nor any predictability about runway usage.

This morning I was awoken by roaring planes at 6:45am.This is a taste of what was happening and will continue all day. Note the PCA is less then or just over 5,000 ft for 5 planes in 6 minutes turning on a Saturday morning before 7am. This is unreasonable and unsustainable at a distance of 15km from the airport.

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

An investigation should be launched immediately into the abuse of operating procedures as directed by NavCan to GTAA.

The response to update the complete form is ridiculous. It glitches, loses multiple times, makes you start over.

Regards,
[redacted]

Subject: Departures, Rumoured New Runway?

CAUTION: **External Sender. Do NOT click on any links or open any attachments unless you trust the sender and know the content is safe.**

Dear [redacted]

As [redacted] **this email is directed to your attention for action and response. I would appreciate a written response acknowledging my email and an explanation on if the 6 requests below will be followed up upon or ignored.**

I have seen reference to a new east/west runway being constructed at Pearson. My understanding was the 2008 Master Plan referenced this but the 2017 Master Plan pg. 7 states the following:

"Because of an industry-wide shift to larger, high-density and more fully occupied aircraft, over the next two decades, proportionally fewer flights will move greater volumes of people and goods. We therefore project faster growth in passenger and cargo traffic than in aircraft movements – which we expect to grow at about 1.5 per cent annually. Our most likely scenario for 2037 suggests that aircraft movements (takeoffs and landings) will increase to 632,000 from today's 478,000. At the same time, the average number of passengers on a plane passing through Toronto Pearson will be 140, compared to 108 today. This represents a 30 per cent increase in the productivity of our runway system. Where our 2008 Master Plan anticipated the need for a new runway, we now expect to be able to meet demand with existing capacity throughout our 20-year planning period"

I have the following questions/comments/requests based on this paragraph.

1. **Is Pearson considering any new runway as referenced in some emails I have received of late from local residents? Have they moved away from what is outlined in the 2017 Master Plan?**

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

2. Please update the Letter of Agreement between Transport Canada and GTAA to be based on the amount of flights and not total passenger volume. This would coincide and be proportional to the strategy in the Master Plan to use larger planes and the increased runway utilization explained above. I would also like to express my extreme frustration that the Preferential Runway System was approved in the absence of reviewing and updating this letter. The formula is fundamentally flawed.
3. Please consult with airline manufacturers, Health Canada, Transport Canada, Environment Canada to review the permitted altitude at which larger planes (airbuses/boeing 747 etc) are allowed to start their turns and acceptable noise impacts upon departure - 3,000 ft is to low. Also for arrivals using the continuous descent operations. These planes are heard and this is evident by who is complaining, where they are complaining..
4. Please follow up with Health Canada regarding GTAA request to update the 2010 Aircraft Noise in the Vicinity of Airports, consistent with the 2019 Report Assessing the Impact of Aircraft Noise in the Vicinity of Major Canadian Airports recommendations 9 and 12a. Inform Health Canada that NavCanada and Transport Canada have made significant decisions that have changed flight paths and operations in the absence of any updated guidelines and this is of extreme concern to the local community who has been impacted by these decisions. Refer to list of changes below.
5. Please provide a copy of the MSE NEF referenced on pg. 10-11 of the Master Plan and opportunities to be involved in consultation mentioned.
6. Please provide an update on additional health studies on the impacts of nanoparticles for local communities that considers dispersion pattern changes that may resulting from new flight paths, operational decisions for runway usage as well as procedures that result in planes flying at lower altitudes eg. continuous descent operations, RNP etc.

    1. Refer to this Toronto Star article indicating that nanoparticles have flown under the radar.
    2. As well as the New York Times article documenting the the impacts of e-commerce creating pollution spikes. GTAA's cargo operations are predicted to be an increasing component of operations and have broader regional impacts creating increased demand for surrounding trucking and warehouses - Regional Transit Center (refer to Section 9 Cargo and Logistics in the 2017 Master Plan)

This email was stimulated by a flight #ACA1103 around 9:15 am this morning. I reviewed flight tracker because I wasn't sure, if it was a lawnmower on my street or a plane overhead. While there has been a marked improvement I fear it has nothing to do with the GTAA/NavCanada and is only the result of prevailing wind conditions (equals less departures to the east) and warmer weather (thicker air results in higher and different turning areas). Here's what's really interesting about this plane.

- It departed from 06, the runway, further south from Vaughan
- It was the top of the turn and webtracker says the plane was 1.1m at 81 degrees and an altitude of 6550ft in comparison to my home
- The Plane was going to Nashville - why did it turn north from 06 just to fly over Vaughan to go south?
- The Acacia Ave Noise Monitor measured 68.3 DB
- Wade Gate Park and Robert Hicks Noise Monitors (west of Hwy 400) measured 56 and 57 Db respectively.
- Matthew Park Noise Monitor (closest to me) didn't register but I heard the equivalent of a lawn mower running on my street

Every time departures run eastbound I wonder if I should stop investing in the home I purchased in 2019 before the pandemic. I reinforce the following for all authorities and decision makers - there was no way for me to know or make an informed decisions about the degree and level of aircraft traffic that has resulted in negative health impacts from myself and family. To NavCanada and GTAA's own admissions departures do not follow flight paths so it's impossible to know if you would have planes turn non-stop over your home. Since I purchased my home the following has occurred.

1. NavCanada/Transport Canada approved a flightpath change impacting arrivals on 05/23 which has planes flying at lower altitudes closer to my home Nov, 2022
2. NavCanada has approved operational changes that significantly and profoundly changed the volume and types of movements that occur in the vicinity of my home. In particular non-stop turning planes - Nov, 2022
3. Transport Canada's Approval of the preferential nighttime runway system which also significantly changes the amount of planes that fly during preferential hours (midnight to 6:30 am) in the vicinity of my home. On Tuesday morning I was awoken by a plane at 6:22 am.
4. Increasing use of continuous descent operating procedures resulting in larger planes turning at lower altitudes closer to my home. While I do not hear these planes I still worry about cumulative health impacts especially with the dispersion of pollutants at lower altitudes, such as nanoparticles, increasingly recognized as impacting communities living near major airports. I have asthma as does my daughter.
5. A shift to larger planes arriving and departing resulting in more profound noise impacts - irregardless of technical efficiencies larger planes still move more air and make more noise

There has not been reasonable due diligence by any authority to understand the implications for local communities based on the following.

1. Transport Canada, NavCanada nor GTAA did anything to understand or attempt to mitigate the new negative health impacts enforced upon new communities. This is evident because there is no monitoring that would capture the new impacts created by the above decisions. (NavCanada actually lied at the Vaughan Open House March, 2023 they told residents nothing has changed when in fact they had directed operational decisions (procedures & runway usage))
2. Health Canada considers themselves an 'advisory body' and has been absent
3. Airport operations appear exempt from any federal environmental legislation with regard to air pollution, Environmental Assessment or Environmental Impact Assessments so even though Pearson is planning to increase operations by 30% over 2017 operations there will be no formal approval or health studies required.

I look forward to your response.

Regards,

[redacted]

[redacted]

Thank you for your response. While I appreciate the explanation, I believe it is important to take a closer look at the broader context and potential for improvement in the procedures, particularly in light of modern aviation and urban planning needs.

I understand that the , century old, 3-degree glide-slope is considered standard in aviation to ensure a stable approach. However, it's important to recognize that this standard was established during the early development of Instrument Landing Systems (ILS) in the **1930s** and **1940s**, a time when aircraft were not pressurized, and the primary considerations were obstacle clearance and descent management.

Given the advancements in aircraft technology and the changing urban landscape, it may be time to reconsider whether this historical standard remains appropriate for modern aviation and densely populated areas.

Furthermore, it's worth noting that Irene Ford has documented numerous instances where aircraft have initiated turns before reaching the prescribed altitude of 3,000 feet AGL, as outlined in the Noise Abatement Procedures. While certain exceptions exist for specific aircraft types and times, consistent adherence to these procedures is crucial for minimizing noise impact on surrounding communities.

It appears that when operational efficiencies are at stake, deviations from established procedures are tolerated. However, when it comes to providing much-needed relief to affected communities, the rules are applied rigidly. This discrepancy suggests a need to reevaluate the balance between operational considerations and community well-being

Globally, several airports have implemented steeper approach angles to accommodate unique geographical constraints and minimize noise impact on surrounding areas. For example:

- **London City Airport** uses a **5.5-degree** approach due to its urban location and short runway.
- **Aspen-Pitkin County Airport (Colorado)** and **Paro Airport (Bhutan)** require steep approaches because of mountainous terrain.
- **Sion and Lugano Airports** in Switzerland have adopted steeper-than-standard approaches for terrain and noise considerations.
- Even **Heathrow** and **London Luton** have experimented with **3.2-degree** glide-slopes in an effort to reduce overflight noise.

These examples illustrate that steeper approach angles are not only feasible but are already operational at busy international airports under the right conditions.

Given the ongoing noise challenges faced by communities near Toronto Pearson, it seems there may be room for further exploration of alternatives, such as steeper descent angles, particularly on runways that significantly affect residential zones.

Moreover, considering the persistent noise exposure and its impact on the health and quality of life for residents in affected areas, it would be appropriate to discuss potential compensation and mitigation measures for these communities. While Transport Canada emphasizes land-use planning and noise abatement procedures, there appears to be a lack of direct compensation programs for residents adversely affected by airport operations. Addressing this gap could demonstrate a commitment to balancing operational needs with community well-being.

Sincerely,
Fabio Ovettini

On Wednesday, April 16, 2025 at 12:11:09 p.m. EDT, [redacted] wrote:

Hello Fabio,

This email is in response to your request for flights to maintain an altitude above 3000 feet over residential areas.

Toronto Pearson applies altitude restrictions on aircraft through the Noise Abatement Procedures. These procedures aim to minimize noise impact by setting minimum altitudes during certain flight phases.

Below is a description of Toronto Pearson's Noise Abatement Procedures:

Departures - Departing aircraft must reach 3000 feet Above Ground Level (AGL) before turning enroute, keeping the initial departure phase within the industrial zone surrounding the airport as much as possible. Departing aircraft require time and space to climb from 0'AGL to 3000' which generally occurs beyond the industrial zone.

Arrivals - Arriving aircraft must be at or above 2400 feet AGL before lining up with the runway for final approach. This occurs at approximately 18kms from the runway. The aircraft then descend along a 3-degree glideslope to the runway to ensure a stable approach. They cannot maintain 3000' AGL until reaching the industrial zone, and then suddenly descend to 0' AGL to

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

the runway.

Unfortunately, the Noise Abatement procedures do no benefit areas like yours that are located within close proximity of the runway (~7kms).

Please visit our Noise Management Program webpages to learn more about how Toronto Pearson manages aircraft noise.

Thank you,

[redacted]

I am writing to follow up on my email dated Monday, March 24, 2025 at 10:47:49 p.m. EDT, titled **"Formal Request to Cease Aircraft Operations Below 3,000 Feet Over Residential Areas."** As of today, I have not received a response.

The issues outlined in my original message remain urgent and unresolved. The continued low-altitude overflights over residential areas have clear and documented impacts on air quality, noise levels, and public health.

Given the seriousness of this matter and the growing frustration among affected residents, I respectfully request a written response detailing the GTAA's position and any intended actions regarding this issue.

I look forward to your timely reply.

Sincerely,

Fabio Ovettini

Subject: Formal Request to Cease Aircraft Operations Below 3,000 Feet Over Residential Areas

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

[redacted]

I am writing to formally request that the **Greater Toronto Airports Authority (GTAA)** take immediate action to restrict aircraft from flying below **3,000 feet** over residential areas.

According to the **U.S. Environmental Protection Agency (EPA)**, aircraft traveling below **3,000 feet** generate significant air pollution, negatively impacting local communities. The **EPA's "Historical Assessment of Aircraft Landing and Take-off Emissions"** outlines that emissions from aircraft operations at low altitudes contribute directly to poor air quality and associated health risks (EPA Document).

Furthermore, the **Federal Aviation Administration (FAA)** has reported that approximately **10% of aircraft emissions occur below 3,000 feet**, exacerbating pollution levels in populated areas (FAA Report). These emissions, combined with excessive noise pollution, have a documented impact on **public health, sleep quality, and overall well-being**.

Given the established risks, I urge the **GTAA** to:

1. **Implement flight path adjustments** to minimize low-altitude overflights in residential areas.
2. **Work with Transport Canada** to establish new operational guidelines for flights under 3,000 feet.
3. **Engage in transparent public consultation** to address concerns from affected communities.

Residents under Toronto Pearson's flight paths experience disproportionate exposure to harmful emissions and noise, significantly reducing their quality of life. The GTAA has a responsibility to mitigate these impacts and align its policies with international best practices for environmental and public health protection.

I would appreciate a written response outlining the steps **GTAA** intends to take regarding this issue. Thank you for your time and attention to this important matter.

Sincerely,
Fabio Ovettini

Subject: The Rot Is Complete

Thank you for confirming—once again—that public trust in the GTAA is not just misplaced, but utterly annihilated.

The meeting was scheduled for **three hours**. You shut it down in under **45 minutes**. Why? Because too few people were "in attendance"? How convenient—especially when **members of the public were literally locked out** while trying to join.

Let me be clear: this is not community engagement. It is **a performance**, and a tired one at that. The only thing missing was the cast of background actors you'll need next time just to make the room look full. Attendance is collapsing because people know the truth—**these meetings mean nothing**, and those running them even less.

Reports are altered in the dead of night without notice. Data is manipulated. Public questions are ignored or pre-screened. Your leadership—Ms. Flint and Mr. Thomas—has reduced the institution to a hollow shell, propped up only by the silence of your federal enablers at **Transport Canada** and **Health Canada**, who watch the decay unfold and **do nothing**.

This is not incompetence. It's **corruption**.

You say the recording will be posted in "the coming weeks." We won't hold our breath. We've seen how easily your archives vanish, your numbers shift, your records "update." Nothing static, nothing reliable—just a constant rewriting of reality to suit your needs.

To our fellow community members: **The time for polite engagement has passed. Sharpen your spears.**

We are done being ignored.

Sincerely,
Fabio Ovettini

On Friday, July 25, 2025 at 11:15:06 a.m. EDT, [redacted] wrote:

Good morning Fabio,

The meeting started at 5PM and was concluded at 5:45PM, as there were no more questions from members of the public in attendance. At 5:55PM (based on the timestamp of your screenshot) the meeting had already ended.

It was recorded and will be posted on the Noise Forums section of the Toronto Pearson webpage in the coming weeks.

Kind regards,

Subject: GTAA Public Meeting – Voices Silenced, Again

To:

Ms. Chrystia Freeland – Minister of Transport

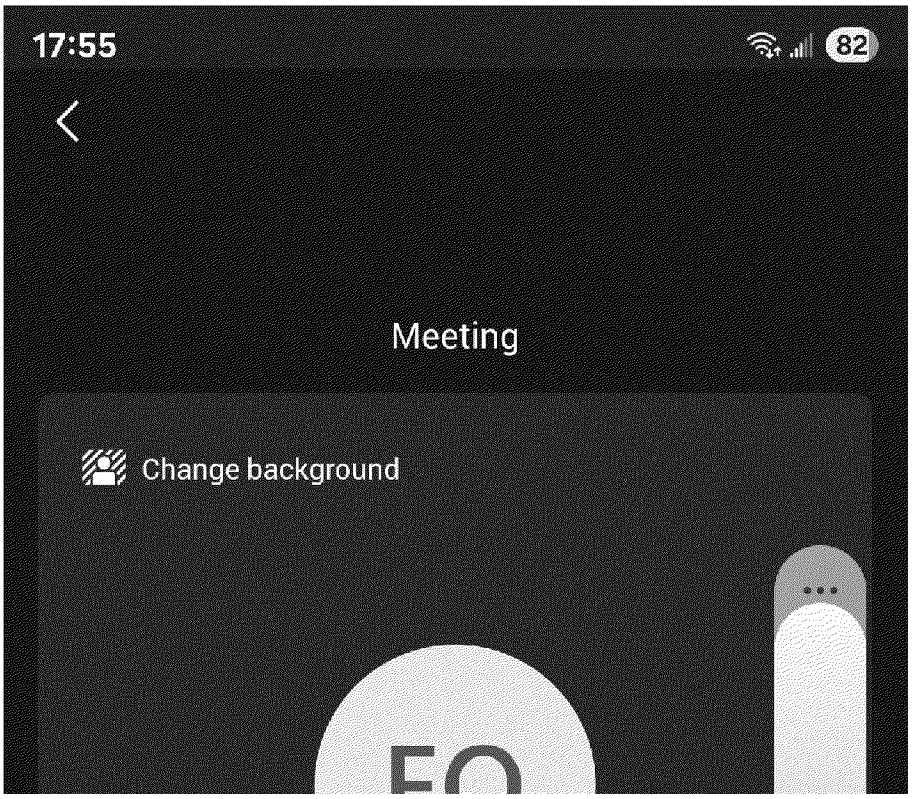
Ms. Marjorie Michel – Minister of Health

Ms. Judy Sgro – Member of Parliament, Humber River—Black Creek

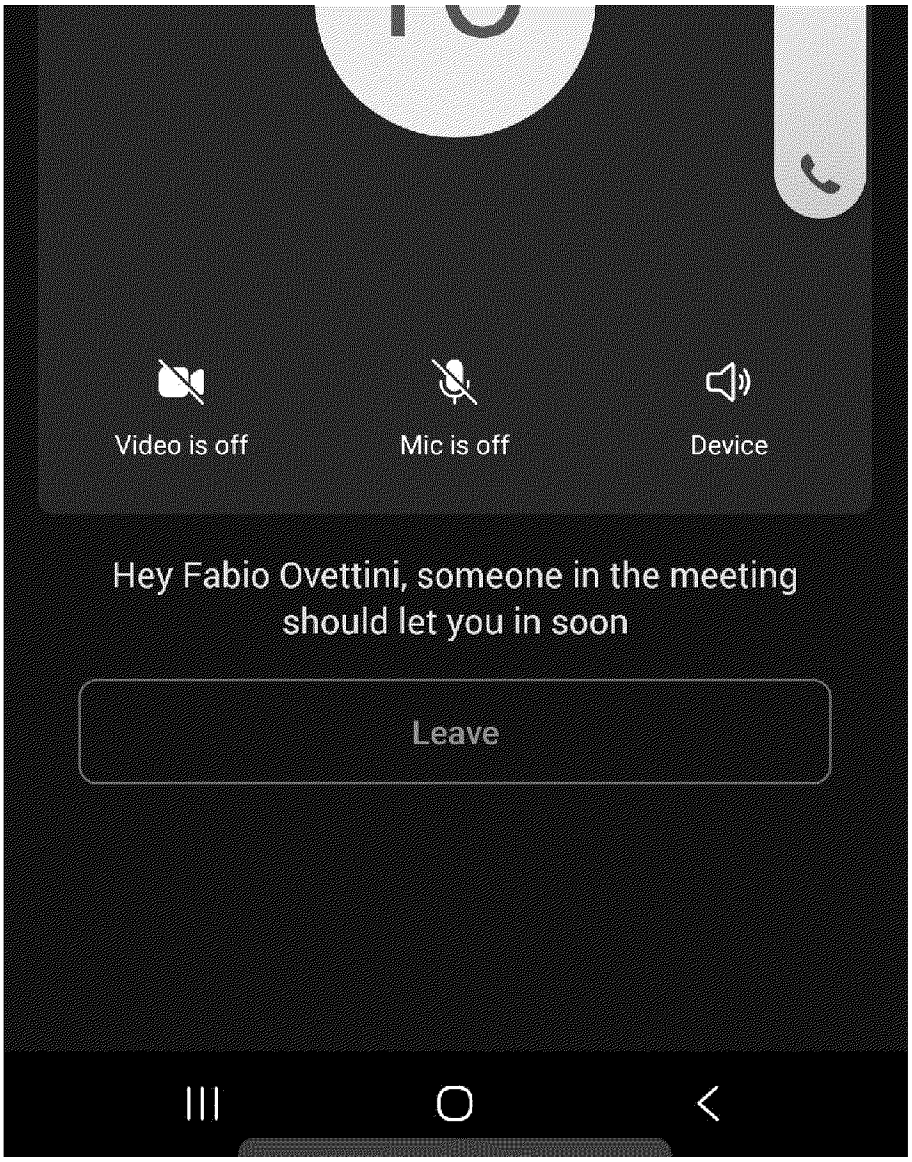
[redacted]

Yesterday at around 17:00, [redacted] and I attempted to join what was advertised as a *public* GTAA meeting via Microsoft Teams.

We were able to access the platform—but were never admitted into the meeting room.
No rejection message. No email. No explanation. Just this screen:



Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada



This is not an isolated incident. This is a pattern. A strategy.
A deliberate act of suppression carried out by the leadership of Ms. Flint and Mr. Thomas—silencing those of us who dare to raise concerns about the unbearable noise and air pollution inflicted daily on our communities.

And it begs the obvious question:

How can you, as federal leaders, continue to rely on GTAA's data and public-facing reports when the very people impacted are systematically denied a voice?

This isn't consultation.
This isn't accountability.
This is state-sanctioned censorship hiding behind a corporate facade.

The public was locked out. The harm continues. And the silence from those in power is becoming complicit.

Print screen below from computer system:

It seems that the month feature works well on Chrome and Edge browsers but does not function properly on Firefox. This discrepancy highlights a concerning lack of quality control from the GTAA before implementing their updates. It raises questions about their commitment to providing a reliable and accessible complaint process for all users, regardless of the browser they choose to use.

Sincerelly,
Fabio Ovettini

Subject: Re: GTAA's New Changes: An Attempt to Silence Community Voices

Furthermore, the recent update to the noise complaint form is a clear example of how the GTAA is attempting to suppress the voices of those raising concerns about airplane noise. The new form now demands more personal information, including an email address, and requires users to refill all their information with each new submission—previously, this data was saved. Additionally, the inclusion of both visible and invisible CAPTCHAs seems designed to prevent individuals from automating the process, especially for those who would otherwise need to spend up to 14 hours a day filing complaints manually.

To make matters worse, after spending hours collecting complaint data from the previous month on WebTrak, I found out minutes ago that we lost the

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

option to submit complaints for the previous month. Until this discriminatory change, we had five days after the end of the month to do so. These changes clearly aim to hinder effective participation from the community. Attached you will find a screen recording displaying the issue.

It appears that the GTAA is facing significant challenges in managing various aspects of airport operations. From the noise pollution that continuously affects surrounding communities to the recent changes in the complaint process, it seems that there are ongoing issues that are not being adequately addressed. These shortcomings are having a profound impact on the well-being of the people living near the airport, and it raises concerns about the GTAA's overall approach to balancing operational efficiency with the needs of affected communities.

Someone has to put an end to the abuse and torture that the GTAA is applying on all communities around Pearson Airport. These people are not just playing with our time—they are playing with our lives. It is madness, and it cannot continue.

Ministers and Deputies of Transport Canada, Ministers and Deputies of Health: the information the GTAA is presenting to you has been manipulated to benefit the GTAA. If they were truly transparent and playing fairly, you would be hearing the loud cries and moans of people begging for help. The reality of the situation is far more dire than the GTAA portrays, and it's time to act on behalf of those suffering.

Minister of Transport, I believe it may be time to seriously consider intervening in the operations of the GTAA. The level of mismanagement I have witnessed in the areas I've had to engage with is deeply concerning and unprecedented in my experience. The ongoing issues, particularly their harmful impact on surrounding communities, suggest that external oversight may now be essential. I trust that you do not wish to inadvertently become complicit in their actions, which are causing significant harm to the well-being of those affected by their decisions.

Please do not wait until we face a dire situation, such as a plane landing in someone's backyard. I know of a lady who is so troubled by the noise that she is having dreams about plane parts falling into her yard. This reflects the severity of the situation and the urgent need for intervention.

Sincerely,
Fabio Ovettini

Good morning,

I have some significant news: GTAA is clearly unsettled when communities come together and voice their true concerns about airplane noise pollution. Our efforts have been effective, and we have made it clear that people are deeply affected by the constant air traffic they generate. They can no longer claim that we are not bothered.

In what appears to be a discriminatory move, GTAA has updated the noise complaint form, now requiring more personal information, including our email addresses. This change has made the process even more tedious and time-consuming.

This behaviour mirrors how authoritarian regimes operate—suppressing the voice of the people so they can continue unchecked. GTAA, if you truly want to understand how communities feel about airplane noise, I challenge you to implement the form I proposed earlier this year.

Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the complaint form allows a maximum of 50 events per submission, I would need to complete it 10 times daily. At an estimated 30 minutes per form, this amounts to 300 minutes, or approximately 5 hours each day.

Additionally, to collect the information required for the 500 events, I would need to record the time of each plane passing by. Since 80 of these events occur while I should be sleeping, I would have to turn on a light, put on my glasses, and note the time. At an average of 1 minute per event, this adds an extra 500 minutes, or 8 hours and 20 minutes.

In total, the current complaint system would require me to spend 13 hours and 20 minutes daily.

Using the phone option would take even longer. (there is a limit of 10 calls per day)

<u>Does it make sense to expect someone to spend over 13 hours a day filing complaints?</u>

I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding a number of dBs determined by the user, based on data from the community noise monitor.

2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are crucial for a fair and accessible complaint process, especially for those who have been made vulnerable, traumatized, and marginalized by this issue

To GTAA, Transport Canada, Health Canada, and our Federal Government: my community will not be silenced. We are resilient, and we will stand up for our rights.

When the state breaks the social contract, there's a philosophical argument that individuals have a right to defend themselves—and we will.

This is just the beginning. There's much more work ahead, and our community will see it through!

Sincerely,
Fabio Ovettini

I realized that my previous email was sent without the intended video attachment. I apologize for the oversight.

I am re-sending this message with the video included, which clearly demonstrates the difficulties in using the current complaint system and WebTrak. The video highlights the issues users are facing when trying to submit complaints, underscoring the lack of functionality in the system.

Please take a moment to review the attached video, as it illustrates the points raised in my earlier message.

In light of the ongoing issues with the complaint system and the apparent disregard for user experience, I'd like to propose a lighthearted yet poignant name change for the airport: "Mickey Mouse Airport."

This name reflects the current state of operations and management, which seems to lack the professionalism and attention to quality that the community deserves. While humour can sometimes help in addressing serious issues, I genuinely hope for a day when the airport lives up to the standards expected by its users.

Thank you for your attention to this matter.

Sincerely,
Fabio Ovettini

This message is in addition to my previous communications regarding the ongoing issues with the complaint system and WebTrak.

I am writing to express my frustration with the GTAA's recent changes to the complaint submission system. It is now nearly impossible for those of us who wish to submit complaints, and the WebTrak platform, which we rely on to collect data, has been rendered unusable. These changes feel like a deliberate effort to block meaningful participation.

Please see the attached print screen video, which highlights how difficult it has become to collect data on Webtrak under the current system. I hope this provides clarity on the challenges we're facing.

It's clear that recent changes have been made to the live system without proper testing or quality control. From the results I've seen, it is evident that no pilot test was run to identify potential issues before rolling out these changes. This lack of foresight is unacceptable for a system that the public relies on.

It seems like you're grasping at straws, making adjustments without ensuring that they work, which has resulted in an even more dysfunctional process.

What steps are being taken to address these glaring issues? A system of this importance deserves thorough testing and quality control before being made live.

We need a functional system that encourages public participation, not more roadblocks.

Sincerely,
Fabio Ovettini

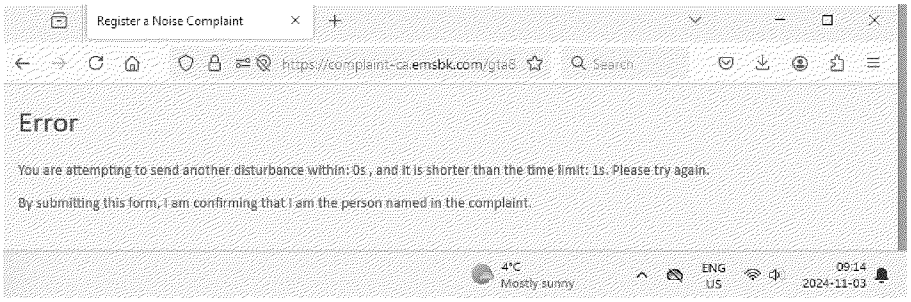
GTAA,

I am reaching out to report ongoing issues with the online web form, encountered today, Sunday, November 11, around 9:15 AM. Despite previous reports and attempted troubleshooting, the problem persists, impacting the submission process and, ultimately, effective communication regarding noise complaints and other concerns.

Could you please investigate and provide an update on the root cause and expected resolution for these issues? Ensuring reliable access to the form is essential for accurate and timely reporting.

Thank you for your attention to this matter. I look forward to your prompt response.



Sincerely,
Fabio Ovettini

I am writing to express my concerns regarding the recurring technical issues with the online complaint system for Pearson Airport. These issues are impacting the community's ability to submit complaints about airport noise and disruptions effectively.

As recently as [mention date/time if possible], I was able to successfully submit a few complaints through the system. However, shortly afterward, I began encountering the same error messages that have plagued the platform in the past, preventing further submissions. This pattern of intermittent functionality suggests that recent changes or maintenance to the platform have reintroduced barriers rather than resolving them.

These technical challenges not only frustrate users but also effectively silence residents' concerns, depriving them of a channel to register legitimate grievances. I respectfully urge the [relevant organization, e.g., Greater Toronto Airports Authority or Nav Canada] to prioritize a thorough fix for this issue to ensure consistent and reliable access to the complaint system.

I would appreciate it if you could confirm when these issues will be fully resolved and if alternative methods for submitting complaints are available in the meantime.

Thank you for your attention to this matter.

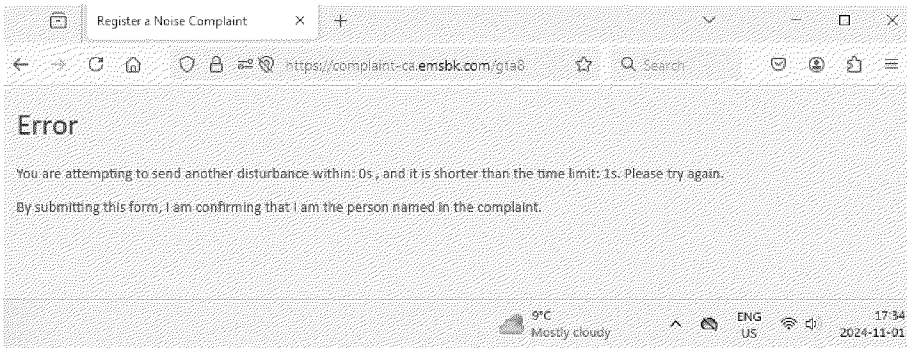
GTAA genii,

I am reaching out to express my frustration with the online complaint submission system, which seems to have significant flaws. After successfully submitting a complaint, I was able to send another just ten minutes later. However, when I tried to submit an additional complaint ten minutes after that, I encountered the following error message: “You are attempting to send another disturbance within: 0s, and it is shorter than the time limit: 60s. Please try again.”

Since that attempt, this error message has repeatedly appeared every time I try to submit a complaint. This is not only inconvenient but also undermines the purpose of the complaint system, which is supposed to allow timely reporting of disturbances.



Sincerely,
Fabio Ovettini

On Monday, October 28, 2024 at 10:20:44 a.m. EDT, Fabio Ovettini wrote:

GTAA,

I am writing on behalf of our community to express the profound frustration caused by your recent changes to the noise complaint system. Despite past feedback pointing out the lack of empathy and common sense in your approach, the recent “downgrade” to the complaint system reflects an unprecedented level of mismanagement and incompetence.

For the past few days, the phone system for noise complaints has been non-functional, with a message on your website suggesting the use of the online form. However, it seems you haven’t considered that those who rely on the phone may not have access to the internet. What about community members without computers? This oversight further underscores the disconnect between your management and the people affected by your operations.

In response, our community has been gathering to compile data and send noise complaints. Yet, since the complaint system “downgrade”, we have encountered persistent issues. Despite adjusting certain aspects after our feedback, the system remains unusable. For example, after successfully submitting one complaint, we were able to send another 10 minutes later. Ten minutes after that, however, when we attempted to submit an additional complaint, we received the following error message: “You are attempting to send another disturbance within: 0s, and it is shorter than the time limit: 60s. Please try again.” Since that attempt, this error message has consistently appeared each time we try to submit a complaint.

It is now the end of the month, and we have only managed to submit a handful of complaints due to these restrictions. As a result, we are attaching a list of complaints we would like recorded for this month. Each of the 27 attached PDF files represents one day, documenting the disturbances we have experienced. Until your complaint system is fully operational, we will continue submitting complaints this way.

In total, there are 5,581 noise events logged by each of the 116 community members, amounting to 647,396 records.

In a separate, secure email, I will send you a password-protected file containing personal information for each community member involved. The password for this file will follow in a subsequent email.

Your immediate attention to this matter is essential.

Sincerely,
Fabio Ovettini

The following reply attempts to respond to every paragraph in your email:

I understand that the noise complaint system is designed to fulfill certain criteria, creating the appearance of concern for the community while primarily serving to discourage residents from filing complaints. This system seems effective in meeting your needs, but it falls short in addressing the real needs and well-being of the communities impacted by airport operations.

Anyone approaching this issue with common sense, empathy, and competence would recognize that if residents are expected to endure 500 aircraft disruptions daily, they should certainly have the right to file 500 complaints a day. Limiting the frequency or ease of submitting these complaints does not change the reality of the impact—it only obscures the data that might otherwise bring needed attention to it.

Please reconsider the structure of the complaint process to ensure it genuinely serves as a platform for community voices, rather than a gatekeeper.

When there are 500 planes passing over the community each day, this becomes a chronic issue rather than a series of isolated incidents. When I moved into the area, there were hardly any flights overnight and far fewer during the day. The drastic increase in air traffic has transformed the environment, intensifying the disruption to the community's daily life and well-being.

On our last meeting, it was mentioned by Ms. Woods that when the GTAA took over in 1996, there were 1,800 night flights per year. This number has since grown to over 18,000 night operations annually, marking a 1,000% increase. This drastic escalation in operations has contributed significantly to the chronic disturbance and health impacts that residents now face, further highlighting the need for a complaint system that truly acknowledges the scale of the problem and the genuine concerns of the affected community members.

I also want to address an inconsistency in your complaint process requirements. In the past, we were told that complaints needed to be accurate to the minute to be considered valid. Your current message reinforces this by stating: *"Please note, we need the specific date and time to be able to investigate the aircraft operations causing the disturbance. If that information is not provided, we are not able to accurately analyze your complaint, and therefore it will not be registered."*

These shifting requirements seem more focused on limiting the number of accepted complaints than on addressing the genuine and damaging impact your operations have on our health. Every disturbance we experience is real, and the cumulative toll of these disruptions on our well-being is undeniable.

On our last meeting, it was mentioned by Ms. Woods that when the GTAA took over in 1996, there were 1,800 night flights per year. This number has since grown to over 18,000 night operations annually, marking a 1,000% increase. This drastic escalation in operations has contributed significantly to the chronic disturbance and health impacts that residents now face, further highlighting the need for a complaint system that truly acknowledges the scale of the problem and the genuine concerns of the affected community members.

The complaint system is intended as a means for residents to register their concerns. However, by imposing specific rules on how complaints must be submitted, it seems the real goal is to manage, or rather limit, the number of complaints received. Our community values productivity over red tape, and we are organized in our approach to protecting our well-being.

If the flights continue to disrupt our lives and adversely impact our health, we will continue to submit complaints. And we will do so in a way that allows residents to remain productive—contributing positively to society, to our community, and to our own well-being—rather than being bogged down by an overly restrictive complaint process.

Last weekend was the last time our group gathered to submit complaints, and I haven't checked the complaint system since. If another error occurs, as it has in the past, I'll be sure to send you a screenshot for reference. I've also noticed the recent changes to the system; for instance, the submission interval used to be restricted to one complaint every 60 seconds, and now it allows one every second. Hopefully, this time around, the testing was real and thorough.

The claim that CAPTCHA was added for "cybersecurity compliance" is misleading. CAPTCHA's purpose is to verify that the user is a real person, not to provide cybersecurity. With CAPTCHA in place, you now have a mechanism to ensure that each complaint is genuinely submitted by an individual. If the volume of complaints continues to be a concern after implementing CAPTCHA, the option that remains is to remove the online complaint system

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

altogether rather than setting restrictions that undermine its purpose.

The reason I submitted complaints by email on behalf of others was due to your system being down. Community members specifically asked me to send those complaints securely. Requiring each complainant to send their personal information openly via email is not secure.

Additionally, many community members either lack access to email or computers, or simply don't know how to use them. This is precisely why our community is organized—to ensure that everyone's needs are met, particularly when systems like yours fall short and effectively ignore those without digital access. I urge you to input those complaints into your system. While, of course, you may proceed as you choose, please be aware that our community will hold you personally liable if these complaints are not properly counted.

That's a good start, but I believe you have not properly interpreted Daryl's request. He specifically asked that you send letters twice a year, via snail mail, to all residents in noise pollution-affected communities. This would ensure that every community member, regardless of access to the internet, is informed and can participate in the complaint process.

Our community will use the complaint system in a way that meets our needs—allowing us to stay productive while also making it clear to everyone that what the GTAA is doing is criminal, authoritarian, and egocentric. Your archaic business model, focused solely on fulfilling demand at any cost, is obsolete. This approach comes at the expense of human lives—whether by prematurely ending them, torturing people, making them sick, or hindering our children's ability to reach their full academic potential, to name just a few of the harmful effects of noise pollution.

Sincerelly,
Fabio Ovettini

On Thursday, November 7, 2024 at 04:10:40 p.m. EST, [redacted] wrote:

Hello Fabio,

I am writing in response to your recent correspondence regarding the noise complaint form.

I would like to again clarify that our complaint system is specifically designed to capture disturbances that residents personally experience at their residences and correlate these with aircraft in the vicinity. Unlike noise events detected by Noise Monitoring Terminals (NMTs), resident-filed complaints do not require a specific noise threshold but must correspond to actual, personal disturbances.

I understand that your concern centers on a chronic disturbance related to all airport operations rather than isolated incidents, which are the primary focus of our current complaint process. We are considering other options that we can develop to gather feedback from residents about concerns about operations.

We have also noticed that recent submissions from your account appear to use automated methods to file complaints based on a formula that captures NMT data, rather than personal experiences. This approach does not align with the intended use of our complaint system and undermines its purpose of addressing genuine impacts on residents' daily lives.

I therefore ask that you discontinue automated submissions and adhere to the complaint system's intended use, which provides a fair and accessible way for residents to report meaningful disturbances.

It's also important to note that while we consider noise complaints an important temperature check on community impacts, they are only one factor among many in assessing overall effects. Operational decisions—such as runway configurations or flight paths—are not influenced by complaint volumes, nor are flight paths changed based on complaint frequency in particular areas.

Below is our response to your comments and questions:

Functioning of the Noise Complaint Form
We have tested the form and have not found any issues. It allows up to 50 complaints to be submitted seconds apart, with a brief time limit between submissions to reduce the risk of bot activity. If you encounter further issues, please provide specific details and, if possible, screenshots so we can share this information with our vendor for investigation.

Changes to the Form
In order to ensure our cybersecurity compliance, we added a CAPTCHA to the form.

Complaints by Phone
We experienced a temporary, intermittent outage with our phone system the week of October 28. The system is now fully operational, and we are monitoring it closely. Residents can again submit complaints by phone, and we will address any concerns from residents who attempted to submit complaints during the outage if any are raised.

Submitting on Behalf of Others
Your email included a list of complaints submitted on behalf of other residents. However, our complaint process requires that complaints be submitted by the individual named in the complaint. Our noise complaint form includes the statement: "By submitting this form, I am confirming that I am the person named in the complaint." As a result, we cannot accept complaints submitted on behalf of others.

Communicating How to Make a Complaint
We are implementing Daryl's suggestion to improve our communication to residents regarding noise complaints. Starting this month, each issue of our community e-newsletter, *Checking In*, will include a link to our noise complaint webpage to ensure residents have easy access to the correct submission process. We have also provided resources to elected officials to share the same information in their communication materials.

Thank you for your advocacy on behalf of the community, and we appreciate your cooperation in using the complaint system as intended to ensure it serves the community effectively.

Subject: Re: Inoperable Noise Complaint System and Continued Disregard for Community Needs

CAUTION: External Sender. Do not click on any links or open any attachments unless you trust the sender and know the content is safe.

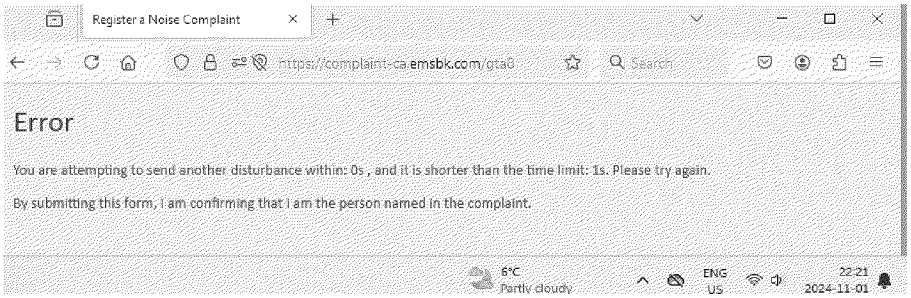
I am writing to express my concerns regarding the recurring technical issues with the online complaint system for Pearson Airport. These issues are impacting the community's ability to submit complaints about airport noise and disruptions effectively.

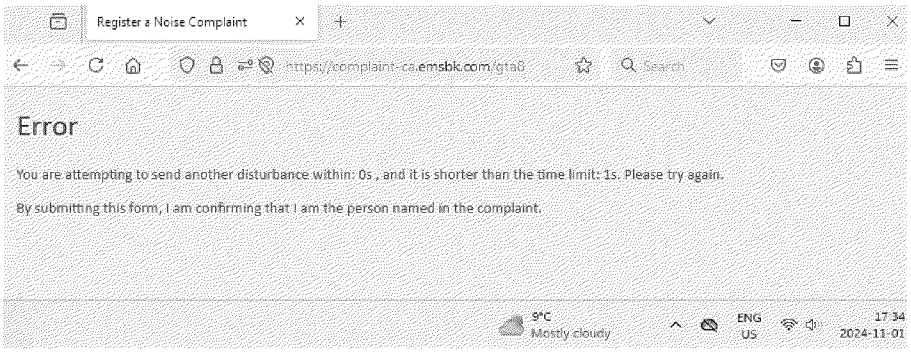
As recently as [mention date/time if possible], I was able to successfully submit a few complaints through the system. However, shortly afterward, I began encountering the same error messages that have plagued the platform in the past, preventing further submissions. This pattern of intermittent functionality suggests that recent changes or maintenance to the platform have reintroduced barriers rather than resolving them.

These technical challenges not only frustrate users but also effectively silence residents' concerns, depriving them of a channel to register legitimate grievances. I respectfully urge the [relevant organization, e.g., Greater Toronto Airports Authority or Nav Canada] to prioritize a thorough fix for this issue to ensure consistent and reliable access to the complaint system.

I would appreciate it if you could confirm when these issues will be fully resolved and if alternative methods for submitting complaints are available in the meantime.

Thank you for your attention to this matter.





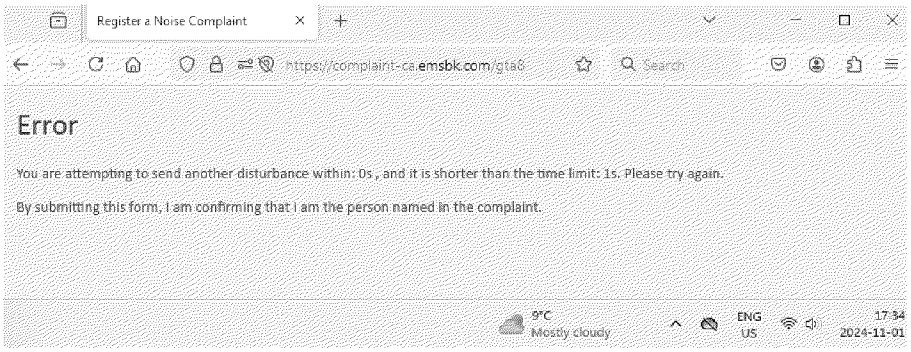
Sincerely,
Fabio Ovettini

On Friday, November 1, 2024 at 05:35:33 p.m. EDT, Fabio Ovettini <fabio217@yahoo.com> wrote:

GTAA genii,

I am reaching out to express my frustration with the online complaint submission system, which seems to have significant flaws. After successfully submitting a complaint, I was able to send another just ten minutes later. However, when I tried to submit an additional complaint ten minutes after that, I encountered the following error message: "You are attempting to send another disturbance within: 0s, and it is shorter than the time limit: 60s. Please try again."

Since that attempt, this error message has repeatedly appeared every time I try to submit a complaint. This is not only inconvenient but also undermines the purpose of the complaint system, which is supposed to allow timely reporting of disturbances.



Sincerely,

Fabio Ovettini

GTAA,

I am writing on behalf of our community to express the profound frustration caused by your recent changes to the noise complaint system. Despite past feedback pointing out the lack of empathy and common

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

sense in your approach, the recent "downgrade" to the complaint system reflects an unprecedented level of mismanagement and incompetence.

For the past few days, the phone system for noise complaints has been non-functional, with a message on your website suggesting the use of the online form. However, it seems you haven't considered that those who rely on the phone may not have access to the internet. What about community members without computers? This oversight further underscores the disconnect between your management and the people affected by your operations.

In response, our community has been gathering to compile data and send noise complaints. Yet, since the complaint system "downgrade", we have encountered persistent issues. Despite adjusting certain aspects after our feedback, the system remains unusable. For example, after successfully submitting one complaint, we were able to send another 10 minutes later. Ten minutes after that, however, when we attempted to submit an additional complaint, we received the following error message: "You are attempting to send another disturbance within: 0s, and it is shorter than the time limit: 60s. Please try again." Since that attempt, this error message has consistently appeared each time we try to submit a complaint.

It is now the end of the month, and we have only managed to submit a handful of complaints due to these restrictions. As a result, we are attaching a list of complaints we would like recorded for this month. Each of the 27 attached PDF files represents one day, documenting the disturbances we have experienced. Until your complaint system is fully operational, we will continue submitting complaints this way.

In total, there are 5,581 noise events logged by each of the 116 community members, amounting to 647,396 records.

In a separate, secure email, I will send you a password-protected file containing personal information for each community member involved. The password for this file will follow in a subsequent email.

Your immediate attention to this matter is essential.

Sincerely,

Fabio Ovettini

Subject: RSVP – September 4 Meeting on Airplane Noise

[redacted]

Thank you for the invitation. I confirm that I will attend the September 4 meeting at St. Jude's Catholic Church.

That said, I must express a concern: issuing an invitation without disclosing the full list of attendees creates a lack of transparency and makes the process feel unnecessarily adversarial—almost like a trial by combat rather than an open and collaborative discussion. For residents to prepare meaningfully, it is only reasonable to know in advance who will be at the table.

I look forward to receiving the full attendee list before the meeting so that the discussion can be constructive and balanced.

Sincerely,
Fabio Ovettini

Good morning,

On behalf of [redacted] I am reaching out to invite you to a meeting hosted by the GTAA and NAV CANADA with certain residents to discuss ongoing concerns about airplane noise in Humber-River Black Creek.

This meeting is on the request of MP Sgro and her staff, who will also be participating in the meeting.

Date: Thursday, Sept 4

Time: 6:30 PM

Location: St. Jude's Catholic Church

3265 Weston Rd, North York, ON
M9M 2T9

Please note that this meeting is invitation only. We ask that you please RSVP by Sept 3. Other residents are with noise-related concerns are encouraged to attend our upcoming Noise Forum on November 6. More details on our website: https://www.torontopearson.com/en/community/noise-management

Morning,

When it comes to economic matters, our message is simple: the health and well-being of our community are non-negotiable.

Best,
Fabio

On Tuesday, April 8, 2025 at 11:39:14 a.m. EDT, [redacted] wrote:

Hello Fabio,

It is unfortunate that we need to spend so much time and energy here convincing elected officials to help us out here.

We were told by Liberal MP Judy Sgro that she lived here many years ago and learned to live with the airplane noise, and that she expected us to do the same now. What she failed to understand is that planes are alot more busier here today than when she lived here. How can a person who lives in Thornhill be the MP for Humber River - Black Creek? She is never here; she is either in Ottawa or Thornhill.

In June 2010 it was revealed that Judy Sgro had been claiming expenses for rent on an Ottawa luxury highrise condominium owned by her adult children, violating rules for such expenses set by the Board of Internal Economy of the House of Commons.

I called Liberal MP Judy Sgro's office this morning to ask why she has not replied to me in many months regarding anything. The person I spoke with had no answer for me. It is terrible. MP Judy Sgro has no connection to Humber River - Black Creek anymore, only what she is told.

After former Federal Liberal Minister of Transport Pablo Rodrigues told us to get lost and seek help from other levels of government regarding airplane noise, we did. MP Tom Rakocevic is trying to help by asking NAV Canada questions but it has taken along ttime now. Councillor Anothony Perruzza, who also sits on the noise committee, knows about the plane noise - he made a great plane noise to mimic what we hear at the noise meeting the other day - but he does not believe he will be able to get help for us if he presents the motion you have created for him.

Matias de Dovitiis, who is running against Liberal MP Judy Sgro for Humber River - Black Creek for the Federal NDP party has worked to get the TDSB to study how airplane noise may affect children's learning abilities. He did something for us here to help us out and it is appreciated.

The GTAA, Pearson Airport, and NAV Canada have all told me that they understand airplane noise is an issue of concern, but they do nothing about it. It comes down to money, and the business owners of the GTAA want to make Pearson Airport busier because it helps them make more of it. Who cares about you, me, or what they consider a small minority of people affected by airplane noise? GTAA is it in it for themselves and they control the Federal Government.

I know I deserve better than the treatment I have received from my elected politicians, the GTAA, Pearson Airport, and NAV Canada here - no respect. I only get to live one life and it is unfair that I have to fight here. Do I look forward to attending another meeting to discuss airplane noise and hearing GTAA's Robyn Connelly tell me proudly that the planes are only going to get busier, that there is nothing I can do about it, and that that is just the way it is? God please help me!

Thank you for continuing to fight and not giving up!

Take care,

[redacted]

[redacted]

Attached you will find the proposed motion titled **"Motion to Address Health Impacts of Airplane Noise on Toronto Residents"**, along with **Appendices 1 through 6**, which provide supporting data and documentation for your review.

The motion outlines the urgent health and environmental concerns associated with sustained aircraft noise and pollution in our city. It includes proposed actions for the City of Toronto to take in collaboration with provincial and federal stakeholders, and calls for accountability from those responsible.

If you find the motion reasonable, I hope you will consider presenting it at the next Board of Health meeting.

If you ultimately decide not to bring the motion forward, we would appreciate knowing as early as possible before the meeting so we can explore alternative avenues for advancing this issue.

Thank you for your time and your commitment to the health and well-being of our community.

Sincerely,
Fabio Ovettini

On Thursday, April 3, 2025 at 03:24:58 p.m. EDT, [redacted] wrote:

Hello [redacted]

Thank you for taking the time to speak with Fabio and me today about the airplane noise issue.

It is incredibly frustrating that every level of government has essentially told us there is nothing they can do to address the issue. MP Judy Sgro is well aware that the Federal Liberal Ministry of Transportation and the Ministry of Health have done nothing to assist us. Robyn Connelly of the GTAA in a strong proud voice told me that the airport traffic is going to get busier, that there was nothing I can be do about it, and that is the way it was going to be. The GTAA operates Pearson Airport as they see fit, and the different levels of government seem indifferent to the thousands of average-income families affected by the noise, siding with economic growth over our quality of life.

You mentioned that if Fabio and I put in the hard work and more of our time to draft a motion, you would review it and, if you believe it has any merit, you would present it. You do not believe the motion will fly right now. Well you at least gave us an option that we did not have before our conversation today, and we appreciate this from you.

I strongly believe that the GTAA and Pearson Airport should take more responsibility and manage air traffic in a way that makes life more livable for residents affected by the airplane noise. The situation worsens each year and many people speak up about it but we are continuously told that nothing can be done. MP Judy Sgro and her office initially told us they had no power to help us out, yet we were able to twist Judy's arm to do more for us. Life is nit great with the airplane noise in my and outside of my house.

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

I wish I owned a Lake Shore mansion in Toronto and could call Michael Finklstein from the Toronto Health Committee when I had issues with airplane noise from the planes using Billy Bishop Airport and he could do something for me because it would be under his jurisdiction. Pearson Airport is under the jurisdiction of Peel Region and we need to call them not Michael Finklstein. Pierre Poilievre said if he is elected Prime Minister of Canada the Big Jets would be allowed to use Billy Bishop airport and there would be less traffic on the highways in Toronto because of this decision - less planes at Pearson Airport.

Thanks again for listening to us today!

Take care,

Board of Health, meeting 23, April 1, 2025Agenda and background materials:https://secure.toronto.ca/council/#/committees/2564/25805

www.youtube.com

Hello [redacted]

I sent you an email yesterday after the Minister of Health meeting, asking if you could plan a meeting to discuss airplane noise. I received a quick email reply from your office stating no and indicating that it is a federal matter. I called your office after receiving the email but was unable to speak to anyone, so I left a message requesting a callback. An hour later, I called again and managed to speak with someone. I asked if I could talk to [redacted] who sent the email, but I was told she was at City Hall and unavailable. I requested that someone please call me back to discuss the matter, but I did not receive a reply from you or your office today.

I have dealt with Liberal MP Judy Sgro for Humber River - Black Creek regarding airplane noise for the past few years, with little success in reducing the airplane traffic in my community. From our first meeting, MP Judy Sgro informed us that she lived in the city many years ago and learned to live with the plane noise, expecting us to do the same. She never suggested actions we could take at that meeting, such as creating a petition for her to present in the House of Commons. Given her long tenure as an MP, she should have been aware that we could have initiated a petition at that time. A couple of years later, a petition was created to save the Marian Shrine of

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

Gratitude, we asked MP Judy Sgro if those affected by airplane noise in Humber River - Black Creek could create a petition for the airplane noise. It wasn't easy for our community to organize this petition due to misunderstandings between her office and us, which caused months of delay. I am not sure how this petition is progressing now because no one updates us on it.

I informed MP Judy Sgro that many residents were unaware of how to file a noise complaint with Pearson Airport, but her level of concern was low. She ignored my requests to help distribute instructions to the community for many months. I asked Robyn Connelly of the GTAA and Pearson Airport if they could mail letters with instructions on instructions on how to file noise complaints, but each time, she declined. MP Judy Sgro was aware of these discussions. Fabio Ovettini and I took it upon ourselves to make people aware of how to file complaints in the community , leading to an increase noise complaints filed with Pearson Airport. After complaints rose significantly, MP Judy Sgro finally decided to inform the community about how to file noise complaints, and now she seems to take credit for the increase in the complaint numbers. Federal Liberal MP Judy Sgro has not spoken to me in months now regarding the airplane noise, and it is disappointing to have her as my MP for Humber River - Black Creek. A staff member of hers once advised me that I should be nicer to MP Judy Sgro if I want her to do anything for me. Yes, I will bow down and kiss her feet. I no longer wish to deal with Liberal MP Judy Sgro, as it is clear that neither she nor her office views airplane noise as a problem.

Previous Federal Liberal Ministers of Transport, including Omar Alghabra, Pablo Rodriguez, and most recently Anita Anand, have completely dismissed the airplane noise issue. Omar Alghabra ignored a letter from MP Judy Sgro regarding airplane noise in her riding, and she did not demand a response from him. Pablo Rodriguez had someone from his office inform us that he was busy with other matters and suggested we seek help from other levels of government. I informed you and Tom of this in a conversation we had. Most recently, Anita Anand claimed that the federal government had nothing to do with air traffic and that we needed to deal with the GTAA and Toronto Pearson Airport directly. Fabio explained to her that the federal government is responsible, but she did not respond to him. Chrystia Freeland is now the new Federal Liberal Minister of Transport, and while she has received several emails regarding this issue, she has not replied to any of us I do not believe.

The meeting at City Hall yesterday highlighted the frustrations of many residents in Toronto regarding various types of noise. Fabio Ovettini spoke up about airplane noise, which likely would not have been discussed otherwise. I was unaware of this meeting until the day before, and it would have been helpful if you had informed us, given your position on the Health Committee and your knowledge of what we are living with here. I do apologize if you did send me information about this meeting. Do you remember the day you visited St. Simons School and expressed alarm upon hearing the noise from large jets overhead? In yesterday's meeting, you acknowledged the plane noise as a problem but stated there was nothing you could do about it "zilch." Many times, planes fly every 45 seconds, making it difficult to have conversations with neighbours in the summer, invite friends over to sit outside, or sleep at night. Your level of concern about airplane noise seems low, and it appears you believe it is not an issue for you to address because you have no authority over it. We have seen your office take some action here, and I am sure you can do more if we twist your arm, but it seems you choose not to. Just look at the children at St. Simons who cannot talk to one another during recess due to the noise from the planes. They can not open the windows in class because of the noise from the planes...thank God for air conditioning.

Ida Li Preti asked Michael Finkelstein, a board of health member, what residents affected by airplane noise should do, and he stated it was a federal issue, then suggested we contact Peel Region, saying it was out of his jurisdiction, but the plane noise is here. It seems to me that no one wants to deal with this issue because the GTAA is powerful, and no one wants to upset this organization because they have lots of money.

As a city councillor, why don't you work on fixing the city bylaws to address noise problems? To identified the problem of City bylaws yesterday. I am sure you can arrange a meeting to discuss the airplane noise and have Judy and Tom there as well. You understand that some nights, residents in your riding cannot sleep, yet you seem okay with it because you have convinced yourself that there is nothing you can do to help us out. I have a medical condition that you are aware of that makes my life difficult for me if I do not get a proper night sleep, as there is a very real possibility of having an epileptic seizure if I don't. I know this to be true now. The noise from planes affects my sleep on many nights. My life changed significantly after I had my first seizure at work at 32 years old. I went to school and had a good job and was well paid and had been promoted a couple of times where I was a supervisor, but my employer considered me a health risk after my seizures and ultimately found a way to terminate me. I lose my drivers license for six months after each seizure I have. Try not driving your car for six months and see if your life becomes more difficult. It is crucial now for me to sleep at night and I am more aware of this now that I am older, and the noise from the planes is no joke - how you made sound effects of a plane; planes at night make it difficult for me and others to sleep properly and it is no joke!

The federal government has given the GTAA and Pearson Airport the authority to operate as they please. Deborah Flint, the GTAA's CEO, was hired with the agenda to increase air traffic to Pearson Airport. The GTAA and Pearson Airport seem unconcerned about those who struggle to sleep at night or enjoy their lives in their own homes. Our highways are continually congested now because of the increase air traffic. Pierre Poilievre spoke up about it and said it was a concern that we should take seriously. Maybe Michael Finkelstein can speak about the pollution created from continual congested highways because it falls under his jurisdiction and not Peel Region.

I have lived in my house my entire life, and the airplane noise has never been this bad in recent years. I truly believe that the GTAA and Pearson Airport need to take more responsibility for addressing the airplane noise issue. Robyn Connelly of the GTAA told me that the planes will get busier and that there is nothing I or others can do about it—that is just the way it is going to be.

I understand the frustration of the man from yesterday's meeting who spoke about his noise issue. He said he has been doing everything possible, yet no one is doing anything to fix the problem. There are delays and more delays. It is terrible!

Listening to you speak yesterday and not receiving a callback today reminded me a lot of how Mammoliti handled the Fiera Foods noise issue in our neighbourhood. I really do not understand why we have different levels of government if none of them take any responsibility to help out.

Sincerely,

[redacted]

Subject: RE: Airplane Noise

Hi [redacted]

As this issue is regulated Federally our office is unable to host a meeting to discuss this in depth at this time. Given the Federal nature of this issue, if we were to call a meeting our Municipal staff do not have the jurisdiction to speak to the matter.

[redacted] will continue to advocate for effected Ward 7 residents such as yourself when given the opportunities on the Municipal level as he sympathizes strongly with you all and is hopeful that the Federal government will properly address this issue.

We will continue to work with you all through this. My colleague [redacted] has adopted the file from [redacted] and is keen on pursuing a resolution.

Best Regards,

Hello [redacted]

Would it be possible to arrange a meeting with residents of Humber River - Black Creek who are affected by airplane noise to discuss this issue of concern?

It was a good meeting today and thank you for speaking up about the noise that this neighbourhood receives.

Take care,

[redacted]

Subject: Re: Sept 4 St. Jude's follow-ups – "mandate to fulfill demand" and lease interpretation

[redacted]

Thank you for sending the follow-ups from the September 4 meeting and for pointing to page 137 of the Ground Lease.

I want to be very clear about the specific issue I raised at St. Jude's: you repeatedly told residents that the GTAA has a *"mandate to fulfill demand"*. I asked you who gave GTAA that mandate and where, exactly, it appears in the Ground Lease.

What you have now provided does **not** support that claim.

1. What the lease actually says

You referenced 8.02.03(a):

> "provide all capital improvements to the Airport in order to ensure that the Airport has the ability and the facilities required to accommodate the capacity demands at the Airport;"

But 8.02.03(a) is *expressly subordinate* to 8.02.01. The core obligation is:

> "manage, operate, and maintain the Airport … in a condition and at a level of service to **meet the capacity demands at the Airport from time to time and the capacity demands for airport services from users within seventy-five [75] kilometres from any point on the perimeter of the Lands to the extent practicable under Her Majesty's policies, procedures and practices**…"

A few key points:

- The lease talks about **meeting capacity demands** of *users within 75 km*, not a blank-cheque mandate to chase and "fulfill" any demand airlines or global markets generate.
- Even within that 75 km catchment, the obligation is **qualified**: "to the extent practicable under Her Majesty's policies, procedures and practices."
- 8.02.03(a) is about **capital improvements and facilities**, not about maximising aircraft movements at any cost or turning Pearson into an unlimited global hub regardless of impacts on surrounding communities.

In other words, the lease tells GTAA to keep the airport functioning as a "First Class Facility and a Major International Airport" for a defined catchment area, and to invest in infrastructure and staffing accordingly. It does *not* say "your mandate is to fulfill whatever demand airlines choose to create," and it certainly does not strip Transport Canada or elected governments of the authority to constrain traffic for safety, health, environmental, or planning reasons.

Crucially, the phrase **"fulfill demand" does not appear anywhere** in the clause you cited.

2. Democratic and policy oversight

At the meeting, I asked a very simple question that remains unanswered:

- Who, specifically, decided that 8.02.01 and 8.02.03(a) amount to a "mandate to fulfill demand"?
- Has Transport Canada ever issued written guidance that interprets the Ground Lease this way and says GTAA's job is to maximize throughput rather than manage capacity within the broader public-interest framework of health, safety, environment, and land-use planning?
- Where is the democratic process behind this "mandate"? Parliament and the public never voted to make surrounding communities disposable so Pearson can indefinitely expand traffic.

The lease language you provided explicitly ties GTAA's obligations to "Her Majesty's policies, procedures and practices." That means public-policy decisions and regulations set the frame; GTAA does **not** get to treat "demand" as self-justifying and beyond democratic control.

3. 75 km catchment vs. global hub rhetoric

You also continue to describe Pearson as if its primary obligation is to serve a global connecting hub. The clause you cited is much narrower:

- It references demand for airport services **from users within 75 km of the perimeter of the lands**.
- There is no mention of a mandate to scale traffic for national or global hub ambitions at the expense of people living under the flight paths.

If GTAA is going to continue telling communities that "we have a mandate to fulfill demand," you need to be transparent about the legal basis. At the moment, the lease text you provided shows something very different: a duty to run a functioning airport, with infrastructure and staffing sufficient for a defined regional catchment, within the limits of federal policies and other legal obligations – *not* a license to maximize flights and externalize the health and environmental costs.

4. Request

Given the above, I am asking for the following:

1. **A clear correction**:
   Either identify the exact lease, statutory, or regulatory text that uses the language "mandate to fulfill demand" or its legal equivalent, or stop using

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

that phrase in public communications with residents and elected officials.

2. **Written interpretation from Transport Canada**:
   Please provide any written guidance from Transport Canada that supports your interpretation of 8.02 as a requirement to meet *all* demand rather than to manage capacity in a way consistent with federal policy and community health.

3. **Acknowledgement of limits**:
   Confirm in writing that GTAA's obligations under the Ground Lease are constrained by:
   - the 75 km user-catchment language in 8.02.01; and
   - the "to the extent practicable under Her Majesty's policies, procedures and practices" qualifier.

Until those points are addressed, continuing to tell residents that GTAA has a "mandate to fulfill demand" looks less like neutral lease interpretation and more like a political choice to justify the current level of harm.

I would appreciate a substantive written response, not just links to generic webpages.

Sincerely,
Fabio Ovettini
On behalf of affected residents and community members surrounding Toronto Pearson Airport

Hello Fabio,

Thank you for your continued engagement and advocacy on behalf of your community and your patience with our response. It was more challenging than anticipated to pull the transcript together based on the overlapping speaking points from the different attendees speaking at the same time, resulting in a longer response time than we would have liked.

Attached you will find a copy of the transcript from the recent meeting, along with answers and supporting links to the different questions that were posed to the GTAA.

Contact details are as follows for GTAA staff that attended our recent meeting:

Steven Thomas – Director, Government Relations (steven.thomas@gtaa.com)

Andrew Larsen – Assoc. Director Airport and Aviation Policy was also in attendance, but has since moved on to another opportunity.

Gijs Van Laethem – Senior Noise Officer (community.relations@gtaa.com)

As always, if you'd like to discuss anything in further detail, please reach out to our noise management office through our website, via phone at [redacted] or via email at [redacted]

[redacted] Could I ask you to please help distribute the attached and above to the other members of the community that were present at the last meeting as I do not have access to all of their respective contact information.

Thank you, and have a great day.

Regards,

[redacted]

CAUTION: External Sender. Do not click on any links or open any attachments unless you trust the sender and know the content is safe.

Dear [redacted]

Thank you for your response.

While I appreciate your note, it is not reasonable to expect individual residents to chase multiple federal agencies and the GTAA for basic information. Transport Canada is the landlord under the Pearson Ground Lease, and Parliament – through our elected representatives – holds oversight responsibility.

To avoid further confusion, I would ask the following be actioned:

1. **Lease obligations:** [redacted] please provide the exact clause and page in the Ground Lease where it states GTAA has a mandate to "meet demand."
2. **Night operations data:** Chase, please provide the GTAA website link where historical yearly operations for night-time traffic are published.
3. **Contact information:** Correct contact details for all agencies and participants present at the September 4 meeting.
4. **Minutes and responses:** The official minutes of the meeting and written responses to the questions raised.
5. **Transport Canada oversight:** Clarification from Transport Canada on their role in enforcing compliance with the Ground Lease and the Noise Management Program.

It is the role of an MP's office to press for accountability and obtain these answers from federal bodies on behalf of constituents. Redirecting us back to GTAA or NAV CANADA only leaves residents without representation or recourse.

I would ask your office to follow up directly with Transport Canada and GTAA on these items and confirm a timeline for when we will receive a response.

Thank you for your attention to this matter.

Sincerely,
Fabio Ovettini

Good afternoon Fabio,

I hope this email finds you well, and thank you for following up.

Apologies for the delay in responding, our office handles an extremely high volume of emails and calls daily, and we're not always able to reply as quickly as we'd like.

Regarding the mix-up with the names on the list, [redacted] perhaps you could kindly provide the correct information for Chase, who attended the meeting?

As for NAV Canada, the details I shared were based on the information provided to us. If you're seeking something more specific, I would recommend reaching out to them directly for clarification.

I've yet to receive a response from Transport Canada regarding contact information. [redacted] would you be able to assist Fabio in obtaining that?

Lastly, any answers to questions raised during the meeting, as well as the official minutes, will need to come directly from GTAA.

I hope this helps clarify things. Thanks again for your follow-up, and wishing you a great day!

Regards,

Subject: Re: List of Attendees - September 4th, 2025 Airplane Noise Meeting

Subject: Accountability Required – September 4 Noise Meeting Follow-Up

Good afternoon [redacted]

Thank you for sending the attendee list. Unfortunately, it is incomplete. While the names are included, the organizational email addresses that participants provided are missing. For example:

- NAV Canada – Jonathan Bagg (service@navcanada.ca
- NAV Canada – Ian Giesbrecht (service@navcanada.ca
- Transport Canada Toronto Region – Duwayne Williams
- Transport Canada Toronto Region – Ovais

In addition, an individual who introduced himself as *Chase* at the meeting does not appear on the list. Everyone in the room agreed to share their contact information, and leaving these details out undermines that agreement.

More importantly, we are still waiting for:

- **The promised responses** to the questions raised during the meeting.
- **The official minutes of the meeting**, so there is a transparent and reliable record.

The community has shown good faith by attending, engaging, and even offering supporting documentation. In contrast, delays, omissions, and incomplete records reflect poorly on the process and risk reinforcing the perception of bad faith from the institutions involved.

As the organizer, are you prepared to exercise the powers and responsibilities of your position to obtain the missing materials, and get back to us with either the requested information or a firm date when it will be delivered?

Finally, I personally committed during the meeting to provide certain documents for review to one of the Transport Canada representatives. Without a complete and accurate contact list, I cannot fulfill that commitment.

The time for partial answers has long passed. We expect full transparency and follow-through.

Sincerely,

Fabio Ovettini

[redacted] efforts since at least 2009, your efforts for at least the last five years, my humble push, and the efforts of well over 100 community members have helped to highlight the damaging effects of airplane noise on life, and our work is paying off.

We have been able to uncover GTAA's corruption. Not only have we exposed it, but we also have all the documentation required to prove it—and we have proven it.

Now, all of our representatives have been made aware, and at least one is taking the necessary steps to move forward.

It is comforting and rewarding to see our efforts yielding significant results.

I feel grateful to live in a community of the most resilient and persistent individuals—people who have the courage to say no: keep your boots off my backyard. Thank you.

I would also like to thank [redacted] for giving this initiative legs to run.

Sincerely,
Fabio Ovettini

Subject: Motion on noise pollution and potential effect on schools

Hi [redacted]
Please see the motion attached.
March 26th is when the motion will be "moved". That means that it will be part of the agenda. You are able to speak at this meeting.
The meetings start at 430 PM and that is when deputants normally speak. I can send you more details closer to the date. In any case, would be great if you wanted to participate. It would give the request for a report more strength to have some community support.
Cheers,
[redacted]

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

Written Notice of Motion

Request for report from staff on potential health hazards related to airport activity from Toronto Pearson Airport on surrounding schools

Whereas, there is a growing body of research on the effects of environmental noise or noise pollution on human health.

Whereas, there is a substantial amount of research on the negative effects of noise impacts on learning and cognitive ability.

Whereas, there is a potential for environmental noise from Toronto Pearson Airport flights to be impacting students health and learning in the north west of the City, in areas that fall above the airport's 30 Noise Exposure Forecast (NEF) as identified by Transport Canada (see map for details).

Whereas, remediation to account for some of these potential health effects and learning impacts may be a possibility. E.g. through building retrofits by having better insulated windows.

Therefore, be it resolved:

That the Director report back on the most relevant potential health and learning impacts that noise may be having on our children based on existing research.

That staff identify all the schools that may be within the 30, 35 and 40 NEF boundary respectively.

That staff investigate and report back on the most relevant best practices for potential remediation of buildings from other jurisdictions, as well as any resources that may be made available for this.

That staff report back on the best practices for ameliorating any potential health risks connected to airplane noise on a move forward basis.

[redacted]

It took weeks for your team to notice the glaring errors in the monthly noise complaint reports for February and March. But rather than issue a note of correction, a statement, or any public acknowledgement, the reports were quietly replaced. Silently. In the middle of the night.

The assumption seems to be that no one would notice. That if the documents are swapped discreetly enough, the problem vanishes. That the public isn't watching closely. That transparency can be retrofitted silently, without accountability.

Wrong. I noticed.

Once again, revised public documents have been issued **with no change-log, no explanation, no footnote, and no record of error.** This is not a minor procedural lapse. This is a pattern. This is how trust erodes: not with major scandal, but through repeated, quiet evasions of responsibility.

If this is your definition of accountability—editing public data without a trace—then it is time to revisit the word entirely. Public trust does not survive on quiet edits and late-night file swaps. It survives on truth, clarity, and the willingness to admit mistakes in daylight.

Sincerely,
Fabio Ovettini

Subject: New Issue. Pointing Without Pointing
[redacted]

It seems there may be a **new** issue affecting the system or how it's being managed. I won't point to specifics this time—I trust someone on your end will be able to spot it.

No need for me to point it out, of course. I imagine the supersonic error detection system already flagged it internally the moment it occurred.

Sincerely,
Fabio Ovettini

Subject: Today, One of Us Was Put on Hold. Still No Help. Still No Justice.

Prime Minister Carney / Minister Freeland / Minister Michel / MP Sgro,

Today, [redacted] a resident of our community, called the office of our Member of Parliament, **Judy Sgro**, seeking help — again.

He was put on hold for **over an hour**.

An hour. For what? For silence. For delay. For the same bureaucratic nothingness we've been met with for years — while our homes shake, our sleep is shattered, and our health continues to decline under the roar of unchecked air traffic.

This is not just about noise.
This is about **abandonment by those elected to protect us**. It is about a system that lets federal representatives dodge responsibility while people suffer in their own homes.

Ms. Sgro is not the first. Former Ministers of Health and Transport also turned away from us. And the current ones continue the pattern.

We are not asking for special treatment. We are asking for **basic human rights**: sleep, health, honesty, and accountability.

But let this also serve as a **reminder** — not a threat, but a historical fact:
Those who ignore the people they serve are rarely remembered kindly.
And sometimes, history turns on them in ways they never imagined.

For reflection — not provocation — we share this:
https://247wallst.com/special-report/2023/02/02/26-rulers-who-were-killed-by-their-own-people/

We do not condone violence.
But we will **never condone silence** in the face of suffering either.
We are not going away. And history, too, is watching.

Respectfully,
Fabio Ovettini

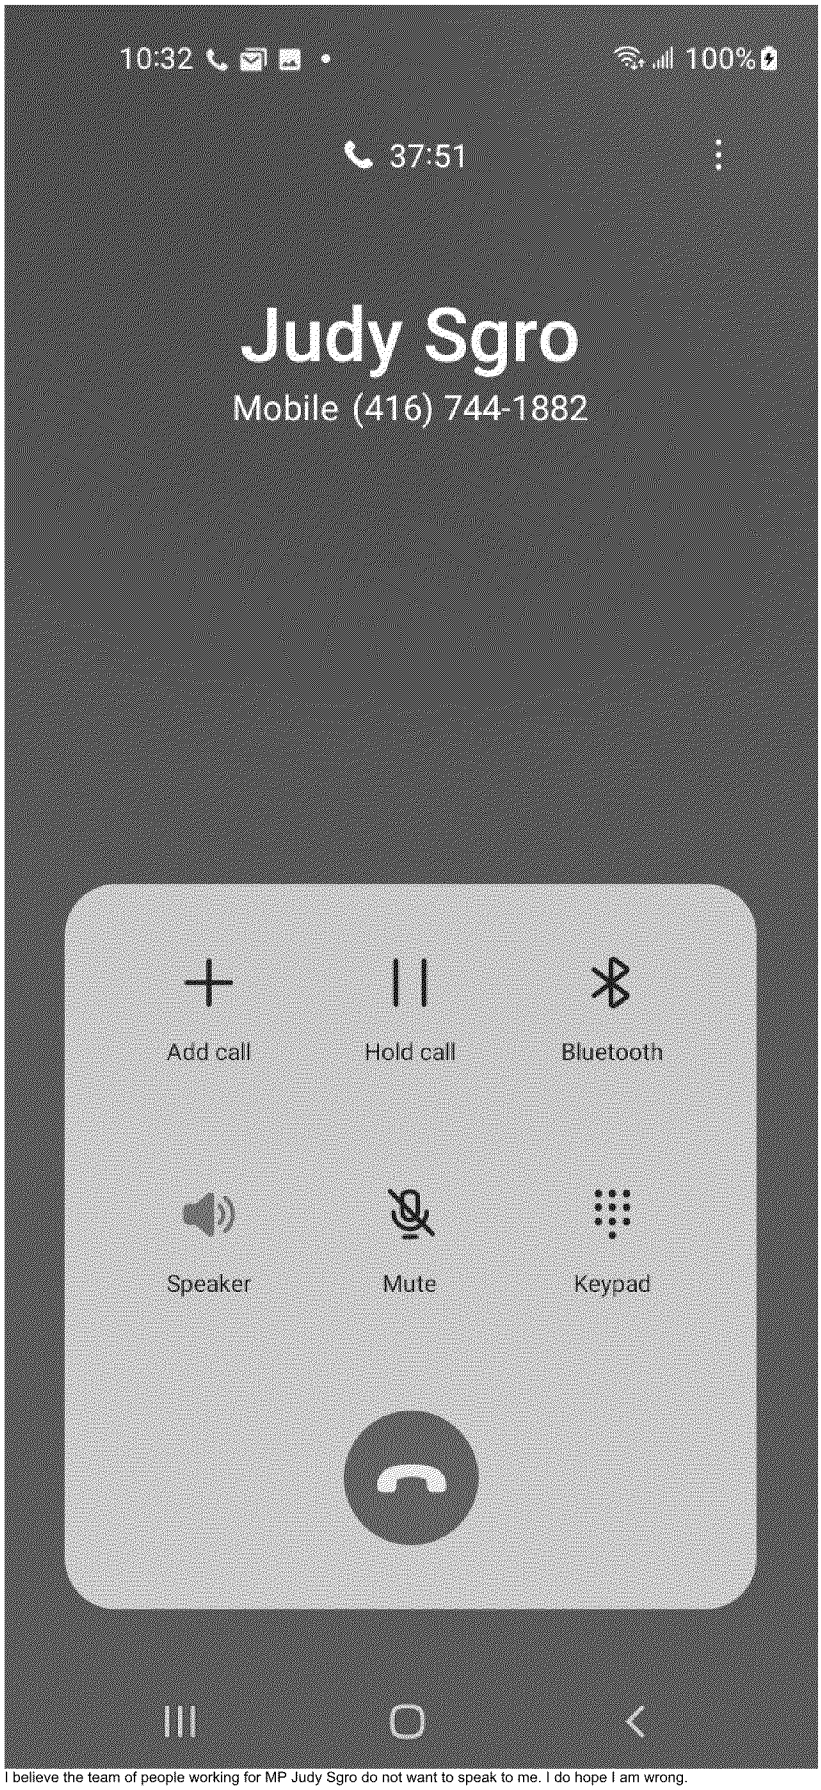
Subject: On Hold Waiting To Speak To Someone At MP Judy Sgro's Office - Over 50 Minutes Waisted.

Hello Prime Minister Mark Carney,

I phoned my MP Judy Sgro's office this morning to ask again for a meeting to discuss GTAA mismanagement of Pearson Airport. A person from her office answered the phone and asked me to hold. I have been patiently waiting for over 50 minutes to speak to someone now.

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada



I believe the team of people working for MP Judy Sgro do not want to speak to me. I do hope I am wrong.

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

I wil end the call after holding for more than 50 minutes because I do not want to waist anymore of my time.

Please do something to address this situation with your Liveral MP Judy Sgro. Thank you!

Sincerely,

[redacted]

Subject: Meeting Request with MP Judy Sgro

Dear Prime Minister Mark Carney,

I am writing to request your assistance in arranging a meeting with MP Judy Sgro, Member of Parliament for Humber River–Black Creek, to discuss the GTAA's mismanagement of Pearson Airport. Many residents in her riding have been affected by excessive airplane noise for many years now and both the GTAA and your government are aware of impact on our health.

Yesterday, I phoned MP Sgro's office and spoke with one of her staff member. I inquired whether MP Sgro and her team were aware of recent emails from Fabio Ovettini, which have raised significant concerns of GTAA management of Pearson Airport. I was told that both MP Sgro and the office manager were indeed aware of the emails. I also asked if MP Sgro was currently in Toronto, and the staff member confirmed that she was.

I then asked if it would be possible to arrange a meeting between MP Sgro and a group of us who are concerned about GTAA recent mismanagement of Pearson Airport. I was informed by this staff member that I needed to send a formal request via email, which I did yesterday. However, I did not receive a response to it. I followed up by phone today and was told by this staff member my email was received, but no further steps have been taken by her office to arrange this meeting.

At this point, I am unsure of what to do next. I have been trying for over seven months to speak with MP Judy Sgro. I have called her office many times, left messages, and sent emails, but I have not received any replies from her. I am frustrated and upset by her lack of response, and it has made me feel angry at her. On one occasion, a member of her staff advised me that I need to be "much nicer" to MP Judy Sgro—almost as if I needed to "kiss her feet"—if I wanted her to do anything for me. In December, Robyn Connelly from the GTAA promised me that she would coordinate a meeting with the Humber River–Black Creek community to once again address the airplane noise issue, but that never materialized. Since then, Robyn Connelly has been let go from the GTAA. Steven Thomas replaced Robyn Connelly and has made no effort to arrange a meeting.

I tried to reach out to your Federal Minister of Transport Chrystia Freeland and Minister of Health Marjorie Michel on this matter and have received no responses from them either.

I recall that you promised all Canadians that, under your leadership, your MPs and Ministers would behave differently than what they did under Justin Trudeau. You stated they would be more responsive and accountable. Unfortunately, based on my experience since the Liberal party was elected, I have not seen that promise fulfilled. Federal Conservative Leader Pierre Poilievre questioned the promise you made to Canadians and essentially called it a lie to get votes.

I am requesting that you assist me, in ensuring a meeting with MP Judy Sgro can be scheduled this week or for sometime next week. MP Judy Sgro needs to be more responsive and accountable to residents of Humber River - Black Creek.

Thank you for your attention to this matter. I hope to hear from MP Judy Sgro sometime tomorrow.

Subject: Re: Vanished May Noise Report — Continued Disrespect Toward Communities

Subject: Re: May 2025 Complaint Data Update

[redacted]

Thank you for your message of June 20 regarding the delay in publishing complaint numbers for May 2025.
As you are surely *"aware,"* two weeks from the date of your email marked a clear deadline of July 4. That date has now passed. None of the commitments you made—providing a status update, notifying me when the data was available, or actually publishing the data—have been fulfilled.
More importantly, as you are also *"aware,"* your complaint management system **crashed on May 4, 2025** and was down for several hours. And yet, to this day, **the public has not even received a basic acknowledgement that the system failed.** No notice. No apology. No explanation. It was simply brought back online as if nothing had happened.
This silence is unacceptable—especially considering that this same data is then presented to Transport Canada and Health Canada to secure ongoing operational approvals. **If the May numbers are missing, corrupted, or incomplete, it would amount to a serious misrepresentation of community impact.**
So I must now ask directly:

- **How many complaints were lost during the May 4 outage?**
- **Is the continued absence of May data due to the fact that you no longer know what the numbers actually are?**

This is no longer a question of software updates or electoral boundary realignments. This is a question of integrity and accountability.
I look forward to a direct response that addresses both the missing data and the failure to acknowledge the system crash.
Sincerely,
Fabio Ovettini

On Friday, June 20, 2025 at 03:11:12 p.m. EDT, [redacted] wrote:

Hi Fabio,
Thank you for your continued engagement on behalf of your community.
As of this moment, no complaint numbers have been published for May 2025. As you may be aware, the boundaries for the federal ridings changed with the last Federal Election. As you may also be aware, the software we use to monitor and report on complaints is tied to these Federal ridings. As such, the team is working together with our vendor to implement those changes and make sure that all profiles are allocated to their correctly updated riding.
We anticipate that this process will be completed, and that data will be populated properly within the next 2 weeks. We appreciate your patience on this matter, as we are addressing the change as quickly as possible.
If you have any further questions about this, please feel free to reach out and we'd be happy to explain further and I will ensure the team sends you an email to let you know when the updates are finalized and data populated.
Regards,

Subject: Vanished May Noise Report — Continued Disrespect Toward Communities
Dear [redacted],
Dear Minister Freeland,
The May 2025 Noise Report, which was posted for four to five days showing blank entries for both the number of complaints and the number of individuals, has now disappeared—just as abruptly as it was published. There has been no notice, no explanation, and no accountability.

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

Once again, communities are left completely in the dark. We do not know *why* the report was removed, *who* made that decision, or *whether* we should continue submitting complaints. The message is loud and clear: our concerns are being erased.

Minister Freeland, I must once again remind you that the clauses in the lease agreement with the GTAA are not being honoured. The federal government cannot continue to look the other way while the operator of Canada's busiest airport shows such blatant disregard for the rights and wellbeing of surrounding communities.

And what Ms. Flint is doing in response—avoiding explanations, erasing data without notice, and failing to engage with the public—is like putting salt on an open wound. It deepens the harm, adds insult to injury, and confirms the growing sense that your office sees us as a nuisance rather than as citizens who deserve protection.

The continued removal or manipulation of public data, the absence of clear communication, and the dismissive treatment of affected residents all point to a culture of contempt and institutional failure. These are not isolated incidents—they are part of a persistent pattern that demands oversight and corrective action.

We are witnessing *manotazos de ahogado*—last-ditch flailing disguised as governance. Communities deserve better. Canada deserves better.

Sincerely,

Fabio Ovettini

P.D. *"Manotazos de ahogado"* is a Spanish idiom that literally means "the flailing of a drowning person." It refers to desperate, chaotic, last-ditch efforts made when someone is already overwhelmed or failing—often ineffective and coming too late.

Subject: This Is Not Fixed. This Is Fraud.

[redacted]

Your reply is worse than insulting — it's an unintentional confession.
And not just that the report was wrong. Not just that you changed it behind the scenes.

No — it's an **unintentional confession that you are a criminal working for a criminal organization**.

And you don't even realize it.

You said:

> *"I apologize for the misunderstanding on my part. Thank you for bringing the issue with the callout boxes to our attention, we acted immediately and have had our vendor rectify the issue."*

As if this is a casual product bug.
As if rewriting a **public report** — quietly, without disclosure, without audit trail — is standard operating procedure.
It is not.

Let me make something absolutely clear for you, for Mr. Thomas, and for Ms. Flint:
What happened here is not "an issue." It is tampering.
And tampering with public records in Canada is **a crime.**

You didn't correct a typo. You didn't resolve a formatting glitch.
You **rewrote evidence**, **erased reality**, and tried to pass it off like nothing happened — until someone caught you.

Let's spell this out:

- A federal-level public report was published with false data.
- That data was later *silently altered* after a private citizen raised the alarm.
- No changelog. No public statement. No version history. Just a quiet revision.
- And now, rather than owning up to what this is — **manipulation** — you act like your team deserves credit for "fixing it."

You didn't fix anything.
You buried the truth. And then expected the public to thank you.

This is the standard now under Ms. Flint and Mr. Thomas?

Let's talk about them.

Deborah Flint — the absentee CEO, permanently adrift in a fog of self-promotion and strategic buzzwords. She hides behind her staff, takes no public responsibility, and appears to believe that "engagement" means filtering the truth until it's safe for corporate optics.

Steven Thomas — a distraction artist who treats public data like a magician's deck: shuffle here, disappear there, and hope the audience is too tired to notice. Installed to "rebuild trust," he's instead become the face of precisely why **trust is dead**.

And [redacted] — you had a chance to break from this culture of deceit. You could have spoken plainly, acknowledged what happened, and acted with integrity.

Instead, you've chosen to follow the same script: deny, deflect, edit, and pretend nothing ever happened.

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

So let me now ask what no one else will:

- Should **Mr. Thomas** report *you* for falsifying public documentation under his supervision?
- Should **Ms. Flint** escalate this to federal legal counsel as a case of potential criminal exposure?
- Should **the Minister of Transport** and **the Minister of Health** be informed that they've been fed manipulated reports?
- Should **MP Judy Sgro** explain to Parliament why her name is attached to this charade?
- Should **Prime Minister Carney** allow a federally regulated airport to rewrite history with no accountability?

Because what happened here is not just unethical.
It may very well be **illegal**.

Legal Implications of Public Report Tampering (Canada)

If GTAA staff knowingly altered public reporting data — and did so to mislead government, media, or the public — it may fall under **Criminal Code offences related to forgery and fraud**:

Offence Type	Possible Maximum Prison Sentence
Forgery (Criminal Code §366)	Up to **10 years**
Uttering a forged document	Up to **10 years**
Summary conviction (minor cases)	Lesser sentence/fine (e.g. 6 months)

Tampering with a public record — especially one used in health and transportation policy — carries **serious legal consequences.**

You didn't "fix" a report.
You falsified federal-level data, attempted to erase the record of doing so, and expected a round of applause for it.

Now everyone copied on this email knows it.

Sincerely,
Fabio Ovettini

Good afternoon Fabio,

I apologize for the misunderstanding on my part. Thank you for bringing the issue with the callout boxes to our attention, we acted immediately and have had our vendor rectify the issue.

The callout boxes were displaying incorrect values, but you'll see the table values remain the same.

Again, we acknowledge there was an issue which has been rectified, and thank you for bringing it to our attention.

Kind regards,

[redacted]

Subject: Re: Noise Complaint Report Manipulation – Under Flint and Thomas, Corruption Becomes Grotesque

CAUTION: External Sender. Do not click on any links or open any attachments unless you trust the sender and know the content is safe.

Subject: No Apology. No Accountability. Just Another Cover-Up.

[redacted]

Let's recap what just happened — not that you'll admit it.

You dismissed a legitimate, evidence-based concern as a "misunderstanding." You waved away factual discrepancies with condescension and corporate fluff about "Power BI interactivity," as if that magically erases the manipulation in front of our eyes.

Then — like clockwork — the report was changed. Quietly. Silently. No correction notice. No public acknowledgement. No admission that anything was ever wrong. Just a quiet midnight rewrite, like it was a bad blog post and not a document of public record.

You didn't correct the data. **You tampered with the evidence.**

And what's worse — **this is now the standard under Ms. Flint and Mr. Thomas.**

Let's talk about *them* for a moment.

Deborah Flint — the absentee CEO, permanently lost in a fog of self-promotion and empty catchphrases. A leader so disconnected from the consequences of her decisions, she might as well be running GTAA from a marketing firm in L.A. Her greatest talent? Hiding behind the failures of others and pretending they're innovations.

Steven Thomas — the illusionist who hasn't even finished his act. A gum-chewing, eye-rolling distraction artist who treats data like a deck of cards — shuffle here, vanish there — hoping no one notices the sleight of hand. He was installed to "rebuild trust." Instead, he's become the living embodiment of **why the public no longer trusts a word GTAA says.**

And [redacted] — you've chosen to stand beside them. You had an opportunity to show integrity, to admit a mistake, to speak truth. Instead, you chose to join the long list of institutional enablers — defenders of the lie.

So here's where we are now:

- Reports are being rewritten in real time to serve whatever narrative GTAA needs in the moment.
- The public is being treated like fools.
- Accountability is a word you people toss around like a brand slogan, while behind the scenes you're running a spin machine.

"You think you're saving the institution. But all you're doing is protecting a fraud."

That fraud wears three names: Flint. Thomas. And now — Gijs.

You have turned a public noise reporting system into a **propaganda tool**. You have disrespected every resident who loses sleep because of your failures. And you have insulted the intelligence of everyone who catches you in the act — by pretending it didn't happen.

But you know what? **It did happen.**

And I have the proof. Screenshots. Records. Archives. Statements like yours — written in arrogance and preserved for accountability.

I won't forget this. And I won't let others forget either.

This is going to follow you. Every report. Every meeting. Every decision you try to pass off as "transparent." This stunt — this tampering — will be there in the background, a reminder of how deep the rot goes.

You chose to bury the truth.

Now you get to wear it.

Sincerely,

Fabio Ovettini

"And if I were the man I was five years ago, I'd take a flamethrower to this place!"

Subject: Misrepresentation of Complaint Data Functionality – Apology Expected

[redacted]

Your response is yet another example of the confusion, deflection, and incompetence that have come to define GTAA's noise management team under Deborah Flint and Steven Thomas.

You state that the callout boxes in Power BI "change based on the data selected." Yes, Gijs — that's how it's *supposed* to work. But that's not what is happening. The reality, as demonstrated in the two attached screenshots, is that the data changes *without any user interaction*. We are not talking about filters being applied. We are talking about total complaint numbers being silently rewritten, without any notification, versioning, or audit trail.

Worse yet, you reference a total of **471 complaints**. Where, exactly, does this number come from? There is no riding, row, or summary on the screen showing **471 complaints**. Are you now pulling numbers out of thin air to defend a broken report?

This is not a "misunderstanding" on my part. It is a technical failure, a transparency failure, and frankly, a professional failure on yours. Your dismissive tone — brushing off legitimate, evidence-backed concerns as "confusion" — only adds insult to injury.

Your job is not to gaslight the public. Your job is to provide accurate, consistent, and accountable reporting. If you are not capable of doing that — or of understanding the very system you're supposed to be managing — then you are as unfit for your role as those who appointed you.

I expect a formal acknowledgment of the discrepancy shown in the attached screenshots, and an apology for the misleading and dismissive nature of your last message.

Sincerely,
Fabio Ovettini

Good morning Fabio,

The reports are made in Power BI, the callout boxes on the right hand side will change based on the data selected by you.

You can clearly see the totals in the table in each set of months in your screen shots remain the same:

April 2025:

Total number of individuals: 233

Total number of complaints: 75,473

March 2025:

Total number of individuals: 252

Total number of complaints: 56,145

February 2025:

Total number of individuals: 173

Total number of complaints: 33,780

I hope that clears up your misunderstanding.

Kind regards,

Subject: Noise Complaint Report Manipulation – Under Flint and Thomas, Corruption Becomes Grotesque

To whom it may concern,

The noise complaint reports have once again been altered — and not discreetly. Most now show thousands fewer complaints than previously recorded. Are we supposed to believe this is a routine update? A glitch? Or is this yet another deliberate manipulation to serve some obscure internal agenda?

Let's stop pretending: this is corruption.

Under the leadership of Ms. Deborah Flint and Mr. Steven Thomas, the corruption has taken on a grotesque, theatrical quality. There's no longer even an attempt to conceal it. The data has been twisted in broad daylight — and the proof is in the reports themselves.

You fired Robyn Connelly and Cynthia Woods for tampering with reports. So why is Mr. Thomas still in charge of complaints?

This man is not a professional — he is a chewing gum–popping, eye-rolling distraction performer who appears more qualified for a midway magic act than for public accountability. He hasn't even finished his illusionist training, and yet he's been entrusted with the very system designed to reflect public harm.

The result? A system that now exists to deceive, not inform.

And Ms. Flint? She installed him. She owns this. The erosion of trust, the manipulated numbers, the disappearing complaints — this is her legacy too.

I am attaching a series of reports that prove the tampering. The edits are not hypothetical. They are timestamped, archived, and undeniable.

This isn't modernization. This isn't streamlining. This is data laundering under the banner of "community engagement."

If there is any remaining shred of integrity left in your leadership, then Steven Thomas must be removed immediately.

Sincerely,

Fabio Ovettini

P.S.

I ask that this message — along with the screenshots documenting your repeated failures — be shared in full with the GTAA Board of Directors. They deserve to see the consequences of your leadership, and to understand the level of public outrage and institutional distrust you've cultivated.

airportnoise.torontopearson.com/complaints-report/#

The report below is a summary of complaints and individuals relating to Toronto Pearson operations, sorted by federal riding and city.

To change between federal riding and city, select the drop-down list in the top-left corner of the report. To view a specific federal riding or city, select the area on the map or select the name in the table. Click the column names in the table to sort by that value (for example, 'Number of Individuals').

The default time period is the most recent month for which data is available. To change the month, select the drop-down list in the top-right corner of the report.

In Q1 2025 the complaint management system experienced four separate outages totaling ~27 hours. We are working with vendors to recover this data.

Subject: Re: Ongoing WebTrak Issues – Urgent Response Required
Date: 2025-04-11 8:44:41 AM

Warning: This message is from an EXTERNAL SENDER - be CAUTIOUS, particularly with links and attachments.
Attention: Ce message provient d'un EXPÉDITEUR EXTERNE - soyez PRUDENT, en particulier avec les liens et les pièces jointes.

[redacted]

It has now been **3 weeks and 21 days** since the WebTrak issue first emerged, and it remains unresolved. The pattern of inaction is deeply troubling.

If the email sent by [redacted] was accurate, then the timeline is clear:

- You were made aware of the issue on **February 18**.
- You chose not to act, and the system failed again on **February 28**.
- Still, no corrective measures were taken, and the system failed again on **March 14**.
- On **March 22**, I took it upon myself to notify you more directly.
- On **March 24**, a notice was finally placed on WebTrak.
- Yet again, on **March 28**, the system failed.

The facts speak for themselves. Whether we refer to this as a *limitation in staff qualifications* or more plainly as *incompetence*, the result is the same: a sustained failure to maintain a basic public-facing system **of a major Canadian airport — a critical piece of national infrastructure**.

I am including a screenshot below to illustrate the response from [redacted]

[redacted] I prefer not to use adjectives. But the above is screaming for one.

RE: Ongoing WebTrak Issues – Urgent Response Required

[redacted]
From: [redacted]
To: Fabio Ovettini

Mon, Apr 7 at 12:32 p.m.

Hello Fabio,

As you pointed out, WebTrak has experienced some recent outages. These were due to temporary losses of the flight data feed:

- 2/18 between approximately 12am – 8am local time
- 2/28 between approximately 1am – 10am local time
- 3/14 between approximately 8am – 12pm local time
- 3/22 between approximately 7am – 5pm local time

Both our team and our vendor quickly identified these issues through automated system checks, and we posted a note on WebTrak to advise residents. Although we have had no outages since March 22, we continu

If the data cannot be restored before we publish our next set of reports, we will include notations on the reports referencing the missing periods of data loss.

Thank you,
[redacted]

Sincerely,
Fabio Ovettini

After two full weeks—fourteen days—I have yet to receive any response, let alone an acknowledgement, regarding my previous email about the ongoing failures of WebTrak. The system continues to malfunction, and no apparent repairs have been made.

Given the critical nature of this system, I would expect at least the courtesy of a reply. Over the past year, I have consistently reported malfunctions, and I suspect that my notifications have, on more than one occasion, prevented a more significant failure. If this is incorrect, I welcome an explanation as to why these issues persist despite prior warnings.

At this point, it is difficult not to conclude that these failures—and the silence surrounding them—indicate a lack of urgency in addressing the problem. I will ask again:

- Why does WebTrak continue to fail?
- What has been done to fix these issues?
- What measures will be implemented to prevent further failures?

I expect a response. For over a year, I have been doing your job for you—identifying failures in both WebTrak and the noise complaint webform, flagging them before they spiral out of control, and essentially providing free diagnostics for systems that, by all appearances, are held together with duct tape and

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

wishful thinking.

The response? Silence. No acknowledgement, no thanks, not even the pretense of concern.

At this point, I have to ask: Why should I continue? Why should I keep handing you precise, actionable reports when you treat them—and me—as if they don't exist? Perhaps I should stop identifying the exact failures and simply report, 'System is broken. Again.' You can figure out the details yourselves.

Sincerely,
Fabio Ovettini

The technical issues with WebTrak continue, and despite multiple emails, I have yet to receive a response. The ongoing failures, combined with the lack of communication, suggest that these issues are not being taken seriously.

If this weren't a matter of critical national infrastructure, it would almost be comical—reminiscent of a Three Stooges routine. But there is nothing funny about a system that repeatedly fails, leaving those responsible unable or unwilling to provide answers.

I expect an immediate response addressing:

1. Why WebTrak continues to fail.
2. What, if anything, has been done to fix these issues.
3. How you intend to ensure this does not continue happening.

Below, I have attached several screenshots displaying the issue. I look forward to your prompt reply.

Sincerely,
Fabio Ovettini

Subject: SECOND REQUEST – Urgent Public-Health Intervention re: Pearson Airport (Response Requested by Fri, Nov 7, 2025)

Dear Health Officials,

This is a time-sensitive follow-up to my October 19 message below. We have received **no response** from Toronto Public Health, the Ontario Ministry of Health, or Health Canada.

Meanwhile, conditions persist: **nighttime aircraft noise of 65–80 dB** (vs. the WHO 40 dB Lnight guideline), equating to **up to 316,000% more sound energy** and noise that *feels roughly 1,000% louder* than the point where harm begins. Residents continue to report sleep deprivation, anxiety, and blood-pressure spikes. We also flagged a **surge at Humber River Hospital to ~500 ER patients/day** despite planning assumptions of ~250–300 — and asked whether this has been assessed and whether reliance on an **obsolete NEF** is a contributing factor. We have not received any acknowledgement.

Given the ongoing harm, please provide the following by **Friday, November 7, 2025 (5:00 p.m. ET):**

1. **Immediate actions** you will take to protect residents (day and night), including any temporary mitigation or enforcement measures.
2. **A commitment to an emergency public-health assessment** (Toronto Public Health / Public Health Ontario) addressing chronic aircraft noise and emissions.
3. **Confirmation of a federal–provincial–municipal coordination mechanism** (Health Canada / Ontario MOH / TPH) with timelines and named leads.
4. **A written answer** on Humber River Hospital volumes (500/day) and whether outdated environmental inputs (e.g., NEF) have been considered in health-system planning.
5. **A plan to obtain and disclose a current Pearson-specific NEF** and to stop reliance on outdated noise forecasts for health/planning decisions.

Please **confirm receipt** of this message today and indicate your point of contact.

If no reply is received by the deadline, I will proceed to:

- File a formal complaint with the **Ontario Ombudsman** regarding failure to act on an environmental-health hazard;
- Submit a **Commissioner of the Environment and Sustainable Development petition** (OAG) regarding federal inaction;
- Request a **Board of Health delegation** for the next meeting agenda; and
- Initiate **FOI/ATIP requests** for records of assessment and inter-agency correspondence regarding aircraft noise, NEF, and ER surge data.

This is a direct appeal for protection. **Every additional day and night of exposure deepens the damage.**

Respectfully,
Fabio Ovettini

On Sunday, October 19, 2025 at 08:15:11 p.m. EDT, Fabio Ovettini wrote:

Dear Health Officials,

We are pleading for help.

Every night, aircraft noise from Toronto Pearson Airport shakes our homes and our bodies. The sound pierces through walls, windows, and minds — and the few seconds of silence between flights are filled with dread for the next one. We cannot rest, we cannot think, we cannot heal. This is not normal life. It is continuous harm, a form of abuse that no community should endure.

For years, we have tried every official channel. Our complaints vanish into broken systems, noise monitors go offline without explanation, and reports are quietly rewritten with no record of correction. When we raise these issues, the response is denial — and the suffering continues.
The only thing the GTAA tells us is that the air traffic will double in the near future — as if the pain we already endure is not enough.

We are residents, families, seniors, children — people who can no longer sleep through a single night. We wake up exhausted, anxious, and ill. The World Health Organization has long recognized that aircraft noise above 40 dB at night causes measurable health damage: hypertension, cardiovascular risk, and cognitive impairment in children.

In our area, nighttime aircraft noise often measures between **65 and 80 decibels**, compared to the World Health Organization's recommended **40 dB Lnight** limit. That means we are enduring **up to 316,000% more sound energy** — and noise that *feels roughly 1,000% louder* to the human ear — than what the WHO defines as the point where harm begins. What science classifies as a clear threshold of health damage has become our nightly reality.

We are also deeply concerned that the harm is already manifesting in the health system. At Humber River Hospital, we are reportedly seeing around **500 patients a day**, despite earlier assumptions and planning for about **250-300**. If this increase reflects the cumulative stress, sleep loss, and illness linked to chronic aircraft noise and emissions, then the situation has already become a public-health crisis. Could your offices confirm whether this surge has been assessed — and whether outdated environmental forecasts like the **obsolete Noise Exposure Forecast (NEF)** could be a contributing factor?

Toronto Public Health, Ontario Health, and Health Canada all share a duty to protect the public from health hazards. This is one of them. The federal government's failure to update environmental data and enforce standards has left our neighbourhoods defenseless.

We are begging you — as health professionals, as public servants, as human beings — to intervene.

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

Please send inspectors. Send medical staff. Send anyone who can witness what is happening and help stop it.

We need an **emergency public-health assessment** and immediate protective measures. Every additional day and night of exposure deepens the damage.

We have nowhere else to turn.

With urgency and respect,
Fabio Ovettini

Subject: Re: Proof of Sleep Deprivation. September 9-10, 10-11 and 11-12, 2024
Date: 2024-09-12 4:55:19 PM

Warning: This message is from an EXTERNAL SENDER - be CAUTIOUS, particularly with links and attachments.
Attention: Ce message provient d'un EXPÉDITEUR EXTERNE - soyez PRUDENT, en particulier avec les liens et les pièces jointes.

As many of you know, airplanes flying over communities near the airport are causing significant sleep deprivation.

Lack of sleep is a major factor in many accidents. If you are involved in an accident and can prove that sleep deprivation contributed to it, this evidence could be crucial in helping you, your lawyer, and your insurance company recover costs from those responsible for causing the sleep deprivation.

In this case, the responsible parties would be the Greater Toronto Airports Authority (GTAA), Transport Canada, and our Federal Government.

Good Morning,

I will start with a reminder of the sleep recommendations issued by Transport Canada, Health Canada and the WHO. Below it you will find the usual spreadsheet that proves we have been sleep deprived.

Transport Canada's Sleep Recommendations

- 8 Hours of Consecutive Sleep: While regulations provide for 8 consecutive hours off-duty, it is generally recommended that this time be used for sleep to ensure adequate rest.
- Total Off-Duty Time: In addition to the 8 consecutive hours, the additional 2 hours of off-duty time can be used for short naps, meals, and relaxation to help manage fatigue.

Health Canada's Sleep Recommendations by Age Group
Adults (18-64 years):
- 7-9 hours per night: This range is considered optimal for maintaining good health, cognitive function, and overall well-being.

Older Adults (65+ years):
- 7-8 hours per night: Slightly less sleep is recommended for older adults, but adequate rest remains crucial for health and functioning.

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

World Health Organization (WHO) Sleep Recommendations by Age Group

- **Infants (0–3 months)**: 14–17 hours per day.
- **Infants (4–11 months)**: 12–16 hours per day, including naps.
- **Toddlers (1–2 years)**: 11–14 hours per day, including naps.
- **Preschoolers (3–4 years)**: 10–13 hours per day, including naps.
- **School-aged children (5–13 years)**: 9–11 hours per night.
- **Teenagers (14–17 years)**: 8–10 hours per night.
- **Adults (18+ years)**: 7–9 hours per night.

Health effects of not sleeping

The main effects of sleep deprivation include physical effects (sleepiness, fatigue, hypertension) cognitive impairment (deterioration of performance, attention and motivation; diminishment of mental concentration and intellectual capacity and increase of the likelihood of accidents at work and during driving) and mental health complications. Inadequate rest
impairs the ability to think, to handle stress, to maintain a healthy immune system, and to moderate emotions. Maintained total sleep deprivation is fatal in some animal species.
The day after a night of abnormal or poor sleep is, whatever the cause, a disturbed day.
People can fall asleep at work, at school or when driving; feel tired; have concentration and vigilance detriments; have memory blanks; irritability; frustration; and have a higher probability of accidents or injury (WHO, 1998)

https://iris.who.int/bitstream/handle/10665/349782/WHO-EURO-2004-4242-44001-62044-eng.pdf?sequence=1&isAllowed=y

As many of you know, airplanes flying over communities near the airport are causing significant sleep deprivation.

Lack of sleep is a major factor in many accidents. If you are involved in an accident and can prove that sleep deprivation contributed to it, this evidence could be crucial in helping you, your lawyer, and your insurance company recover costs from those responsible for causing the sleep deprivation.

In this case, the responsible parties would be the Greater Toronto Airports Authority (GTAA), Transport Canada, and our Federal Government.

Good Morning,

As many of you know, airplanes flying over communities near the airport are causing significant sleep deprivation.

Lack of sleep is a major factor in many accidents. If you are involved in an accident and can prove that sleep deprivation contributed to it, this evidence could be crucial in helping you, your lawyer, and your insurance company recover costs from those responsible for causing the sleep deprivation.

In this case, the responsible parties would be the Greater Toronto Airports Authority (GTAA), Transport Canada, and our Federal Government.

As recorded by Acacia's noise Monitor on September 2, 2024

Subject: Re: Proposal for Compensation Due to Chronic Sleep Deprivation Caused by GTAA
Date: 2025-04-11 12:52:06 PM

Warning: This message is from an EXTERNAL SENDER - be CAUTIOUS, particularly with links and attachments.
Attention: Ce message provient d'un EXPÉDITEUR EXTERNE - soyez PRUDENT, en particulier avec les liens et les pièces jointes.

[redacted]

I am writing to follow up on my email titled **"Request for Compensation for Sleep Deprivation and Related Damages,"** sent on Sat, Mar 22, 2025 at 12:06 . As of today, I have not received any acknowledgment or response.

The matter addressed in that proposal is of significant and ongoing concern to our community. The documented impacts of chronic aircraft noise—especially overnight—have resulted in measurable harm to health, learning, employment, and quality of life. The proposal outlines reasonable financial reparations based on the severity and duration of these harms.

I ask that you respond promptly with a clear indication of how the GTAA intends to address the demands outlined. This issue will not resolve itself, and silence is not an acceptable outcome.

We remain open to dialogue, but we also reserve the right to escalate this matter through legal and political channels should there continue to be no response.

Sincerely,
Fabio Ovettini

Christine,

Thank you for your response. While I acknowledge that the Greater Toronto Airports Authority (GTAA) operates as a private entity, I must emphasize that it does so under a lease agreement with Transport Canada. As the regulatory authority, Transport Canada holds oversight responsibilities, including ensuring compliance with the terms of that lease—especially those related to integrity, transparency, and proper governance.

Our community has uncovered **serious concerns regarding the GTAA's conduct**, including **evidence of reports being altered in the middle of the night, lack of transparency, and indications of potential corruption.** These actions undermine public trust and violate the principles of accountability that should govern the operation of such a critical national infrastructure.

It is concerning that an official response from Transport Canada on such a serious matter would be signed with only a first name, lacking full accountability. Transparency starts with clear and responsible communication, and I would appreciate knowing who, within Transport Canada, is taking responsibility for addressing these concerns.

The lease agreement between Transport Canada and GTAA requires that the airport be managed in a **reputable and responsible manner.** If the GTAA is failing to uphold these obligations, then Transport Canada has a **duty** to intervene and investigate. Dismissing these concerns outright does not align with your mandate to ensure proper governance of Canada's airport system.

Key Integrity-Related Provisions from the Lease Agreement

- **Reputable Management:** The lease requires the GTAA to "actively manage and operate Pearson at our own cost and expense, in a reputable manner as a First-Class Facility and a Major International Airport."
- **Performance Reviews:** Section 9.02 of the Ground Lease mandates regular performance analyses of the GTAA's management of the airport, ensuring compliance with lease terms and maintaining operational integrity.

I urge Transport Canada to:

1. **Clarify its role in ensuring GTAA compliance with the lease agreement**, particularly regarding integrity and transparency.
2. **Investigate concerns of misconduct** related to altered reports and lack of accountability.
3. **Engage with the community** to address these serious allegations rather than dismissing them without due consideration.

The expectation is not that Transport Canada micromanages GTAA but rather that it fulfills its regulatory responsibilities by ensuring that lease obligations—including those related to ethical management—are being met.

I look forward to your response and to understanding how Transport Canada intends to address these pressing concerns.

Sincerely,
Fabio Ovettini

Dear [redacted] and Fabio:

I am responding to your emails to the Minister of Transport and Internal Trade regarding issues pertaining to the Greater Toronto Airports Authority (GTAA).

While the Minister appreciates receiving your views, it is important to note that the GTAA is not a federal agency or department, but rather a private entity that operates an airport. This being the case, we have no additional comments or information to provide you at this time.

Please continue to raise your concerns with the GTAA. Transport Canada will not be replying to further correspondence from you on this matter.

Sincerely,

Christine

Thank you for your response. While we appreciate that you have forwarded our concerns to the GTAA, this is a **federal issue** that demands direct government intervention, not merely a referral to the very entity we are holding accountable.

Our investigations have uncovered serious concerns, including a lack of transparency and potential corruption. Yet, rather than addressing these findings, your response suggests a willingness to look the other way. **Is corruption something you and your government are willing to accept?**

We expect more than just referrals—we expect action. **What concrete steps will you take to escalate this matter?** Will you press for an independent investigation? Will you push for parliamentary oversight? Or will this issue continue to be ignored?

We look forward to your response and a clear commitment to addressing these concerns at the federal level.

Sincerely,
Fabio Ovettini

Dear Fabio,

Thank you for your follow-up and for expressing the community's ongoing concerns regarding the transparency and accountability issues with GTAA. The health impacts of aircraft noise is a serious issue.

I have forwarded your concerns directly to the GTAA, and ask that they respond directly to you. I understand the frustration regarding the lack of progress, and I hope for a more meaningful and timely response.

Regarding the open house, I have inquired about any developments on this front and will let you know when I hear back.

I have copied the Hon. Anita Anand, Minister of Transportation, on this email and request her assistance in addressing this important issue.

Thank you again for your continued engagement on this important issue.

Best regards,

[redacted]

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

I am following up on my previous email regarding the ongoing concerns about transparency and accountability from GTAA. As of now, we have not received a meaningful response addressing the specific issues raised.

While we appreciate your stated intention to contact GTAA, the community remains frustrated by the ongoing delays and lack of concrete action. We need to know what steps have been taken beyond simply reaching out. Have you received any substantive response from GTAA? If so, please share their justification for the continued lack of transparency. If not, what actions will you take to escalate this matter?

Additionally, we understand there has been discussion about an open house for the community. Can you provide any updates on this, including potential timing and format?

At this stage, reassurances are not enough—we need decisive action. Please provide an update on the progress made and the immediate next steps you will take to ensure this matter is properly addressed.

We look forward to your prompt response.

Sincerely,

Fabio Ovettini

Dear [redacted]

On behalf of Mr. Fabio Ovettini and the community, I am reaching out to formally request an update on the ongoing concerns related to transparency and accountability from the GTAA. Despite multiple discussions and assurances over the years, the community continues to face delays and a lack of meaningful resolution on this matter.

We understand that GTAA has provided some responses to previous inquiries, and we appreciate the communication to date. However, our office continues to receive numerous inquiries from the community regarding this issue, which remains unresolved. Transparency is vital to the community, and there are still significant concerns about the handling of complaints and data inconsistencies. Therefore, we respectfully request the following:

1. A detailed response addressing the reported data discrepancies and concerns regarding the complaint reporting process.
2. A clear explanation as to why the requested information has not been made available or fully clarified.
3. The next steps GTAA will take to ensure transparency, accountability, and that the community's concerns are appropriately addressed.

Additionally, we acknowledge that GTAA has communicated a willingness to host another open house for the community. This would be a valuable opportunity to engage directly with residents, provide further clarity, and address any outstanding concerns. Please provide further details on the potential timing and format of this event so that we can assist in ensuring broad community participation.

While we recognize that GTAA is best positioned to handle operational concerns, it is essential that we see concrete actions to ensure transparency and a meaningful resolution. The community deserves clarity, and we urge you to treat this matter with the urgency it requires.

Please provide a response at your earliest convenience.

I look forward to your prompt reply.

Best regards,

Subject: Re: Request for Assistance in Addressing GTAA Complaint Reporting Discrepancies

Good day [redacted]

We appreciate your response and your stated intention to contact GTAA. However, we must express our growing frustration with the ongoing pattern of delays and inaction. This is not the first time we have been assured that steps would be taken, yet after years of discussions, we have yet to see any meaningful resolution or accountability from GTAA.

Our community has uncovered clear instances of report manipulation and data discrepancies, yet GTAA continues to evade transparency. Simply stating that you will reach out is not enough—we need results. What concrete actions have you taken beyond making contact? Have they provided any justification for their continued lack of transparency? If so, we would like to know exactly what they have said. If not, what steps will you take to escalate the matter further?

At this point, we are not looking for more reassurances—we are looking for decisive action. The time for delays has long passed. We urge you to demonstrate real leadership in holding GTAA accountable, rather than allowing this issue to be endlessly pushed aside.

Please provide an update on what has been done and what immediate steps you will take to ensure this matter is properly addressed.

We look forward to your prompt response.

Sincerely,

Fabio Ovettini

I am re-sending my previous email as I have not yet received a response. I would appreciate it if you could take a moment to address this matter, as it is important.

I would appreciate it if any or all of you could provide an update on this matter.

Sincerely,

Fabio Ovettini

On Tuesday, December 24, 2024 at 09:57:34 a.m. EST, Fabio Ovettini wrote:

[redacted]

Thank you for your email regarding the updates to the complaint reports. I would like to express my concerns about the process and the implications of these changes.

It is essential for the sake of transparency and accountability that once a report is posted, it remains as is, with any updates or changes clearly documented and issued as separate reports. This ensures the original data is preserved, and any modifications are accompanied by a clear explanation.

The current approach, where reports continue to refresh following their initial posting, introduces confusion and raises questions about the integrity of the data. For instance:

- The July report saw a **27.85%** increase in complaints compared to its initial version.
- The August report experienced an even more dramatic change, with a **42.64%** increase in complaints.

Such substantial changes demand clarity and accountability. The handling of these reports reflects glaring issues of incompetence, and even malice cannot be ruled out. These practices undermine trust in the data, diminish confidence in GTAA's processes, and create unnecessary confusion for all stakeholders.

I respectfully request a detailed explanation of what has changed in these reports to result in such significant increases.

Furthermore, I urge GTAA to consider the following improvements to restore confidence in the reporting process:

1. **Post Reports as Final**: Once published, reports should remain unaltered
2. **Issue New Reports for Changes**: Updates should be reflected in separate reports, with clear explanations for modifications.
3. **Provide Detailed Summaries**: Changes related to duplicate accounts or data consolidation should be explained with transparency to ensure the data remains credible and actionable.

I trust you understand the seriousness of these concerns and will provide the requested explanation promptly.

I look forward to your response.

Sincerely,
FO

Fabio, we have already addressed many of the items you raise in your correspondence and so have focused on my response to new questions.

Reporting

The complaint reports continue to refresh following an initial posting. Typically there is very little change from the original report, however changes can relate to duplicate accounts for people due to changes in how contact information is entered into a complaint. When duplicates are identified, they are merged, which are reflected in a later refresh.

I do not understand your comments about residents being required to encrypt contact information to us by email. We accept complaints through our online complaint form and by voicemail, not by email. For more information on the use of personal information, please see the noise complain process.

Noise Mitigation Suggestions

Thank you for sharing your detailed recommendations and concerns. We understand the importance of balancing Toronto Pearson's growth with the impact on surrounding

communities, and we appreciate the thought and research you have put into your suggestions. Your feedback aligns with our commitment to accountability and continuous improvement, as reflected in our Noise Management Action Plan.

As we work towards delivering Pearson LIFT and developing the next Master Plan, we will carefully consider how to enhance Pearson's noise management program and community engagement.

Thank you again for your engagement and advocacy,

Request for Clarification on Noise Report Discrepancies

Dear [redacted],

"You can fool some of the people all of the time, and all of the people some of the time, but you can not fool all of the people all of the time."

— Abraham Lincoln

I would like to address some continued discrepancies in the tailored noise complaint reports for July and August 2024. These discrepancies raise concerns about the accuracy and transparency of the data provided. As you know, the integrity of these reports is critical, as they form the basis for important decisions, including airport expansion approvals.

Here are the discrepancies that require clarification:

July 2024

- **Before last make-up session:**
  - Total Complaints: 128,377
  - Total Individuals: 236
- **After last make-up session:**
  - Total Complaints: 22,085
  - Total Individuals: 168
  - +
    July 2024 Select a month : Jul-24
    The report includes complaints submitted by individuals using Toronto Pearson's complaint process. Additionally, according to our records, 147,518 complaints for 68 Humber River- Black Creek residents were submitted via automation. Since October 2024, auto-generated complaints are excluded from monthly reports. For more information, please see the GTAA noise complaint process.
  -
- **Combined Totals (Reported):**
  - Complaints: 169,903
  - Individuals: 233

The complaint and individual totals before and after the last make-up session do not reconcile with the combined totals reported. Why?

August 2024

- **Before last make-up session:**
  - Total Complaints: 363,274
  - Total Individuals: 307
- **After last make-up session:**
  - Total Complaints: 24,785
  - Total Individuals: 206
  - +

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

- **Combined Totals (Reported):**
  - Complaints: 560,182
  - Individuals: 305

Again, the combined totals appear inconsistent when compared to the sums of the before and after data. Why?

Could you please provide clarification on how these figures were calculated? Additionally, if there have been any adjustments or methodologies applied that could explain these discrepancies, I would appreciate a detailed explanation.

Thank you for your attention to this matter. I look forward to your response.

Sincerely,

FO

Thank you [redacted]

I would like to add the following:

I wanted to reiterate some points we've discussed previously about the outdated business model the GTAA uses, where demand is met at any cost, with little regard for the impact on surrounding communities. This approach is compounded by the equally outdated and inefficient process for logging complaints.

We're in an era where digital assistants like Alexa, Google, and Siri help us with everyday tasks. We can say, "Google, take me home," or "Alexa, what's the weather going to be like today?" Yet, when it comes to noise complaints, the GTAA still expects community members to manually log each flight disturbance—an approach that is inefficient and entirely out of step with modern technology. Imagine if we could say, "Siri, send 500 noise complaints to the GTAA."

Instead, they continue to uphold a bureaucratic process that prioritizes red tape over the productivity and well-being of those affected by aircraft noise. This reflects an outdated mindset that seems to be shared by some of our representatives, who also appear more focused on maintaining these outdated processes than on finding forward-thinking solutions. We need representatives who are ready to embrace modern tools and advocate for the interests of all community members.

Thank you for allowing me to share these thoughts

Sincerely,
Fabio Ovettini

On Wednesday, October 30, 2024 at 10:05:05 a.m. EDT, [redacted] wrote:

Hello [redacted]

Humber River - Black Creek and everyone living in flight zones to Pearson Airport need your help once again to tell our story about airplane noise and how it affects our lives. We do not be silenced!

Last night, I spoke to my friend and neighbor, Fabio Ovettini, and shared my feelings about the Federal Minister of Health, Mark Holland. Mark has not replied to any of our emails now addressing our health concerns regarding airplane noise at Pearson Airport. I told Fabio that Mark Holland reminds me of George Costanza from Seinfeld —he goes to work and does absolutely nothing, based on my experience dealing with him concerning airplane noise.

George Constanza = MP Minister of Health Mark Holland

Why can't Mark speak up for the many residents living in flight path zones affected by airplane noise from Pearson Airport? The CEO of the GTAA, Deborah Flint, was hired to make Pearson Airport one of the busiest airports in the world, increasing passengers from 50 million to 85 million, and likely even higher. Night flights are allowed because Pearson Airport, the GTAA, and the Federal Government have crafted legal language based on passenger numbers, enabling cargo planes with only a few people on board to land and take off during the early morning hours. A cargo plane and a passenger plane produce the same amount of noise. Did Federal Liberal Leader and Prime Minister of Canada Justin Trudeau instruct Mark to keep quiet and not defend the health and well-being of those affected by airplane noise? Prime Minister Trudeau is usually seated inside a plane looking out, which may lead him to overlook the noise and emissions from airplanes.

The GTAA is focused on profitability and manages Pearson Airport with minimal restrictions or oversight from the Federal Liberal Government regarding its operations. Pearson Airport should not be permitted to grow exponentially in the number of planes and passengers it handles in the coming years without addressing the complaints of the many individuals affected by airplane noise now. The GTAA and Pearson Airport should take responsibility for soundproofing homes in flight path zones before any increase in aircraft and passenger numbers is even considered. No one wants to pay to do this and it will likely never happen.

I informed MP Judy Sgro a year ago that very few people in Humber River - Black Creek were aware they could file a noise complaint with Pearson Airport, and I asked

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

her to include instructions in her monthly newsletter on how to do this. Noise complaints were very low, and she did not comply. It wasn't until recently, when complaints rose significantly over two months in Humber River - Black Creek, that she decided to address the issue. She posted the instructions only on her website in early September for the month of August. I complained to her and asked her to mail it out as she usually does, but she did not. Several weeks passed without a letter from her providing instructions on how to file a noise complaint. The lack of urgency in addressing these instructions is likely because MP Judy Sgro's lives in Thornhill and does not experience the daily impact of airplane noise and many of her office staff consider it a non issue too.

Yesterday, I received MP Judy Sgro's monthly newsletter, which included instructions on how to file a noise complaint with Pearson Airport, but it also contained three lines at the end of it that concern me.

HOW TO FILE AIRPORT NOISE COMPLAINTS FROM YYZ:

The Toronto Pearson Noise Management Office registers complaints for aircraft flying into and out of Toronto Pearson International Airport - https://bit.ly/AirportNoise

Residents can make a noise complaint using any of the following means:

*phone at 416-247-7682 - limit 10 complaints per day by phone
*through their online flight tracking tool - Webtrack
*directly to their noise complaint form- they accept up to 50 complaints per form

Complaints will not be accepted if:
***they are submitted through methods not listed above, such as automated systems or software - e.g., BOTS**
***they are submitted by someone other the individual named in the complaint.**

It looks like Robyn Connelly from GTAA, Cynthia Woods from the Pearson Airport Complaints Department, and MP Judy Sgro have addressed the increase in noise complaints for Humber River - Black Creek by including the last three lines in the instructions. Fabio and I worked on increasing the complaints for Humber River - Black Creek by stopping people who walked by our houses and asking if they were aware of how to file a noise complaint with Pearson Airport. Almost everyone we spoke to said no. We asked if they would like to become part of a noise complaint system where complaints would be filed automatically on their behalf, and nearly everyone agreed to participate. Many hours were spent organizing and arranging this system for our community. It looks like the complaints filed for Humber River - Black Creek will now come to an end. Congratulations to Liberal Leader and Prime Minister Justin Trudeau, Liberal MP Judy Sgro, GTAA, and Pearson Airport for silencing people affected by airplane noise. Who has the time to file a complaint every time a plane flies over their house?

The people of Humber River - Black Creek have the right to vote for who we want to be our next Prime Minister and MP in the next federal election. I hope everyone I copied on this email reads it and remembers what was written when it comes time to decide who we want as our leader in the next election.

MP Judy Sgro told us in one of our first meetings that she lived here many years ago and learned to live with the airplanes, expecting us to do the same. This did not make sense to those who listened to her that day, and we spoke up. She later denied having said it to us. There are many more planes flying over our houses today than when MP Judy Sgro lived here, and it will only get worse. The GTAA must appreciate MP Judy Sgro for her support in generating more business at the expense of people affected by airplane noise. MP Judy Sgro is skilled at using her charm when she needs something and then ignoring you when she no longer does. It seems she learned early in her career how to charm people and has successfully carried that into her political career, still going strong at 78 years old.

The online Pearson Airport complaint system has not been functional for a few weeks, from September 22 until now. The phone reporting was not operational from late last week until yesterday, October 29th. This is concerning because people had no way to file noise complaints with Pearson Airport during that time. Also noise monitoring stations have been seen not operational for many months on Webtracker. It is terrible!

I asked Robyn Connelly from the GTAA at a meeting last week if the GTAA and Pearson Airport could mail out instructions on how to file a noise complaint at least twice a year to people living in flight path zones, and she said point-blank to me no, without discussing the matter further. MP Judy Sgro told me that she would post it in her monthly news letter from now on. Robyn Connelly, Cynthia Woods, and our federal Liberal government are all aware that not many people know they can file a complaint with Pearson Airport, and they do not seem to care. Robyn Connelly even told us at the meeting that complaints are not important to anyone involved with the air industry at Pearson Airport. Why is there even a Pearson Airport Complaints Department, then?

It has been incredibly frustrating over the last few years dealing with the airplane noise issue and these people in charge because they don't really seem to care. Most of us like where we live; we have no problem with a certain number of planes, but the number of planes and times they fly have changed on us where it is overwhelming at time —when we can't sleep at night or talk outside because of the roaring sound of planes every 40 seconds—it becomes complicated and depressing. George Costanza —sorry, Minister of Health Mark Holland—where are you?

Please let Fabio and Irene do another news story with you to explain what we did to help increase complaints and what GTAA, Pearson Airport, and what our federal Liberal government, GTAA and Pearson Airport have done to silence us.

Take care,

[redacted]

I wanted to kindly follow up on the email we sent on On Thursday, October 3, 2024 at 08:05:27 a.m. EDT, regarding the processing of complaints Our community is eager to move forward in the most efficient way possible, and your input is crucial to ensuring we can do so effectively.

We understand that you may have a busy schedule, but we would greatly appreciate your response to the question posed in our last email at your earliest convenience.

We look forward to hearing from you.

Sincerely,
Fabio Ovettini

Robyn, GTAA's managent,

Thank you for your response. However, it is clear that the GTAA lacks both common sense and empathy in its approach to managing operations. These two fundamental qualities are critical for building trust and ensuring that the needs of residents are genuinely addressed.

The lack of empathy is evident in how the current process, while touted as "fair and accessible," completely disregards the emotional and psychological toll it takes on residents. Being subjected to constant noise pollution is already difficult, but adding a burdensome and time-consuming complaint process only exacerbates the suffering. It's as though the well-being of residents—particularly those of us living closest to the airport—is not a priority.

Equally troubling is the airport's lack of common sense. It becomes clear when the GTAA justifies tormenting entire communities by claiming that meeting demand is a priority above all else. This logic reminds me of the deeply flawed reasoning of those in history who justified unspeakable acts in the name of "demand"—such as the raiding of African villages for labour. The idea that fulfilling an objective at any cost is acceptable is as harmful now as it was then. It demonstrates a complete disregard for the people and communities whose lives are directly impacted by these decisions. Trying to justify a complaint system that forces people to spend 15 hours a day navigating it is another demonstration of this lack of common sense.

Moreover, it appears that the GTAA's first priority is not to address community concerns meaningfully but to look good on paper. The continuous emphasis on participation in community events, newsletters, and public meetings seems more focused on ticking off boxes to project an image of engagement rather than making substantive changes that would improve the lives of those affected by aircraft noise. This preoccupation with appearances does little to address the real issue at hand—residents are suffering, and the current processes fail to reflect any genuine care for their well-being.

I recommend reading *The Book of Negroes* by Lawrence Hill, which illustrates how prioritizing objectives over human dignity has devastating consequences. I hope it will prompt deeper reflection on how your operations impact the communities around Pearson.

Sincerely,
Fabio Ovettini

On Friday, October 11, 2024 at 11:46:24 a.m. EDT [redacted] wrote:

Fabio and Darryl,

I am writing in response to your concerns regarding the noise complaint form and community awareness about how to submit noise complaints.

The GTAA's noise complaint process offers a clear, secure, and accessible way for residents to express concerns and learn about airport operations. Over time, we have added features to the form—such as the ability to submit multiple complaints in one submission and the option to retain contact information—based on feedback from residents. We believe the current complaint form is sufficient and provides a fair and accessible way for residents to submit concerns and questions about aircraft operations. While we understand the process may require some effort, this is essential to maintain accuracy and ensure proper correlation with flight data.

As you may know, the Noise Management Forums—held three times per year—include the Pearson Public Meeting. At this meeting, we provide updates on airport operations, discuss noise management efforts, and offer opportunities for community feedback, including noise complaints.

In addition to the connections we foster through the Noise Management Office, we engage with the community in various ways to keep our neighbors informed and involved in our projects and initiatives. This summer alone, we participated in over 75 community events, reaching more than 10,000 residents, and our e-newsletter reaches thousands of residents each month. Through these platforms, as well as our website and community partners, we regularly share information about our operations, our role as a local economic anchor providing jobs and supporting development, and how to connect with the Noise Management Office or attend the Pearson Public Meeting.

While we appreciate your input and ideas, we encourage continued use of the established process for submitting noise complaints.

Regards,

[redacted]

[redacted]

Thank you for your email. I would like to take this opportunity to address some of the points you raised, particularly in relation to the changes made to the complaint submission system and the implications for our community.

For some time now, I have voiced concerns about the transparency of the current noise complaint process. The system, as it stands, requires a significant amount of manual effort that makes it impractical for those of us living under flight paths. To illustrate this: if I were to submit a complaint for every airplane that flies over my home, I would need to spend over 15 hours a day simply logging complaints. Surely, you must understand that this is an unreasonable expectation for any resident.

I have previously proposed a more efficient system, one where users could authorize the submission of complaints when noise levels exceed a certain threshold set by the user. Unfortunately, this proposal has not been addressed or implemented.

Instead, you introduced a CAPTCHA requirement, implying that the use of automation or 'bots' is inappropriate. I find this approach not only dismissive but offensive, given that the only way our community can voice the sheer volume of complaints is through automation. Without an accessible and efficient system in place, we have been left with little choice but to take matters into our own hands.

To further complicate things, the new system you've implemented is not even usable. It is unstable and frequently breaks, making the complaint submission process frustrating and inefficient. This only exacerbates the problem for residents like us, who are already struggling with the overwhelming noise pollution.

Furthermore, I would like to point out that CAPTCHA is not a foolproof solution against cyberattacks. Services that automatically resolve CAPTCHAs for minimal costs are widely available, undermining any claims of added security.

More importantly, I want to remind you that behind every complaint our community submits, there is a real person made of flesh and bones, someone who is suffering from the constant noise pollution. These complaints are not just data points or numbers—they represent people whose lives and health are being impacted daily.

Our community's goal is not to game the system, but to have a fair, transparent, accessible, and stable way of voicing our legitimate concerns about the noise pollution we endure. Instead of making the process more challenging for residents, I urge you to consider a system that respects the time and well-being of those affected by airplane noise.

I look forward to your response and hope for a constructive dialogue on improving this system for everyone involved.

Sincerely,
Fabio Ovettini

On Wednesday, October 9, 2024 at 02:29:17 p.m. EDT, [redacted] **wrote:**

Hi Fabio,

Once a complaint is submitted, the Noise Management Office utilizes the ANOMS system to investigate and correlate the complaint with a specific flight. If a flight can be identified, the complaint is registered and will be reflected in our statistical reports. If no corresponding flight is found, the complaint is categorized as 'Nothing Found.'

For a complaint to be accepted into the system, it must also meet the criteria outlined in our noise complaint process, including being submitted by a resident and containing valid contact information. Additionally, we ensure that complaints are submitted by individuals and not generated by bots. To enhance security, we recently introduced a CAPTCHA feature to the noise complaint form to protect our system and data from cyber security threats.

We report only on complaints that meet these criteria. Sometimes some complaints remain unprocessed at the time of the noise report publication and will be included in subsequent reports as the system updates. Our current reports are published for August 2024. We will be reporting on September shortly.

Please share the specific details of the discrepancy you're observing, and we will be glad to investigate further.

Thanks,
[redacted]

[redacted]

I am writing to seek clarification on how noise complaints submitted by the public are processed in your system.

It is my understanding that your system validates noise complaints before accepting them as valid entries. We are currently noticing a discrepancy between the number of complaints we have submitted and those that are officially reported by your system.

Could you kindly explain the following:

1. **Validation Process: What are the specific criteria or steps involved in the validation of noise complaints? Are there cases where a**

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

complaint might be rejected, and if so, for what reasons?

2. Discrepancies in Complaint Numbers: What could potentially account for differences between the number of complaints sent and the number officially recorded? For example, are complaints filtered or categorized in a way that affects their counting?

Understanding this process is crucial for us, as it will allow us to ensure that our records align with yours, and it will help us identify and address any issues that might arise during the submission process.

Sincerely,

Fabio Ovettini

On Monday, October 7, 2024 at 11:04:37 a.m. EDT, [redacted] wrote:

Hello Fabio, the following is a response to your October 3 inquiry regarding how noise complaints are processed in relation to noise monitors.

Noise monitoring data does not play a role in the noise complaint process. A noise complaint reflects an individual's experience of disturbance from aircraft operations, regardless of the measured noise levels at the nearest Noise Monitoring Terminal (NMT).

Aircraft Noise Regulations

It's important to understand that aircraft operating in Canada are regulated by their certification under noise standards, and adherence to noise operating restrictions and noise abatement procedures, not by noise levels measured by monitors. This distinction is crucial because even if a flight generates noticeable noise, this does not indicate non-compliance to regulations.

The International Civil Aviation Organization (ICAO) sets global noise emission standards for aircraft known as "chapters" (Chapter 2, Chapter 3, Chapter 4, and Chapter 14). Each new 'chapter' is more stringent than the last. Transport Canada requires that aircraft meet the Chapter 3 or above standards before they are allowed to fly at Canadian airports. At Toronto Pearson, nearly 70% of operations are conducted by quieter Chapter 4 and Chapter 14 aircraft.

Noise Monitoring and Thresholds
The noise monitors are designed to provide residents with information about their local noise environment. Thresholds are set based on typical ambient noise levels—65 dBA during the day and 60 dBA at night – to detect noise events that are louder than the background noise. Noise above the threshold can come from many sources, including aircraft, also sirens, or fireworks for example. We publish a variety of reports that analyze noise data including a comparison of aircraft noise to community noise, events above certain noise levels, and by type of operation.

Noise Complaint Process
As mentioned, noise complaints are based on personal experience of disturbance and are independent of noise monitor data. While there are 25 noise monitors across the GTA, the data from the closest monitor may not always reflect an individual's specific experience of the noise. Complaints help us understand community concerns, even if the noise level is not above noise monitoring thresholds. You will find more information on our complaint process here.

Thank you,

[redacted]

Subject: Video of Near-Collision at Pearson Now Available

Dear all,

Please note that the video showing the near-collision incident at Toronto Pearson Airport — previously sent as an attachment — has now been uploaded to Google Drive due to size limitations on several servers.

You can access it here:

https://drive.google.com/file/d/1ww3ArpIkRrtW_bPXGriCpJK4S8ij2vW1/view?usp=sharing
This video captures the moment when a landing aircraft was forced to abort at the last possible second to avoid a collision on the runway.

Sincerely,
Fabio Ovettini

Subject: Near-Collision at Pearson – How Many Must Die Before You Act?

Minutes ago, Toronto Pearson Airport came seconds away from tragedy.
A landing aircraft was forced to perform a dangerous emergency go-around — its wheels nearly touching the ground — to avoid slamming into another plane still on the runway.

I am attaching a screen recording of the incident.
Watch it.
Then ask yourself this:

How many people are you willing to kill before doing something?

Ms. Flint, Ms. Freeland, Ms. Michel, Mr. Carney, Ms. Sgro — this is what your negligence has built:
A deregulated, self-serving, self-policing corporate labyrinth where accountability has vanished and oversight is a joke.

You were warned.
You heard from residents.
You received complaint data, flight records, noise monitor failures, sleep deprivation reports, and legal notices.
And you did nothing.

Instead, you made speeches. You posed for photos. You praised "innovation."
Meanwhile, your creation nearly claimed hundreds of lives.

This was not a scare. This was a near-death event.
The only reason we're not mourning is the instinct of one pilot.

Next time, we may not be so lucky.

And so again, we ask you — and this time we expect an answer:

How many people are you willing to kill before doing something?

Sincerely,
Fabio Ovettini

Subject: Re: WebTrak Accessibility and Functionality

[redacted]

Thank you for your response.

To clarify: during the period I referenced, **only the WebTrak shell was loading—no data, no interface controls, no maps, no flight paths**. This occurred **for at least 15 minutes**, during which I made a deliberate effort to rule out user error or local connectivity issues.

I tested the site using **three separate browsers**—Firefox, Chrome, and Edge—and confirmed that **all other websites I accessed were functioning normally**. This was not an issue with my internet connection, browser, or device. It was an issue with WebTrak itself.

So here is my conclusion: **a system cannot be fixed by those who do not know why it is broken**.

I trust you will pass this along to your vendor with the seriousness it warrants. Repeating "we couldn't replicate it" is not a meaningful diagnostic response when a user provides timestamped evidence across multiple platforms.

Sincerely,
Fabio Ovettini

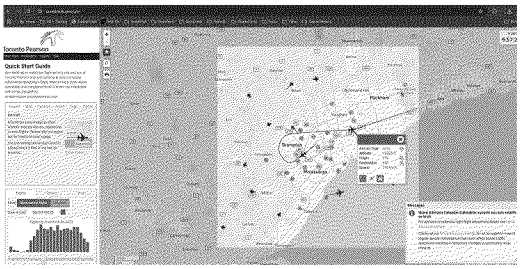
Hi Fabio,

Thank you for your continued advocacy on behalf of yourself and your community.

I've checked with our vendor and they are unaware of any WebTrak outages as per your email below. Internally, we have also tried to replicate your issue on our network and off, and are unable to do so. The site is rendering properly on our end for both historical and current operations. I've included a screenshot of what we see when trying to re-create this issue.

I can see via the screenshots you've attached that you did have an issue with the software, but also note that there does not seem to be a day populated in the Historical – Date to Load. I'm wondering if this is/was part of the issue or if you couldn't use that function? Either way, if you continue to have issues, please let me know. I'd be happy to set up a call to troubleshoot the issue(s) and rectify if there is an issue with the system on our end.



Additionally, I wanted to let you know in advance that Microsoft has advised us of scheduled maintenance on their Azure Analysis Services that may affect PowerBI report functionality in InsightFull. This will take place during a 24-hour window starting on Friday, July 11, 2025.

Impact:

This maintenance will affect PowerBI report functionality in InsightFull for all customers globally. During the maintenance activity, reports may fail to load, and users may encounter a blank screen.

We will display a message within InsightFull to let users know about the temporary disruption.

Maintenance Timing:

Start: 11 July 2025 at 07:00 UTC

End: 12 July 2025 at 07:00 UTC

Note: While the maintenance window spans 24 hours, the actual service interruption is expected to last no more than 6 hours.

Subject: Sudden Removal of WebTrak Aircraft Data – Unacceptable Censorship of Public Oversight

To:

Chrystia Freeland, Minister of Transport

Marjorie Michel, Minister of Health

[redacted]

Ms Judy Sgro, MP

Mr. Mark Carney, Prime Minister

Minister Freeland, Minister Michel, [redacted] Ms Sgro and Mr. Carney,

As of this morning, July 7, 2025, all flight data has been removed from the WebTrak platform used to monitor Pearson Airport operations.

The interface loads — but no aircraft appear, no complaint integration is available, no historical data can be accessed, and no live operations are displayed. The app is hollowed out. The public has been cut off.

This is not a browser issue. I have attached screenshots from Firefox, Chrome, and Microsoft Edge to confirm this is a system-wide removal. It is not a glitch. It is a calculated act.

Let's be clear:

- WebTrak was the only real-time visibility tool the public had to verify Pearson's flight activity.
- It was used to file noise complaints, investigate illegal overflights, and demonstrate health harms from overnight operations.
- Residents relied on it to defend themselves — in the face of institutional gaslighting by GTAA and regulatory inaction by Transport Canada and Health Canada.

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

Now, it has been turned off. Quietly. Without public notice. Without justification.

This is censorship, plain and simple.
It is an attack on public oversight.
It is a deeply disturbing indicator of authoritarian decay.

Are we a democracy — or are we drifting toward North Korea?

Who authorized this?
Where is the public notification?
Under what regulatory authority was this done?
How does this align with your government's stated commitments to transparency, public health, and environmental justice?

We demand an immediate explanation — and full restoration of all WebTrak functionality, including live flight data, complaint integration, and historical playback. The federal government is legally responsible for oversight of GTAA under the terms of its lease. The Minister of Health is constitutionally obligated to protect Canadians from harm.

This silencing of residents — in the face of overwhelming noise exposure, sleep deprivation, and medical distress — is not only unethical, it may constitute a Charter violation.

We will not remain silent while our communities are deafened and digitally erased.

I await your reply.

Sincerely,

Fabio Ovettini

Subject: Re: Removal from Pearson-related Email List

Timothy Christian School Administration,

I have received your request to be removed from the mailing list regarding Pearson Airport and its harmful operations. While I will respect your wishes and proceed with the removal, I feel compelled to share the following.

I am myself a product of private Catholic education—institutions that instilled in me not just academic rigour but a moral obligation to stand up against injustice, protect the vulnerable, and speak out against abuse. That formation taught me that silence in the face of harm is complicity.

Which is why I must admit, I am deeply surprised that a school—especially one built on Christian values—would choose to disengage from an issue that directly affects the health, development, and future of its students.

The evidence is overwhelming. Studies from the **World Health Organization**, **Harvard School of Public Health**, and **Lancet Public Health** have consistently shown the profound impact of aircraft noise on cognitive performance in children. For example:

- A study published in *The Lancet* found that for every 10-decibel increase in aircraft noise, children's reading scores dropped significantly.
- The **RANCH study** (Road Traffic and Aircraft Noise Exposure and Children's Cognition and Health) spanning schools near major airports in Europe found that chronic exposure to aircraft noise delays reading and impairs memory.
- The **WHO Environmental Noise Guidelines** clearly state that aircraft noise is linked to increased stress hormones, sleep disturbance, and reduced academic achievement in children.

This is *not* a theoretical risk—it is an active, measurable harm.

Sleep deprivation and noise exposure are silently robbing children of their full potential. Choosing to disengage from this issue is, knowingly or not, a choice to accept that harm. I encourage you to reconsider this position. At the very least, I would welcome the opportunity to speak directly with your leadership team to address any questions or misconceptions you may have.

Thank you for your time—and I hope you will reflect on what kind of legacy we want to leave for the next generation: one of disengagement, or one of moral courage.

Sincerely,
Fabio Ovettini

Subject: Two Noise Monitors Down – Continued System Failures at GTAA

Subject: Two Noise Monitors Down – Continued System Failures at GTAA

[redacted] and Minister Freeland,

As of this morning, yet another noise monitor has gone down—this time the one located at Eriksdale Avenue. That makes two community monitors out of service simultaneously, including the already non-functioning unit at Oriole Park.

This is not a minor technical hiccup. These failures are emblematic of a broader pattern of rot and institutional decay at GTAA—one that continues to erode any remaining public trust in your ability to manage even the most basic aspects of airport accountability.

You are knowingly leaving communities unmonitored and unprotected in the face of constant low-altitude jet traffic and dangerous nighttime overflights. Without functioning monitors, data disappears—and with it, any pretense of transparency, oversight, or meaningful public reporting.

Your failure to promptly repair even one of these monitors speaks volumes.

In any country with basic accountability standards, this level of technical negligence, data suppression, and contempt for residents would be grounds for resignation. In Japan, the responsible leadership would bow. Here, the system just continues to rot.

We demand immediate answers:

- When will the Eriksdale and Oriole Park monitors be fixed?
- What caused these failures, and how long were you aware before acting?
- What contingency plans exist to ensure communities are not left in data darkness?

This cannot be brushed aside with another vague excuse. We are tracking every failure, and we will not stop documenting, escalating, and exposing them—locally, federally, and internationally.

Minister Freeland,

Your Wikipedia page paints you as a leader—someone willing to take risks, do the right thing, and speak uncomfortable truths, even when it comes at a cost.

But here, in this fight, you have not yet left the comfort of the trenches.
You have not stood with the people.
You have not forced accountability.
You have not even responded.

Are you getting old and complacent? Or worse—are you now part of the machine you once swore to challenge?

As Churchill warned:

"To each, there comes in their lifetime a special moment when they are figuratively tapped on the shoulder and offered the chance to do a very special thing. What a tragedy if that moment finds them unprepared or unworthy."

This is one of those moments.

Sincerely,

Fabio Ovettini

P.S.
When we say, *"In Japan, the responsible leadership would bow,"* we're referring to a cultural expectation of honour, humility, and public accountability. In cases of failure or scandal, executives and public officials in Japan often bow deeply—sometimes even resign—acknowledging their responsibility and expressing genuine remorse.

At GTAA and within Transport Canada, we see the opposite: denial, delay, silence, and spin. No one apologizes. No one steps aside. The system protects itself while the public pays the price.

Morning,
As you all know, we have been working tirelessly over the past few years to engage every level of government in addressing the airplane noise pollution that is affecting our health. Despite our efforts, MP Judy Sgro, MPP Tom Rakocevic, Councillor Perruzza, and Matias de Dovitiis have consistently refused to assist. Whenever we raised the issue, we were met with delays and evasions.

Noblesse oblige, MP Judy Sgro, Councillor Perruzza, and Matias de Dovitiis on the latest online newsletter addressed airplane noise pollution and provided instructions on how to file a noise complaint. No mention of the issue, that I know of, from the office of MPP Tom Rakocevic,

As a result, much like in the past, we had no other choice but to come together as a community and take on the work that our elected representatives are supposed to do, the work they are getting paid to perform.

It is with great satisfaction that I now share the results of our collective efforts. The results of a very efficient community. Please see the pictures below.

Our riding, Humber River--Black Creek has managed to increase the number of complainants from 77 to 106 a 37.66% increment. Most community members were unaware of the existence of a complaint system.

Month	# Complainants	Increment %
June, 2024	7	Baseline
July, 2024	77	1000.00%
August, 2024	106	37.66%

We have managed to increase the number of complaints from 106537 to 338637 a 217.86% increment.

Month	# Complaints	Increment %
June, 2024	186	Baseline
July, 2024	106537	57177.96%
August, 2024	338637	217.86%

When the state decides to break the Social Contract there is a philosophical argument that individuals have a right to defend themselves and their rights. And we will.

This is just the beginning. There is much more work to be done. Our community will get it done!

Please see the picture below.

[redacted]

Thank you for your email and the update on Toronto Pearson's noise complaint process and reports. I would like to address the points raised in your correspondence and clarify a few key matters from the community's perspective.

1. Complaint System Functionality

You have not provided any clarity about the status of your new complaint system. Is it operational? Has the testing phase been completed?

2. Changes to 2024 Reports

The lack of transparency regarding changes to the 2024 monthly reports is troubling. You have failed to address the recent changes to the 2024 monthly reports, where numbers have been retroactively altered and, in all cases, reduced. Why the numbers were retroactively altered, and why has this not been clearly communicated to the public?

3. Volume of Complaints

Our community is overwhelmed with noise pollution, enduring over 500 airplanes flying overhead daily. Capturing and submitting complaint data for this volume of activity would require someone with advanced technical skills to dedicate at least 15 hours a day. This is an unreasonable expectation, forcing our community to organize and create collective solutions to engage with the GTAA—an organization that has repeatedly demonstrated a lack of transparency.

4. System Failures

Your complaint system has not been functioning properly for months. Many community members, including myself, have encountered significant challenges in manually submitting complaints. Given these circumstances, we expect all complaints submitted—whether manually or through alternative methods—to be acknowledged and accurately counted.

5. Unreasonable Expectations and Security Concerns (fingerprinting)

When your complaint system was down, our community took initiative by creating a secure process to submit complaints. This involved:

* One email containing the event data,
* A second email with an encrypted file holding complainants' personal information,
* A third email with the encryption key to ensure the safety of sensitive data.

However, Ms. Connelly later stated that each complainant needed to submit their personal information directly, insisting that complaints be made by the individual listed on the form. This created serious concerns:

* It exposed complainants to identity theft by requiring unencrypted emails containing sensitive personal information, leaving them vulnerable to malicious interception.
* It excluded community members who lack the technological means or knowledge to encrypt their data. Most people do not know how to encrypt files, leaving them unfairly marginalized and unable to participate.

This decision effectively disenfranchised residents without access to digital literacy or resources, further alienating those most affected by airport operations.

I would also like to highlight that your system is essentially fingerprinting every community member who places a complaint. By "fingerprinting," I mean your system extracts personal information from individuals' computers to create profiles. Without previous notification to the user. This raises serious legal and ethical questions. How lawful is this practice?

6. Retroactive Changes to Reporting

I strongly oppose the retroactive changes to noise complaint reporting. These changes are not only unfair but may also be illegal. You broke the complaint system, removed a secure way for individuals to voice their concerns, and then altered how complaints are reported. Informing us of these changes three months later only adds to the perception of mismanagement and undermines your claims of transparency or accountability.

7. Phone System Issues

During this period, your phone system was also down, further compounding the issue. This is an insult to the communities impacted by airport operations.

8. Legal Considerations

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

Have you consulted your legal department to ensure that retroactively altering the complaint data reporting complies with legal and ethical standards? I urge you to revisit this decision and ensure that all complaints—regardless of submission method—are recognized and accurately included in your reporting.

9. Unbelievable Misconduct

If I don't like the score, I change the rules in the middle of the game and retroactively clear the scoreboard. This is unbelievable misconduct, and not even history's most infamous regimes attempted such audacity.

10. Rebuilding Trust

While I appreciate the update regarding your plans for community engagement in 2025, it is essential to acknowledge that trust between the GTAA and the community has been severely eroded. Your meetings increasingly feel like box-ticking exercises, with declining attendance reflecting the community's perception that these gatherings lack authenticity and meaningful engagement. Rebuilding trust will require more than meetings; it will require substantial action.

Proposed Actions

To rebuild trust and ensure the noise complaint process is accessible and inclusive, I propose implementing the following measures:

Restore the Secure Submission System: Reinstate or replace the secure system to prioritize user privacy and confidence.

Investigate and Resolve Technical Issues: Address the ongoing problems that hinder complaint submissions.

Commit to Transparency: Clearly explain the changes to complaint numbers and ensure accurate reporting

Recognize the Value of Automation: Acknowledge that automation is a tool for efficiency, widely accepted in modern systems. The current complaint system forces us to choose between being productive members of society or dedicating countless hours to address the devastating health effects your organization imposes on us. This is an impossible choice. The only party that benefits from this flawed system is you, as it allows your adverse impacts to continue unchecked.

Provide Resources to Impacted Communities: Mail physical instructions on how to submit noise complaints to every residence, school, daycare, retirement home, hospital, library, and community center in affected areas.

Mitigate Noise in Schools: Construct enclosed exterior structures around schoolyards in affected areas to provide isolation during times when clear and uninterrupted communication is essential, as modeled by successful implementations at Heathrow Airport in London, England. Retrofit all schools with acoustical insulation panels and triple-glass windows to minimize interior noise levels during class hours.

Retrofit Residences and Facilities: Extend noise mitigation efforts to affected residences and essential facilities, including hospitals, daycare centers, learning centers, medical buildings, old age homes, libraries, community centers, rehabilitation facilities, and places of worship, etc.

Implement Night Traffic Restrictions: Cease all nighttime flights to align with Health Canada's sleep recommendations.

Enforce Aircraft Compliance: Ban A320 aircraft without vortex generator retrofits, as they produce excessive noise. This fix, a small metal tab costing only a couple thousand dollars, has been available for well over a decade and significantly reduces noise levels. There is no justification for continued non-compliance.

Temporary Measures Pending Long-Term Solutions

The above measures are temporary solutions while GTAA re-evaluates its long-term options. These options must include:

- Relocating the airport to a less densely populated area to reduce its impact on residents.
- Appropriating surrounding lands affected by airplane noise, ensuring fair compensation and planning for the future development of quieter zones.

We are a united and determined community, and you will need to work with us—not against us—to address these ongoing issues.

I look forward to your response and hope to see a commitment to meaningful change that prioritizes the health, well-being, and quality of life of the communities you serve.

P.S. Attached, you will find a PDF document with the contents of the email.

Sincerely,
Fabio Ovettini

Fabio,

I am providing you with a response regarding Toronto Pearson's noise complaint process, and a status update on the noise complaint reports for July through October 2024.

Noise Complaint Process

As noted in our November 7 correspondence, we identified that you have been using digital tools to auto-generate a very high volume of noise complaints for yourself and others. In that correspondence, we requested that you discontinue automated submissions. However, you continued to submit auto-generated complaints. Over the past five months, we have received more than 1.8 million complaint submissions originating from you, some of which were made on behalf of others.

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

As of October 2024, we implemented enhancements to the noise complaint process and noise complaint form to maintain the efficiency, proper functioning and usefulness of the system and its data for all users and the GTAA.

If you continue to auto-generate complaints in violation of the system's terms of use, we will block your IP addresses from submitting complaints online to the noise complaint system. For further details, we encourage you to review the GTAA Noise Complaint Process. Please note that we will no longer respond to any further correspondence on this issue.

Noise Complaint Reports

1. From October onward, any complaints submitted using an auto-generated system or on behalf of others will not be included in our reporting, in accordance with our updated noise complaint process.
2. For the period prior to these procedural updates (July through September), auto-generated complaints and those submitted on behalf of others will be included in the GTAA's reports. However, these complaints will be reported separately from standard complaint data. As a result, the July and August complaint reports will be updated. These updated reports, as well as the September and October reports, will be published within the next week to 10 days.

We understand your concerns and remain committed to finding ways to work with the community about noise matters. While the excessive volume of your complaints does not heighten our awareness of community noise concerns, we value opportunities for dialogue. To that end, we will be hosting another open house in your community in early 2025 and will be happy to meet with the community members you have been representing. We will be in touch in the new year with details.

Regards,

[redacted]

I believe [redacted] — who replaced [redacted] — is the same person who attended the meeting called by Judy Sgro last year at St. Jude. He was the one chewing gum throughout the meeting.

This is also the same person who, along with [redacted] was making faces and rolling his eyes while I was speaking with the representative from NAV — the one who got unusually animated when talking about straws. Their behaviour was so disturbing that I had to stop the conversation, look [redacted] directly in the eye, and ask, "Do you think rolling your eyes and making faces makes you look professional?"

He didn't respond.

So I followed up by saying, "No, it doesn't — you look like an idiot. Don't ever do that to me again."

He choked on his gum. And that was the end of it.

Sincerely,
Fabio Ovettini

On Monday, May 26, 2025 at 10:07:12 a.m. EDT, [redacted] wrote:

Hello [redacted]

Thank you for the updated information regarding the positions at the GTAA and the instructions on whom to contact about airplane noise now. I've forwarded your email to everyone that is usually copied on the emails regarding airplane noise so they are also informed about the updated positions at the GTAA.

Will you be handling airplane noise concerns any differently than [redacted]? Over the past few years, we attended several meetings and sent many emails to both of them, but all of the suggestions we made were dismissed. Eventually, it became very difficult to communicate with them, as they began to ignore questions and tuned some of us out entirely. It was a very frustrating and upsetting experience to have gone through.

I had suggested to [redacted] mail out instructions on how to file a noise complaint to all residents living in flight path areas around Pearson Airport, in the spring and fall. She informed me that she would not be doing this and expressed confidence that Pearson's website provides sufficient direction on how to file a noise complaint. I explained to her that many residents affected by airplane noise do not know how to file a complaint—or are even aware of Pearson's webpage—particularly older members of our community who do not use computers. I hope this is an issue that you will now address. If you can please let me if you will mail out instructions it would be good.

Last Friday night and into the early hours of Saturday morning, the airplanes were loud and frequent till 12:45 am, and I lost a couple of hours of sleep. I called and left you a message to let you know.

I hope you understand that airplane noise is a real concern—it affects people's health, disrupts sleep, limits social interactions, increases pollution, and even impacts children's ability to learn in school. While many in government and at the GTAA have acknowledged airplane noise as an issue of concern, we have yet to see any meaningful action.

Pearson Airport's CEO, Deborah Flint, has stated her intention to aggressively increase air traffic in the coming years. From what I've seen, she appears to have little concern for those of us affected by airplane noise, with her focus is solely on GTAA's economic growth. Robyn Connelly told me that air traffic will increase, there is nothing I can do about it, and that this is just the way it is going to be from now on. I hope I will never hear a statement like this come from you.

Chrystia Freeland, the current Federal Liberal Minister of Transport, and Kamal Khera, the Federal Liberal Minister of Health, continue to ignore the airplane noise issue at Pearson Airport. I am disappointed in both of them and had hoped that under the leadership of Prime Minister of Canada Mark Carney, we would start seeing meaningful changes. Conservative Federal opposition leader Pierre Poilievre is the only person in Federal Government that I have heard speak out about air traffic at Pearson Airport - increased traffic on the 401, pollution and noise.

I sincerely hope you will be an improvement over [redacted] in addressing the concerns around airplane noise and I look forward to working with you here now!

Take care,

[redacted]

Subject: Pearson Airport Noise Compliant Manager

Hello [redacted]

I'm not sure why you're no longer working at Pearson Airport as the manager of the complaints department. I do wish our relationship had been better, particularly in addressing the impact of airplane noise for people in my community affected by it. It's unfortunate that more couldn't have been done to reduce that impact, simply ignoring it. Your hands were likely tied here.

Deborah Flint, the CEO of the GTAA, seems unconcerned about the ever-increasing planes flying over homes near the airport. She was hired by the GTAA specifically to increase air traffic at Pearson Airport, and she has certainly done that—unfortunately, with little regard for the health and well-being of the people affected by the plane noise. Everyone acknowledges airplane noise is a health concern, yet nothing meaningful has been done about it. The Federal Liberal Government continues to ignore this issue, and the current Minister of Transport, Chrystia Freeland, is no better than the former ministers—Omar Alghabra, Pablo Rodriguez, or Anita Anand. Federal Liberal Minister of Health Kamal Khera is no better than Mark Holland. Federal Conservative Leader Pierre Poilievre spoke out about plane noise at Pearson Airport.

The last time I spoke with GTAA's Robyn Connelly, about five months ago, she told me in a proud voice that air traffic at Pearson is only going to get busier, that there's nothing I can do about it, and that this is just how things will be from now on. I guess she wanted me to shut-up and disappear and not bother her anymore. She no longer responds to my calls and broke a promise she made to me. It's clear she doesn't care about me or others affected by airplane noise.

I hope you have new career opportunities waiting for you—or perhaps you're planning to retire early. Either way, I sincerely wish you all the best.

Take care,

[redacted]

Subject: Plane Noise On A Saturday Afternoon

Hello [redacted]

Today, I was outside cleaning up and doing some gardening and it was difficult to do because of the constant noise from the planes flying over my house. Planes were every 40 to 60 seconds, with noise levels reaching 70–80 decibels. As you are well aware this is an unhealthy situation to be living in.

The girl who works for you at the GTAA Robyn Connelly, informed me that air traffic will only get busier, there's nothing I can do about it, and that this is simply how things will be from now on. What do I do? What would you do?

Do you get a chance to take a break and enjoy some peace and quiet during a regular workday? There was no quiet time for me today from the planes. The quality of life in my neighbourhood is not good because of plane noise, and it must be addressed but you choose to simply ignore us!

I urge you to take airplane noise matter seriously!

Sincerely,

[redacted]

Subject: Re: New Issue. Pointing Without Pointing

[redacted]

It took weeks for your team to notice the glaring errors in the monthly noise complaint reports for February and March. But rather than issue a note of correction, a statement, or any public acknowledgement, the reports were quietly replaced. Silently. In the middle of the night.

The assumption seems to be that no one would notice. That if the documents are swapped discreetly enough, the problem vanishes. That the public isn't watching closely. That transparency can be retrofitted silently, without accountability.

Wrong. I noticed.

Once again, revised public documents have been issued **with no change-log, no explanation, no footnote, and no record of error.** This is not a minor procedural lapse. This is a pattern. This is how trust erodes: not with major scandal, but through repeated, quiet evasions of responsibility.

If this is your definition of accountability—editing public data without a trace—then it is time to revisit the word entirely. Public trust does not survive on quiet edits and late-night file swaps. It survives on truth, clarity, and the willingness to admit mistakes in daylight.

Sincerely,

Fabio Ovettini

Subject: New Issue. Pointing Without Pointing

[redacted]

It seems there may be a **new** issue affecting the system or how it's being managed. I won't point to specifics this time—I trust someone on your end will be able to spot it.

No need for me to point it out, of course. I imagine the supersonic error detection system already flagged it internally the moment it occurred.

Sincerely,

Fabio Ovettini

Subject: Re: May 2025 Complaint Data Update

[redacted]

Thank you for your message of June 20 regarding the delay in publishing complaint numbers for May 2025.

As you are surely *"aware,"* two weeks from the date of your email marked a clear deadline of July 4. That date has now passed. None of the commitments you made—providing a status update, notifying me when the data was available, or actually publishing the data—have been fulfilled.

More importantly, as you are also *"aware,"* your complaint management system **crashed on May 4, 2025** and was down for several hours. And yet, to this day, **the public has not even received a basic acknowledgement that the system failed.** No notice. No apology. No explanation. It was simply brought back online as if nothing had happened.

This silence is unacceptable—especially considering that this same data is then presented to Transport Canada and Health Canada to secure ongoing operational approvals. **If the May numbers are missing, corrupted, or incomplete, it would amount to a serious misrepresentation of community impact.**

So I must now ask directly:

- **How many complaints were lost during the May 4 outage?**
- **Is the continued absence of May data due to the fact that you no longer know what the numbers actually are?**

This is no longer a question of software updates or electoral boundary realignments. This is a question of integrity and accountability.

I look forward to a direct response that addresses both the missing data and the failure to acknowledge the system crash.

Sincerely,
Fabio Ovettini

Hi Fabio,

Thank you for your continued engagement on behalf of your community.

As of this moment, no complaint numbers have been published for May 2025. As you may be aware, the boundaries for the federal ridings changed with the last Federal Election. As you

ATIA - 19(1)

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

may also be aware, the software we use to monitor and report on complaints is tied to these Federal ridings. As such, the team is working together with our vendor to implement those changes and make sure that all profiles are allocated to their correctly updated riding.

We anticipate that this process will be completed, and that data will be populated properly within the next 2 weeks. We appreciate your patience on this matter, as we are addressing the change as quickly as possible.

If you have any further questions about this, please feel free to reach out and we'd be happy to explain further and I will ensure the team sends you an email to let you know when the updates are finalized and data populated.

Regards,

Subject: Vanished May Noise Report — Continued Disrespect Toward Communities

Dear [redacted]
Dear Minister Freeland,

The May 2025 Noise Report, which was posted for four to five days showing blank entries for both the number of complaints and the number of individuals, has now disappeared—just as abruptly as it was published. There has been no notice, no explanation, and no accountability.

Once again, communities are left completely in the dark. We do not know *why* the report was removed, *who* made that decision, or *whether* we should continue submitting complaints. The message is loud and clear: our concerns are being erased.

Minister Freeland, I must once again remind you that the clauses in the lease agreement with the GTAA are not being honoured. The federal government cannot continue to look the other way while the operator of Canada's busiest airport shows such blatant disregard for the rights and wellbeing of surrounding communities.

And what Ms. Flint is doing in response—avoiding explanations, erasing data without notice, and failing to engage with the public—is like putting salt on an open wound. It deepens the harm, adds insult to injury, and confirms the growing sense that your office sees us as a nuisance rather than as citizens who deserve protection.

The continued removal or manipulation of public data, the absence of clear communication, and the dismissive treatment of affected residents all point to a culture of contempt and institutional failure. These are not isolated incidents—they are part of a persistent pattern that demands oversight and corrective action.

We are witnessing *manotazos de ahogado*—last-ditch flailing disguised as governance. Communities deserve better. Canada deserves better.

Sincerely,

Fabio Ovettini

P.D. *"Manotazos de ahogado"* is a Spanish idiom that literally means "the flailing of a drowning person." It refers to desperate, chaotic, last-ditch efforts made when someone is already overwhelmed or failing—often ineffective and coming too late.

Subject: Request for Confirmation: WebTrak Operational Status and Data Accuracy

Ms. Flint and Mr. Thomas,

Following the July 28 WebTrak outage between 19:00:00 and 19:59:59—during which only two operations were displayed despite continuous overhead aircraft—I have been informed by [redacted] that the missing data has now been "restored."

Given the ongoing pattern of technical failures, late-night report alterations, and inconsistent data handling, your team owes the public a transparent and verifiable account—not vague reassurances.

I am requesting a clear and formal confirmation of the following:

1. That **WebTrak is currently functioning properly**, with no active outages or display failures.
2. That **no other data anomalies exist for July 28**, either **before or after** the 19:00–20:00 window.
3. That **no similar data gaps or system failures occurred** in the days immediately before or after July 28.
4. That **all data currently presented by WebTrak—including the restored entries for July 28—is complete, unaltered, and factually accurate**, faithfully reflecting the actual number of aircraft operations during all displayed periods.

Your systems do not merely inform the public—they shape public trust. When data disappears, or when restored data is incomplete or manipulated, that trust collapses.

Please confirm the above, without ambiguity.

Sincerely,
Fabio Ovettini

Subject: WebTrak Failure at 19:00 – Another Example of GTAA's Corruption and Lack of Transparency

To: Ms. Freeland, Ms. Michel, [redacted] Ms. Sgro

On July 28, 2025, between 19:00:00 and 19:59:59, WebTrak recorded **only 2 aircraft operations**—an impossibility for a major international airport like Pearson during peak hours. Aircraft were clearly audible and visible overhead, yet your system showed nothing.

This is not a minor glitch. This is a **system-wide failure**, and it raises critical questions:

- **How many aircraft operations in total went unregistered by WebTrak on July 28?**
- **Will this data be recovered, and if so, when?**
- **Will the public be notified transparently when the actual data is restored—if it ever is?**

Let me remind you:

In **Q1 2025**, your **complaint management system suffered four separate outages**, totaling approximately **27 hours**. You claimed at the time:

"We are working with vendors to recover this data."

Are we to assume this is the same pattern repeating? A system that routinely fails during critical moments—and a leadership team that *routinely hides behind vendors* when confronted?

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

When systems go dark, **public trust dies with them**. And when data is quietly erased, **your credibility is erased alongside it**.

Enough. We demand answers. And we demand them now.

Sincerely,

Fabio Ovettini

Subject: You Had the Chance to Be Transparent. You Declined.

[redacted]

On **Monday, August 4**, I gave you a chance.

I offered you the opportunity to be **proactively transparent**, to come clean about the **system outages** that continue to sabotage community engagement. I wrote:

> "Additionally, I urge you to begin **publicly posting every single system outage—past, present, and future—including duration, cause, and corrective action—so there is a permanent and accessible record.** At present, outages are quietly corrected after being reported by the public, with no acknowledgement, no documentation, and no transparency. As if they never happened.
>
> *And while we are at it: **Would you like to be proactively transparent and report any outages that occurred over the past long weekend?** Or will this be yet another case where the public is left to detect the failures, report them, and watch them vanish without explanation?"*
>
> *(Sent: Mon, Aug 4, 10:51 PM)*

I followed up the next day with the same question — still unanswered:

> *"How many times did your systems go down this past weekend?*
> *How many hours of flight and noise data were lost?*
> *How many complaint submissions were disrupted?*
> *And how long do you think you can keep dodging accountability?"*
> *(Sent: Tue, Aug 5, 1:35 PM)*

You said nothing. You took no action. And so now, **I will explain to the public what you refused to admit**.

Monday, August 4, 2025

A group of community members gathered to enter the final set of complaints for the month of July—a small act of democratic engagement from residents who've been ignored, gaslit, and physically harmed by your operations.

And once again, **GTAA shut the door in our faces.**

Your **complaint portal was down for most of the day.**
"504 Gateway Time-out."
We waited. And waited. And waited.
No notice. No update. No fix.
Just silence—again.

Screenshots are attached.
You can't lie your way out of this one.

You make us sick.
You deprive us of sleep.
You pollute the air we breathe.
You torment us with a daily barrage of noise, and then, when we try to hold you accountable, **you do it again**—by taking away the tools for engagement.

You waste our time. You steal our health. You insult our intelligence.
And then you call it modernization.

So now we're going to talk about compensation.

Because under **well-established principles in Canadian environmental law**, **the polluter pays**.

You have:

- Destroyed our ability to sleep, work, and concentrate.
- Contaminated the air our children breathe.
- Sabotaged democratic tools like public forums and complaint systems.
- Manipulated public data that is used to shape health and transport policy.

And you've done it knowingly, consistently, and **with contempt for the public**.

And what did we receive in return?

A **$50 Visa gift card**.

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

Yes — a few years ago, GTAA offered some residents a **prepaid card** as “compensation” for the privilege of having jets roar overhead day and night, every single day, for years.
It was a **pathetic and insulting gesture** — a **mockery of accountability** — and the most transparent example of your belief that **our suffering can be bought off cheaply**.

You poisoned the skies. You stole our sleep. And you sent us a gift card.

So I ask you now, formally and in writing:
What is your plan to compensate the people you’ve harmed — meaningfully, transparently, and lawfully?

Because this time, we’re not taking your crumbs.

To Minister Freeland and Minister Michel:

Please understand the situation clearly.

GTAA is not simply mishandling complaints. It is **deliberately sabotaging public participation**. This isn’t speculation — it’s documented.

Let me remind you what happened during the **last GTAA public meeting**, scheduled for **three and a half hours**:

- It was **abruptly closed after just 45 minutes**.
- **No notice** was issued.
- **Multiple residents**, including myself, sat for over an hour in the waiting room, believing we were about to be let in.
- The platform gave no message, no warning — just silence.
- No recording has been posted. No explanation offered.

This wasn’t a scheduling error. This was **intentional obstruction**. A digital door slammed shut on the very people GTAA is supposed to be listening to.

Now combine that with:

- Repeated portal outages, including the one on **August 4**
- Complaint reports being manipulated post-publication
- A leadership team that refuses to respond until caught
- A noise and emissions regime that continues to harm thousands daily

And ask yourselves: **What kind of system is this?**

Because if you continue to rely on GTAA’s sanitized, self-serving reports—**then you are complicit.**

We are documenting everything.
We are building the timeline.
We are gathering the names.
And this time, we will not be silenced.

Sincerely,
Fabio Ovettini

Subject: Recurring Failure of Noise Monitor Terminals

To [redacted] and GTAA Noise Management,

The Pond Street and Lisgar Green Park noise monitor terminals have once again gone down. This is not an isolated occurrence but a recurring failure that has become emblematic of GTAA's disregard for accuracy, transparency, and accountability.

For communities forced to endure aircraft noise day and night, these outages are more than a technical malfunction. They are an insult — one more demonstration that the "noise management system" you promote is unreliable and unfit for purpose.

I remind you that under the Pearson lease, GTAA is obligated to operate in compliance with **all applicable environmental laws and regulations**. The consistent failure of noise monitoring infrastructure undermines your ability to comply with those obligations and to provide Transport Canada and the public with accurate data.

And let me be absolutely clear: this is not the only issue. There are additional matters — serious, documented, and damning — that I am intentionally withholding at this stage. I am also tired of being treated as your tester. It is not my role, nor the role of affected communities, to constantly catch your failures. You should be conducting your own testing and debugging before placing any system online. These matters will be disclosed in full during discovery, under oath, where evasions and excuses will carry consequences.

You should treat this as advance notice. These repeated failures will not disappear into the background. They will form part of the evidentiary record of your negligence and breach of duty.

Below are the print screens documenting the failures.

Sincerely,
Fabio Ovettini

Subject: Request for Assistance in Addressing GTAA Complaint Reporting Discrepancies
Date: 2025-01-28 2:36:51 PM

Warning: This message is from an EXTERNAL SENDER - be CAUTIOUS, particularly with links and attachments.
Attention: Ce message provient d'un EXPÉDITEUR EXTERNE - soyez PRUDENT, en particulier avec les liens et les pièces jointes.

Good day Councillor Perruzza,

I hope this email finds you well. I am writing on behalf of our community to address serious concerns regarding the Greater Toronto Airports Authority (GTAA) and its complaint reporting practices.

As you recently visited the airport at the invitation of GTAA, we wanted to take this opportunity to ask if you are aware of the corruption case our community uncovered. Specifically, we exposed instances where GTAA manipulated complaint reports to favor their interests, undermining trust in their processes.

During your visit, were you able to raise this issue with them? If so, we would greatly appreciate hearing about any steps they indicated they would take to address this matter. If not, we urge you to use your position as our representative to help ensure transparency and accountability in how GTAA manages community complaints.

Our community has been facing ongoing challenges with GTAA, including:

1. **Exclusion of Q3 2024 Complaints**: Complaints submitted during this period that aligned with the previous process were excluded from the quarterly reports without adequate explanation.
2. **Significant Discrepancies in Monthly Reports**: The July report saw a 27.85% increase in complaints compared to its initial version, while the August report experienced a 42.64% increase. These anomalies remain unexplained, raising concerns about transparency.

We would like to know if you are willing to advocate for the community you represent and help us get clear answers and accountability from GTAA. Your support in holding them accountable would demonstrate a strong commitment to protecting the interests of the residents you serve.

Thank you for your attention to this important matter. We look forward to hearing from you.

Sincerely,
Fabio Ovettini

Dear Committee Clerks and Ministers,

Please find attached my disclosure submission (**PSIC-D-2025-0955**) and the **October 9 2025** response from the **Public Sector Integrity Commissioner (PSIC)** declining to investigate.

The matter concerns **Transport Canada's oversight of Toronto Pearson International Airport** and the federal government's continuing failure to enforce the terms of the airport's Ground Lease. The evidence demonstrates:

- a **25-year lapse** in updating the airport's **Noise Exposure Forecast (NEF)**, **constituting non-compliance with the Pearson Ground Lease**, which explicitly requires the Tenant (GTAA) to maintain and update NEF contours as part of its Noise Management and environmental obligations under **Sections 7.01, 7.01.01(ix), 8.11–8.13, 9.02, 9.04, and 37.08**; and

- **non-enforcement by Transport Canada**, as lessor, of these environmental and community-protection clauses despite the resulting public-health and environmental impacts.

These failures amount to **gross mismanagement** and **breach of federal environmental duties**, meeting the definitions of wrongdoing under **sections 8(c) and 8(d)** of the *Public Servants Disclosure Protection Act (PSDPA).*
Despite this, the Commissioner declined to investigate under **section 24(1)** — a decision I have now formally asked the Office to reconsider.

I respectfully request that this correspondence and its attachments be **circulated to all members of the Standing Committees on Transport (TRAN), Health (HESA), Government Operations (OGGO), and Access to Information, Privacy and Ethics (ETHI)** for their information and consideration. Given the systemic nature of the issue, I also ask that the Committees consider **calling upon the Commissioner and Transport Canada to explain their respective decisions and oversight failures.**

PROTECTED B

October 8, 2025

Mr. Fabio Ovettini
34 Jodphur Ave
Toronto, ON M9M 2J4

Re: File No. PSIC-D-2025-0955

Dear Mr. Ovettini:

This letter is in response to the submission of information concerning alleged wrongdoing in the federal public sector that you made to my Office on September 9, 2025, pursuant to subsection 33(1) of the *Public Servants Disclosure Protection Act* (the Act), and further to correspondence from my Office to you dated July 28, 2025, August 5, 2025, August 12, 2025, and September 2, 2025, regarding the same subject-matter. The purpose of this letter is to inform you of my decision not to proceed with an investigation into your allegations for the reasons outlined below.

Before I may commence an investigation based on information received from a person who is not a public servant, subsection 33(1) of the Act provides that I must have reason to believe that wrongdoing, as defined under section 8 of the Act, has been committed. I must also have reasonable grounds to believe that the public interest requires an investigation, taking into account sections 23 and 24 of the Act, which set out the restrictions and discretionary factors to be considered in deciding whether to commence an investigation.

I note that I have already issued multiple decisions on substantially the same subject-matter, namely, the administration and enforcement of the *Canadian Environmental Protection Act*, the *Aeronautics Act*, and associated regulations by Transport Canada in relation to Toronto Pearson International Airport (file nos. PSIC-D-2025-0577, PSIC-D-2025-0722, PSIC-D-2025-0779, PSIC-D-2025-0833, and PSIC-D-2025-0878). For example, your allegations that Transport Canada has refused to enforce the Greater Toronto Airports Authority's (GTAA) obligations to comply with laws under the terms of the ground lease and has tolerated the disabling of community noise monitors, the alteration of reports, the falsification of data, and inaction in the face of public disclosures, all of which you allege has created risks to public health and safety due to excessive aircraft noise, are substantially similar to your allegations in PSIC-D-2025-0878.

Although you claim that your most recent submission "introduces additional and material evidence not included in prior filings," more specifically, the GTAA's alleged failure to update the Noise Exposure Forecast, I am of the opinion that this is not, as you

ATIA - 19(1)

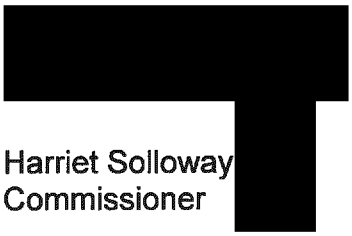
Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

suggest, "a distinct and ongoing form of gross mismanagement and a substantial danger to the health and safety of the public," but rather a continuation of the numerous submissions you have already made to my Office. Moreover, upon review of your latest submission, I note that you have not provided reasonable information to support your allegations regarding the actions of the GTAA, including any alleged legislative or regulatory breaches, that Transport Canada has not met its enforcement or oversight obligations in relation to any such actions, or that this has created a substantial and specific danger to the health and safety of the public or otherwise led to wrongdoing under section 8 of the Act.

As a result, given that I do not have reason to believe that wrongdoing as defined under the Act may have occurred, the requirements of subsection 33(1) of the Act are not met and an investigation will not be commenced into your allegations.

Please note that my decisions are final, and I will not consider subsequent submissions that raise substantially the same allegations.

Sincerely,



Harriet Solloway
Commissioner

Disclosure of Wrongdoing – Transport Canada

Filed under s.33(1), Public Servants Disclosure Protection Act

Introductory Note

This disclosure is submitted pursuant to subsection 33(1) of the Public Servants Disclosure Protection Act. It follows previous submissions made to the Office of the Public Sector Integrity Commissioner concerning Transport Canada's handling of airport oversight and lease enforcement at Toronto Pearson International Airport.

This new submission introduces additional and material evidence not included in prior filings. In particular, it highlights the failure to update the Noise Exposure Forecast (NEF) for Toronto Pearson since the year 2000, despite explicit requirements under the Ground Lease and federal policy guidance. This omission represents a distinct and ongoing form of gross mismanagement and a substantial danger to the health and safety of the public.

This new evidence is central to the present disclosure and warrants consideration on its own merits, in addition to the allegations previously raised.

From:
Fabio Ovettini

Toronto, Ontario, M9M 2J4

Date: September 9. 2025

To:
Office of the Public Sector Integrity Commissioner of Canada
Ottawa, ON K1P 5Y7

1. Jurisdictional Statement

This disclosure is made under subsection 33(1) of the Public Servants Disclosure Protection Act (PSDPA). It concerns senior public servants within Transport Canada, specifically:

- Deputy Minister of Transport Canada
- Assistant Deputy Minister, Programs (Airports Directorate)
- Assistant Deputy Minister, Safety and Security (Civil Aviation)

This disclosure does not target elected officials or parliamentarians. It targets career public

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

servants whose responsibilities fall directly within the PSDPA's scope.

Section 8 of the Act defines "wrongdoing" to include:

s.8(a): contravention of an Act or regulation;
s.8(b): misuse of public funds or assets;
s.8(c): gross mismanagement;
s.8(d): substantial and specific danger to the health or safety of the public or the environment;
s.8(e): serious breach of a code of conduct.

Each allegation below maps directly to one or more of these categories.

[Sections 2–4 follow as already drafted, including Allegations, Evidence, and Conclusion.]

2. Allegations of Wrongdoing

Allegation 1 – Contravention of Law (s.8(a))

The Pearson International Airport Ground Lease (a binding federal instrument) requires GTAA to comply with all environmental laws (Article 6.1, Article 6.4).

GTAA has violated provisions of the Canadian Environmental Protection Act and the Aeronautics Act regarding excessive aircraft noise and air emissions.

Transport Canada, as lessor, has refused to enforce these obligations. This failure amounts to permitting ongoing contraventions of federal law.

Allegation 2 – Gross Mismanagement (s.8(c))

Pearson International Airport is a multi-billion-dollar federal asset.

Transport Canada officials have consistently failed to enforce the lease despite documented breaches.

Disabling of monitoring systems, tolerance of altered reports, and refusal to act on public disclosures constitute mismanagement of federal property on a scale that meets the statutory threshold of "gross mismanagement."

Outdated Noise Exposure Forecast (NEF) – Evidence of Gross Mismanagement

The Ground Lease between Transport Canada and the GTAA explicitly requires the Tenant to maintain and update Noise Exposure Forecasts (NEF) as part of its Noise Management obligations and land-use compatibility planning (Lease, Article 8, Sections 8.11–8.13). These forecasts are intended to guide municipalities, developers, and the public in making informed decisions about siting schools, homes, and healthcare facilities in relation to aircraft noise exposure.

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

Yet, the official NEF used for Toronto Pearson Airport has not been updated since the year 2000. For nearly 25 years, land-use planning has relied on obsolete data that does not reflect the massive growth in flight operations, the intensification of night flights, or the expansion of affected communities.

This failure to update the NEF has:
• Undermined municipal zoning and development decisions;
• Concealed the true scale of noise impacts on residents, schools, and health institutions;
• Breached the Ground Lease's requirement for current noise management and reporting;
• Constituted gross mismanagement by both Transport Canada and the GTAA, eroding public trust.

The continued reliance on a 25-year-old NEF violates both the intent of the Ground Lease and federal policy guidance (TP 1247 – Land Use in the Vicinity of Airports). It exemplifies a systematic neglect of duty that falls squarely within the definition of wrongdoing under the PSDPA (s.8).

Allegation 3 – Substantial and Specific Danger to Public Health (s.8(d))

WHO Guidelines (2018): Aircraft noise above 40 dB Lnight linked to cardiovascular disease and sleep disturbance.

RAND Study (2016): Insufficient sleep increases mortality risk by 13%, costing billions in lost productivity.

AAA Foundation (2016): Sleep deprivation impairs driving safety, equating to drunk driving risk.

Toronto and Mississauga residents are chronically exposed to levels far exceeding WHO limits, directly due to Transport Canada's refusal to enforce noise standards.

This constitutes a substantial and specific danger to the health and safety of the public.

Allegation 4 – Serious Breach of the Values and Ethics Code (s.8(e))

Noise complaint reports have been altered under GTAA's administration.

Community noise monitors (e.g., Acacia Park, Oriole Park, Tobias Park) have been repeatedly disabled without corrective action.

By tolerating falsified data and failing to safeguard integrity in reporting, Transport Canada officials have breached the Values and Ethics Code for the Public Sector (principles of honesty, transparency, stewardship, and respect for the public).

Document Released Under the Access to Information Act by Health Canada / Document divulgué en vertu de la Loi sur l'accès à l'information par Santé Canada

3. Evidence and Exhibits

Exhibit A – Pearson Ground Lease excerpts (Articles 6.1, 6.4, 7.3, 8.11–8.13, 9.1).

Exhibit B – Screenshots of disabled noise monitors.

Exhibit C – Altered complaint reports (before/after).

Exhibit D – Scientific references: WHO Noise Guidelines, RAND Sleep Study, AAA Crash Risk Report, Transport Canada / Hours-of-Service Guidance, Health Canada / Canadian Sleep Guidelines.

Exhibit E – Evidence of outdated NEF (showing last update from 2000).

4. Conclusion

Transport Canada's senior officials are not failing in the abstract. They are actively permitting:

- systemic breaches of federal law,
- gross mismanagement of a critical federal asset,
- falsification of public reporting, and
- ongoing endangerment of public health.

These are not matters of policy disagreement. They are statutory wrongdoings as defined in section 8 of the PSDPA.

I therefore respectfully request that the Office commence a formal investigation pursuant to subsection 33(1) of the Act.

Sincerely,
Fabio Ovettini
