Subject: Record of NMT Outage – Pond Street Monitor – March 15–16, 2026

GTAA Noise Management Team,

I am writing to document an apparent outage of the **Pond Street Noise Monitoring Terminal (NMT)**.

Based on publicly available monitoring data, the **Pond Street NMT stopped reporting at approximately 08:00:00 on March 15, 2026**. Functionality appears to have been **restored shortly after 09:00 on March 16, 2026**.

For the purposes of maintaining an accurate public record, I would appreciate confirmation of:

- the cause of the outage
- the exact time service was restored
- whether any aircraft noise events occurred during the outage period that were not recorded by the monitor

Please consider this correspondence a request to ensure the interruption is properly documented within the monitoring record.

Sincerely,

Fabio Ovettoni
