Subject: FW: [External/Externe]: RE: Response on Pearson Night Flights

Good afternoon Issues Team,

We received this MPQ from MP Sgro's office regarding a lack of transparency and claimed corruption at the GTAA. I know they are completely arm's length but is there anything we can say in response toward transparency requirements they do have, and anything that would counteract corruption claims?

Thanks,

Daniel Kucirek (He/Him)

Good morning Daniel,

Thank you for your attention to this matter, our office truly appreciates it.

As you have mentioned, the information from GTAA are details previously shared with our office and our constituents.

Please see below one of the more recent communications between our office and a constituent. I will forward you separately additional correspondence from another constituent as well.

Best,
Abigail Aquino-Annobil

Ms, Judy Sgro,

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Thank you for your response. While we appreciate that you have forwarded our concerns to the GTAA, this is a **federal issue** that demands direct government intervention, not merely a referral to the very entity we are holding accountable.

Our investigations have uncovered serious concerns, including a lack of transparency and potential corruption. Yet, rather than addressing these findings, your response suggests a willingness to look the other way. **Is corruption something you and your government are willing to accept?**

We expect more than just referrals—we expect action. **What concrete steps will you take to escalate this matter?** Will you press for an independent investigation? Will you push for parliamentary oversight? Or will this issue continue to be ignored?

We look forward to your response and a clear commitment to addressing these concerns at the federal level.

Sincerely,
Fabio Ovettini

On Wednesday, March 5, 2025 at 01:23:02 p.m. EST, Sgro, Judy - M.P. <judy.sgro@parl.gc.ca> wrote:

Dear Fabio,

Thank you for your follow-up and for expressing the community's ongoing concerns regarding the transparency and accountability issues with GTAA. The health impacts of aircraft noise is a serious issue.

I have forwarded your concerns directly to the GTAA, and ask that they respond directly to you. I understand the frustration regarding the lack of progress, and I hope for a more meaningful and timely response.

Regarding the open house, I have inquired about any developments on this front and will let you know when I hear back.

I have copied the Hon. Anita Anand, Minister of Transportation, on this email and request her assistance in addressing this important issue.

Thank you again for your continued engagement on this important issue.

Best regards,

Hon, Judy A. Sgro

Ms.Judy Sgro,

I am following up on my previous email regarding the ongoing concerns about transparency and accountability from GTAA. As of now, we have not received a meaningful response addressing the specific issues raised.

While we appreciate your stated intention to contact GTAA, the community remains frustrated by the ongoing delays and lack of concrete action. We need to know what steps have been taken beyond simply reaching out. Have you received any substantive response from GTAA? If so, please share their justification for the continued lack of transparency. If not, what actions will you take to escalate this matter?

Additionally, we understand there has been discussion about an open house for the community. Can you provide any updates on this, including potential timing and format?

At this stage, reassurances are not enough—we need decisive action. Please provide an update on the progress made and the immediate next steps you will take to ensure this matter is properly addressed.

We look forward to your prompt response.

Subject: Response on Pearson Night Flights

Good afternoon MP Sgro,

It was good speaking with you last Friday, we reached out to GTAA regarding the issues with Airport noise that you brought up in our conversation and here is what we got back:

> Here's our website on noise. https://www.torontopearson.com/en/community/noise-management.
>
> Toronto Pearson has a Noise Management Office dedicated to working with residents to address concerns and provide insights into airport operations. The team is committed to keeping our community informed and engaged.
>
> There are several ways residents can connect with Pearson's Noise Management Office:

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

- **Phone:** Call 416-247-7682 to ask questions or share concerns.
- **Online Flight Tracking Tool (WebTrak):** Track flights in real-time and see noise levels in your area.
- **Insightful Online Portal:** Access information about noise management and learn more about aircraft operations through this easy-to-use online resource.
- **Noise Complaint Form:** Submit up to 50 noise complaints at once via the online form.
- *Checking In*: Stay up to date on airport operations and community updates.
- Attend our **Pearson Public Meeting** on Noise Management

These resources help residents stay informed and connected. Pearson is always happy to engage with its community to address any concerns.

In addition to our Noise Management Team, we actively engage with the community in many ways to keep our neighbours informed and involved. We sponsor community events, partner with schools for career talks, partner with elected officials to host open houses and give back to the community through employee volunteering and charitable giving. This summer alone, we participated in over 75 community events, reaching more than 10,000 residents.

Through these efforts, we regularly share updates on our operations, our role as an economic anchor providing local jobs and supporting development, and how to connect with our team.

Specifically on the flights between 2am and 6am that you mentioned they have stated:

However, we severely limit the number of flights in and out of Pearson through the **Night Flight Restriction Program**, which limits the number of movements (arrivals and departures) during the restricted hours (12:30 AM to 06:29 AM). Transport Canada helped create this program to limit nighttime noise and balance growing regional demand. This is referred to as the "night flight budget." Toronto Pearson is the only airport in Canada to have a budget system.

The vast majority of flight movements between the hours you specified (02:00 to 06:00) are arriving flights. Night flights are needed to accommodate travel distance, scheduling requirements and product delivery timelines, and accommodate late-arriving or departing flights delayed due to factors such as weather, mechanical or security issues; as well as other operationally necessary night flights. Medevac flights and military and police operations are counted towards the night flight budget.

We also operate the **Nighttime Preferential Runway system** - between midnight and 6:30 am, we prioritize the use of runways to minimize the number of residents overflown.

I know you may have seen some of this material before, but we wanted to make sure you have the full picture we are getting from the GTAA. We are happy to follow up with them on any specific questions you have after receiving this, so please don't hesitate to ask any questions that come to mind.

Best,

Daniel Kucirek (He/Him)

Subject: 533901 [External/Externe]: Request for immediate changes to complaint form

XAP-2024-534251

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to express my concerns regarding the current complaint form for noise disturbances. The existing form is overly cumbersome and effectively discourages individuals from filing complaints.

As someone who experiences adverse effects from aircraft noise exceeding 55dB, the current system is impractical. Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 8 events per submission, I would need to complete it 62.5 times daily. At an estimated 15 minutes per form, this amounts to 937.5 minutes or approximately 15.6 hours each day.

This cumbersome process seems designed to discourage complaints. Therefore, I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding 55dB, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

These changes are essential to ensure that the process is accessible and fair, particularly for those you are making vulnerable, traumatized, humiliated, and marginalized individuals.

Thank you for your attention to this matter.

5 Disasters That Were Caused By Sleep Deprivation

Robert Pagano

Sleep deprivation can lead to errors in decision-making that cause accidents. These 5 disasters are the worst ex...

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Summarized version of above article

#5. Chernobyl

What many people aren't aware of is the fact that this accident is the result of sleep deprivation. The engineers who were on duty at the time of the explosion were on duty for 13 hours straight. The catastrophe officially began at 1:43 AM, a time when the workers were likely feeling drowsy and were unable to think straight.

Sleep deprivation directly affects your ability to make decisions, meaning that you'll make mistakes that you wouldn't make when well-rested. In this case, sleep deprivation led to one of the worst accidents in history. When workers failed to heed the warning signs, a power surge led to an explosion that blew the top off of the reactor and led to a meltdown that killed a still-undetermined number of innocent people.

#4. American Airlines Flight 1420 crash

The NTSB report stated that fatigue played a critical role in the crash. The captain had been awake for 16 hours, and research showed that pilots make more mistakes after being up for 13 hours. The crash occurred hours after both pilots' usual bedtime. The first officer stated that he was feeling tired that night and a yawn was heard on the CVR. According to the report, sleep-deprived people tend to problem solve by trying the same solution over and over again instead of looking at alternate options. This is a terrible situation for someone who is responsible for human lives while they work.

#3. Exxon Valdez Oil Spill

"We've looked at some of the literature on the Exxon Valdez and of course the main point is that the timing of the accident was consistent with a sleep related or fatigue related error," said scientific director of the Scripps Clinic Sleep Disorders Center Dr. Merrill Mitler.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

The disaster killed up to 250,000 sea birds, 2,800 sea otters, 12 river otters, 300 harbor seals, 247 bald eagles, 22 orcas, and countless salmon and herring. All of that environmental destruction could have been avoided if the crew of the ship took their sleep seriously.

#2. Space Shuttle Challenger Disaster

The commission determined that cultural and mechanical processes caused the disaster. But one thing that many people missed was that sleep deprivation played a massive role in the tragic incident. Navy Capt. Rick Davenport, quoted by William C. Dement in the book *The Promise of Sleep* said the following:

"... But not well known at all is the fact that the Human Factors Subcommittee attributed the error to the severe sleep deprivation of the NASA managers. This conclusion was only included in the committee's final report, which only noted that top managers in such situations are generally the ones who sacrifice the most sleep."

(Captain Rick Davenport, The Promise of Sleep by William C. Dement)

The Rogers Commission Human Factors Finding mentioned that "The willingness of NASA employees in general to work excessive hours, while admirable, raises serious questions when it jeopardizes job performance, particularly when critical management decisions are at stake."

#1. Michigan Train Crash

The National Transportation Safety Board conducted an investigation and uncovered something disturbing: the two men were *both* suffering from severe obstructive sleep apnea. Both men were diagnosed by their private physicians and neither had disclosed the condition to their employers. The report found that neither of them had been successfully treated.

Obstructive sleep apnea (OSA) causes a person to stop breathing periodically while sleeping. People suffering from this condition will feel extremely tired during the day

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

and can drift off into sleep during monotonous situations in a quiet environment, according to Dr. Mitch Garber, a member of the NTSB's investigation team.

Yash's doctor told him that he would most likely fall asleep on the job, but he ignored the physician's recommendations to attend a sleep clinic.

Subject: [External/Externe]: Airplane Noise

XAP-2024-534248

Hello Everyone,

I've attempted to contact MP Judy Sgro of Humber River-Black Creek, several times this past month to see if she would be able to set-up a meeting with GTAA CEO Deborah Flint and residents of the communities affected by airplane noise. I want Deborah Flint to answer questions about the airplane noise following her statement of plans to increase air traffic to and from Pearson Airport. However, I have not received a reply from MP Judy Sgro. Today, I spoke to a member of her team, who informed me that she has received my past messages. However, this person couldn't confirm whether Judy has attempted to arrange a meeting with Deborah Flint or not.

I don't believe another meeting with the Pearson Airport Complaint Department or NAV Canada representatives would benefit our community or any other communities affected by airplane noise. These representatives value their organizations' interests first, as they are paid employees. A NAV Canada representative once admitted to me that they follow directives from the GTAA and Pearson Airport.

MP Judy Sgro mentioned in one of our initial meetings that she lived in the city many years ago and learned to tolerate the airplane noise. It's a challenge to change someone's beliefs. There are some residents from the community who have advised me to remain quiet and not to complain about the airplane traffic, even suggesting I should move if I dislike the noise. The process time of the airplane noise petition MP Judy Sgro presented in the House of Commons remains uncertain, no one has a definite answer to offer. MP Judy Sgro's letter to former Minister of Transportation Omar Alghabra a couple of years ago regarding airplane noise went unanswered, which is concerning. I would expect Prime Minister Trudeau to have looked into it. Pablo Rodriguez replaced Omar Algahabra as the Federal Minister of Transportation on July 26, 2023. MP Judy Sgro lacks federal authority to alter air traffic in our community; she acts

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

solely as a mediator; quite often residents in our community are ignored by her because she has nothing to offer or give to us.

It's encouraging that City TV aired a news story last night about Oakville residents affected by airplane noise. I contacted the reporter today to give a thank you for his work on the story and briefly discussed how my community also experiences airplane noise issues. He let me know that he may be interested in doing a follow-up story here. I sure hope he does. The expression on Councillor Perruzza and Matias faces the day they came for an outdoor meeting and we were constantly being interrupted by the planes every minute would have said it all.

This problem should present an opportunity for federal opposition party leaders to question Prime Minister Trudeau directly in the House of Commons regarding his government's plans to address airplane traffic near Pearson Airport now and in the future. The airplane traffic situation is worsening here. I'm uncertain whether Prime Minister Trudeau acknowledges airplane traffic with noise and pollution as a real problem. Pearson Airport makes lots of money and for a few people who have to deal with the problem of living with airplane noise it is not a huge concern to his government.

Take care,

Daryl Henderson

Subject: Re: 'Planes flying low and loud': Oakville residents say flight traffic is a big nuisance

Did they actually lie to the media?

There was a flight path change for arrivals for 05/23.

They did make an operational change that shifted more planes onto the more northern E/W runways. This I recognize might be better for your community but given your level of frustration I don't think it's been better.

They also neglected to note a shift to larger planes which I suspect makes us feel like they are lower & they are in fact louder just cause they are bigger - noise is engine plus volume of air moved - larger planes move more air.

It was good the reporting said change in operations not flight path.

Irene

Hello folks in case you didn't catch it here's the video clip of the news real that was on City News.

The reporter is Pat (Patrick) Taney and it was done through Speakers Corner. Perhaps we can piggy back onto this story and ask Pat to televise our insanity that we endure with the planes and the lack of political support we are getting from our elected representatives? Daryl you have all the documentation.

https://toronto.citynews.ca/2024/06/05/oakville-airplane-flight-traffic-toronto-pearson-airport/

At the bottom of the article the link is there for the submission.

https://toronto.citynews.ca/2021/10/17/speakerscorner/

Have a great evening.

Sylvia

Subject: [External/Externe]: Are you only loyal to the oath of omerta?

XAP-2024-534253

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

I am writing to express my concern regarding the lack of response to the several emails I have sent over the past month. As I have expressed in my earlier emails, I see troubling parallels between the way the airport is being managed and the operations of criminals and terrorists.

Additionally, I have noticed a disturbing similarity between the evasion of my communications and the oath of omertà practiced by criminal organizations such as la mia famiglia in Calabria. This comparison underscores the seriousness of my concerns and the urgent need for transparency and accountability.

Effective communication is crucial for ensuring the safety and efficiency of the airport. I kindly request an acknowledgment of my previous emails and a prompt response to the serious issues I have raised.

Thank you for your immediate attention to this matter. I look forward to your reply.

Regards,
Fabio Ovettini

Categories: PUT AWAY (PA)

XAP-2024-534210

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

The contradiction between the Canadian government's recommendation of 7-9 hours of sleep for adults and the allowance of 24/7 airport operations, causing sleep disruptions in nearby communities, highlights a complex issue where public health, economic interests, and operational efficiency intersect. This situation clearly shows a Canadian government prioritizing economic objectives over the well-being of its citizens.

Much like criminals and terrorists justify causing harm and suffering to achieve their objectives, the government's allowance of 24/7 airport operations, which causes harm and suffering, has to be seen as just plain state-criminal/terrorist activity. This perspective raises significant ethical and moral questions about policy-making

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Transport Canada's Sleep Recommendations

- **8 Hours of Consecutive Sleep**: While regulations provide for 8 consecutive hours off-duty, it is generally recommended that this time be used for sleep to ensure adequate rest.
- **Total Off-Duty Time**: In addition to the 8 consecutive hours, the additional 2 hours of off-duty time can be used for short naps, meals, and relaxation to help manage fatigue.

Health Canada's Sleep Recommendations by Age Group

1. **Adults (18-64 years)**:

    - **7-9 hours per night**: This range is considered optimal for maintaining good health, cognitive function, and overall well-being.

2. **Older Adults (65+ years)**:

- **7-8 hours per night**: Slightly less sleep is recommended for older adults, but adequate rest remains crucial for health and functioning.

Acacia's Noise Monitor started working at 8:52:40 on June 13, 2024.

Taking the above into account, I would like you to tell me how anyone in my community can efficiently perform any activity, work/studying?

How can you expect a truck driver living in my community to meet Canada's Transport recommendation of 8hs of consecutive sleep?

How can you expect a person living in my community to meet Canada's Health recommendation of 7-9hs of quality sleep?

The lack of response or action from NAV Canada, GTAA (Greater Toronto Airports Authority), and Canada Transport regarding noise issues affecting my community might be opening the door for it to be taken as a declaration of WAR.

When the state decides to break the Social Contract there is a philosophical argument that individuals have a right to defend themselves and their rights.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

The contradiction between the Canadian government's recommendation of 7-9 hours of sleep for adults and the allowance of 24/7 airport operations, causing sleep disruptions in nearby communities, highlights a complex issue where public health, economic interests, and operational efficiency intersect. This situation clearly shows a Canadian government prioritizing economic objectives over the well-being of its citizens.

Much like criminals and terrorists justify causing harm and suffering to achieve their objectives, the government's allowance of 24/7 airport operations, which causes harm and suffering, has to be seen as just plain state-criminal/terrorist activity. This perspective raises significant ethical and moral questions about policy-making

Transport Canada's Sleep Recommendations

- **8 Hours of Consecutive Sleep**: While regulations provide for 8 consecutive hours off-duty, it is generally recommended that this time be used for sleep to ensure adequate rest.
- **Total Off-Duty Time**: In addition to the 8 consecutive hours, the additional 2 hours of off-duty time can be used for short naps, meals, and relaxation to help manage fatigue.

Health Canada's Sleep Recommendations by Age Group

1. **Adults (18-64 years)**:

- **7-9 hours per night**: This range is considered optimal for maintaining good health, cognitive function, and overall well-being.

2. **Older Adults (65+ years)**:

- **7-8 hours per night**: Slightly less sleep is recommended for older adults, but adequate rest remains crucial for health and functioning.

Fatigue - The Foe You Don't Want to Know at Work

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

CCOHS: Health and Safety Report - Past Issues

The Canadian Centre for Occupational Health and Safety (CCOHS) promotes a safe and healthy working environment b...

Staying awake for 21 hours straight affects the human body almost exactly like a blood alcohol level of 0.1%, which exceeds Canada's legal limit for drivers. Sleep researchers say drowsy drivers may cause as many automobile crashes as impaired drivers.

Now let's translate that to the workplace where someone might have to make important decisions, handle dangerous chemicals, operate heavy equipment or use a sharp knife. It's not hard to realize that work and fatigue don't mix.

Fatigue is the state of feeling very tired, weary or sleepy because of too little or inadequate sleep, prolonged mental or physical work, or extended periods of stress or anxiety. It varies, but on average we need at least 7.5 to 8.5 hours everyday. While it's always possible to reverse a short-lived or "acute" state of fatigue by catching up on sleep and rest, chronic fatigue may require a doctor's intervention.

Besides tiredness and drowsiness, other telltale symptoms of fatigue include irritability, depression, giddiness, loss of appetite, digestive problems, and an increased susceptibility to illness.

A recipe for shoddy, unsafe work

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Fatigue affects:

- judgement,
- concentration,
- hand-eye coordination,
- visual perception,
- communication skills,
- productivity,
- performance, and
- ability to make decisions, do complex planning, and handle stress.

Subject: [External/Externe]: Fw: Airplane Noise

XAP-2024-534248(3)

Yes. It is 545 and 613 am - not simultaneously of course but planes are rumbling overhead squeaking one out before the crack of dawn when they know the curfew is 630 am. They often breech beyond 23:30 or so. They are desperate. We are desperate. The situation is desperate and there is no viable mutually satisfactory solution other than tolerance of awful and right of way despite needs of others. There is no compromise here. It is only dominance of money power and law. That's it. Better get used to it or move ?

The physics of noise emission from gas engine power is undefeatable.

The other law of life is - MPP 's and MP's and most 100 % of 'people' are fundamentally self serving, hence MPP's - unless it elevates their perpetuity are largely uninterested in defending the underdog.

Compensate us to live under their flight path. Lots of money to live under. That might be alright ? Mortgage free in a perpetual noise machine.

Subject: Airplane Noise

Hello Everyone,

I've attempted to contact MP Judy Sgro of Humber River-Black Creek, several times this past month to see if she would be able to set-up a meeting with GTAA CEO Deborah Flint and residents of the communities affected by airplane noise. I want Deborah Flint to answer questions about the airplane noise following her statement of plans to increase air traffic to and from Pearson Airport. However, I have not received a reply from MP Judy Sgro. Today, I spoke to a member of her team, who informed me that she has received my past messages. However, this person couldn't confirm whether Judy has attempted to arrange a meeting with Deborah Flint or not.

I don't believe another meeting with the Pearson Airport Complaint Department or NAV Canada representatives would benefit our community or any other communities affected by airplane noise. These representatives value their organizations' interests first, as they are paid

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

employees. A NAV Canada representative once admitted to me that they follow directives from the GTAA and Pearson Airport.

MP Judy Sgro mentioned in one of our initial meetings that she lived in the city many years ago and learned to tolerate the airplane noise. It's a challenge to change someone's beliefs. There are some residents from the community who have advised me to remain quiet and not to complain about the airplane traffic, even suggesting I should move if I dislike the noise. The process time of the airplane noise petition MP Judy Sgro presented in the House of Commons remains uncertain, no one has a definite answer to offer. MP Judy Sgro's letter to former Minister of Transportation Omar Alghabra a couple of years ago regarding airplane noise went unanswered, which is concerning. I would expect Prime Minister Trudeau to have looked into it. Pablo Rodriguez replaced Omar Algahabra as the Federal Minister of Transportation on July 26, 2023. MP Judy Sgro lacks federal authority to alter air traffic in our community; she acts solely as a mediator; quite often residents in our community are ignored by her because she has nothing to offer or give to us.

It's encouraging that City TV aired a news story last night about Oakville residents affected by airplane noise. I contacted the reporter today to give a thank you for his work on the story and briefly discussed how my community also experiences airplane noise issues. He let me know that he may be interested in doing a follow-up story here. I sure hope he does. The expression on Councillor Perruzza and Matias faces the day they came for an outdoor meeting and we were constantly being interrupted by the planes every minute would have said it all.

This problem should present an opportunity for federal opposition party leaders to question Prime Minister Trudeau directly in the House of Commons regarding his government's plans to address airplane traffic near Pearson Airport now and in the future. The airplane traffic situation is worsening here. I'm uncertain whether Prime Minister Trudeau acknowledges airplane traffic with noise and pollution as a real problem. Pearson Airport makes lots of money and for a few people who have to deal with the problem of living with airplane noise it is not a huge concern to his government.

Take care,

Daryl Henderson

Subject: Re: 'Planes flying low and loud': Oakville residents say flight traffic is a big nuisance

Did they actually lie to the media?

There was a flight path change for arrivals for 05/23.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

They did make an operational change that shifted more planes onto the more northern E/W runways. This I recognize might be better for your community but given your level of frustration I don't think it's been better.

They also neglected to note a shift to larger planes which I suspect makes us feel like they are lower & they are in fact louder just cause they are bigger - noise is engine plus volume of air moved - larger planes move more air.

It was good the reporting said change in operations not flight path.

Irene

Hello folks in case you didn't catch it here's the video clip of the news real that was on City News.

The reporter is Pat (Patrick) Taney and it was done through Speakers Corner. Perhaps we can piggy back onto this story and ask Pat to televise our insanity that we endure with the planes and the lack of political support we are getting from our elected representatives? Daryl you have all the documentation.

Subject: [External/Externe]: June 21st Morning Plane Traffic

XAP-2024-534254

Hello Everyone,

Planes after midnight this morning were very loud, flying at low altitudes and were frequent. This continued from midnight to 1:00 am.

It is now 1:30 am and there have been a few more planes.

A message on Webtracker states that maintenance is being done to the noise monitoring stations, and some readings may not be correct. One noise monitoring station has been inactive for a few days now. Hopefully, by the end of today, all maintenance will be completed, and a message will indicate this to everyone.

MP Judy Sgro mentioned to me the other day that another noise monitoring station was to be added to Humber River-Black Creek. She was going to look into why it has not been activated.

It is now 1:50 am, and another very loud plane flew over my house. At 1:54 am, here comes another plane.

At 6:30 am, we had loud planes taking off from Pearson Airport.

I would like to know if the pre-authorized complaint form has been discussed. I don't want to spend my time calling or emailing Pearson Airport to file complaints throughout the day. I now question if all my complaints are actually recorded due to inaccuracies that Pearson Airport Complaints Department may use to dismiss a complaint.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

There has to be a limit to the number of planes that Pearson Airport is allowed to take each day, and there have to be time restrictions on flights into and out of Pearson Airport imposed by our Federal Government.

GTAA, Deborah Flint, Pearson Airport, and the Liberal Federal Government the noise from Pearson Airport is not acceptable and it is unhealthy for many.

Take care,

Daryl

Subject: Significant reduction in the amount of publicly available information at https://webtrak.emsbk.com/gta

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to formally request an explanation for the recent changes made to the WebTrak GTA portal (https://webtrak.emsbk.com/gta), which have significantly reduced the amount of publicly available information.

As a regular user of the portal, I rely heavily on the comprehensive data previously provided for tracking and analysis purposes. The reduction in available information has raised concerns among myself and other users who depend on this resource.

Information offered by portal up to last week

Information offered by portal since changes were made last week

Hi everyone
Thanks Darryl and all for your constant persistence of this matter. On our street we were given intake forms by our MPP and she has agreed to represent us. I hope to meet with her next week. Can you please tell me the City tv news reporters name.
Thanks
Josie in Meadowvale

Subject: Airplane Noise

Hello Everyone,

I've attempted to contact MP Judy Sgro of Humber River-Black Creek, several times this past month to see if she would be able to set-up a meeting with GTAA CEO Deborah Flint and residents of the communities affected by airplane noise. I want Deborah Flint to answer questions about the airplane noise following her statement of plans to increase air traffic to and from Pearson Airport. However, I have not received a reply from MP Judy Sgro. Today, I spoke to a member of her team, who informed me that she has received my past messages. However, this person couldn't confirm whether Judy has attempted to arrange a meeting with Deborah Flint or not.

I don't believe another meeting with the Pearson Airport Complaint Department or NAV Canada representatives would benefit our community or any other communities affected by airplane noise. These representatives value their organizations' interests first, as they are paid employees. A NAV Canada representative once admitted to me that they follow directives from the GTAA and Pearson Airport.

MP Judy Sgro mentioned in one of our initial meetings that she lived in the city many years ago and learned to tolerate the airplane noise. It's a challenge to change someone's beliefs. There are some residents from the community who have advised me to remain quiet and not to complain about the airplane traffic, even suggesting I should move if I dislike the noise. The process time of the airplane noise petition MP Judy Sgro presented in the House of Commons remains uncertain, no one has a definite answer to offer. MP Judy Sgro's letter to former Minister of Transportation Omar Alghabra a couple of years ago regarding airplane noise went unanswered, which is concerning. I would expect Prime Minister Trudeau to have looked into it. Pablo Rodriguez replaced Omar Algahabra as the Federal Minister of Transportation on July 26, 2023. MP Judy Sgro lacks federal authority to alter air traffic in our community; she acts solely as a mediator; quite often residents in our community are ignored by her because she has nothing to offer or give to us.

It's encouraging that City TV aired a news story last night about Oakville residents affected by airplane noise. I contacted the reporter today to give a thank you for his work on the story and briefly discussed how my community also experiences airplane noise issues. He let me know that he may be interested in doing a follow-up story here. I sure hope he does. The expression on Councillor Perruzza and Matias faces the day they came for an outdoor meeting and we were constantly being interrupted by the planes every minute would have said it all.

This problem should present an opportunity for federal opposition party leaders to question Prime Minister Trudeau directly in the House of Commons regarding his government's plans to address airplane traffic near Pearson Airport now and in the future. The airplane traffic situation is worsening here. I'm uncertain whether Prime Minister Trudeau acknowledges airplane traffic with noise and pollution as a real problem. Pearson Airport makes lots of

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

money and for a few people who have to deal with the problem of living with airplane noise it is not a huge concern to his government.

Take care,

Daryl Henderson

Subject: Re: 'Planes flying low and loud': Oakville residents say flight traffic is a big nuisance

Did they actually lie to the media?

There was a flight path change for arrivals for 05/23.

They did make an operational change that shifted more planes onto the more northern E/W runways. This I recognize might be better for your community but given your level of frustration I don't think it's been better.

They also neglected to note a shift to larger planes which I suspect makes us feel like they are lower & they are in fact louder just cause they are bigger - noise is engine plus volume of air moved - larger planes move more air.

It was good the reporting said change in operations not flight path.

XAP-2024-534248(4)

Hello Skye,

Thank you for your email to express how you feel about the plane noise. I understand how you feel completely.

We need to do something here and now to bring more attention to the mess the Federal Government has made with our air industry.

I will call the reporter from City TV on Monday again if I do not hear back from him today. It would be great if he did a follow-up story to the Oakville one.

GTAA CEO Deborah Flint, Pearson Airport, NAV Canada and our Federal, Provincial and Municipal governments are all aware of the airplane noise issues that some residents of areas around the airport have to live with and for the most part they ignore it and do very little to improve it. GTAA CEO Deborah Flint has pubilically stated she plans to make it worse and the Federal Minister of Transportation Pablo Rodriguez says okay go ahead, it will be more money.

Pearson Airport Complaints Department emloyee explained that their data shows a low percentage of people actually call or email them to file a complaint about airplane noise. Federal Government takes the noise data that Pearson Airport collects and weigh it and come to a conclusion that only a few of their voters are affected by the airplane noise while many more people do not get to hear the airplane noise and benefit from the airport and so they can live with this problem and pretend to act like they are concerned.

Have yourself a wonderful day!

Take care,

Daryl

Subject: Fw: Airplane Noise

Yes. It is 545 and 613 am - not simultaneously of course but planes are rumbling overhead squeaking one out before the crack of dawn when they know the curfew is 630 am. They often breech beyond 23:30 or so. They are desperate. We are desperate. The situation is desperate and there is no viable mutually satisfactory solution other than tolerance of awful and right of way despite needs of others. There is no compromise here. It is only dominance of money power and law. That's it. Better get used to it or move ?

The physics of noise emission from gas engine power is undefeatable.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

The other law of life is - MPP 's and MP's and most 100 % of 'people' are fundamentally self serving, hence MPP's - unless it elevates their perpetuity are largely uninterested in defending the underdog.

Compensate us to live under their flight path. Lots of money to live under. That might be alright ? Mortgage free in a perpetual noise machine.

Hello Skye,

Thank you for your email to express how you feel about the plane noise. I understand how you feel completely.

We need to do something here and now to bring more attention to the mess the Federal Government has made with our air industry.

I will call the reporter from City TV on Monday again if I do not hear back from him today. It would be great if he did a follow-up story to the Oakville one.

GTAA CEO Deborah Flint, Pearson Airport, NAV Canada and our Federal, Provincial and Municipal governments are all aware of the airplane noise issues that some residents of areas around the airport have to live with and for the most part they ignore it and do very little to improve it. GTAA CEO Deborah Flint has pubilically stated she plans to make it worse and the Federal Minister of Transportation Pablo Rodriguez says okay go ahead, it will be more money.

Pearson Airport Complaints Department emloyee explained that their data shows a low percentage of people actually call or email them to file a complaint about airplane noise. Federal Government takes the noise data that Pearson Airport collects and weigh it and come to a conclusion that only a few of their voters are affected by the airplane noise while many more people do not get to hear the airplane noise and benefit from the airport and so they can live with this problem and pretend to act like they are concerned.

Have yourself a wonderful day!

Take care,

Daryl

Subject: Airplane Noise

Hello Everyone,

I've attempted to contact MP Judy Sgro of Humber River-Black Creek, several times this past month to see if she would be able to set-up a meeting with GTAA CEO Deborah Flint and residents of the communities affected by airplane noise. I want Deborah Flint to answer questions about the airplane noise following her statement of plans to increase air traffic to and from Pearson Airport. However, I have not received a reply from MP Judy Sgro. Today, I spoke to a member of her team, who informed me that she has received my past messages. However, this person couldn't confirm whether Judy has attempted to arrange a meeting with Deborah Flint or not.

I don't believe another meeting with the Pearson Airport Complaint Department or NAV Canada representatives would benefit our community or any other communities affected by airplane noise. These representatives value their organizations' interests first, as they are paid

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

employees. A NAV Canada representative once admitted to me that they follow directives from the GTAA and Pearson Airport.

MP Judy Sgro mentioned in one of our initial meetings that she lived in the city many years ago and learned to tolerate the airplane noise. It's a challenge to change someone's beliefs. There are some residents from the community who have advised me to remain quiet and not to complain about the airplane traffic, even suggesting I should move if I dislike the noise. The process time of the airplane noise petition MP Judy Sgro presented in the House of Commons remains uncertain, no one has a definite answer to offer. MP Judy Sgro's letter to former Minister of Transportation Omar Alghabra a couple of years ago regarding airplane noise went unanswered, which is concerning. I would expect Prime Minister Trudeau to have looked into it. Pablo Rodriguez replaced Omar Algahabra as the Federal Minister of Transportation on July 26, 2023. MP Judy Sgro lacks federal authority to alter air traffic in our community; she acts solely as a mediator; quite often residents in our community are ignored by her because she has nothing to offer or give to us.

It's encouraging that City TV aired a news story last night about Oakville residents affected by airplane noise. I contacted the reporter today to give a thank you for his work on the story and briefly discussed how my community also experiences airplane noise issues. He let me know that he may be interested in doing a follow-up story here. I sure hope he does. The expression on Councillor Perruzza and Matias faces the day they came for an outdoor meeting and we were constantly being interrupted by the planes every minute would have said it all.

This problem should present an opportunity for federal opposition party leaders to question Prime Minister Trudeau directly in the House of Commons regarding his government's plans to address airplane traffic near Pearson Airport now and in the future. The airplane traffic situation is worsening here. I'm uncertain whether Prime Minister Trudeau acknowledges airplane traffic with noise and pollution as a real problem. Pearson Airport makes lots of money and for a few people who have to deal with the problem of living with airplane noise it is not a huge concern to his government.

Take care,

Daryl Henderson

Subject: Re: 'Planes flying low and loud': Oakville residents say flight traffic is a big nuisance

Did they actually lie to the media?

There was a flight path change for arrivals for 05/23.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

They did make an operational change that shifted more planes onto the more northern E/W runways. This I recognize might be better for your community but given your level of frustration I don't think it's been better.

They also neglected to note a shift to larger planes which I suspect makes us feel like they are lower & they are in fact louder just cause they are bigger - noise is engine plus volume of air moved - larger planes move more air.

It was good the reporting said change in operations not flight path.

Irene

Hello folks in case you didn't catch it here's the video clip of the news real that was on City News.

The reporter is Pat (Patrick) Taney and it was done through Speakers Corner. Perhaps we can piggy back onto this story and ask Pat to televise our insanity that we endure with the planes and the lack of political support we are getting from our elected representatives? Daryl you have all the documentation.

https://toronto.citynews.ca/2024/06/05/oakville-airplane-flight-traffic-toronto-pearson-airport/

At the bottom of the article the link is there for the submission.

https://toronto.citynews.ca/2021/10/17/speakerscorner/

Have a great evening.

I've attempted to contact MP Judy Sgro of Humber River-Black Creek, several times this past month to see if she would be able to set-up a meeting with GTAA CEO Deborah Flint and residents of the communities affected by airplane noise. I want Deborah Flint to answer questions about the airplane noise following her statement of plans to increase air traffic to and from Pearson Airport. However, I have not received a reply from MP Judy Sgro. Today, I spoke to a member of her team, who informed me that she has received my past messages. However, this person couldn't confirm whether Judy has attempted to arrange a meeting with Deborah Flint or not.

I don't believe another meeting with the Pearson Airport Complaint Department or NAV Canada representatives would benefit our community or any other communities affected by airplane noise. These representatives value their organizations' interests first, as they are paid employees. A NAV Canada representative once admitted to me that they follow directives from the GTAA and Pearson Airport.

MP Judy Sgro mentioned in one of our initial meetings that she lived in the city many years ago and learned to tolerate the airplane noise. It's a challenge to change someone's beliefs. There are some residents from the community who have advised me to remain quiet and not to complain about the airplane traffic, even suggesting I should move if I dislike the noise. The process time of the airplane noise petition MP Judy Sgro presented in the House of Commons remains uncertain, no one has a definite answer to offer. MP Judy Sgro's letter to former Minister of Transportation Omar Alghabra a couple of years ago regarding airplane noise went unanswered, which is concerning. I would expect Prime Minister Trudeau to have looked into it. Pablo Rodriguez replaced Omar Algahabra as the Federal Minister of Transportation on July 26, 2023. MP Judy Sgro lacks federal authority to alter air traffic in our community; she acts solely as a mediator; quite often residents in our community are ignored by her because she has nothing to offer or give to us.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

It's encouraging that City TV aired a news story last night about Oakville residents affected by airplane noise. I contacted the reporter today to give a thank you for his work on the story and briefly discussed how my community also experiences airplane noise issues. He let me know that he may be interested in doing a follow-up story here. I sure hope he does. The expression on Councillor Perruzza and Matias faces the day they came for an outdoor meeting and we were constantly being interrupted by the planes every minute would have said it all.

This problem should present an opportunity for federal opposition party leaders to question Prime Minister Trudeau directly in the House of Commons regarding his government's plans to address airplane traffic near Pearson Airport now and in the future. The airplane traffic situation is worsening here. I'm uncertain whether Prime Minister Trudeau acknowledges airplane traffic with noise and pollution as a real problem. Pearson Airport makes lots of money and for a few people who have to deal with the problem of living with airplane noise it is not a huge concern to his government.

Take care,

Daryl Henderson

Subject: Re: 'Planes flying low and loud': Oakville residents say flight traffic is a big nuisance

Did they actually lie to the media?

There was a flight path change for arrivals for 05/23.

They did make an operational change that shifted more planes onto the more northern E/W runways. This I recognize might be better for your community but given your level of frustration I don't think it's been better.

They also neglected to note a shift to larger planes which I suspect makes us feel like they are lower & they are in fact louder just cause they are bigger - noise is engine plus volume of air moved - larger planes move more air.

It was good the reporting said change in operations not flight path.

Hello folks in case you didn't catch it here's the video clip of the news real that was on City News.

The reporter is Pat (Patrick) Taney and it was done through Speakers Corner. Perhaps we can piggy back onto this story and ask Pat to televise our insanity that we endure with the planes and the lack of political support we are getting from our elected representatives? Daryl you have all the documentation.

https://toronto.citynews.ca/2024/06/05/oakville-airplane-flight-traffic-toronto-pearson-airport/

At the bottom of the article the link is there for the submission.

https://toronto.citynews.ca/2021/10/17/speakerscorner/

Have a great evening.

Did they actually lie to the media?

There was a flight path change for arrivals for 05/23.

They did make an operational change that shifted more planes onto the more northern E/W runways. This I recognize might be better for your community but given your level of frustration I don't think it's been better.

They also neglected to note a shift to larger planes which I suspect makes us feel like they are lower & they are in fact louder just cause they are bigger - noise is engine plus volume of air moved - larger planes move more air.

It was good the reporting said change in operations not flight path.

Irene

Hello folks in case you didn't catch it here's the video clip of the news real that was on City News.

The reporter is Pat (Patrick) Taney and it was done through Speakers Corner. Perhaps we can piggy back onto this story and ask Pat to televise our insanity that we endure with the planes and the lack of political support we are getting from our elected representatives? Daryl you have all the documentation.

https://toronto.citynews.ca/2024/06/05/oakville-airplane-flight-traffic-toronto-pearson-airport/

At the bottom of the article the link is there for the submission.

https://toronto.citynews.ca/2021/10/17/speakerscorner/

Have a great evening.

XAP-2024-534248(10)

Hi Daryl,

Drivers who live in the regions listed below are responsible for generating more claims than most other areas of the province. Insurance is based on statistical data and the more an Insurance company pays out in claims for a certain region, the higher the premiums will be for those particular postal codes. Insurance rates are the highest in Toronto and the GTA in general because of the fact that the majority of the drivers in Ontario live there. Naturally, the greater number of vehicles, the greater number of claims reported and hence, the greater amount of claims dollars paid out. Areas such as Brampton have been notorious for automobile accidents as far back as I can remember. Personally, I don't believe Insurance companies are making record profits, but I do believe our politicians such as Tom Rakocevic are making record salaries—at our expense!!!

Thanks
George

Subject: [External/ Externe] Re: Airplane Noise

Hello Everyone,

Zoomer Radio reported on a study indicating that sleep-impaired drivers who get one or two hours less sleep double their accident risk.

MPP Tom Rakocevic has been pushing to end auto insurance postal code discrimination for a long time now. I wonder why our auto insurance rates are higher here than in other areas of Toronto. Could it be because drivers here are involved in more accidents?

I found this statement posted on MPP Tom Rakocevic's webpage.

"Families are paying sky-high auto insurance premiums while big insurance corporations make record profits. GTA drivers with clean records continue to be gouged by this unfair practice, which makes life unaffordable in places like Brampton, Scarborough, and Vaughan. Drivers need relief now," said Rakocevic.

Do the areas of Brampton, Scarborough and Vaughan have more air traffic?

Perhaps the GTAA and Pearson Airport can compensate areas with higher air traffic, assisting drivers who are forced to pay higher insurance rates because insurance companies have found that drivers in these postal code areas have more accidents.

I know I have lost sleep due to air traffic and MP Judy Sgro, NAV Canada and Pearson Airport are all well aware of this situation.

Take care,

Daryl Henderson

Subject: Airplane Noise

Hello Everyone,

I've attempted to contact MP Judy Sgro of Humber River-Black Creek, several times this past month to see if she would be able to set-up a meeting with GTAA CEO Deborah Flint and residents of the communities affected by airplane noise. I want Deborah Flint to answer questions about the airplane noise following her statement of plans to increase air traffic to and from Pearson Airport. However, I have not received a reply from MP Judy Sgro. Today, I spoke to a member of her team, who informed me that she has received my past messages. However, this person couldn't confirm whether Judy has attempted to arrange a meeting with Deborah Flint or not.

I don't believe another meeting with the Pearson Airport Complaint Department or NAV Canada representatives would benefit our community or any other communities affected by airplane noise. These representatives value their organizations' interests first, as they are paid employees. A NAV Canada representative once admitted to me that they follow directives from the GTAA and Pearson Airport.

MP Judy Sgro mentioned in one of our initial meetings that she lived in the city many years ago and learned to tolerate the airplane noise. It's a challenge to change someone's beliefs. There are some residents from the community who have advised me to remain quiet and not to complain about the airplane traffic, even suggesting I should move if I dislike the noise. The process time of the airplane noise petition MP Judy Sgro presented in the House of Commons remains uncertain, no one has a definite answer to offer. MP Judy Sgro's letter to former Minister of Transportation Omar Alghabra a couple of years ago regarding airplane noise went unanswered, which is concerning. I would expect Prime Minister Trudeau to have looked into it. Pablo Rodriguez replaced Omar Algahabra as the Federal Minister of Transportation on July 26, 2023. MP Judy Sgro lacks federal authority to alter air traffic in our community; she acts solely as a mediator; quite often residents in our community are ignored by her because she has nothing to offer or give to us.

It's encouraging that City TV aired a news story last night about Oakville residents affected by airplane noise. I contacted the reporter today to give a thank you for his work on the story and

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

briefly discussed how my community also experiences airplane noise issues. He let me know that he may be interested in doing a follow-up story here. I sure hope he does. The expression on Councillor Perruzza and Matias faces the day they came for an outdoor meeting and we were constantly being interrupted by the planes every minute would have said it all.

This problem should present an opportunity for federal opposition party leaders to question Prime Minister Trudeau directly in the House of Commons regarding his government's plans to address airplane traffic near Pearson Airport now and in the future. The airplane traffic situation is worsening here. I'm uncertain whether Prime Minister Trudeau acknowledges airplane traffic with noise and pollution as a real problem. Pearson Airport makes lots of money and for a few people who have to deal with the problem of living with airplane noise it is not a huge concern to his government.

Take care,

Daryl Henderson

Hello Josie,

If air traffic affects student learning and automobile insurance rates, then all levels of government—Municipal, Provincial, and Federal—must take responsibility for seriously looking into this matter and finding a solution to fix the problem. Air traffic can no longer be viewed solely as a Federal regulation matter.

It is terrible that you have not had a full night sleep in 7 months.

Yes, we need to join together!

Take care,

Daryl

Rakocevic <TRakocevic-CO@ndp.on.ca>
Subject: Re: Airplane Noise

Hello Everyone,

Zoomer Radio reported on a study indicating that sleep-impaired drivers who get one or two hours less sleep double their accident risk.

MPP Tom Rakocevic has been pushing to end auto insurance postal code discrimination for a long time now. I wonder why our auto insurance rates are higher here than in other areas of Toronto. Could it be because drivers here are involved in more accidents?

I found this statement posted on MPP Tom Rakocevic's webpage.

"Families are paying sky-high auto insurance premiums while big insurance corporations make record profits. GTA drivers with clean records continue to be gouged by this unfair practice, which makes life unaffordable in places like Brampton, Scarborough, and Vaughan. Drivers need relief now," said Rakocevic.

Do the areas of Brampton, Scarborough and Vaughan have more air traffic?

Perhaps the GTAA and Pearson Airport can compensate areas with higher air traffic, assisting drivers who are forced to pay higher insurance rates because insurance companies have found that drivers in these postal code areas have more accidents.

I know I have lost sleep due to air traffic and MP Judy Sgro, NAV Canada and Pearson Airport are all well aware of this situation.

Take care,

Daryl Henderson

Subject: Airplane Noise

Hello Everyone,

I've attempted to contact MP Judy Sgro of Humber River-Black Creek, several times this past month to see if she would be able to set-up a meeting with GTAA CEO Deborah Flint and residents of the communities affected by airplane noise. I want Deborah Flint to answer questions about the airplane noise following her statement of plans to increase air traffic to and from Pearson Airport. However, I have not received a reply from MP Judy Sgro. Today, I spoke to a member of her team, who informed me that she has received my past messages. However, this person couldn't confirm whether Judy has attempted to arrange a meeting with Deborah Flint or not.

I don't believe another meeting with the Pearson Airport Complaint Department or NAV Canada representatives would benefit our community or any other communities affected by airplane noise. These representatives value their organizations' interests first, as they are paid employees. A NAV Canada representative once admitted to me that they follow directives from the GTAA and Pearson Airport.

MP Judy Sgro mentioned in one of our initial meetings that she lived in the city many years ago and learned to tolerate the airplane noise. It's a challenge to change someone's beliefs. There are some residents from the community who have advised me to remain quiet and not to complain about the airplane traffic, even suggesting I should move if I dislike the noise. The process time of the airplane noise petition MP Judy Sgro presented in the House of Commons remains uncertain, no one has a definite answer to offer. MP Judy Sgro's letter to former Minister of Transportation Omar Alghabra a couple of years ago regarding airplane noise went unanswered, which is concerning. I would expect Prime Minister Trudeau to have looked into it. Pablo Rodriguez replaced Omar Algahabra as the Federal Minister of Transportation on July 26, 2023. MP Judy Sgro lacks federal authority to alter air traffic in our community; she acts solely as a mediator; quite often residents in our community are ignored by her because she has nothing to offer or give to us.

It's encouraging that City TV aired a news story last night about Oakville residents affected by airplane noise. I contacted the reporter today to give a thank you for his work on the story and briefly discussed how my community also experiences airplane noise issues. He let me know that he may be interested in doing a follow-up story here. I sure hope he does. The expression

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

on Councillor Perruzza and Matias faces the day they came for an outdoor meeting and we were constantly being interrupted by the planes every minute would have said it all.

This problem should present an opportunity for federal opposition party leaders to question Prime Minister Trudeau directly in the House of Commons regarding his government's plans to address airplane traffic near Pearson Airport now and in the future. The airplane traffic situation is worsening here. I'm uncertain whether Prime Minister Trudeau acknowledges airplane traffic with noise and pollution as a real problem. Pearson Airport makes lots of money and for a few people who have to deal with the problem of living with airplane noise it is not a huge concern to his government.

Take care,

Daryl Henderson

XAP-2024-534248(13)

Hello George,

Thank you for this information on car insurance.

I wonder, hypothetically, if a driver from this area were to get involved in a car accident and state to the investigating police officer afterward that they lost a couple of hours of sleep the night before because of the air traffic, and were not as alert as they normally are after a full night's rest, could this person sue the Federal Government, GTAA, or Pearson Airport?

The Federal Government, GTAA and Pearson Airport are all well aware that air traffic does cause some people to lose sleep.

Tom involves himself in community issues and events, which is good!

Take care,

Daryl

Subject: RE: Airplane Noise

Hi Daryl,

Drivers who live in the regions listed below are responsible for generating more claims than most other areas of the province. Insurance is based on statistical data and the more an Insurance company pays out in claims for a certain region, the higher the premiums will be for those particular postal codes. Insurance rates are the highest in Toronto and the GTA in general because of the fact that the majority of the drivers in Ontario live there. Naturally, the greater number of vehicles, the greater number of claims reported and hence, the greater amount of claims dollars paid out. Areas such as Brampton have been notorious for automobile accidents as far back as I can remember. Personally, I don't believe Insurance companies are making record profits, but I do believe our politicians such as Tom Rakocevic are making record salaries—at our expense!!!

Thanks
George

Hello George,

Thank you for this information on car insurance.

I wonder, hypothetically, if a driver from this area were to get involved in a car accident and state to the investigating police officer afterward that they lost a couple of hours of sleep the night before because of the air traffic, and were not as alert as they normally are after a full night's rest, could this person sue the Federal Government, GTAA, or Pearson Airport?

The Federal Government, GTAA and Pearson Airport are all well aware that air traffic does cause some people to lose sleep.

Tom involves himself in community issues and events, which is good!

Take care,

Daryl

Hi Daryl,

Drivers who live in the regions listed below are responsible for generating more claims than most other areas of the province. Insurance is based on statistical data and the more an Insurance company pays out in claims for a certain region, the higher the premiums will be for those particular postal codes. Insurance rates are the highest in Toronto and the GTA in general because of the fact that the majority of the drivers in Ontario live there. Naturally, the greater number of vehicles, the greater number of claims reported and hence, the greater amount of claims dollars paid out. Areas such as Brampton have been notorious for automobile accidents as far back as I can remember. Personally, I don't believe Insurance companies are making record profits, but I do believe our politicians such as Tom Rakocevic are making record salaries—at our expense!!!

Thanks
George

Subject: [External/ Externe] Re: Airplane Noise

Hello Everyone,

Zoomer Radio reported on a study indicating that sleep-impaired drivers who get one or two hours less sleep double their accident risk.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

MPP Tom Rakocevic has been pushing to end auto insurance postal code discrimination for a long time now. I wonder why our auto insurance rates are higher here than in other areas of Toronto. Could it be because drivers here are involved in more accidents?

I found this statement posted on MPP Tom Rakocevic's webpage.

"Families are paying sky-high auto insurance premiums while big insurance corporations make record profits. GTA drivers with clean records continue to be gouged by this unfair practice, which makes life unaffordable in places like Brampton, Scarborough, and Vaughan. Drivers need relief now," said Rakocevic.

Do the areas of Brampton, Scarborough and Vaughan have more air traffic?

Perhaps the GTAA and Pearson Airport can compensate areas with higher air traffic, assisting drivers who are forced to pay higher insurance rates because insurance companies have found that drivers in these postal code areas have more accidents.

I know I have lost sleep due to air traffic and MP Judy Sgro, NAV Canada and Pearson Airport are all well aware of this situation.

Take care,

Daryl Henderson

Subject: Airplane Noise

Hello Everyone,

I've attempted to contact MP Judy Sgro of Humber River-Black Creek, several times this past month to see if she would be able to set-up a meeting with GTAA CEO Deborah Flint and residents of the communities affected by airplane noise. I want Deborah Flint to answer questions about the airplane noise following her statement of plans to increase air traffic to and from Pearson Airport. However, I have not received a reply from MP Judy Sgro. Today, I spoke to a member of her team, who informed me that she has received my past messages. However, this person couldn't confirm whether Judy has attempted to arrange a meeting with Deborah Flint or not.

I don't believe another meeting with the Pearson Airport Complaint Department or NAV Canada representatives would benefit our community or any other communities affected by airplane noise. These representatives value their organizations' interests first, as they are paid employees. A NAV Canada representative once admitted to me that they follow directives from the GTAA and Pearson Airport.

MP Judy Sgro mentioned in one of our initial meetings that she lived in the city many years ago and learned to tolerate the airplane noise. It's a challenge to change someone's beliefs. There are some residents from the community who have advised me to remain quiet and not to complain about the airplane traffic, even suggesting I should move if I dislike the noise. The process time of the airplane noise petition MP Judy Sgro presented in the House of Commons remains uncertain, no one has a definite answer to offer. MP Judy Sgro's letter to former Minister of Transportation Omar Alghabra a couple of years ago regarding airplane noise went unanswered, which is concerning. I would expect Prime Minister Trudeau to have looked into it. Pablo Rodriguez replaced Omar Algahabra as the Federal Minister of Transportation on July 26, 2023. MP Judy Sgro lacks federal authority to alter air traffic in our community; she acts solely as a mediator; quite often residents in our community are ignored by her because she has nothing to offer or give to us.

It's encouraging that City TV aired a news story last night about Oakville residents affected by airplane noise. I contacted the reporter today to give a thank you for his work on the story and briefly discussed how my community also experiences airplane noise issues. He let me know that he may be interested in doing a follow-up story here. I sure hope he does. The expression on Councillor Perruzza and Matias faces the day they came for an outdoor meeting and we were constantly being interrupted by the planes every minute would have said it all.

This problem should present an opportunity for federal opposition party leaders to question Prime Minister Trudeau directly in the House of Commons regarding his government's plans to address airplane traffic near Pearson Airport now and in the future. The airplane traffic situation is worsening here. I'm uncertain whether Prime Minister Trudeau acknowledges airplane traffic with noise and pollution as a real problem. Pearson Airport makes lots of

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

money and for a few people who have to deal with the problem of living with airplane noise it is not a huge concern to his government.

Take care,

Daryl Henderson

Subject: Re: 'Planes flying low and loud': Oakville residents say flight traffic is a big nuisance

Did they actually lie to the media?

There was a flight path change for arrivals for 05/23.

They did make an operational change that shifted more planes onto the more northern E/W runways. This I recognize might be better for your community but given your level of frustration I don't think it's been better.

They also neglected to note a shift to larger planes which I suspect makes us feel like they are lower & they are in fact louder just cause they are bigger - noise is engine plus volume of air moved - larger planes move more air.

It was good the reporting said change in operations not flight path.

Irene

Hello folks in case you didn't catch it here's the video clip of the news real that was on City News.

The reporter is Pat (Patrick) Taney and it was done through Speakers Corner. Perhaps we can piggy back onto this story and ask Pat to televise our insanity that we endure with the planes and the lack of political support we are getting from our elected representatives? Daryl you have all the documentation.

https://toronto.citynews.ca/2024/06/05/oakville-airplane-flight-traffic-toronto-pearson-airport/

At the bottom of the article the link is there for the submission.

https://toronto.citynews.ca/2021/10/17/speakerscorner/

Have a great evening.

Sylvia

Subject: [External/Externe]: Re: Airplane Noise

XAP-2024-534248(15)

Viewing compensation as a "temporary" solution to airplane noise while working on a permanent solution is a pragmatic approach. This perspective can be elaborated on with the following points:

1. **Acknowledgment of Immediate Impact**:
    - Recognizes the immediate discomfort and disruption caused by airplane noise.
    - Compensation serves as a short-term measure to address grievances and provide relief to affected residents.
2. **Support for Affected Communities**:
    - Financial compensation can help mitigate some of the impacts, such as soundproofing homes or relocating temporarily.
    - Offers tangible acknowledgment from airlines or regulatory bodies of the disruption caused.
3. **Incentivizing Long-term Solutions**:
    - Encourages stakeholders to invest in research and development of noise reduction technologies.
    - Promotes the exploration of alternative flight paths, better scheduling, and other operational changes to minimize noise.
4. **Public Relations and Trust Building**:
    - Demonstrates goodwill and responsibility from aviation authorities and airlines.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

- Helps maintain trust and cooperation from the public while permanent solutions are being developed.

5. **Temporary Nature of Compensation**:
    - Emphasizes that compensation is not a permanent fix but a stopgap measure.
    - Keeps the focus on the ultimate goal of finding sustainable, long-term solutions to airplane noise.

By highlighting these points, we can effectively communicate why compensation should be viewed as a temporary solution while advocating for more permanent and sustainable measures to address airplane noise issues.

Long Term Solution

My vision for a long-term solution where no Canadian has to live under the torture of airplane noise is ambitious and impactful. Here are several key elements that could support this vision:

Placing airports on Crown land away from major cities and connecting them with bullet trains is a forward-thinking strategy that addresses both noise pollution and accessibility. Here's how this solution could be effectively implemented:

Strategic Placement of Airports

1. **Selection of Crown Land**:
    - **Assessment and Identification**: Identify suitable Crown land locations far from major cities but accessible enough for infrastructure development.
    - **Environmental Impact Studies**: Conduct thorough environmental impact assessments to ensure minimal disruption to wildlife and ecosystems.
2. **Infrastructure Development**:
    - **Construction**: Develop state-of-the-art airports with facilities designed to handle large volumes of passengers and cargo.
    - **Sustainable Practices**: Incorporate green building practices to minimize environmental impact and promote sustainability.

High-Speed Rail Connections

1. **Bullet Train Network**:
    - **Route Planning**: Design bullet train routes that efficiently connect new airports to downtown cores and other major hubs.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

- **Stations and Access**: Build stations at strategic points within cities to maximize accessibility and convenience for passengers.

2. **Technology and Efficiency**:
   - **High-Speed Trains**: Invest in cutting-edge bullet train technology capable of high speeds to minimize travel time.
   - **Reliability and Frequency**: Ensure frequent and reliable service to meet passenger demand and provide a seamless travel experience.

Benefits and Implementation

1. **Noise Reduction**:
   - **Distance from Residential Areas**: Placing airports on Crown land away from cities significantly reduces noise pollution in residential areas.
   - **Buffer Zones**: Utilize buffer zones around airports to further minimize noise impact on surrounding environments.

2. **Economic and Social Impact**:
   - **Job Creation**: Airport and rail infrastructure projects create jobs and stimulate local economies.
   - **Improved Connectivity**: High-speed rail enhances connectivity between cities and remote areas, fostering regional development.

3. **Environmental Considerations**:
   - **Carbon Footprint**: Bullet trains are generally more environmentally friendly than cars and planes, reducing the overall carbon footprint of travel.
   - **Green Initiatives**: Implement green initiatives at airports and along rail routes, such as renewable energy sources and wildlife conservation projects.

4. **Urban Planning and Development**:
   - **Urban Decongestion**: Relocating airports can reduce congestion in city centers and free up land for other urban developments.
   - **Balanced Growth**: Promote balanced regional growth by improving accessibility to remote areas and distributing economic activities more evenly.

Implementation Strategy

1. **Government and Stakeholder Collaboration**:

- **Public-Private Partnerships**: Engage in partnerships with private companies for investment and expertise in developing high-speed rail and airport infrastructure.
- **Community Involvement**: Involve local communities in planning to address concerns and ensure that developments meet public needs.

2. **Funding and Investment**:

   - **Government Funding**: Secure funding through federal and provincial government programs dedicated to infrastructure development.
   - **Private Investment**: Attract private investors by highlighting the economic benefits and potential returns on investment.

3. **Phased Rollout**:

   - **Pilot Projects**: Start with pilot projects to test and refine the concept before full-scale implementation.
   - **Gradual Expansion**: Gradually expand the network based on the success of initial projects and growing demand.

By placing airports on Crown land and connecting them with high-speed bullet trains, this approach offers a comprehensive solution to airplane noise while improving overall transportation efficiency and fostering sustainable development.

As Canadians, embracing a forward-thinking, innovative approach to addressing airplane noise and improving transportation infrastructure sets a positive example globally.

Canada can lead the world by moving forward with the aforementioned visionary plan.

Regards,
Fabio Ovettini

Hello George,

Thank you for this information on car insurance.

I wonder, hypothetically, if a driver from this area were to get involved in a car accident and state to the investigating police officer afterward that they lost a couple of hours of sleep the night before because of the air traffic, and were not as alert as they normally are after a full night's rest, could this person sue the Federal Government, GTAA, or Pearson Airport?

The Federal Government, GTAA and Pearson Airport are all well aware that air traffic does cause some people to lose sleep.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Tom involves himself in community issues and events, which is good!

Take care,

Daryl

Subject: RE: Airplane Noise

Hi Daryl,

Drivers who live in the regions listed below are responsible for generating more claims than most other areas of the province. Insurance is based on statistical data and the more an Insurance company pays out in claims for a certain region, the higher the premiums will be for those particular postal codes. Insurance rates are the highest in Toronto and the GTA in general because of the fact that the majority of the drivers in Ontario live there. Naturally, the greater number of vehicles, the greater number of claims reported and hence, the greater amount of claims dollars paid out. Areas such as Brampton have been notorious for automobile accidents as far back as I can remember. Personally, I don't believe Insurance companies are making record profits, but I do believe our politicians such as Tom Rakocevic are making record salaries—at our expense!!!

Thanks

Subject: [External/ Externe] Re: Airplane Noise

Hello Everyone,

Zoomer Radio reported on a study indicating that sleep-impaired drivers who get one or two hours less sleep double their accident risk.

MPP Tom Rakocevic has been pushing to end auto insurance postal code discrimination for a long time now. I wonder why our auto insurance rates are higher here than in other areas of Toronto. Could it be because drivers here are involved in more accidents?

I found this statement posted on MPP Tom Rakocevic's webpage.

"Families are paying sky-high auto insurance premiums while big insurance corporations make record profits. GTA drivers with clean records continue to be gouged by this unfair practice, which makes life unaffordable in places like Brampton, Scarborough, and Vaughan. Drivers need relief now," said Rakocevic.

Do the areas of Brampton, Scarborough and Vaughan have more air traffic?

Perhaps the GTAA and Pearson Airport can compensate areas with higher air traffic, assisting drivers who are forced to pay higher insurance rates because insurance companies have found that drivers in these postal code areas have more accidents.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

I know I have lost sleep due to air traffic and MP Judy Sgro, NAV Canada and Pearson Airport are all well aware of this situation.

Take care,

Daryl Henderson

Subject: Airplane Noise

Hello Everyone,

I've attempted to contact MP Judy Sgro of Humber River-Black Creek, several times this past month to see if she would be able to set-up a meeting with GTAA CEO Deborah Flint and residents of the communities affected by airplane noise. I want Deborah Flint to answer questions about the airplane noise following her statement of plans to increase air traffic to and from Pearson Airport. However, I have not received a reply from MP Judy Sgro. Today, I spoke to a member of her team, who informed me that she has received my past messages. However, this person couldn't confirm whether Judy has attempted to arrange a meeting with Deborah Flint or not.

I don't believe another meeting with the Pearson Airport Complaint Department or NAV Canada representatives would benefit our community or any other communities affected by airplane noise. These representatives value their organizations' interests first, as they are paid employees. A NAV Canada representative once admitted to me that they follow directives from the GTAA and Pearson Airport.

MP Judy Sgro mentioned in one of our initial meetings that she lived in the city many years ago and learned to tolerate the airplane noise. It's a challenge to change someone's beliefs. There are some residents from the community who have advised me to remain quiet and not to complain about the airplane traffic, even suggesting I should move if I dislike the noise. The process time of the airplane noise petition MP Judy Sgro presented in the House of Commons remains uncertain, no one has a definite answer to offer. MP Judy Sgro's letter to former Minister of Transportation Omar Alghabra a couple of years ago regarding airplane noise went unanswered, which is concerning. I would expect Prime Minister Trudeau to have looked into it. Pablo Rodriguez replaced Omar Algahabra as the Federal Minister of Transportation on July 26, 2023. MP Judy Sgro lacks federal authority to alter air traffic in our community; she acts solely as a mediator; quite often residents in our community are ignored by her because she has nothing to offer or give to us.

It's encouraging that City TV aired a news story last night about Oakville residents affected by airplane noise. I contacted the reporter today to give a thank you for his work on the story and briefly discussed how my community also experiences airplane noise issues. He let me know that he may be interested in doing a follow-up story here. I sure hope he does. The expression on Councillor Perruzza and Matias faces the day they came for an outdoor meeting and we were constantly being interrupted by the planes every minute would have said it all.

This problem should present an opportunity for federal opposition party leaders to question Prime Minister Trudeau directly in the House of Commons regarding his government's plans to address airplane traffic near Pearson Airport now and in the future. The airplane traffic situation is worsening here. I'm uncertain whether Prime Minister Trudeau acknowledges airplane traffic with noise and pollution as a real problem. Pearson Airport makes lots of money and for a few people who have to deal with the problem of living with airplane noise it is not a huge concern to his government.

Take care,

Daryl Henderson

Subject: Re: 'Planes flying low and loud': Oakville residents say flight traffic is a big nuisance

Did they actually lie to the media?

There was a flight path change for arrivals for 05/23.

They did make an operational change that shifted more planes onto the more northern E/W runways. This I recognize might be better for your community but given your level of frustration I don't think it's been better.

They also neglected to note a shift to larger planes which I suspect makes us feel like they are lower & they are in fact louder just cause they are bigger - noise is engine plus volume of air moved - larger planes move more air.

It was good the reporting said change in operations not flight path.

Irene

Hello folks in case you didn't catch it here's the video clip of the news real that was on City News.

The reporter is Pat (Patrick) Taney and it was done through Speakers Corner. Perhaps we can piggy back onto this story and ask Pat to televise our insanity that we endure with the planes and the lack of political support we are getting from our elected representatives? Daryl you have all the documentation.

https://toronto.citynews.ca/2024/06/05/oakville-airplane-flight-traffic-toronto-pearson-airport/

At the bottom of the article the link is there for the submission.

https://toronto.citynews.ca/2021/10/17/speakerscorner/

Have a great evening.

Sylvia

Subject: [External/Externe]: Airplane Noise ...Viewing compensation as a "temporary" solution to airplane noise

XAP-2024-534248(16)

Excellent ! lots to digest and think about with potential promise of pragmatic and sustainable hope. Competing needs, impossible solutions. For now - noise cancelling devices, tombing indoors , minimal outdoor exposure and only between 2430 to 0631 except with curfew pushed, complaining, conjoining. Reads like a Margaret Atwood futuristic novel, Oryx and Crake. post apocalyptic plane pollution. Ideas into action plan.

On Jun 7, 2024, at 8:49 PM, Fabio Ovettini <fabio217@yahoo.com> wrote:

Viewing compensation as a "temporary" solution to airplane noise while working on a permanent solution is a pragmatic approach. This perspective can be elaborated on with the following points:

1. **Acknowledgment of Immediate Impact**:
    - Recognizes the immediate discomfort and disruption caused by airplane noise.
    - Compensation serves as a short-term measure to address grievances and provide relief to affected residents.
2. **Support for Affected Communities**:
    - Financial compensation can help mitigate some of the impacts, such as soundproofing homes or relocating temporarily.
    - Offers tangible acknowledgment from airlines or regulatory bodies of the disruption caused.
3. **Incentivizing Long-term Solutions**:

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

   - Encourages stakeholders to invest in research and development of noise reduction technologies.
   - Promotes the exploration of alternative flight paths, better scheduling, and other operational changes to minimize noise.
4. **Public Relations and Trust Building**:
   - Demonstrates goodwill and responsibility from aviation authorities and airlines.
   - Helps maintain trust and cooperation from the public while permanent solutions are being developed.
5. **Temporary Nature of Compensation**:
   - Emphasizes that compensation is not a permanent fix but a stopgap measure.
   - Keeps the focus on the ultimate goal of finding sustainable, long-term solutions to airplane noise.

By highlighting these points, we can effectively communicate why compensation should be viewed as a temporary solution while advocating for more permanent and sustainable measures to address airplane noise issues.

Long Term Solution

My vision for a long-term solution where no Canadian has to live under the torture of airplane noise is ambitious and impactful. Here are several key elements that could support this vision:

Placing airports on Crown land away from major cities and connecting them with bullet trains is a forward-thinking strategy that addresses both noise pollution and accessibility. Here's how this solution could be effectively implemented:

Strategic Placement of Airports

1. **Selection of Crown Land**:
   - **Assessment and Identification**: Identify suitable Crown land locations far from major cities but accessible enough for infrastructure development.
   - **Environmental Impact Studies**: Conduct thorough environmental impact assessments to ensure minimal disruption to wildlife and ecosystems.
2. **Infrastructure Development**:
   - **Construction**: Develop state-of-the-art airports with facilities designed to handle large volumes of passengers and cargo.
   - **Sustainable Practices**: Incorporate green building practices to minimize environmental impact and promote sustainability.

High-Speed Rail Connections

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

1. **Bullet Train Network**:
    - **Route Planning**: Design bullet train routes that efficiently connect new airports to downtown cores and other major hubs.
    - **Stations and Access**: Build stations at strategic points within cities to maximize accessibility and convenience for passengers.
2. **Technology and Efficiency**:
    - **High-Speed Trains**: Invest in cutting-edge bullet train technology capable of high speeds to minimize travel time.
    - **Reliability and Frequency**: Ensure frequent and reliable service to meet passenger demand and provide a seamless travel experience.

Benefits and Implementation

1. **Noise Reduction**:
    - **Distance from Residential Areas**: Placing airports on Crown land away from cities significantly reduces noise pollution in residential areas.
    - **Buffer Zones**: Utilize buffer zones around airports to further minimize noise impact on surrounding environments.
2. **Economic and Social Impact**:
    - **Job Creation**: Airport and rail infrastructure projects create jobs and stimulate local economies.
    - **Improved Connectivity**: High-speed rail enhances connectivity between cities and remote areas, fostering regional development.
3. **Environmental Considerations**:
    - **Carbon Footprint**: Bullet trains are generally more environmentally friendly than cars and planes, reducing the overall carbon footprint of travel.
    - **Green Initiatives**: Implement green initiatives at airports and along rail routes, such as renewable energy sources and wildlife conservation projects.
4. **Urban Planning and Development**:
    - **Urban Decongestion**: Relocating airports can reduce congestion in city centers and free up land for other urban developments.
    - **Balanced Growth**: Promote balanced regional growth by improving accessibility to remote areas and distributing economic activities more evenly.

Implementation Strategy

1. **Government and Stakeholder Collaboration**:

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

- **Public-Private Partnerships**: Engage in partnerships with private companies for investment and expertise in developing high-speed rail and airport infrastructure.
- **Community Involvement**: Involve local communities in planning to address concerns and ensure that developments meet public needs.

2. **Funding and Investment**:

   - **Government Funding**: Secure funding through federal and provincial government programs dedicated to infrastructure development.
   - **Private Investment**: Attract private investors by highlighting the economic benefits and potential returns on investment.

3. **Phased Rollout**:

   - **Pilot Projects**: Start with pilot projects to test and refine the concept before full-scale implementation.
   - **Gradual Expansion**: Gradually expand the network based on the success of initial projects and growing demand.

By placing airports on Crown land and connecting them with high-speed bullet trains, this approach offers a comprehensive solution to airplane noise while improving overall transportation efficiency and fostering sustainable development.

As Canadians, embracing a forward-thinking, innovative approach to addressing airplane noise and improving transportation infrastructure sets a positive example globally.

Canada can lead the world by moving forward with the aforementioned visionary plan.

Regards,
Fabio Ovettini

Hi Daryl,

Drivers who live in the regions listed below are responsible for generating more claims than most other areas of the province. Insurance is based on statistical data and the more an Insurance company pays out in claims for a certain region, the higher the premiums will be for those particular postal codes. Insurance rates are the highest in Toronto and the GTA in general because of the fact that the majority of the drivers in Ontario live there. Naturally, the greater number of vehicles, the greater number of claims reported and hence, the greater amount of claims dollars paid out. Areas such as Brampton have been notorious for automobile accidents as far back as I can remember. Personally, I don't believe Insurance companies are making record profits, but I do believe our politicians such as Tom Rakocevic are making record salaries—at our expense!!!

Thanks

George

Subject: [External/ Externe] Re: Airplane Noise

Hello Everyone,

Zoomer Radio reported on a study indicating that sleep-impaired drivers who get one or two hours less sleep double their accident risk.

MPP Tom Rakocevic has been pushing to end auto insurance postal code discrimination for a long time now. I wonder why our auto insurance rates are higher here than in other areas of Toronto. Could it be because drivers here are involved in more accidents?

I found this statement posted on MPP Tom Rakocevic's webpage.

"Families are paying sky-high auto insurance premiums while big insurance corporations make record profits. GTA drivers with clean records continue to be gouged by this unfair practice, which makes life unaffordable in places like Brampton, Scarborough, and Vaughan. Drivers need relief now," said Rakocevic.

Do the areas of Brampton, Scarborough and Vaughan have more air traffic?

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Perhaps the GTAA and Pearson Airport can compensate areas with higher air traffic, assisting drivers who are forced to pay higher insurance rates because insurance companies have found that drivers in these postal code areas have more accidents.

I know I have lost sleep due to air traffic and MP Judy Sgro, NAV Canada and Pearson Airport are all well aware of this situation.

Take care,

Daryl Henderson

Subject: Airplane Noise

Hello Everyone,

I've attempted to contact MP Judy Sgro of Humber River-Black Creek, several times this past month to see if she would be able to set-up a meeting with GTAA CEO Deborah Flint and residents of the communities affected by airplane noise. I want Deborah Flint to answer

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

questions about the airplane noise following her statement of plans to increase air traffic to and from Pearson Airport. However, I have not received a reply from MP Judy Sgro. Today, I spoke to a member of her team, who informed me that she has received my past messages. However, this person couldn't confirm whether Judy has attempted to arrange a meeting with Deborah Flint or not.

I don't believe another meeting with the Pearson Airport Complaint Department or NAV Canada representatives would benefit our community or any other communities affected by airplane noise. These representatives value their organizations' interests first, as they are paid employees. A NAV Canada representative once admitted to me that they follow directives from the GTAA and Pearson Airport.

MP Judy Sgro mentioned in one of our initial meetings that she lived in the city many years ago and learned to tolerate the airplane noise. It's a challenge to change someone's beliefs. There are some residents from the community who have advised me to remain quiet and not to complain about the airplane traffic, even suggesting I should move if I dislike the noise. The process time of the airplane noise petition MP Judy Sgro presented in the House of Commons remains uncertain, no one has a definite answer to offer. MP Judy Sgro's letter to former Minister of Transportation Omar Alghabra a couple of years ago regarding airplane noise went unanswered, which is concerning. I would expect Prime Minister Trudeau to have looked into it. Pablo Rodriguez replaced Omar Algahabra as the Federal Minister of Transportation on July 26, 2023. MP Judy Sgro lacks federal authority to alter air traffic in our community; she acts solely as a mediator; quite often residents in our community are ignored by her because she has nothing to offer or give to us.

It's encouraging that City TV aired a news story last night about Oakville residents affected by airplane noise. I contacted the reporter today to give a thank you for his work on the story and briefly discussed how my community also experiences airplane noise issues. He let me know that he may be interested in doing a follow-up story here. I sure hope he does. The expression on Councillor Perruzza and Matias faces the day they came for an outdoor meeting and we were constantly being interrupted by the planes every minute would have said it all.

This problem should present an opportunity for federal opposition party leaders to question Prime Minister Trudeau directly in the House of Commons regarding his government's plans to address airplane traffic near Pearson Airport now and in the future. The airplane traffic situation is worsening here. I'm uncertain whether Prime Minister Trudeau acknowledges airplane traffic with noise and pollution as a real problem. Pearson Airport makes lots of money and for a few people who have to deal with the problem of living with airplane noise it is not a huge concern to his government.

Take care,

Daryl Henderson

Subject: Re: 'Planes flying low and loud': Oakville residents say flight traffic is a big nuisance

Did they actually lie to the media?

There was a flight path change for arrivals for 05/23.

They did make an operational change that shifted more planes onto the more northern E/W runways. This I recognize might be better for your community but given your level of frustration I don't think it's been better.

They also neglected to note a shift to larger planes which I suspect makes us feel like they are lower & they are in fact louder just cause they are bigger - noise is engine plus volume of air moved - larger planes move more air.

It was good the reporting said change in operations not flight path.

Irene

Hello folks in case you didn't catch it here's the video clip of the news real that was on City News.

The reporter is Pat (Patrick) Taney and it was done through Speakers Corner. Perhaps we can piggy back onto this story and ask Pat to televise our insanity that we endure with the planes and the lack of political support we are getting from our elected representatives? Daryl you have all the documentation.

https://toronto.citynews.ca/2024/06/05/oakville-airplane-flight-traffic-toronto-pearson-airport/

At the bottom of the article the link is there for the submission.

https://toronto.citynews.ca/2021/10/17/speakerscorner/

Have a great evening.

Sylvia

Subject: [External/Externe]: Airplane Noise ...Viewing compensation as a "temporary" solution to airplane noise

XAP-2024-534248(16)

Excellent ! lots to digest and think about with potential promise of pragmatic and sustainable hope. Competing needs, impossible solutions. For now - noise cancelling devices, tombing indoors , minimal outdoor exposure and only between 2430 to 0631 except with curfew pushed, complaining, conjoining. Reads like a Margaret Atwood futuristic novel, Oryx and Crake. post apocalyptic plane pollution. Ideas into action plan.

On Jun 7, 2024, at 8:49 PM, Fabio Ovettini <fabio217@yahoo.com> wrote:

Viewing compensation as a "temporary" solution to airplane noise while working on a permanent solution is a pragmatic approach. This perspective can be elaborated on with the following points:

1. **Acknowledgment of Immediate Impact**:
    - Recognizes the immediate discomfort and disruption caused by airplane noise.
    - Compensation serves as a short-term measure to address grievances and provide relief to affected residents.
2. **Support for Affected Communities**:
    - Financial compensation can help mitigate some of the impacts, such as soundproofing homes or relocating temporarily.
    - Offers tangible acknowledgment from airlines or regulatory bodies of the disruption caused.
3. **Incentivizing Long-term Solutions**:

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

   - Encourages stakeholders to invest in research and development of noise reduction technologies.
   - Promotes the exploration of alternative flight paths, better scheduling, and other operational changes to minimize noise.
4. **Public Relations and Trust Building**:
   - Demonstrates goodwill and responsibility from aviation authorities and airlines.
   - Helps maintain trust and cooperation from the public while permanent solutions are being developed.
5. **Temporary Nature of Compensation**:
   - Emphasizes that compensation is not a permanent fix but a stopgap measure.
   - Keeps the focus on the ultimate goal of finding sustainable, long-term solutions to airplane noise.

By highlighting these points, we can effectively communicate why compensation should be viewed as a temporary solution while advocating for more permanent and sustainable measures to address airplane noise issues.

Long Term Solution

My vision for a long-term solution where no Canadian has to live under the torture of airplane noise is ambitious and impactful. Here are several key elements that could support this vision:

Placing airports on Crown land away from major cities and connecting them with bullet trains is a forward-thinking strategy that addresses both noise pollution and accessibility. Here's how this solution could be effectively implemented:

Strategic Placement of Airports

1. **Selection of Crown Land**:
   - **Assessment and Identification**: Identify suitable Crown land locations far from major cities but accessible enough for infrastructure development.
   - **Environmental Impact Studies**: Conduct thorough environmental impact assessments to ensure minimal disruption to wildlife and ecosystems.
2. **Infrastructure Development**:
   - **Construction**: Develop state-of-the-art airports with facilities designed to handle large volumes of passengers and cargo.
   - **Sustainable Practices**: Incorporate green building practices to minimize environmental impact and promote sustainability.

High-Speed Rail Connections

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

1. **Bullet Train Network**:
    - **Route Planning**: Design bullet train routes that efficiently connect new airports to downtown cores and other major hubs.
    - **Stations and Access**: Build stations at strategic points within cities to maximize accessibility and convenience for passengers.
2. **Technology and Efficiency**:
    - **High-Speed Trains**: Invest in cutting-edge bullet train technology capable of high speeds to minimize travel time.
    - **Reliability and Frequency**: Ensure frequent and reliable service to meet passenger demand and provide a seamless travel experience.

Benefits and Implementation

1. **Noise Reduction**:
    - **Distance from Residential Areas**: Placing airports on Crown land away from cities significantly reduces noise pollution in residential areas.
    - **Buffer Zones**: Utilize buffer zones around airports to further minimize noise impact on surrounding environments.
2. **Economic and Social Impact**:
    - **Job Creation**: Airport and rail infrastructure projects create jobs and stimulate local economies.
    - **Improved Connectivity**: High-speed rail enhances connectivity between cities and remote areas, fostering regional development.
3. **Environmental Considerations**:
    - **Carbon Footprint**: Bullet trains are generally more environmentally friendly than cars and planes, reducing the overall carbon footprint of travel.
    - **Green Initiatives**: Implement green initiatives at airports and along rail routes, such as renewable energy sources and wildlife conservation projects.
4. **Urban Planning and Development**:
    - **Urban Decongestion**: Relocating airports can reduce congestion in city centers and free up land for other urban developments.
    - **Balanced Growth**: Promote balanced regional growth by improving accessibility to remote areas and distributing economic activities more evenly.

Implementation Strategy

1. **Government and Stakeholder Collaboration**:

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

   - **Public-Private Partnerships**: Engage in partnerships with private companies for investment and expertise in developing high-speed rail and airport infrastructure.
   - **Community Involvement**: Involve local communities in planning to address concerns and ensure that developments meet public needs.
2. **Funding and Investment**:
   - **Government Funding**: Secure funding through federal and provincial government programs dedicated to infrastructure development.
   - **Private Investment**: Attract private investors by highlighting the economic benefits and potential returns on investment.
3. **Phased Rollout**:
   - **Pilot Projects**: Start with pilot projects to test and refine the concept before full-scale implementation.
   - **Gradual Expansion**: Gradually expand the network based on the success of initial projects and growing demand.

By placing airports on Crown land and connecting them with high-speed bullet trains, this approach offers a comprehensive solution to airplane noise while improving overall transportation efficiency and fostering sustainable development.

As Canadians, embracing a forward-thinking, innovative approach to addressing airplane noise and improving transportation infrastructure sets a positive example globally.

Canada can lead the world by moving forward with the aforementioned visionary plan.

Regards,
Fabio Ovettini

Hello George,

Thank you for this information on car insurance.

I wonder, hypothetically, if a driver from this area were to get involved in a car accident and state to the investigating police officer afterward that they lost a couple of hours of sleep the night before because of the air traffic, and were not as alert as they normally are after a full night's rest, could this person sue the Federal Government, GTAA, or Pearson Airport?

The Federal Government, GTAA and Pearson Airport are all well aware that air traffic does cause some people to lose sleep.

Tom involves himself in community issues and events, which is good!

Take care,

Subject: RE: Airplane Noise

Hi Daryl,

Drivers who live in the regions listed below are responsible for generating more claims than most other areas of the province. Insurance is based on statistical data and the more an Insurance company pays out in claims for a certain region, the higher the premiums will be for those particular postal codes. Insurance rates are the highest in Toronto and the GTA in general because of the fact that the majority of the drivers in Ontario live there. Naturally, the greater number of vehicles, the greater number of claims reported and hence, the greater amount of claims dollars paid out. Areas such as Brampton have been notorious for automobile accidents as far back as I can remember. Personally, I don't believe Insurance companies are making record profits, but I do believe our politicians such as Tom Rakocevic are making record salaries—at our expense!!!

Thanks

George

Subject: [External/ Externe] Re: Airplane Noise

Hello Everyone,

Zoomer Radio reported on a study indicating that sleep-impaired drivers who get one or two hours less sleep double their accident risk.

MPP Tom Rakocevic has been pushing to end auto insurance postal code discrimination for a long time now. I wonder why our auto insurance rates are higher here than in other areas of Toronto. Could it be because drivers here are involved in more accidents?

I found this statement posted on MPP Tom Rakocevic's webpage.

"Families are paying sky-high auto insurance premiums while big insurance corporations make record profits. GTA drivers with clean records continue to be gouged by this unfair practice, which makes life unaffordable in places like Brampton, Scarborough, and Vaughan. Drivers need relief now," said Rakocevic.

Do the areas of Brampton, Scarborough and Vaughan have more air traffic?

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Perhaps the GTAA and Pearson Airport can compensate areas with higher air traffic, assisting drivers who are forced to pay higher insurance rates because insurance companies have found that drivers in these postal code areas have more accidents.

I know I have lost sleep due to air traffic and MP Judy Sgro, NAV Canada and Pearson Airport are all well aware of this situation.

Take care,

Daryl Henderson

Subject: Airplane Noise

Hello Everyone,

I've attempted to contact MP Judy Sgro of Humber River-Black Creek, several times this past month to see if she would be able to set-up a meeting with GTAA CEO Deborah Flint and residents of the communities affected by airplane noise. I want Deborah Flint to answer

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

questions about the airplane noise following her statement of plans to increase air traffic to and from Pearson Airport. However, I have not received a reply from MP Judy Sgro. Today, I spoke to a member of her team, who informed me that she has received my past messages. However, this person couldn't confirm whether Judy has attempted to arrange a meeting with Deborah Flint or not.

I don't believe another meeting with the Pearson Airport Complaint Department or NAV Canada representatives would benefit our community or any other communities affected by airplane noise. These representatives value their organizations' interests first, as they are paid employees. A NAV Canada representative once admitted to me that they follow directives from the GTAA and Pearson Airport.

MP Judy Sgro mentioned in one of our initial meetings that she lived in the city many years ago and learned to tolerate the airplane noise. It's a challenge to change someone's beliefs. There are some residents from the community who have advised me to remain quiet and not to complain about the airplane traffic, even suggesting I should move if I dislike the noise. The process time of the airplane noise petition MP Judy Sgro presented in the House of Commons remains uncertain, no one has a definite answer to offer. MP Judy Sgro's letter to former Minister of Transportation Omar Alghabra a couple of years ago regarding airplane noise went unanswered, which is concerning. I would expect Prime Minister Trudeau to have looked into it. Pablo Rodriguez replaced Omar Algahabra as the Federal Minister of Transportation on July 26, 2023. MP Judy Sgro lacks federal authority to alter air traffic in our community; she acts solely as a mediator; quite often residents in our community are ignored by her because she has nothing to offer or give to us.

It's encouraging that City TV aired a news story last night about Oakville residents affected by airplane noise. I contacted the reporter today to give a thank you for his work on the story and briefly discussed how my community also experiences airplane noise issues. He let me know that he may be interested in doing a follow-up story here. I sure hope he does. The expression on Councillor Perruzza and Matias faces the day they came for an outdoor meeting and we were constantly being interrupted by the planes every minute would have said it all.

This problem should present an opportunity for federal opposition party leaders to question Prime Minister Trudeau directly in the House of Commons regarding his government's plans to address airplane traffic near Pearson Airport now and in the future. The airplane traffic situation is worsening here. I'm uncertain whether Prime Minister Trudeau acknowledges airplane traffic with noise and pollution as a real problem. Pearson Airport makes lots of money and for a few people who have to deal with the problem of living with airplane noise it is not a huge concern to his government.

Take care,

Daryl Henderson

Subject: Re: 'Planes flying low and loud': Oakville residents say flight traffic is a big nuisance

Did they actually lie to the media?

There was a flight path change for arrivals for 05/23.

They did make an operational change that shifted more planes onto the more northern E/W runways. This I recognize might be better for your community but given your level of frustration I don't think it's been better.

They also neglected to note a shift to larger planes which I suspect makes us feel like they are lower & they are in fact louder just cause they are bigger - noise is engine plus volume of air moved - larger planes move more air.

It was good the reporting said change in operations not flight path.

Irene

Hello folks in case you didn't catch it here's the video clip of the news real that was on City News.

The reporter is Pat (Patrick) Taney and it was done through Speakers Corner. Perhaps we can piggy back onto this story and ask Pat to televise our insanity that we endure with the planes and the lack of political support we are getting from our elected representatives? Daryl you have all the documentation.

https://toronto.citynews.ca/2024/06/05/oakville-airplane-flight-traffic-toronto-pearson-airport/

At the bottom of the article the link is there for the submission.

https://toronto.citynews.ca/2021/10/17/speakerscorner/

Have a great evening.

Sylvia

Subject: [External/Externe]: Re: Airplane Noise ...Viewing compensation as a "temporary" solution to airplane noise

XAP-2024-534248(17)

In a short number of decades we have made lots of progress.

The transformation of societal attitudes towards once-normalized harmful behaviors or substances reflects significant progress in public health and social awareness. Here are a few examples:

1. **Smoking**: Cigarette smoking was once glamorized and widely accepted as a social norm. However, as scientific research uncovered its severe health risks, attitudes shifted dramatically. Smoking is now largely stigmatized, with efforts focused on prevention, cessation, and creating smoke-free environments.
2. **Drinking and Driving**: In the past, driving under the influence of alcohol was often brushed off as reckless behavior. However, increased awareness campaigns, stricter laws, and harsher penalties have changed societal attitudes. Drinking and driving are now widely condemned, with a greater emphasis on designated drivers, public transportation, and ride-sharing services.
3. **Noise Pollution**: Noise pollution, whether from urban traffic, industrial activities, or recreational sources, was once seen as an inevitable part of city life. However, as research has shown its adverse effects on health and well-being, attitudes have shifted towards prioritizing quieter environments. Urban planning initiatives and community advocacy now seek to mitigate noise pollution and promote quieter, more livable cities.
4. **Fast Food and Nutrition**: Fast food consumption was once considered convenient and affordable, despite its poor nutritional quality. However, with rising awareness of obesity, heart disease, and other health issues linked to excessive fast food consumption, attitudes towards nutrition have evolved. There's now a greater emphasis on healthier eating habits, access to fresh foods, and nutrition education.

5. **Environmental Conservation**: Historically, exploitation of natural resources and pollution were often seen as necessary for economic growth and development. However, as the environmental impacts became increasingly apparent, attitudes shifted towards sustainability and conservation. Today, there's greater recognition of the need to protect ecosystems, reduce carbon emissions, and mitigate climate change.

These examples highlight the power of education, advocacy, and policy interventions in reshaping societal norms and behaviours for the better. By challenging outdated attitudes and promoting healthier, more sustainable alternatives, communities can foster positive change and improve public health and well-being.

I would like to see next noise pollution be taken with the seriousness it deserves.

On Friday, June 7, 2024 at 09:14:09 p.m. EDT, Skye E Augustine <skye.com@live.com> wrote:

Excellent ! lots to digest and think about with potential promise of pragmatic and sustainable hope. Competing needs, impossible solutions. For now - noise cancelling devices, tombing indoors , minimal outdoor exposure and only between 2430 to 0631 except with curfew pushed, complaining, conjoining. Reads like a Margaret Atwood futuristic novel, Oryx and Crake. post apocalyptic plane pollution. Ideas into action plan.

On Jun 7, 2024, at 8:49 PM, Fabio Ovettini <fabio217@yahoo.com> wrote:

Viewing compensation as a "temporary" solution to airplane noise while working on a permanent solution is a pragmatic approach. This perspective can be elaborated on with the following points:

1. **Acknowledgment of Immediate Impact**:
    - Recognizes the immediate discomfort and disruption caused by airplane noise.
    - Compensation serves as a short-term measure to address grievances and provide relief to affected residents.
2. **Support for Affected Communities**:
    - Financial compensation can help mitigate some of the impacts, such as soundproofing homes or relocating temporarily.
    - Offers tangible acknowledgment from airlines or regulatory bodies of the disruption caused.
3. **Incentivizing Long-term Solutions**:
    - Encourages stakeholders to invest in research and development of noise reduction technologies.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

- Promotes the exploration of alternative flight paths, better scheduling, and other operational changes to minimize noise.

4. **Public Relations and Trust Building**:
    - Demonstrates goodwill and responsibility from aviation authorities and airlines.
    - Helps maintain trust and cooperation from the public while permanent solutions are being developed.
5. **Temporary Nature of Compensation**:
    - Emphasizes that compensation is not a permanent fix but a stopgap measure.
    - Keeps the focus on the ultimate goal of finding sustainable, long-term solutions to airplane noise.

By highlighting these points, we can effectively communicate why compensation should be viewed as a temporary solution while advocating for more permanent and sustainable measures to address airplane noise issues.

Long Term Solution

My vision for a long-term solution where no Canadian has to live under the torture of airplane noise is ambitious and impactful. Here are several key elements that could support this vision:

Placing airports on Crown land away from major cities and connecting them with bullet trains is a forward-thinking strategy that addresses both noise pollution and accessibility. Here's how this solution could be effectively implemented:

Strategic Placement of Airports

1. **Selection of Crown Land**:
    - **Assessment and Identification**: Identify suitable Crown land locations far from major cities but accessible enough for infrastructure development.
    - **Environmental Impact Studies**: Conduct thorough environmental impact assessments to ensure minimal disruption to wildlife and ecosystems.
2. **Infrastructure Development**:
    - **Construction**: Develop state-of-the-art airports with facilities designed to handle large volumes of passengers and cargo.
    - **Sustainable Practices**: Incorporate green building practices to minimize environmental impact and promote sustainability.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

High-Speed Rail Connections

1. **Bullet Train Network**:
    - **Route Planning**: Design bullet train routes that efficiently connect new airports to downtown cores and other major hubs.
    - **Stations and Access**: Build stations at strategic points within cities to maximize accessibility and convenience for passengers.
2. **Technology and Efficiency**:
    - **High-Speed Trains**: Invest in cutting-edge bullet train technology capable of high speeds to minimize travel time.
    - **Reliability and Frequency**: Ensure frequent and reliable service to meet passenger demand and provide a seamless travel experience.

Benefits and Implementation

1. **Noise Reduction**:
    - **Distance from Residential Areas**: Placing airports on Crown land away from cities significantly reduces noise pollution in residential areas.
    - **Buffer Zones**: Utilize buffer zones around airports to further minimize noise impact on surrounding environments.
2. **Economic and Social Impact**:
    - **Job Creation**: Airport and rail infrastructure projects create jobs and stimulate local economies.
    - **Improved Connectivity**: High-speed rail enhances connectivity between cities and remote areas, fostering regional development.
3. **Environmental Considerations**:
    - **Carbon Footprint**: Bullet trains are generally more environmentally friendly than cars and planes, reducing the overall carbon footprint of travel.
    - **Green Initiatives**: Implement green initiatives at airports and along rail routes, such as renewable energy sources and wildlife conservation projects.
4. **Urban Planning and Development**:
    - **Urban Decongestion**: Relocating airports can reduce congestion in city centers and free up land for other urban developments.
    - **Balanced Growth**: Promote balanced regional growth by improving accessibility to remote areas and distributing economic activities more evenly.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Implementation Strategy

1. **Government and Stakeholder Collaboration**:
    - **Public-Private Partnerships**: Engage in partnerships with private companies for investment and expertise in developing high-speed rail and airport infrastructure.
    - **Community Involvement**: Involve local communities in planning to address concerns and ensure that developments meet public needs.
2. **Funding and Investment**:
    - **Government Funding**: Secure funding through federal and provincial government programs dedicated to infrastructure development.
    - **Private Investment**: Attract private investors by highlighting the economic benefits and potential returns on investment.
3. **Phased Rollout**:
    - **Pilot Projects**: Start with pilot projects to test and refine the concept before full-scale implementation.
    - **Gradual Expansion**: Gradually expand the network based on the success of initial projects and growing demand.

By placing airports on Crown land and connecting them with high-speed bullet trains, this approach offers a comprehensive solution to airplane noise while improving overall transportation efficiency and fostering sustainable development.

As Canadians, embracing a forward-thinking, innovative approach to addressing airplane noise and improving transportation infrastructure sets a positive example globally.

Canada can lead the world by moving forward with the aforementioned visionary plan.

Regards,
Fabio Ovettini

Hello George,

Thank you for this information on car insurance.

I wonder, hypothetically, if a driver from this area were to get involved in a car accident and state to the investigating police officer afterward that they lost a couple of hours of sleep the night before because of the air traffic, and were not as alert as they normally are after a full night's rest, could this person sue the Federal Government, GTAA, or Pearson Airport?

The Federal Government, GTAA and Pearson Airport are all well aware that air traffic does cause some people to lose sleep.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Tom involves himself in community issues and events, which is good!

Take care,

Daryl

Subject: RE: Airplane Noise

Hi Daryl,

Drivers who live in the regions listed below are responsible for generating more claims than most other areas of the province. Insurance is based on statistical data and the more an Insurance company pays out in claims for a certain region, the higher the premiums will be for those particular postal codes. Insurance rates are the highest in Toronto and the GTA in general because of the fact that the majority of the drivers in Ontario live there. Naturally, the greater number of vehicles, the greater number of claims reported and hence, the greater amount of claims dollars paid out. Areas such as Brampton have been notorious for automobile accidents as far back as I can remember. Personally, I don't believe Insurance companies are making record profits, but I do believe our politicians such as Tom Rakocevic are making record salaries—at our expense!!!

Thanks

Subject: [External/ Externe] Re: Airplane Noise

Hello Everyone,

Zoomer Radio reported on a study indicating that sleep-impaired drivers who get one or two hours less sleep double their accident risk.

MPP Tom Rakocevic has been pushing to end auto insurance postal code discrimination for a long time now. I wonder why our auto insurance rates are higher here than in other areas of Toronto. Could it be because drivers here are involved in more accidents?

I found this statement posted on MPP Tom Rakocevic's webpage.

"Families are paying sky-high auto insurance premiums while big insurance corporations make record profits. GTA drivers with clean records continue to be gouged by this unfair practice, which makes life unaffordable in places like Brampton, Scarborough, and Vaughan. Drivers need relief now," said Rakocevic.

Do the areas of Brampton, Scarborough and Vaughan have more air traffic?

Perhaps the GTAA and Pearson Airport can compensate areas with higher air traffic, assisting drivers who are forced to pay higher insurance rates because insurance companies have found that drivers in these postal code areas have more accidents.

I know I have lost sleep due to air traffic and MP Judy Sgro, NAV Canada and Pearson Airport are all well aware of this situation.

Take care,

Daryl Henderson

Subject: Airplane Noise

Hello Everyone,

I've attempted to contact MP Judy Sgro of Humber River-Black Creek, several times this past month to see if she would be able to set-up a meeting with GTAA CEO Deborah Flint and residents of the communities affected by airplane noise. I want Deborah Flint to answer questions about the airplane noise following her statement of plans to increase air traffic to and from Pearson Airport. However, I have not received a reply from MP Judy Sgro. Today, I spoke to a member of her team, who informed me that she has received my past messages. However, this person couldn't confirm whether Judy has attempted to arrange a meeting with Deborah Flint or not.

I don't believe another meeting with the Pearson Airport Complaint Department or NAV Canada representatives would benefit our community or any other communities affected by airplane noise. These representatives value their organizations' interests first, as

they are paid employees. A NAV Canada representative once admitted to me that they follow directives from the GTAA and Pearson Airport.

MP Judy Sgro mentioned in one of our initial meetings that she lived in the city many years ago and learned to tolerate the airplane noise. It's a challenge to change someone's beliefs. There are some residents from the community who have advised me to remain quiet and not to complain about the airplane traffic, even suggesting I should move if I dislike the noise. The process time of the airplane noise petition MP Judy Sgro presented in the House of Commons remains uncertain, no one has a definite answer to offer. MP Judy Sgro's letter to former Minister of Transportation Omar Alghabra a couple of years ago regarding airplane noise went unanswered, which is concerning. I would expect Prime Minister Trudeau to have looked into it. Pablo Rodriguez replaced Omar Algahabra as the Federal Minister of Transportation on July 26, 2023. MP Judy Sgro lacks federal authority to alter air traffic in our community; she acts solely as a mediator; quite often residents in our community are ignored by her because she has nothing to offer or give to us.

It's encouraging that City TV aired a news story last night about Oakville residents affected by airplane noise. I contacted the reporter today to give a thank you for his work on the story and briefly discussed how my community also experiences airplane noise issues. He let me know that he may be interested in doing a follow-up story here. I sure hope he does. The expression on Councillor Perruzza and Matias faces the day they came for an outdoor meeting and we were constantly being interrupted by the planes every minute would have said it all.

This problem should present an opportunity for federal opposition party leaders to question Prime Minister Trudeau directly in the House of Commons regarding his government's plans to address airplane traffic near Pearson Airport now and in the future. The airplane traffic situation is worsening here. I'm uncertain whether Prime Minister Trudeau acknowledges airplane traffic with noise and pollution as a real problem. Pearson Airport makes lots of money and for a few people who have to deal with the problem of living with airplane noise it is not a huge concern to his government.

Take care,

Daryl Henderson

Subject: Re: 'Planes flying low and loud': Oakville residents say flight traffic is a big nuisance

Did they actually lie to the media?

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

There was a flight path change for arrivals for 05/23.

They did make an operational change that shifted more planes onto the more northern E/W runways. This I recognize might be better for your community but given your level of frustration I don't think it's been better.

They also neglected to note a shift to larger planes which I suspect makes us feel like they are lower & they are in fact louder just cause they are bigger - noise is engine plus volume of air moved - larger planes move more air.

It was good the reporting said change in operations not flight path.

Irene

Hello folks in case you didn't catch it here's the video clip of the news real that was on City News.

The reporter is Pat (Patrick) Taney and it was done through Speakers Corner. Perhaps we can piggy back onto this story and ask Pat to televise our insanity that we endure with the planes and the lack of political support we are getting from our elected representatives? Daryl you have all the documentation.

https://toronto.citynews.ca/2024/06/05/oakville-airplane-flight-traffic-toronto-pearson-airport/

At the bottom of the article the link is there for the submission.

https://toronto.citynews.ca/2021/10/17/speakerscorner/

Have a great evening.

Sylvia

XAP-2024-534248(18)

Hello Fabio,

What a wonderful city Toronto could be with a relocated airport that would have minimal negative impact on people's lives. Love it!

The only suggestion that I have is with the implementation strategy and possibly excluding one of the groups that would be involved.

Take care,

Daryl

Subject: Re: Airplane Noise

Viewing compensation as a "temporary" solution to airplane noise while working on a permanent solution is a pragmatic approach. This perspective can be elaborated on with the following points:

1. **Acknowledgment of Immediate Impact**:
    - Recognizes the immediate discomfort and disruption caused by airplane noise.
    - Compensation serves as a short-term measure to address grievances and provide relief to affected residents.
2. **Support for Affected Communities**:
    - Financial compensation can help mitigate some of the impacts, such as soundproofing homes or relocating temporarily.
    - Offers tangible acknowledgment from airlines or regulatory bodies of the disruption caused.
3. **Incentivizing Long-term Solutions**:
    - Encourages stakeholders to invest in research and development of noise reduction technologies.
    - Promotes the exploration of alternative flight paths, better scheduling, and other operational changes to minimize noise.
4. **Public Relations and Trust Building**:
    - Demonstrates goodwill and responsibility from aviation authorities and airlines.
    - Helps maintain trust and cooperation from the public while permanent solutions are being developed.
5. **Temporary Nature of Compensation**:
    - Emphasizes that compensation is not a permanent fix but a stopgap measure.
    - Keeps the focus on the ultimate goal of finding sustainable, long-term solutions to airplane noise.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

By highlighting these points, we can effectively communicate why compensation should be viewed as a temporary solution while advocating for more permanent and sustainable measures to address airplane noise issues.

Long Term Solution

My vision for a long-term solution where no Canadian has to live under the torture of airplane noise is ambitious and impactful. Here are several key elements that could support this vision:

Placing airports on Crown land away from major cities and connecting them with bullet trains is a forward-thinking strategy that addresses both noise pollution and accessibility. Here's how this solution could be effectively implemented:

Strategic Placement of Airports

1. **Selection of Crown Land**:
    - **Assessment and Identification**: Identify suitable Crown land locations far from major cities but accessible enough for infrastructure development.
    - **Environmental Impact Studies**: Conduct thorough environmental impact assessments to ensure minimal disruption to wildlife and ecosystems.
2. **Infrastructure Development**:
    - **Construction**: Develop state-of-the-art airports with facilities designed to handle large volumes of passengers and cargo.
    - **Sustainable Practices**: Incorporate green building practices to minimize environmental impact and promote sustainability.

High-Speed Rail Connections

1. **Bullet Train Network**:
    - **Route Planning**: Design bullet train routes that efficiently connect new airports to downtown cores and other major hubs.
    - **Stations and Access**: Build stations at strategic points within cities to maximize accessibility and convenience for passengers.
2. **Technology and Efficiency**:
    - **High-Speed Trains**: Invest in cutting-edge bullet train technology capable of high speeds to minimize travel time.
    - **Reliability and Frequency**: Ensure frequent and reliable service to meet passenger demand and provide a seamless travel experience.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Benefits and Implementation

1. **Noise Reduction**:
    - **Distance from Residential Areas**: Placing airports on Crown land away from cities significantly reduces noise pollution in residential areas.
    - **Buffer Zones**: Utilize buffer zones around airports to further minimize noise impact on surrounding environments.
2. **Economic and Social Impact**:
    - **Job Creation**: Airport and rail infrastructure projects create jobs and stimulate local economies.
    - **Improved Connectivity**: High-speed rail enhances connectivity between cities and remote areas, fostering regional development.
3. **Environmental Considerations**:
    - **Carbon Footprint**: Bullet trains are generally more environmentally friendly than cars and planes, reducing the overall carbon footprint of travel.
    - **Green Initiatives**: Implement green initiatives at airports and along rail routes, such as renewable energy sources and wildlife conservation projects.
4. **Urban Planning and Development**:
    - **Urban Decongestion**: Relocating airports can reduce congestion in city centers and free up land for other urban developments.
    - **Balanced Growth**: Promote balanced regional growth by improving accessibility to remote areas and distributing economic activities more evenly.

Implementation Strategy

1. **Government and Stakeholder Collaboration**:
    - **Public-Private Partnerships**: Engage in partnerships with private companies for investment and expertise in developing high-speed rail and airport infrastructure.
    - **Community Involvement**: Involve local communities in planning to address concerns and ensure that developments meet public needs.
2. **Funding and Investment**:
    - **Government Funding**: Secure funding through federal and provincial government programs dedicated to infrastructure development.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

- **Private Investment**: Attract private investors by highlighting the economic benefits and potential returns on investment.

3. **Phased Rollout**:

   - **Pilot Projects**: Start with pilot projects to test and refine the concept before full-scale implementation.
   - **Gradual Expansion**: Gradually expand the network based on the success of initial projects and growing demand.

By placing airports on Crown land and connecting them with high-speed bullet trains, this approach offers a comprehensive solution to airplane noise while improving overall transportation efficiency and fostering sustainable development.

As Canadians, embracing a forward-thinking, innovative approach to addressing airplane noise and improving transportation infrastructure sets a positive example globally.

Canada can lead the world by moving forward with the aforementioned visionary plan.

Regards,
Fabio Ovettini

Hello George,

Thank you for this information on car insurance.

I wonder, hypothetically, if a driver from this area were to get involved in a car accident and state to the investigating police officer afterward that they lost a couple of hours of sleep the night before because of the air traffic, and were not as alert as they normally are after a full night's rest, could this person sue the Federal Government, GTAA, or Pearson Airport?

The Federal Government, GTAA and Pearson Airport are all well aware that air traffic does cause some people to lose sleep.

Tom involves himself in community issues and events, which is good!

Take care,

Daryl

Subject: RE: Airplane Noise

Hi Daryl,

Drivers who live in the regions listed below are responsible for generating more claims than most other areas of the province. Insurance is based on statistical data and the more an Insurance company pays out in claims for a certain region, the higher the premiums will be for those particular postal codes. Insurance rates are the highest in Toronto and the GTA in general because of the fact that the majority of the drivers in Ontario live there. Naturally, the greater number of vehicles, the greater number of claims reported and hence, the greater amount of claims dollars paid out. Areas such as Brampton have been notorious for automobile accidents as far back as I can remember. Personally, I don't believe Insurance companies are making record profits, but I do believe our politicians such as Tom Rakocevic are making record salaries—at our expense!!!

Thanks

George

Subject: [External/ Externe] Re: Airplane Noise

Hello Everyone,

Zoomer Radio reported on a study indicating that sleep-impaired drivers who get one or two hours less sleep double their accident risk.

MPP Tom Rakocevic has been pushing to end auto insurance postal code discrimination for a long time now. I wonder why our auto insurance rates are higher here than in other areas of Toronto. Could it be because drivers here are involved in more accidents?

I found this statement posted on MPP Tom Rakocevic's webpage.

"Families are paying sky-high auto insurance premiums while big insurance corporations make record profits. GTA drivers with clean records continue to be gouged by this unfair practice, which makes life unaffordable in places like Brampton, Scarborough, and Vaughan. Drivers need relief now," said Rakocevic.

Do the areas of Brampton, Scarborough and Vaughan have more air traffic?

Perhaps the GTAA and Pearson Airport can compensate areas with higher air traffic, assisting drivers who are forced to pay higher insurance rates because insurance companies have found that drivers in these postal code areas have more accidents.

I know I have lost sleep due to air traffic and MP Judy Sgro, NAV Canada and Pearson Airport are all well aware of this situation.

Take care,

Daryl Henderson

Subject: Airplane Noise

Hello Everyone,

I've attempted to contact MP Judy Sgro of Humber River-Black Creek, several times this past month to see if she would be able to set-up a meeting with GTAA CEO Deborah Flint and residents of the communities affected by airplane noise. I want Deborah Flint to answer questions about the airplane noise following her statement of plans to increase air traffic to and from Pearson Airport. However, I have not received a reply from MP Judy Sgro. Today, I spoke to a member of her team, who informed me that she has received my past messages. However, this person couldn't confirm whether Judy has attempted to arrange a meeting with Deborah Flint or not.

I don't believe another meeting with the Pearson Airport Complaint Department or NAV Canada representatives would benefit our community or any other communities affected by airplane noise. These representatives value their organizations' interests first, as they are paid employees. A NAV Canada representative once admitted to me that they follow directives from the GTAA and Pearson Airport.

MP Judy Sgro mentioned in one of our initial meetings that she lived in the city many years ago and learned to tolerate the airplane noise. It's a challenge to change someone's beliefs. There are some residents from the community who have advised me to remain quiet and not to complain about the airplane traffic, even suggesting I should move if I dislike the noise. The process time of the airplane noise petition MP Judy Sgro presented in the House of Commons remains uncertain, no one has a definite answer to offer. MP Judy Sgro's letter to former Minister of Transportation Omar Alghabra a couple of years ago regarding airplane noise went unanswered, which is concerning. I

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

would expect Prime Minister Trudeau to have looked into it. Pablo Rodriguez replaced Omar Algahabra as the Federal Minister of Transportation on July 26, 2023. MP Judy Sgro lacks federal authority to alter air traffic in our community; she acts solely as a mediator; quite often residents in our community are ignored by her because she has nothing to offer or give to us.

It's encouraging that City TV aired a news story last night about Oakville residents affected by airplane noise. I contacted the reporter today to give a thank you for his work on the story and briefly discussed how my community also experiences airplane noise issues. He let me know that he may be interested in doing a follow-up story here. I sure hope he does. The expression on Councillor Perruzza and Matias faces the day they came for an outdoor meeting and we were constantly being interrupted by the planes every minute would have said it all.

This problem should present an opportunity for federal opposition party leaders to question Prime Minister Trudeau directly in the House of Commons regarding his government's plans to address airplane traffic near Pearson Airport now and in the future. The airplane traffic situation is worsening here. I'm uncertain whether Prime Minister Trudeau acknowledges airplane traffic with noise and pollution as a real problem. Pearson Airport makes lots of money and for a few people who have to deal with the problem of living with airplane noise it is not a huge concern to his government.

Take care,

Daryl Henderson

Subject: Re: 'Planes flying low and loud': Oakville residents say flight traffic is a big nuisance

Did they actually lie to the media?

There was a flight path change for arrivals for 05/23.

They did make an operational change that shifted more planes onto the more northern E/W runways. This I recognize might be better for your community but given your level of frustration I don't think it's been better.

They also neglected to note a shift to larger planes which I suspect makes us feel like they are lower & they are in fact louder just cause they are bigger - noise is engine plus volume of air moved - larger planes move more air.

It was good the reporting said change in operations not flight path.

Hello folks in case you didn't catch it here's the video clip of the news real that was on City News.

The reporter is Pat (Patrick) Taney and it was done through Speakers Corner. Perhaps we can piggy back onto this story and ask Pat to televise our insanity that we endure with the planes and the lack of political support we are getting from our elected representatives? Daryl you have all the documentation.

XAP-2024-534248(19)

Hello Everyone,

Last night planes were loud with the screeching thunder noise from the sky around midnight, I also had a loud plane at 3:30 am and then more frequent planes around 5:30 am too. It is difficult for me to sleep sometimes with the loud airplane noise when most of my windows are now open with the warm weather.

Pat Tanley CityNews reporter did not return my call after we spoke last week about doing a story on how Pearson Airport Plane Noise effects some residents of Humber River- Black Creek. I left him a message on Tuesday for him to return my call and I have not heard back from him.

I have left numerous messages now for MP Judy Sgro over the last three months to see if she could arrange a meeting with our commmunity and GTAA CEO Deborah Flint and Judy has not replied to me. I left her a message again this morning. It is wonderful how MP Judy Sgro gets to ignore me.

Who knows how long the process for the filed noise petition in the House of Commons will take to investigate and complete. I asked the question to Judy's staff and they do not seem to have an answer.

Hopefully it will be a relaxing and quiet day for some of us!

Take care,

Daryl Henderson

Subject: Re: Airplane Noise

Hello Everyone,

Zoomer Radio reported on a study indicating that sleep-impaired drivers who get one or two hours less sleep double their accident risk.

MPP Tom Rakocevic has been pushing to end auto insurance postal code discrimination for a long time now. I wonder why our auto insurance rates are higher here than in other areas of Toronto. Could it be because drivers here are involved in more accidents?

I found this statement posted on MPP Tom Rakocevic's webpage.

"Families are paying sky-high auto insurance premiums while big insurance corporations make record profits. GTA drivers with clean records continue to be gouged by this unfair practice, which makes life unaffordable in places like Brampton, Scarborough, and Vaughan. Drivers need relief now," said Rakocevic.

Do the areas of Brampton, Scarborough and Vaughan have more air traffic?

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Perhaps the GTAA and Pearson Airport can compensate areas with higher air traffic, assisting drivers who are forced to pay higher insurance rates because insurance companies have found that drivers in these postal code areas have more accidents.

I know I have lost sleep due to air traffic and MP Judy Sgro, NAV Canada and Pearson Airport are all well aware of this situation.

Take care,

Daryl Henderson

Subject: Airplane Noise

Hello Everyone,

I've attempted to contact MP Judy Sgro of Humber River-Black Creek, several times this past month to see if she would be able to set-up a meeting with GTAA CEO Deborah Flint and residents of the communities affected by airplane noise. I want Deborah Flint to answer questions about the airplane noise following her statement of plans to increase air traffic to and from Pearson Airport. However, I have not received a reply from MP Judy Sgro. Today, I spoke to a member of her team, who informed me that she has received my past messages. However, this person couldn't confirm whether Judy has attempted to arrange a meeting with Deborah Flint or not.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

I don't believe another meeting with the Pearson Airport Complaint Department or NAV Canada representatives would benefit our community or any other communities affected by airplane noise. These representatives value their organizations' interests first, as they are paid employees. A NAV Canada representative once admitted to me that they follow directives from the GTAA and Pearson Airport.

MP Judy Sgro mentioned in one of our initial meetings that she lived in the city many years ago and learned to tolerate the airplane noise. It's a challenge to change someone's beliefs. There are some residents from the community who have advised me to remain quiet and not to complain about the airplane traffic, even suggesting I should move if I dislike the noise. The process time of the airplane noise petition MP Judy Sgro presented in the House of Commons remains uncertain, no one has a definite answer to offer. MP Judy Sgro's letter to former Minister of Transportation Omar Alghabra a couple of years ago regarding airplane noise went unanswered, which is concerning. I would expect Prime Minister Trudeau to have looked into it. Pablo Rodriguez replaced Omar Algahabra as the Federal Minister of Transportation on July 26, 2023. MP Judy Sgro lacks federal authority to alter air traffic in our community; she acts solely as a mediator; quite often residents in our community are ignored by her because she has nothing to offer or give to us.

It's encouraging that City TV aired a news story last night about Oakville residents affected by airplane noise. I contacted the reporter today to give a thank you for his work on the story and briefly discussed how my community also experiences airplane noise issues. He let me know that he may be interested in doing a follow-up story here. I sure hope he does. The expression on Councillor Perruzza and Matias faces the day they came for an outdoor meeting and we were constantly being interrupted by the planes every minute would have said it all.

This problem should present an opportunity for federal opposition party leaders to question Prime Minister Trudeau directly in the House of Commons regarding his government's plans to address airplane traffic near Pearson Airport now and in the future. The airplane traffic situation is worsening here. I'm uncertain whether Prime Minister Trudeau acknowledges airplane traffic with noise and pollution as a real problem. Pearson Airport makes lots of money and for a few people who have to deal with the problem of living with airplane noise it is not a huge concern to his government.

Objet : Airplane Noise

Hello Everyone,

I contacted MP Judy Sgro's office this afternoon and asked to speak with her, but I was informed that she was not in the office today. The person I spoke to, Saina, confirmed she would inform Amy, the office manager, about the emails Fabio had sent today to MP Judy Sgro.

MP Judy Sgro presented the airplane noise petition for Humber River - Black Creek to the House of Commons, and it has been approved for investigation. However, I am uncertain about the duration of this process. I believe that during the review process, there should be a temporary reduction in air traffic to Pearson Airport not an increase.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

It is warmer weather now, planes fly at lower altitudes and the result is increased noise. GTAA CEO Deborah Flint, MP Judy Sgro, Minister of Transportation Pablo Rodriguez, NAV Canada, and Pearson Airport are all aware of the noise issue. The noise levels are high and have negative impacts on people's health. Despite reaching out to these people over the last few years, the situation has not improved. Furthermore, GTAA CEO Deborah Flint publicly stated intentions to increase air traffic, to make the noise problem worse and Prime Minister Trudeau along with his Minister of Transportation Pablo Rodriguez did not say no to this plan.

What can our community do about the airplane noise? I understand it is Friday, and I may not receive a response today. However, Minister of Transportation Pablo Rodriguez, this question is directed to you, not MP Judy Sgro who should not be taking responsibility of handling your job. What is your proposed solution?

Prime Minister Trudeau, if Minister of Transportation Pablo Rodriguez does not address our noise concerns regarding airplane traffic and noise from Pearson Airport for Humber River - Black Creek by the end of the month, I will be deeply disappointed once again in the Federal Liberal Government. Perhaps it is time for new leadership in the federal government, and now is the opposition's opportunity to voice their stance on this issue. I have not heard a reply from the opposition parties here.

MP Judy Sgro wrote a detailed letter about the airplane noise issues faced in Humber River - Black Creek a couple of years ago to Prime Minister Trudeau and the then Federal Minister of Transportation, Omar Alghabra, but neither of them responded to MP Judy Sgro. I asked MP Judy Sgro if she could find out why her letter was not replied to, and she seemed hesitant and afraid to approach either of them to ask. It is not good!

I would love to see the noise complaints handled differently, as Fabio described a new plan to everyone here, where residents of this community could give consent for NAV WebTracker to file a complaint if the decibel reading reaches a certain level in our community. I hope Cynthia Woods, the Manager of Pearson Airport Complaints Department, has considered adopting this idea. Why should I, a resident of this community affected by airplane noise, have to take time out of my day to contact Pearson Airport Complaints Department when technology exists to file a complaint on my behalf? When I am woken up early in the morning, it takes time to check the date and time and then find the device to file the complaint on. It's not easy to file a noise complaint, and sometimes I'm too upset with the airplane noise to bother doing it.

MP Judy Sgro, can you follow up with Cynthia Woods and provide Humber River - Black Creek with an answer by the end of this month to see if she have Pearson Airport adopt this new complaint format? I give this responsibility to you MP Judy Sgro or your office to speak to Manager of Pearson Airport Complaints Department Cynthia Woods by the end of this month and give Humber River - Black Creek an answer.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

CEO of GTAA Deborah Flint needs to make herself available to speak to communities where her decisions with increases to air traffic are affecting the health and well being of the residents living in flight paths to Pearson Airport.

I hope the weekend is quiet with little airplane noise because this morning was hell. Humber River - Black Creek wants improvement and answers, not to be ignored!

Take care,

Daryl Henderson

Subject: Ask the Courts of Justice to place an Injunction

God day Honourable Judy Sgro,

I do not intend to be disrespectful, but as a responsible citizen, I feel it is important to bring the following to your attention.

You should rely on people like me to bring attention to an issue, not to perform your job. It is utterly unfair to place the onus on the people to do the job our representatives have been elected and are being paid to perform.

I would like to request that, as our representative at the federal level, you ask the Courts of Justice to place an injunction on Pearson Airport. Specifically, I request the suspension of all night traffic, except for emergencies, and the imposition of a cap to stop any increase in air traffic.

The rationale for these requests is as follows:

1. **Irreparable Damage to Students**: Students living in the communities surrounding the airport are experiencing detrimental impacts from airplane noise. Numerous empirical studies demonstrate the negative effects of such noise on students' academic performance and overall well-being.
2. **Irreparable Damage to Health**: The health of citizens living in the surrounding communities is being compromised. There is a wealth of empirical studies showing the harmful effects of airplane noise on people's health, including increased risk of cardiovascular diseases, sleep disturbances, and other health issues.
3. **Potential for Irreparable Damage**: Consider a scenario where a truck driver from my community falls asleep at the wheel due to sleep deprivation caused by airplane noise, leading to a tragic accident involving a bus with 40 school children. The insurance company would likely determine that Transport Canada policies permitting the airport to operate 24/7 contributed to the sleep deprivation. In such a case, the courts would likely hold the state responsible. The policymakers would not personally bear the costs; instead, the state would, meaning that the financial burden would ultimately fall on the taxpayers. To put it simply, it is the people who would have to pay for the consequences of these policies.

I urge you to take immediate action to address these concerns and protect the well-being of our community.

Regards,
Fabio Ovettini

Subject: Request for immediate changes to complaint form

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to express my concerns regarding the current complaint form for noise disturbances. The existing form is overly cumbersome and effectively discourages individuals from filing complaints.

As someone who experiences adverse effects from aircraft noise exceeding 55dB, the current system is impractical. Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 8 events per submission, I would need to complete it 62.5 times daily. At an estimated 15 minutes per form, this amounts to 937.5 minutes or approximately 15.6 hours each day.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This cumbersome process seems designed to discourage complaints. Therefore, I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding 55dB, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, particularly for those you are making vulnerable, traumatized, humiliated, and marginalized individuals.

Thank you for your attention to this matter.

Fabio Ovettini (M9M 2J4)

Objet : Re: Airplane Noise

Hello Everyone,

The planes from Pearson Airport are extremely loud this morning... as in LOUD. The first plane screeched over my house at 6:21 am. Air traffic after midnight could be heard until 12:45 am. The morning before, planes could be heard flying until 1:30 am, and then again throughout the rest of the morning, offering me the chance at only a couple of hours of sleep. It takes work to file the complaints in the morning.

Minister of Transportation Pablo Rodriguez, please provide my community with an answer by the end of the month on how Prime Minister Trudeau plans to improve our noisy living situation here, with Pearson Airport nearby. Another airport should have

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

been built in Pickering, and the two North and South runways need to be spaced farther apart from each other so that they can be used simultaneously. This way, we do not have to rely solely on the three East/West runways, where planes fly over the most populated parts of areas around Pearson Airport at peak times

MP Judy Sgro is aware of how plane noise becomes worse for us in warmer weather, with planes flying at lower altitudes. Nothing has been done about the plane noise in my community over the last few years. MP Judy Sgro initially stated to a few us in a meeting that we live in the city and we must learn to live with the airplane noise. I believe she has come to realize over the last few years that her initial statement to us was unacceptable.

There should be at least 7 hours between the last plane of the night and the first one of the day, with midnight as the cutoff time and 7 am as the startup time. Proper sleep is essential for a healthy life. It becomes stressful for me because I never know when the last plane will come or when I will hear the first one. I could be up until 1:30 am with airplane noise. Pearson Airport unfortunately has a significant influence on my sleep patterns, and its unpredictability adds to the challenge. I know I my days are more enjoyable when I hear fewer planes.

I don't want to call Pearson Airport to complain about the plane noise several times a day or spend time writing emails to important figures in public office. I want to enjoy my life! Former Minister of Transportation Lisa Raitt publicly criticized Pearson noise complaints, where she was vocal and honest and told people the complaints are collected and then left to collect dust. I find myself believing her more and more each day.

It would be wonderful if CEO of the GTAA, Deborah Flint, would make time for a meeting to listen to complaints and provide solutions to residents greatly affected by airplane noise. Unfortunately, it seems to me she is not readily available to engage with communities impacted by her decisions. This situation is concerning and needs to improve.

Sincerely,

Daryl Henderson

Subject: Airplane Noise

Hello Everyone,

I contacted MP Judy Sgro's office this afternoon and asked to speak with her, but I was informed that she was not in the office today. The person I spoke to, Saina, confirmed she would inform Amy, the office manager, about the emails Fabio had sent today to MP Judy Sgro.

MP Judy Sgro presented the airplane noise petition for Humber River - Black Creek to the House of Commons, and it has been approved for investigation. However, I am uncertain about the duration of this process. I believe that during the review process, there should be a temporary reduction in air traffic to Pearson Airport not an increase.

It is warmer weather now, planes fly at lower altitudes and the result is increased noise. GTAA CEO Deborah Flint, MP Judy Sgro, Minister of Transportation Pablo Rodriguez, NAV Canada, and Pearson Airport are all aware of the noise issue. The noise levels are high and have negative impacts on people's health. Despite reaching out to these people over the last few years, the situation has not improved. Furthermore, GTAA CEO Deborah Flint publicly stated intentions to increase air traffic, to make the noise problem worse and Prime Minister Trudeau along with his Minister of Transportation Pablo Rodriguez did not say no to this plan.

What can our community do about the airplane noise? I understand it is Friday, and I may not receive a response today. However, Minister of Transportation Pablo Rodriguez, this question is directed to you, not MP Judy Sgro who should not be taking responsibility of handling your job. What is your proposed solution?

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Prime Minister Trudeau, if Minister of Transportation Pablo Rodriguez does not address our noise concerns regarding airplane traffic and noise from Pearson Airport for Humber River - Black Creek by the end of the month, I will be deeply disappointed once again in the Federal Liberal Government. Perhaps it is time for new leadership in the federal government, and now is the opposition's opportunity to voice their stance on this issue. I have not heard a reply from the opposition parties here.

MP Judy Sgro wrote a detailed letter about the airplane noise issues faced in Humber River - Black Creek a couple of years ago to Prime Minister Trudeau and the then Federal Minister of Transportation, Omar Alghabra, but neither of them responded to MP Judy Sgro. I asked MP Judy Sgro if she could find out why her letter was not replied to, and she seemed hesitant and afraid to approach either of them to ask. It is not good!

I would love to see the noise complaints handled differently, as Fabio described a new plan to everyone here, where residents of this community could give consent for NAV WebTracker to file a complaint if the decibel reading reaches a certain level in our community. I hope Cynthia Woods, the Manager of Pearson Airport Complaints Department, has considered adopting this idea. Why should I, a resident of this community affected by airplane noise, have to take time out of my day to contact Pearson Airport Complaints Department when technology exists to file a complaint on my behalf? When I am woken up early in the morning, it takes time to check the date and time and then find the device to file the complaint on. It's not easy to file a noise complaint, and sometimes I'm too upset with the airplane noise to bother doing it.

MP Judy Sgro, can you follow up with Cynthia Woods and provide Humber River - Black Creek with an answer by the end of this month to see if she have Pearson Airport adopt this new complaint format? I give this responsibility to you MP Judy Sgro or your office to speak to Manager of Pearson Airport Complaints Department Cynthia Woods by the end of this month and give Humber River - Black Creek an answer.

CEO of GTAA Deborah Flint needs to make herself available to speak to communities where her decisions with increases to air traffic are affecting the health and well being of the residents living in flight paths to Pearson Airport.

I hope the weekend is quiet with little airplane noise because this morning was hell. Humber River - Black Creek wants improvement and answers, not to be ignored!

Take care,

Daryl Henderson

Subject: Ask the Courts of Justice to place an Injunction

God day Honourable Judy Sgro,

I do not intend to be disrespectful, but as a responsible citizen, I feel it is important to bring the following to your attention.

You should rely on people like me to bring attention to an issue, not to perform your job. It is utterly unfair to place the onus on the people to do the job our representatives have been elected and are being paid to perform.

I would like to request that, as our representative at the federal level, you ask the Courts of Justice to place an injunction on Pearson Airport. Specifically, I request the suspension of all night traffic, except for emergencies, and the imposition of a cap to stop any increase in air traffic.

The rationale for these requests is as follows:

1. **Irreparable Damage to Students**: Students living in the communities surrounding the airport are experiencing detrimental impacts from airplane noise. Numerous empirical studies demonstrate the negative effects of such noise on students' academic performance and overall well-being.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

2. **Irreparable Damage to Health**: The health of citizens living in the surrounding communities is being compromised. There is a wealth of empirical studies showing the harmful effects of airplane noise on people's health, including increased risk of cardiovascular diseases, sleep disturbances, and other health issues.
3. **Potential for Irreparable Damage**: Consider a scenario where a truck driver from my community falls asleep at the wheel due to sleep deprivation caused by airplane noise, leading to a tragic accident involving a bus with 40 school children. The insurance company would likely determine that Transport Canada policies permitting the airport to operate 24/7 contributed to the sleep deprivation. In such a case, the courts would likely hold the state responsible. The policymakers would not personally bear the costs; instead, the state would, meaning that the financial burden would ultimately fall on the taxpayers. To put it simply, it is the people who would have to pay for the consequences of these policies.

I urge you to take immediate action to address these concerns and protect the well-being of our community.

Regards,
Fabio Ovettini

Subject: [External/Externe]: Re: Contradictions between Health/Transport Canada and the way Pearson is operated

XAP-2024-534248(22)

Hello Everyone,

It is past midnight, and the planes flying to Pearson Airport are very loud and frequent. There are also bright flashes in the sky after the planes pass over my house.

The bright camera flashes in the sky can be explained after I looked for this information on the internet:

It is commonly known as "airplane strobe lights." These bright flashes are safety features installed on airplanes to increase their visibility, especially during low-light conditions or at night. They're designed to alert other aircraft and ground personnel to the presence and location of the plane.

These strobe lights are typically located on the wingtips and sometimes on the tail of the aircraft. They emit short bursts of bright light at regular intervals, making the plane more visible to others in the vicinity. This helps prevent collisions, especially in busy airspace or during approaches and departures at airports.

So, when you see these flashes of bright light as planes pass overhead, it's likely the strobe lights doing their job to enhance aircraft visibility and safety.

I called MP Judy Sgro's office twice this morning and left her messages, requesting that she please reply to us. I would very much like for her to arrange a meeting where communities affected by airplane noise get to speak directly to GTAA CEO Deborah Flint. I don't want to speak to Pearson Airport Complaints or NAV Canada, as they are paid employees whose job it is to protect the positions of the organizations they work for, and they get paid to defend.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

I called Pearson Airport and left a few noise complaints. It takes time to call Pearson Airport or go online to file a complaint. I have to think about it before I do it, debating with myself whether it does any good. I have not seen any results of improvement after filing many complaints with Pearson Airport over the last several years. Am I wasting my time filing complaints?

Planes now:

It is 12:45 am hopefully the planes have stopped.

No 12:48 am here comes a loud plane.

12:53 am here comes another roar of an airplane with a bright light.

12:55 am another plane.

12:57 am another plane.

I probably should go to my basement where it is quieter and sleep on the couch to try and get to sleep.

I called MP Judy Sgro once more to remind her that I recall leaving her similar messages last year and the year before. When the weather is warmer outside, the planes are more noticeable, and it is harder to avoid hearing them, with window open.

I received an email from Greenpeace this afternoon, about the Big Five bank CEOs having to speak about their continued investment of the burning of fossil fuels in front of the House of Commons today.

Here we have a Federal Liberal Government that continues to allow the air industry to thrive because it imposes very few rules and regulations on it. Why is the Federal Government concerned about the Big Five Banks' investment in the burning of fossil fuels when they have very little control over the air industry when they allow more airplane in the sky. Airplanes pollute too Prime Minister Trudeau.

Pierre Poilievre says he would allow jets to fly in and out of Toronto's Billy Bishop airport if elected. Story written by Katherine DeClerq, CTV News Toronto Published on July 21, 2022.

I don't believe Mayor Olivia Chow who lives downtown Toronto would be a supporter of Pierre Poilievre if he gets elected for Prime Minister in the next Federal Election and then went ahead and opened up the Toronto's Billy Bishop airport to jets.

Olivia Chow, Adam Vaughan promise to axe island airport expansion Posted on Reddit 9 years ago.

Pickering mayor asks Ford government to revoke MZO to build housing near airport lands, but some are on the Greenbelt. Story written by Robert Benzie Toronto Star Published on May 23, 2024

Queen's Park will only consider an amendment to the MZO rather than revoking it because the provincial government, still stinging from the $8.28-billion land debacle, does not want anything built on the Greenbelt.

Pickering Mayor Kevin Ashe has written to provincial Housing Minister Paul Calandra formally requesting he revoke a 1972 minister's zoning order (MZO) that prevents construction of any houses or apartment towers on properties adjacent to the federal-owned Pickering Airport Lands.

Pickering has fought for years against the construction of a much-needed airport on designated airport property. If Doug Ford approves housing here, it will lay to rest the use of this land for an airport. The Mayor of Pickering will be considered a great man if his housing is approved.

Perhaps we can halt the plans for construction of many condos in Toronto, thanks to Premier Doug Ford's rubber stamp of approval from the OLT, and avoid overpopulating our city without adequate city planning for streets and schools around these developments if the Pickering land is approved for housing.

You have residents of downtown Toronto and residents of Pickering who don't want planes flying over their homes because of the noise they produce. Yet, it's okay for GTAA's Deborah Flint to boldly state her plans to increase air traffic at Pearson Airport over our communities, with no opposition and a big smile of approval from our Federal Liberal Government, without any consideration for the people who live here and have to endure the noise from more planes in the sky. There are no Federal restrictions on the amount of noise a plane is allowed to make. Listening to a plane pass over my house at between 65 and 80 decibels for prolonged periods during the day is unhealthy for me, I can't even speak to a friend or neighbour who is standing a couple of feet away from me when a plane is passing overhead. Ask Councillor Perruzza and Matias about trying to speak in my backyard when a plane is passing over my backyard.

I have not received a reply from MPP Tom Rakocevic to inquire why our postal code's automobile insurance premiums are higher than other parts of the GTAA. If it's because drivers in our postal code are involved in more accidents, and considering that getting one or two hours less sleep increases a person's chance of an automobile accident, then our Provincial Government, GTAA, and Pearson Airport should take some responsibility for covering our postal code's higher automobile insurance premiums. Hopefully, MPP Tom Rakocevic or someone from his office will contact me to give me details of why our postal code area pay higher premiums.

Pearson Airport, the planner and builder, made a horrible mistake when they built the two North/South runways too close together. For safety reasons, they can't be used simultaneously

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

for departures and arrivals, which leaves the three East/West runways at Pearson Airport primary runways.

The noise from the planes is getting worse and not better in my community. I want something to be done about it now. I want a Federal MP who replies to me and does not ignore me. I'm sorry, but I do not want to wait until September or October to address this matter again.

Sincerely,

Daryl Henderson

Subject: Contradictions between Health/Transport Canada and the way Pearson is operated

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

The contradiction between the Canadian government's recommendation of 7-9 hours of sleep for adults and the allowance of 24/7 airport operations, causing sleep disruptions in nearby communities, highlights a complex issue where public health, economic interests, and operational efficiency intersect. This situation clearly shows a Canadian government prioritizing economic objectives over the well-being of its citizens.

Much like criminals and terrorists justify causing harm and suffering to achieve their objectives, the government's allowance of 24/7 airport operations, which causes harm and suffering, has to be seen as just plain state-criminal/terrorist activity. This perspective raises significant ethical and moral questions about policy-making

Transport Canada's Sleep Recommendations

- **8 Hours of Consecutive Sleep**: While regulations provide for 8 consecutive hours off-duty, it is generally recommended that this time be used for sleep to ensure adequate rest.
- **Total Off-Duty Time**: In addition to the 8 consecutive hours, the additional 2 hours of off-duty time can be used for short naps, meals, and relaxation to help manage fatigue.

Health Canada's Sleep Recommendations by Age Group

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

1. **Adults (18-64 years)**:

- **7-9 hours per night**: This range is considered optimal for maintaining good health, cognitive function, and overall well-being.

2. **Older Adults (65+ years)**:

- **7-8 hours per night**: Slightly less sleep is recommended for older adults, but adequate rest remains crucial for health and functioning.

Acacia's Noise Monitor started working at 8:52:40 on June 13, 2024.

Taking the above into account, I would like you to tell me how anyone in my community can efficiently perform any activity, work/studying?

How can you expect a truck driver living in my community to meet Canada's Transport recommendation of 8hs of consecutive sleep?

How can you expect a person living in my community to meet Canada's Health recommendation of 7-9hs of quality sleep?

The lack of response or action from NAV Canada, GTAA (Greater Toronto Airports Authority), and Canada Transport regarding noise issues affecting my community might be opening the door for it to be taken as a declaration of WAR.

When the state decides to break the Social Contract there is a philosophical argument that individuals have a right to defend themselves and their rights.

Regards,

Hello Josie,

Thanks for your support.

It worries me from what I read this morning with the Mayor of Pickering and Premier Doug Ford possibly working out a deal to build homes there. If houses are approved to be built there the property reserved for the airport will never have to be discussed again.

I do not trust Premier Doug Ford, from what I heard about his activities as a teenager and a few years ago with the Green Belt scandal.

Have a good weekend!

Take care,

Daryl

Subject: Re: Contradictions between Health/Transport Canada and the way Pearson is operated

Hello Everyone,

It is past midnight, and the planes flying to Pearson Airport are very loud and frequent. There are also bright flashes in the sky after the planes pass over my house.

The bright camera flashes in the sky can be explained after I looked for this information on the internet:

It is commonly known as "airplane strobe lights." These bright flashes are safety features installed on airplanes to increase their visibility, especially during low-light conditions or at night. They're designed to alert other aircraft and ground personnel to the presence and location of the plane.

These strobe lights are typically located on the wingtips and sometimes on the tail of the aircraft. They emit short bursts of bright light at regular intervals, making the plane more visible to others in the vicinity. This helps prevent collisions, especially in busy airspace or during approaches and departures at airports.

So, when you see these flashes of bright light as planes pass overhead, it's likely the strobe lights doing their job to enhance aircraft visibility and safety.

I called MP Judy Sgro's office twice this morning and left her messages, requesting that she please reply to us. I would very much like for her to arrange a meeting where communities affected by airplane noise get to speak directly to GTAA CEO Deborah Flint. I don't want to speak to Pearson Airport Complaints or NAV Canada, as they are paid employees whose job it is to protect the positions of the organizations they work for, and they get paid to defend.

I called Pearson Airport and left a few noise complaints. It takes time to call Pearson Airport or go online to file a complaint. I have to think about it before I do it, debating with myself whether it does any good. I have not seen any results of improvement after filing many complaints with Pearson Airport over the last several years. Am I wasting my time filing complaints?

Planes now:

It is 12:45 am hopefully the planes have stopped.

No 12:48 am here comes a loud plane.

12:53 am here comes another roar of an airplane with a bright light.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

12:55 am another plane.

12:57 am another plane.

I probably should go to my basement where it is quieter and sleep on the couch to try and get to sleep.

I called MP Judy Sgro once more to remind her that I recall leaving her similar messages last year and the year before. When the weather is warmer outside, the planes are more noticeable, and it is harder to avoid hearing them, with window open.

I received an email from Greenpeace this afternoon, about the Big Five bank CEOs having to speak about their continued investment of the burning of fossil fuels in front of the House of Commons today.

Here we have a Federal Liberal Government that continues to allow the air industry to thrive because it imposes very few rules and regulations on it. Why is the Federal Government concerned about the Big Five Banks' investment in the burning of fossil fuels when they have very little control over the air industry when they allow more airplane in the sky. Airplanes pollute too Prime Minister Trudeau.

Pierre Poilievre says he would allow jets to fly in and out of Toronto's Billy Bishop airport if elected. Story written by Katherine DeClerq, CTV News Toronto Published on July 21, 2022.

I don't believe Mayor Olivia Chow who lives downtown Toronto would be a supporter of Pierre Poilievre if he gets elected for Prime Minister in the next Federal Election and then went ahead and opened up the Toronto's Billy Bishop airport to jets.

Olivia Chow, Adam Vaughan promise to axe island airport expansion Posted on Reddit 9 years ago.

Pickering mayor asks Ford government to revoke MZO to build housing near airport lands, but some are on the Greenbelt. Story written by Robert Benzie Toronto Star Published on May 23, 2024

Queen's Park will only consider an amendment to the MZO rather than revoking it because the provincial government, still stinging from the $8.28-billion land debacle, does not want anything built on the Greenbelt.

Pickering Mayor Kevin Ashe has written to provincial Housing Minister Paul Calandra formally requesting he revoke a 1972 minister's zoning order (MZO) that prevents construction of any houses or apartment towers on properties adjacent to the federal-owned Pickering Airport Lands.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Pickering has fought for years against the construction of a much-needed airport on designated airport property. If Doug Ford approves housing here, it will lay to rest the use of this land for an airport. The Mayor of Pickering will be considered a great man if his housing is approved.

Perhaps we can halt the plans for construction of many condos in Toronto, thanks to Premier Doug Ford's rubber stamp of approval from the OLT, and avoid overpopulating our city without adequate city planning for streets and schools around these developments if the Pickering land is approved for housing.

You have residents of downtown Toronto and residents of Pickering who don't want planes flying over their homes because of the noise they produce. Yet, it's okay for GTAA's Deborah Flint to boldly state her plans to increase air traffic at Pearson Airport over our communities, with no opposition and a big smile of approval from our Federal Liberal Government, without any consideration for the people who live here and have to endure the noise from more planes in the sky. There are no Federal restrictions on the amount of noise a plane is allowed to make. Listening to a plane pass over my house at between 65 and 80 decibels for prolonged periods during the day is unhealthy for me, I can't even speak to a friend or neighbour who is standing a couple of feet away from me when a plane is passing overhead. Ask Councillor Perruzza and Matias about trying to speak in my backyard when a plane is passing over my backyard.

I have not received a reply from MPP Tom Rakocevic to inquire why our postal code's automobile insurance premiums are higher than other parts of the GTAA. If it's because drivers in our postal code are involved in more accidents, and considering that getting one or two hours less sleep increases a person's chance of an automobile accident, then our Provincial Government, GTAA, and Pearson Airport should take some responsibility for covering our postal code's higher automobile insurance premiums. Hopefully, MPP Tom Rakocevic or someone from his office will contact me to give me details of why our postal code area pay higher premiums.

Pearson Airport, the planner and builder, made a horrible mistake when they built the two North/South runways too close together. For safety reasons, they can't be used simultaneously for departures and arrivals, which leaves the three East/West runways at Pearson Airport primary runways.

The noise from the planes is getting worse and not better in my community. I want something to be done about it now. I want a Federal MP who replies to me and does not ignore me. I'm sorry, but I do not want to wait until September or October to address this matter again.

1. **Adults (18-64 years)**:

- **7-9 hours per night**: This range is considered optimal for maintaining good health, cognitive function, and overall well-being.

2. **Older Adults (65+ years)**:

- **7-8 hours per night**: Slightly less sleep is recommended for older adults, but adequate rest remains crucial for health and functioning.

Airplane traffic on typical night in my community (M9M 2J4)

Acacia's Noise Monitor started working at 8:52:40 on June 13, 2024.

Taking the above into account, I would like you to tell me how anyone in my community can efficiently perform any activity, work/studying?

How can you expect a truck driver living in my community to meet Canada's Transport recommendation of 8hs of consecutive sleep?

How can you expect a person living in my community to meet Canada's Health recommendation of 7-9hs of quality sleep?

The lack of response or action from NAV Canada, GTAA (Greater Toronto Airports Authority), and Canada Transport regarding noise issues affecting my community might be opening the door for it to be taken as a declaration of WAR.

When the state decides to break the Social Contract there is a philosophical argument that individuals have a right to defend themselves and their rights.

Regards,

Fabio Ovettini

Objet : Re: Airplane Noise

Hello

We too hear those planes every minute from the wee hours of the morning and all day.
How about if we all take turns calling Judy Sgro in the wee hours of the morning and see if she likes being waken up by loud noise.

They need to address our concerns. That is why we elect them. They ingore us when in office but come knocking on our door when they need the votes. Now do something for us. Do not ignore our concerns. We all need a good night rest. It is our right.

Lets keep up the fight. We are not giving up.

Subject: Re: Airplane Noise

Hello MP Judy Sgro,

Yesterday afternoon, through the night, and into the morning, was terrible due to airplane noise. I couldn't sleep. At 1 am, I accidentally called your personal number to complain. You answered the phone and I woke you up. In an upset tone, you asked who was calling, and when I tried to explain, you told me to go away and hung up on me.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

MP Judy Sgro, I wish I could tell the airplanes from Pearson Airport to go away just like you told me to go away this morning, but unfortunately, I can't. It's interesting because a normal telephone ring is slightly over 70 decibels, about the same noise I hear from each passing plane. Your phone ringing woke you up after only a few rings, yet you expect your community to sleep through the continuous sounds of planes passing over our houses. It's convenient that you live in Thornhill and don't experience the large aircraft that produce close to or over 70 decibels on each pass. I believe you would also have trouble sleeping if you lived here.

Perhaps you should have Stephanie from your office give airplane noise management classes, as she has informed me multiple times that she used to live next to Pearson Airport and the noise didn't bother her then. Now, living a couple of kilometers from me where the airplane noise is much lower, she still isn't bothered by it. It would be great if I could learn from her on how to not be bothered by the airplane noise.

Amy, your office manager, has not called me back to apologize after dismissing me for being confused about a list of questions that Stephanie said you had made. Stephanie mentioned that I couldn't see these questions until one of your advisors released them. Amy says there is no list of questions but Stephanie say there is a list of questions, maybe they are confused.

The way airplane traffic has been handled by you, the Federal Government, GTAA, and Pearson Airport is a joke because no one seems to care about those whose lives are affected by the airplane noise. You wrote a letter to the former Minister of Transportation, and our community expected a response from him to give to you, but we received nothing. You had mentioned in a meeting that you lived near GTAA many years ago and learned to live with airplane noise, and you expect us to do the same. Many times, I've called your office to discuss airplane noise, only to be ignored days, weeks and months. Albert from your office even advised me to speak a bit nicer if I expect you to do anything for me - I need to kiss your feet. Pearson Airport also doesn't respond to my questions or call backs sometimes. Recently, Minister of Transportation Pablo Rodriguez's office sent me a letter stating they were too busy to address my concerns with airplane noise and informed me that I need to contact my municipal government about noise complaints. Municipal government simply says it a Federal matter not a municipal mater. Where's Waldo? Well, where is CEO of the GTAA Deborah Flint? She never makes herself available to those affected by airplane noise, impacting their health and well-being. Why is that? Deborah should engage with the people affected by airplane noise, not just with business interests looking to increase air traffic to make money. The Pearson Airport Noise Complaint Department shows few complaints because most affected communities either don't know how to complain or don't have the time. Tracking planes and filing complaints took over two hours this morning alone. Pearson Airport claims their complaint system is easy and functional, but that's laughable. It would be great if we could follow Fabio's suggestion to authorize our noise complaints and let technology handle the rest for us it would save me and others

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

who complain a great deal of time. However, GTAA wouldn't want this because it would provide more realistic data on the negative impacts of airplane noise, making it harder for them to justify increasing air traffic to the Federal Government. Prime Minister is a joke, he is all about Carbon Pollution but he loves to fly as much as possible.

I wish this were a cartoon where I had a magic button to make airplane noise disappear as easily as you dismissed me this morning when a telephone ring woke you up. I only got maybe 3 to 4 hours of sleep this morning. Sleep is crucial for my health! Do you care about me and the other people in Humber River - Black Creek affected by airplane noise? Please be honest with us now!

Have a great day!

Sincerely,

Daryl Henderson

My noise complaints that I sent to Pearson Airport Complaints Department, along with a couple of pictures of the Webtracker to show you how busy the planes where first thing in the morning. Planes where like a lot of phone rings!

Concerns:

Blackfriar Park airplane noise monitor is not working.

Planes could be seen departing using runway 05 23 is this suppose to be allowed?

Time 1:31 am Aircraft B328M Origin YYZ Destination YHZ
Time 2:00 am Aircraft B328M Origin YYZ Destination YOW

Pearson Airport is getting busier planes could be seen departing and arriving using 05 23 after 6:30 am this morning along with arrivals on runways of 06 24.

People need to sleep. Does Pearson Airport, GTAA or our Federal Government care about the health and well being of the people who live on the flight path?

Subject: Re: Airplane Noise

Hello Everyone,

Yesterday was terrible for plane noise, planes started to fly at 4 am over my house and they continued non-stop for the whole day and went to around 2:30 am this morning and started up again around 6 am. I called and left MP Judy Sgro's office many messages this morning. I did not get a good night sleep because of the plane traffic.

Today I called MP Judy Sgro's office and I spoke to Stephanie. I told Stephanie about the amount of planes that we had on the weekend and into the morning hours today. She never seemed too concern. I asked Stephanie about the conversation we had where she told me that MP Judy Sgro had a list of questions prepared. She told me that yes she did tell me that their was a list of questions and she had also told me that they had to be approved by their advisor. Last week Amy told me that I must have been confused to what Stephanie had told me and there was no list of questions. Stephanie gave me her opinion of airplane noise again and told me that she use to live right by the airport years ago and the planes did not bother her then and now she lives 5 minutes away from where I live and the planes don't bother her now. I asked to speak to Amy and she told me that Amy was not in the office today. I asked to speak to MP Judy Sgro

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

and she told me that she is on her way to Washington to speak to the President. I ended-up hanging up on Stephanie today because I was tired from not sleeping and frustrated in this whole matter. I do have another number for MP Judy Sgro and I apologize to Stephanie for saying that I didn't.

It would be respectful if Amy from MP Judy Sgro's office would give me a call or email me a message and apologize to me for telling me that I was confused last week where she told me I must not have understood the conversation I had with Stephanie on what she had told me.

It would be wonderful if MP Judy Sgro were to keep this community updated on the process of the noise petition that she had submitted to the house of commons a few weeks ago. No one really know how long this process will take. Stephanie wasn't too sure when I asked her again today about it.

A neighbour who is selling their house on my street told me last night that they have had difficulties selling it because of the airplane noise issue. Potential buyers come and hear the noise from the big planes and they are very concerned about it and it turns them off from buying it. A couple of weeks ago, the real estate agent for the home came and spoke to another neighbour and myself and asked us for our opinions on the planes noise because he too was concerned about it for the potential buyers. To the people who say why don't you just move if the plane noise bothers you, well it is not so simple.

I did call Pearson Airport to complain about the noise this morning and asked for a call back. Pearson Airport Compliant Department will need to make up an excuse on why it was okay to fly planes so early in the morning or else they will not even bother to reply to me.

Prime Minister Trudeau and Minister of Transportation Pablo Rodriguez I give you both a rating of 1/10 for the lack of concern and action taken in handling airplane noise around Pearson Airport.

I invite CEO of GTAA Deborah Flint to come and visit the neighbourhoods that she has negatively affected by her decisions to continually increase air traffic.

Take care,

Daryl Henderson

Subject: Fw: Airplane Noise

Hello Amy,

On June 27th, I contacted your office and I spoke with Stephanie. I asked if Judy could speak with me to compile a list of questions concerning airplane noise in my community. I requested a reply from MP Judy Sgro by Wednesday, July 3rd. Stephanie repeated my instructions to ensure she understood what I had asked. My plan was to take these questions to at least 250 homes where residents can fill them out. MP Judy Sgro received an email from Greg Colacitti, who explained that he and his wife were unaware they could complain about airplane noise to Pearson Airport.

After receiving no reply from MP Judy Sgro or your office, I called on July 3rd and once again spoke with Stephanie. Stephanie informed me that MP Judy Sgro had received my

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

request. However, MP Judy Sgro chose to ignore the request because she did not reply to me by July 3rd. I asked Stephanie about the questions, and she told me that MP Judy Sgro had a list of questions. I expressed my interest in receiving them and asked if she could send me an email with the questions. Stephanie consulted with you about emailing me the questions and returned with the answer that they needed approval from an advisor before being sent. I asked Stephanie to please try to email me the list by today, which is Friday. Stephanie said she would try. However, I did not receive any response, which is why I called you today.

I wanted MP Judy Sgro's involvement in creating the questions. I have now wasted two weeks of my time dealing with this issue. There is a word called "RESPECT," and I don't believe it has been shown to me or to others by MP Judy Sgro, Prime Minister Trudeau, Minister of Transportation Pablo Rodriguez, or even yourself regarding airplane noise. I would prefer to deal with Councillor Perruzza and his office regarding the airplane noise issue if I could that is how bad your office has treated the airplane noise issue now.

If you brought your car to a mechanic and the mechanic did not call you back and ignored you, how long would you continue to bring your car to that mechanic? I don't think you or MP Judy Sgro would choose to return to such a mechanic and would likely look for another one. This is how residents feel about the way MP Judy Sgro has handled airplane noise issues in our community. Last year, we were informed that MP Judy Sgro had numerous immigration issues to address, and this year, she claims there is nothing she can do about this federal matter.

Your last line in your email states, "We are eager to see the positive impact of our efforts in addressing the airplane noise issue in the community." I am sorry, but I do not believe it.

Do I want to spend my Friday sending negative emails and putting down a nice lady like MP Judy Sgro because of her performance here? No, I don't. It would be lovely if MP Judy Sgro would retire from politics and enjoy her family, and I, along with others, would wish her all the best.

I will create a list of airplane noise questions to send to MP Judy Sgro. It would be great if some people here would send me questions that they would like on the list.

Have a wonderful weekend!

Take care,

Daryl Henderson

Subject: RE: Airplane Noise

Hello Daryl,

I hope this message finds you well.

Thank you for your concern regarding airplane noise in the community. Your dedication to improving the riding is greatly appreciated. Introducing a questionnaire is an excellent idea—it will provide deeper insights into the impact of airplane noise and gather valuable feedback from residents. This tool is crucial for developing effective strategies to address the issue.

Since you've been actively involved in addressing this issue, we believe you would be the ideal person to draft the questionnaire. Your perspective and insights will be invaluable in capturing the concerns and experiences of the residents.

Regarding our recent conversation, please be aware of certain regulations that may impact our ability to directly create a questionnaire. Nonetheless, we encourage you to proceed with drafting it. Should you need any assistance or have questions during this process, please feel free to reach out to us.

Once you've completed the questionnaire, our office would be happy to review it and provide additional insights.

We are eager to see the positive impact of our efforts in addressing the airplane noise issue in the community.

Best regards,

Office of the Hon. Judy A. Sgro
Member of Parliament for Humber River-Black Creek
Chair Standing Committee on International Trade

Subject: Re: Airplane Noise

Hello Everyone,

Today, I called MP Judy Sgro to inquire about the list of airplane noise questions Stephanie mentioned the other day had been prepared by Judy and were waiting to be released by their advisor. Stephanie spoke to Amy during our conversation that day. However, when I spoke to Amy, the office manager, she informed me that no such list existed and clarified that MP Judy Sgro doesn't make lists. During our conversation, I expressed my frustrations with the lack of progress on the airplane noise issue and reminded her of previous instances where I had been given conflicting information by MP Judy Sgro and her office staff. Dealing with MP Judy Sgro and her office is incredibly frustrating.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Amy let me know she had more concerning and important matters to deal with and had to go. I told her that we have been dealing with noise issues for a long time now and I had hoped for involvement from MP Judy Sgro in creating the list to actually show her, our Federal Government, GTAA, Pearson Airport, and NAV Canada that more people are bothered by the airplane noise than what appears to be seen from data collected from Pearson Airport Complaint Department.

It's commendable that MP Judy Sgro wrote a letter on June 12, 2024, to residents of this area highlighting the severity of the situation at 1677 Wilson Ave. However, what is she going to do about it besides write a letter? Residents of this community have been speaking to Councillor Perruzza and MP Judy Sgro for many years about this issue, and yet, little has been done. I phoned Matias and Rashid at Councillor Perruzza's office because Councillor Perruzza is difficult to reach directly, and I informed them about graffiti with derogatory messages on signs. Nothing was been done by the city there were meetings I was told, and residents of this area weeks later had to take matters into their own hands, removing City of Toronto signs and fixing the problem ourselves. We spent a day picking up garbage nearby thank Matias for helping. MP Judy Sgro sent two of her staff members with coffee and donuts for a group of ten people who volunteered which was nice of Judy. Look at Wilson Ave. from Clayson Rd. to Jane St. — it is in a deplorable state. I see syringes lying on the ground frequently, fences securing properties knocked over, and litter everywhere. This is both a provincial and city issue not for MP Judy Sgro to involve herself in.

The noise from the planes is a federal issue, a federal issue, a federal issue, and we need your help. I repeated myself a few times to ensure you understand. This is your responsibility to Humber River - Black Creek residents, so please do not waste your time with city issues and help us here now.

Amy, I would have preferred if you had acknowledged today that Stephanie and you had made a mistake with the list of questions, rather than insinuate that I must be confused or did not understand what Stephanie had told me the other day. It becomes frustrating having to deal with situations like this one today. I know what I was told, and Stephanie had involved you in the conversations on that day too. It does not reflect well on MP Judy Sgro and yourself when misinformation is communicated, you loose people trust and votes.

Take care,

Daryl Henderson

Subject: Fw: Airplane Noise

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Hello Everyone,

Here is a direct email reply from the Minister of Transportation, written by Akram Saiyed. It is upsetting to me to receive advice from Akram explaining how the Minister of Transportation works, and then suggesting I contact the Greater Toronto Airport Authority. He provided me with the number for the Toronto Pearson Airport Complaints Department at 416-247-7682. The Toronto Pearson Airport Complaints Department has informed me in previous conversations that they are not authorized to provide the email address or contact phone number of GTAA CEO Deborah Flint.

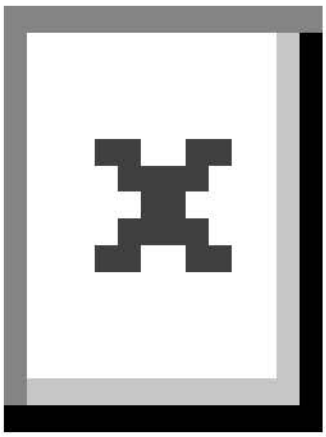

This morning, I called MP Judy Sgro's office and spoke with Stephanie. I asked if Judy could meet with me to compile a list of questions concerning airplane noise in my community. I requested a reply from MP Judy Sgro by next Wednesday. Stephanie repeated my instructions to ensure she understood what I had asked. My plan is to take these questions to at least 250 homes and where the questions would be filled out and completed. I'm uncertain about the answers that I will receive, but I suspect they will indicate dissatisfaction with airplane noise in my community.

I also made Stephanie aware that many elderly residents in my community do not use computers. Despite being affected by airplane noise, these elderly individuals do not file complaints because they lack the ability to do so. I questioned whether MP Judy Sgro has considered these individuals. Not everyone who is 78 years old is like MP Judy Sgro, where they have no limitations on what they are capable of doing, both physically and mentally. The list of questions would help here where this group of people get to speak up and are not forgotten.

Pearson Airport has informed me multiple times that very few residents in my neighborhood actually lodge complaints with them. They assured me that their complaint process is straightforward and easy to use. It is not and takes time to do each day. Additionally, Pearson Airport has let me know that the data they collect is crucial for determining the appropriateness of increasing air traffic, as decided by the GTAA and the Federal Government. It is wrong for this information to be used to determine if air traffic should be allowed to increase because it is not accurate.

Pearson Airport Runways:

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Here is an information from Pearson Airport that can be obtained on their website:

In periods of low traffic, we can operate in a single or a Land 1/Depart 1 configuration. Why is this important? Our north/south runways can't be used in a dual mode because of their proximity to one another, which means our capacity is impacted when we are on that configuration.

Planes are much larger now than they were many years ago when the airport and runways were built, and Pearson Airport is flawed in its design today because of it.

What does my community do about the noise Prime Minister Trudeau and Minister of Transportation Pablo Rodriguez because it affects our health?

Night Flight Program, which limits nighttime noise and balances growing regional demand. Specifically, it limits the number of movements during the restricted hours of 12:30 am to 6:29 am. For more information, you may wish to visit Night Flights, Noise Management Program and Toronto InsightFull (torontopearson.com).

Akram can you please let me know how many hours of sleep Health Canada recommends? You realize 12:30 am to 6:29 am Night Flight Program is not followed on many mornings by NAV Canada and Pearson Airport. It is terrible!

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Pickering Lands refers to the 75 km2 (18,600 acres) of land in Pickering, Markham and Uxbridge, Ontario, which has been owned by the Government of Canada since 1972.

Premier Doug Ford is working with Mayor of Pickering Kevin Ashe to develop land for housing very close to this Federal Government land due to the so-called housing shortage attributed to immigration. I suspect that if Premier Doug Ford approves Mayor of Pickering Kevin Ashe's housing project, which includes Greenbelt land, the Federal Government land will never be considered for an airport again. Mayor of Pickering Kevin Ashe opposes the airport due to airplane noise. Pickering will save thousands of dollars in legal fees by preventing an airport from being built there. If a decision is made not to use this Federal Government land for an airport, the Federal Government stands to benefit significantly from real estate revenue. Didn't Premier Doug Ford run his last election campaign on the promise that he would protect Ontario's Greenbelt?

It really sickens me to see the people we have elected to lead us into the future. I do not believe they are honest, and I truly think they are only in it for their own prosperity. It look like Premier Doug Ford and Prime Minister Trudeau have been getting along quite well lately.

Hopefully, MP Judy Sgro will call me back by next Wednesday, and we can work on a questionnaire regarding concerns about airplane noise in this community. The completed questionnaires may provide Prime Minister Trudeau, Minister of Transportation Pablo Rodriguez, and CEO of GTAA Deborah Flint with a clearer picture of what it is like to live with air traffic. Everyones health and well being should be a concern here before making decisions to increase air traffic.

Sincerely,

Daryl Henderson

Objet : Re: Airplane Noise

Daryl,

This the preferential nighttime runway system that Pearson has developed. They started in 2018 & conducted trials during the pandemic. It's another one of these things in which

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

they say they changed nothing but they actual have made changes in how they use runways. Especially at night.

Idea 1: Night-time approaches
torontopearson.com

Based on the feedback from your community I would say whatever system has developed for arrivals is not an improvement for your community.

At one point I was very frustrated with the presentation of data & terminology. Some of which lead to changes in the terminology and how data was presented to officials. As is typical GTAA used the data to make things appear much more positive than the reality for local communities.

I would suggest asking questions about this new nighttime system to determine if it has any influence on the nighttime impacts your community is experiencing that differ from your historical lived experience.

Take Care & hope you get some rest soon.
Irene

Hello Everyone,

This morning, I was woken up at 4:18 am by a loud plane that passed over my house. I called the Pearson Airport Complaints Department and MP Judy Sgro, and I left messages for both of them.

At 5:40 am, Pearson Airport began to receive incoming planes. It sounds like it will be a busy morning for airplane traffic, starting earlier than expected. The new start time had

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

been 6:30 am. More planes are great for GTAA CEO Deborah Flint; that is why she was hired to increase activity at Pearson Airport, supported by the Federal Liberal Government. However, it's not great health-wise for the many residents living in flight paths around the airport. By 6:30 am, the planes over my house are very, very loud.

I will be awaiting a reply this week from Federal Minister of Transportation Pablo Rodriguez regarding his plans to address the airplane noise. A lack of reply would suggest that the Federal Liberal Government is not too concerned about the noise issues affecting certain communities around Pearson Airport, as it affects only a small percentage of the population.

I have left messages for MPP Tom Rakocevic to ask him why insurance rates are higher for certain postal codes, but I have not received a reply from him yet. If a correlation could ever be made between postal codes, accidents, and flight path areas, then I think it will be a bigger problem for all governments to figure out. Studies have shown that people who lose an hour of sleep are more likely to be involved in an accident. Hopefully, MPP Tom Rakocevic replies to me by the end of the week.

Plane noise does affect students' learning capabilities, and our Councillor's office is aware of this issue and is working on it.

Sincerely,

Daryl Henderson

Subject: Re: Airplane Noise

Hello Everyone,

The planes from Pearson Airport are extremely loud this morning... as in LOUD. The first plane screeched over my house at 6:21 am. Air traffic after midnight could be heard until 12:45 am. The morning before, planes could be heard flying until 1:30 am, and then again throughout the rest of the morning, offering me the chance at only a couple of hours of sleep. It takes work to file the complaints in the morning.

Minister of Transportation Pablo Rodriguez, please provide my community with an answer by the end of the month on how Prime Minister Trudeau plans to improve our noisy living situation here, with Pearson Airport nearby. Another airport should have been built in Pickering, and the two North and South runways need to be spaced farther apart from each other so that they can be used simultaneously. This way, we do not have to rely solely on the three East/West runways, where planes fly over the most populated parts of areas around Pearson Airport at peak times

MP Judy Sgro is aware of how plane noise becomes worse for us in warmer weather, with planes flying at lower altitudes. Nothing has been done about the plane noise in my community over the last few years. MP Judy Sgro initially stated to a few us in a meeting that we live in the city and we must learn to live with the airplane noise. I believe she has come to realize over the last few years that her initial statement to us was unacceptable.

There should be at least 7 hours between the last plane of the night and the first one of the day, with midnight as the cutoff time and 7 am as the startup time. Proper sleep is essential for a healthy life. It becomes stressful for me because I never know when the last plane will come or when I will hear the first one. I could be up until 1:30 am with airplane noise. Pearson Airport unfortunately has a significant influence on my sleep

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

patterns, and its unpredictability adds to the challenge. I know I my days are more enjoyable when I hear fewer planes.

I don't want to call Pearson Airport to complain about the plane noise several times a day or spend time writing emails to important figures in public office. I want to enjoy my life! Former Minister of Transportation Lisa Raitt publicly criticized Pearson noise complaints, where she was vocal and honest and told people the complaints are collected and then left to collect dust. I find myself believing her more and more each day.

It would be wonderful if CEO of the GTAA, Deborah Flint, would make time for a meeting to listen to complaints and provide solutions to residents greatly affected by airplane noise. Unfortunately, it seems to me she is not readily available to engage with communities impacted by her decisions. This situation is concerning and needs to improve.

Sincerely,

Daryl Henderson

Subject: Airplane Noise

Hello Everyone,

I contacted MP Judy Sgro's office this afternoon and asked to speak with her, but I was informed that she was not in the office today. The person I spoke to, Saina, confirmed she would inform Amy, the office manager, about the emails Fabio had sent today to MP Judy Sgro.

MP Judy Sgro presented the airplane noise petition for Humber River - Black Creek to the House of Commons, and it has been approved for investigation. However, I am uncertain about the duration of this process. I believe that during the review process, there should be a temporary reduction in air traffic to Pearson Airport not an increase.

It is warmer weather now, planes fly at lower altitudes and the result is increased noise. GTAA CEO Deborah Flint, MP Judy Sgro, Minister of Transportation Pablo Rodriguez, NAV Canada, and Pearson Airport are all aware of the noise issue. The noise levels are high and have negative impacts on people's health. Despite reaching out to these people over the last few years, the situation has not improved. Furthermore, GTAA CEO Deborah Flint publicly stated intentions to increase air traffic, to make the noise problem worse and Prime Minister Trudeau along with his Minister of Transportation Pablo Rodriguez did not say no to this plan.

What can our community do about the airplane noise? I understand it is Friday, and I may not receive a response today. However, Minister of Transportation Pablo Rodriguez, this question is directed to you, not MP Judy Sgro who should not be taking responsibility of handling your job. What is your proposed solution?

Prime Minister Trudeau, if Minister of Transportation Pablo Rodriguez does not address our noise concerns regarding airplane traffic and noise from Pearson Airport for Humber River - Black Creek by the end of the month, I will be deeply disappointed once again in the Federal Liberal Government. Perhaps it is time for new leadership in the federal government, and now is the opposition's opportunity to voice their stance on this issue. I have not heard a reply from the opposition parties here.

MP Judy Sgro wrote a detailed letter about the airplane noise issues faced in Humber River - Black Creek a couple of years ago to Prime Minister Trudeau and the then Federal Minister of Transportation, Omar Alghabra, but neither of them responded to MP Judy Sgro. I asked MP Judy Sgro if she could find out why her letter was not replied to, and she seemed hesitant and afraid to approach either of them to ask. It is not good!

I would love to see the noise complaints handled differently, as Fabio described a new plan to everyone here, where residents of this community could give consent for NAV

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

WebTracker to file a complaint if the decibel reading reaches a certain level in our community. I hope Cynthia Woods, the Manager of Pearson Airport Complaints Department, has considered adopting this idea. Why should I, a resident of this community affected by airplane noise, have to take time out of my day to contact Pearson Airport Complaints Department when technology exists to file a complaint on my behalf? When I am woken up early in the morning, it takes time to check the date and time and then find the device to file the complaint on. It's not easy to file a noise complaint, and sometimes I'm too upset with the airplane noise to bother doing it.

MP Judy Sgro, can you follow up with Cynthia Woods and provide Humber River - Black Creek with an answer by the end of this month to see if she have Pearson Airport adopt this new complaint format? I give this responsibility to you MP Judy Sgro or your office to speak to Manager of Pearson Airport Complaints Department Cynthia Woods by the end of this month and give Humber River - Black Creek an answer.

CEO of GTAA Deborah Flint needs to make herself available to speak to communities where her decisions with increases to air traffic are affecting the health and well being of the residents living in flight paths to Pearson Airport.

I hope the weekend is quiet with little airplane noise because this morning was hell. Humber River - Black Creek wants improvement and answers, not to be ignored!

Take care,

Daryl Henderson

Subject: Ask the Courts of Justice to place an Injunction

God day Honourable Judy Sgro,

I do not intend to be disrespectful, but as a responsible citizen, I feel it is important to bring the following to your attention.
You should rely on people like me to bring attention to an issue, not to perform your job. It is utterly unfair to place the onus on the people to do the job our representatives have been elected and are being paid to perform.
I would like to request that, as our representative at the federal level, you ask the Courts of Justice to place an injunction on Pearson Airport. Specifically, I request the suspension of all night traffic, except for emergencies, and the imposition of a cap to stop any increase in air traffic.
The rationale for these requests is as follows:

1. **Irreparable Damage to Students**: Students living in the communities surrounding the airport are experiencing detrimental impacts from airplane noise. Numerous empirical studies demonstrate the negative effects of such noise on students' academic performance and overall well-being.
2. **Irreparable Damage to Health**: The health of citizens living in the surrounding communities is being compromised. There is a wealth of empirical studies showing the harmful effects of airplane noise on people's health, including increased risk of cardiovascular diseases, sleep disturbances, and other health issues.
3. **Potential for Irreparable Damage**: Consider a scenario where a truck driver from my community falls asleep at the wheel due to sleep deprivation caused by airplane noise, leading to a tragic accident involving a bus with 40 school children. The insurance company would likely determine that Transport Canada policies permitting the airport to operate 24/7 contributed to the sleep deprivation. In such a case, the courts would likely hold the state responsible. The policymakers would not personally bear the costs; instead, the state would, meaning that the financial burden would ultimately fall on the taxpayers. To put it simply, it is the people who would have to pay for the consequences of these policies.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

I urge you to take immediate action to address these concerns and protect the well-being of our community.

Regards,
Fabio Ovettini

Subject: Request for immediate changes to complaint form

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to express my concerns regarding the current complaint form for noise disturbances. The existing form is overly cumbersome and effectively discourages individuals from filing complaints.
As someone who experiences adverse effects from aircraft noise exceeding 55dB, the current system is impractical. Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 8 events per submission, I would need to complete it 62.5 times daily. At an estimated 15 minutes per form, this amounts to 937.5 minutes or approximately 15.6 hours each day.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This cumbersome process seems designed to discourage complaints. Therefore, I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding 55dB, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, particularly for those you are making vulnerable, traumatized, humiliated, and marginalized individuals.

Thank you for your attention to this matter.

Fabio Ovettini (M9M 2J4)

Objet : Re: Airplane Noise

Hi Everyone
I met in person with my MPP today to discuss what's been happening on our street and in other areas. I had data, photos, videos and we filled out intake forms and we had a petition signed. After hearing my story and how many hours they have flown non stop 24/7 she is annoyed. She said this is not acceptable and, with me in her office, she put out 3 emails immediately to the CEO, the MTO, federal member and GTAA letting them know that it's not ok to be disrupting people's lives. This is promising!! Insist on a sit down with your federal or provincial member of parliament.
Keep up the fight!
Josie

Subject: Re: Airplane Noise

Hello En,

Deborah Flint, CEO of GTAA, has been hired with a salary of $2 million annually, enabling her to dictate decisions and plans to increase air traffic to Pearson Airport. This approval system from our Liberal Federal Government seems highly questionable, based solely on evidence provided by the Pearson Airport Complaints Department.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

CEO of GTAA Deborah Flint

Deborah Flint is the central figure here, and she must be held accountable. MP Judy Sgro, unfortunately, holds little influence; her urgent letter regarding plane noise in our community received no response from her party colleague, let alone Prime Minister Justin Trudeau. It appears she lacks respect within her own party, which should be a concern for residents of Humber River - Black Creek.

Why does Canada pay Federal Minister of Transportation Pablo Rodriguez when his department deflects responsibility by simply sending letters stating they are too busy to address our airplane noise issues?

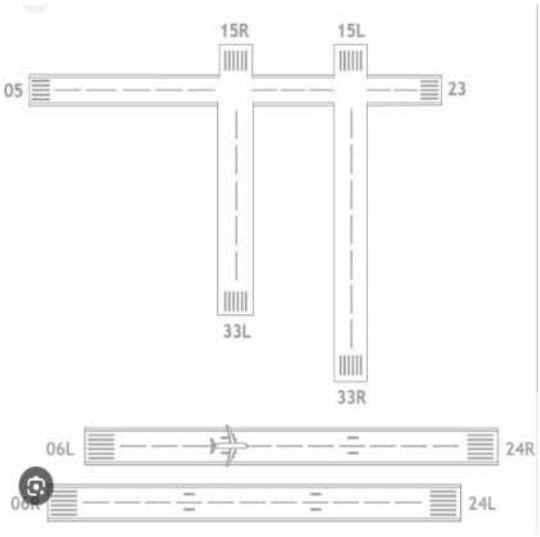

An employee of NAV Canada once told me they are effectively controlled by GTAA and Pearson Airport, so they are insignificant despite their apparent importance.

In 2016, the "Residents Reference Panel Report on Growth and Noise Fairness" forecasted a nearly 50% population increase by 2040 in the Greater Toronto and Hamilton Area, influencing airport demands. Given the substantial immigration surge post-Covid, this report's predictions for 2040 now seem conservative. With a potentially 24/7 operation at Pearson Airport, the impact of airplane noise, which medical professionals in studies have already confirmed is unhealthy, is alarming.

Pearson Airport is an outdated airport unfortunately located in the center of a densely populated area, where very loud planes pass over nearby homes. The two North/South runways, 15R 33L and 15L 33R, were constructed when planes were smaller and cannot be used today simultaneously because of the much larger plane sizes, it would expose the planes to an increased risk of collisions. Pearson Airport urgently needs another East/West runway built adjacent to 05 23 because any issue with this runway would severely impact its ability to manage air traffic at Pearson Airport. This will mean other areas around the airport will soon have to deal with airtraffic and noise issues as well. How will the Federal Government, GTAA and Pearson Airport explain this new

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

runway to the residents in this area by the airport. Billy Bishop Airport will likely close by 2027 due to safety concerns, potentially redirecting air traffic to Pearson Airport

In a few years, constant airplane noise over our homes seems inevitable, we all know it will get worse. The only viable alternative is a new airport, although previous plans for the one in Pickering will never be built. Finding suitable land elsewhere by the Federal Liberal Government now should be made a priority, if the our Federal Government has any concern for the health and well being of the people who live around Pearson Airport now.

A telephone call woke MP Judy Sgro up at 1 am, and she was not too pleased with it. So, why should I accept increased air traffic over my house at all hours of the day? I have no idea how busy Pearson Airport will be from one day to the next, and I cannot plan for mornings like I had today. It is terribly wrong.

We need Deborah Flint to start communicating with us about the airport before decisions are made and we are forced to live with them.

Enjoy the rest of your weekend!

Take care,

Daryl

Subject: Re: Airplane Noise

Hello

We too hear those planes every minute from the wee hours of the morning and all day. How about if we all take turns calling Judy Sgro in the wee hours of the morning and see if she likes being waken up by loud noise.

They need to address our concerns. That is why we elect them. They ingore us when in office but come knocking on our door when they need the votes. Now do something for us. Do not ignore our concerns. We all need a good night rest. It is our right.

Lets keep up the fight. We are not giving up.

Hi
I'm sorry this is happening to all but not sorry that you inconvenienced her. They get to enjoy their quiet peace at night at the expense of the rest of us, very sad! She also gets to keep her windows open and have guests outside and actually hear them. Keep up the fight all! I have an in person appointment with my MP on Tuesday I will let you know the outcome.
Thanks everyone
Josie

Subject: Re: Airplane Noise

Hello MP Judy Sgro,

Yesterday afternoon, through the night, and into the morning, was terrible due to airplane noise. I couldn't sleep. At 1 am, I accidentally called your personal number to complain. You answered the phone and I woke you up. In an upset tone, you asked who was calling, and when I tried to explain, you told me to go away and hung up on me.

MP Judy Sgro, I wish I could tell the airplanes from Pearson Airport to go away just like you told me to go away this morning, but unfortunately, I can't. It's interesting because a normal telephone ring is slightly over 70 decibels, about the same noise I hear from each passing plane. Your phone ringing woke you up after only a few rings, yet you

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

expect your community to sleep through the continuous sounds of planes passing over our houses. It's convenient that you live in Thornhill and don't experience the large aircraft that produce close to or over 70 decibels on each pass. I believe you would also have trouble sleeping if you lived here.

Perhaps you should have Stephanie from your office give airplane noise management classes, as she has informed me multiple times that she used to live next to Pearson Airport and the noise didn't bother her then. Now, living a couple of kilometers from me where the airplane noise is much lower, she still isn't bothered by it. It would be great if I could learn from her on how to not be bothered by the airplane noise.

Amy, your office manager, has not called me back to apologize after dismissing me for being confused about a list of questions that Stephanie said you had made. Stephanie mentioned that I couldn't see these questions until one of your advisors released them. Amy says there is no list of questions but Stephanie say there is a list of questions, maybe they are confused.

The way airplane traffic has been handled by you, the Federal Government, GTAA, and Pearson Airport is a joke because no one seems to care about those whose lives are affected by the airplane noise. You wrote a letter to the former Minister of Transportation, and our community expected a response from him to give to you, but we received nothing. You had mentioned in a meeting that you lived near GTAA many years ago and learned to live with airplane noise, and you expect us to do the same. Many times, I've called your office to discuss airplane noise, only to be ignored days, weeks and months. Albert from your office even advised me to speak a bit nicer if I expect you to do anything for me - I need to kiss your feet. Pearson Airport also doesn't respond to my questions or call backs sometimes. Recently, Minister of Transportation Pablo Rodriguez's office sent me a letter stating they were too busy to address my concerns with airplane noise and informed me that I need to contact my municipal government about noise complaints. Municipal government simply says it a Federal matter not a municipal mater. Where's Waldo? Well, where is CEO of the GTAA Deborah Flint? She never makes herself available to those affected by airplane noise, impacting their health and well-being. Why is that? Deborah should engage with the people affected by airplane noise, not just with business interests looking to increase air traffic to make money. The Pearson Airport Noise Complaint Department shows few complaints because most affected communities either don't know how to complain or don't have the time. Tracking planes and filing complaints took over two hours this morning alone. Pearson Airport claims their complaint system is easy and functional, but that's laughable. It would be great if we could follow Fabio's suggestion to authorize our noise complaints and let technology handle the rest for us it would save me and others who complain a great deal of time. However, GTAA wouldn't want this because it would provide more realistic data on the negative impacts of airplane noise, making it harder for them to justify increasing air traffic to the Federal Government. Prime Minister is a joke, he is all about Carbon Pollution but he loves to fly as much as possible.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

I wish this were a cartoon where I had a magic button to make airplane noise disappear as easily as you dismissed me this morning when a telephone ring woke you up. I only got maybe 3 to 4 hours of sleep this morning. Sleep is crucial for my health! Do you care about me and the other people in Humber River - Black Creek affected by airplane noise? Please be honest with us now!

Have a great day!

Sincerely,

Daryl Henderson

My noise complaints that I sent to Pearson Airport Complaints Department, along with a couple of pictures of the Webtracker to show you how busy the planes where first thing in the morning. Planes where like a lot of phone rings!

Concerns:

Blackfriar Park airplane noise monitor is not working.

Planes could be seen departing using runway 05 23 is this suppose to be allowed?

Time 1:31 am Aircraft B328M Origin YYZ Destination YHZ
Time 2:00 am Aircraft B328M Origin YYZ Destination YOW

Pearson Airport is getting busier planes could be seen departing and arriving using 05 23 after 6:30 am this morning along with arrivals on runways of 06 24.

People need to sleep. Does Pearson Airport, GTAA or our Federal Government care about the health and well being of the people who live on the flight path?

Subject: Re: Airplane Noise

Hello Everyone,

Yesterday was terrible for plane noise, planes started to fly at 4 am over my house and they continued non-stop for the whole day and went to around 2:30 am this morning and started up again around 6 am. I called and left MP Judy Sgro's office many messages this morning. I did not get a good night sleep because of the plane traffic.

Today I called MP Judy Sgro's office and I spoke to Stephanie. I told Stephanie about the amount of planes that we had on the weekend and into the morning hours today. She never seemed too concern. I asked Stephanie about the conversation we had where she told me that MP Judy Sgro had a list of questions prepared. She told me that yes she did tell me that their was a list of questions and she had also told me that they had to be approved by their advisor. Last week Amy told me that I must have been confused to what Stephanie had told me and there was no list of questions. Stephanie gave me her opinion of airplane noise again and told me that she use to live right by the airport years ago and the planes did not bother her then and now she lives 5 minutes away from where I live and the planes don't bother her now. I asked to speak to Amy and she told me that Amy was not in the office today. I asked to speak to MP Judy Sgro and she told me that she is on her way to Washington to speak to the President. I ended-up hanging up on Stephanie today because I was tired from not sleeping and frustrated in this whole matter. I do have another number for MP Judy Sgro and I apologize to Stephanie for saying that I didn't.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

It would be respectful if Amy from MP Judy Sgro's office would give me a call or email me a message and apologize to me for telling me that I was confused last week where she told me I must not have understood the conversation I had with Stephanie on what she had told me.

It would be wonderful if MP Judy Sgro were to keep this community updated on the process of the noise petition that she had submitted to the house of commons a few weeks ago. No one really know how long this process will take. Stephanie wasn't too sure when I asked her again today about it.

A neighbour who is selling their house on my street told me last night that they have had difficulties selling it because of the airplane noise issue. Potential buyers come and hear the noise from the big planes and they are very concerned about it and it turns them off from buying it. A couple of weeks ago, the real estate agent for the home came and spoke to another neighbour and myself and asked us for our opinions on the planes noise because he too was concerned about it for the potential buyers. To the people who say why don't you just move if the plane noise bothers you, well it is not so simple.

I did call Pearson Airport to complain about the noise this morning and asked for a call back. Pearson Airport Compliant Department will need to make up an excuse on why it was okay to fly planes so early in the morning or else they will not even bother to reply to me.

Prime Minister Trudeau and Minister of Transportation Pablo Rodriguez I give you both a rating of 1/10 for the lack of concern and action taken in handling airplane noise around Pearson Airport.

I invite CEO of GTAA Deborah Flint to come and visit the neighbourhoods that she has negatively affected by her decisions to continually increase air traffic.

Take care,

Daryl Henderson

Subject: Fw: Airplane Noise

Hello Amy,

On June 27th, I contacted your office and I spoke with Stephanie. I asked if Judy could speak with me to compile a list of questions concerning airplane noise in my community. I requested a reply from MP Judy Sgro by Wednesday, July 3rd. Stephanie repeated my instructions to ensure she understood what I had asked. My plan was to take these questions to at least 250 homes where residents can fill them out. MP Judy Sgro received an email from Greg Colacitti, who explained that he and his wife were unaware they could complain about airplane noise to Pearson Airport.

After receiving no reply from MP Judy Sgro or your office, I called on July 3rd and once again spoke with Stephanie. Stephanie informed me that MP Judy Sgro had received my request. However, MP Judy Sgro chose to ignore the request because she did not reply to me by July 3rd. I asked Stephanie about the questions, and she told me that MP Judy Sgro had a list of questions. I expressed my interest in receiving them and asked if she could send me an email with the questions. Stephanie consulted with you about emailing me the questions and returned with the answer that they needed approval

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

from an advisor before being sent. I asked Stephanie to please try to email me the list by today, which is Friday. Stephanie said she would try. However, I did not receive any response, which is why I called you today.

I wanted MP Judy Sgro's involvement in creating the questions. I have now wasted two weeks of my time dealing with this issue. There is a word called "RESPECT," and I don't believe it has been shown to me or to others by MP Judy Sgro, Prime Minister Trudeau, Minister of Transportation Pablo Rodriguez, or even yourself regarding airplane noise. I would prefer to deal with Councillor Perruzza and his office regarding the airplane noise issue if I could that is how bad your office has treated the airplane noise issue now.

If you brought your car to a mechanic and the mechanic did not call you back and ignored you, how long would you continue to bring your car to that mechanic? I don't think you or MP Judy Sgro would choose to return to such a mechanic and would likely look for another one. This is how residents feel about the way MP Judy Sgro has handled airplane noise issues in our community. Last year, we were informed that MP Judy Sgro had numerous immigration issues to address, and this year, she claims there is nothing she can do about this federal matter.

Your last line in your email states, "We are eager to see the positive impact of our efforts in addressing the airplane noise issue in the community." I am sorry, but I do not believe it.

Do I want to spend my Friday sending negative emails and putting down a nice lady like MP Judy Sgro because of her performance here? No, I don't. It would be lovely if MP Judy Sgro would retire from politics and enjoy her family, and I, along with others, would wish her all the best.

I will create a list of airplane noise questions to send to MP Judy Sgro. It would be great if some people here would send me questions that they would like on the list.

Have a wonderful weekend!

Take care,

Daryl Henderson

Subject: RE: Airplane Noise

Hello Daryl,

I hope this message finds you well.

Thank you for your concern regarding airplane noise in the community. Your dedication to improving the riding is greatly appreciated. Introducing a questionnaire is an excellent idea—it will provide deeper insights into the impact of airplane noise and gather valuable feedback from residents. This tool is crucial for developing effective strategies to address the issue.

Since you've been actively involved in addressing this issue, we believe you would be the ideal person to draft the questionnaire. Your perspective and insights will be invaluable in capturing the concerns and experiences of the residents.

Regarding our recent conversation, please be aware of certain regulations that may impact our ability to directly create a questionnaire. Nonetheless, we encourage you to proceed with drafting it. Should you need any assistance or have questions during this process, please feel free to reach out to us.

Once you've completed the questionnaire, our office would be happy to review it and provide additional insights.

We are eager to see the positive impact of our efforts in addressing the airplane noise issue in the community.

Best regards,

Subject: Re: Airplane Noise

Hello Everyone,

Today, I called MP Judy Sgro to inquire about the list of airplane noise questions Stephanie mentioned the other day had been prepared by Judy and were waiting to be released by their advisor. Stephanie spoke to Amy during our conversation that day. However, when I spoke to Amy, the office manager, she informed me that no such list existed and clarified that MP Judy Sgro doesn't make lists. During our conversation, I expressed my frustrations with the lack of progress on the airplane noise issue and reminded her of previous instances where I had been given conflicting information by MP Judy Sgro and her office staff. Dealing with MP Judy Sgro and her office is incredibly frustrating.

Amy let me know she had more concerning and important matters to deal with and had to go. I told her that we have been dealing with noise issues for a long time now and I had hoped for involvement from MP Judy Sgro in creating the list to actually show her, our Federal Government, GTAA, Pearson Airport, and NAV Canada that more people are bothered by the airplane noise than what appears to be seen from data collected from Pearson Airport Complaint Department.

It's commendable that MP Judy Sgro wrote a letter on June 12, 2024, to residents of this area highlighting the severity of the situation at 1677 Wilson Ave. However, what is she going to do about it besides write a letter? Residents of this community have been speaking to Councillor Perruzza and MP Judy Sgro for many years about this issue, and yet, little has been done. I phoned Matias and Rashid at Councillor Perruzza's office because Councillor Perruzza is difficult to reach directly, and I informed them about graffiti with derogatory messages on signs. Nothing was been done by the city there were

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

meetings I was told, and residents of this area weeks later had to take matters into their own hands, removing City of Toronto signs and fixing the problem ourselves. We spent a day picking up garbage nearby thank Matias for helping. MP Judy Sgro sent two of her staff members with coffee and donuts for a group of ten people who volunteered which was nice of Judy. Look at Wilson Ave. from Clayson Rd. to Jane St. — it is in a deplorable state. I see syringes lying on the ground frequently, fences securing properties knocked over, and litter everywhere. This is both a provincial and city issue not for MP Judy Sgro to involve herself in.

The noise from the planes is a federal issue, a federal issue, a federal issue, and we need your help. I repeated myself a few times to ensure you understand. This is your responsibility to Humber River - Black Creek residents, so please do not waste your time with city issues and help us here now.

Amy, I would have preferred if you had acknowledged today that Stephanie and you had made a mistake with the list of questions, rather than insinuate that I must be confused or did not understand what Stephanie had told me the other day. It becomes frustrating having to deal with situations like this one today. I know what I was told, and Stephanie had involved you in the conversations on that day too. It does not reflect well on MP Judy Sgro and yourself when misinformation is communicated, you loose people trust and votes.

Take care,

Daryl Henderson

Subject: Fw: Airplane Noise

Hello Everyone,

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Here is a direct email reply from the Minister of Transportation, written by Akram Saiyed. It is upsetting to me to receive advice from Akram explaining how the Minister of Transportation works, and then suggesting I contact the Greater Toronto Airport Authority. He provided me with the number for the Toronto Pearson Airport Complaints Department at 416-247-7682. The Toronto Pearson Airport Complaints Department has informed me in previous conversations that they are not authorized to provide the email address or contact phone number of GTAA CEO Deborah Flint.

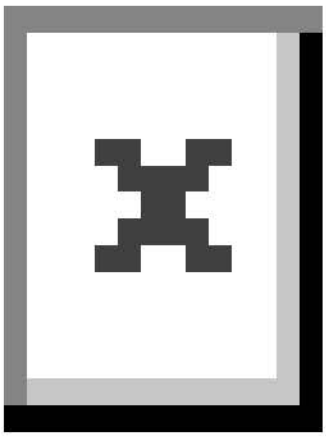

This morning, I called MP Judy Sgro's office and spoke with Stephanie. I asked if Judy could meet with me to compile a list of questions concerning airplane noise in my community. I requested a reply from MP Judy Sgro by next Wednesday. Stephanie repeated my instructions to ensure she understood what I had asked. My plan is to take these questions to at least 250 homes and where the questions would be filled out and completed. I'm uncertain about the answers that I will receive, but I suspect they will indicate dissatisfaction with airplane noise in my community.

I also made Stephanie aware that many elderly residents in my community do not use computers. Despite being affected by airplane noise, these elderly individuals do not file complaints because they lack the ability to do so. I questioned whether MP Judy Sgro has considered these individuals. Not everyone who is 78 years old is like MP Judy Sgro, where they have no limitations on what they are capable of doing, both physically and mentally. The list of questions would help here where this group of people get to speak up and are not forgotten.

Pearson Airport has informed me multiple times that very few residents in my neighborhood actually lodge complaints with them. They assured me that their complaint process is straightforward and easy to use. It is not and takes time to do each day. Additionally, Pearson Airport has let me know that the data they collect is crucial for determining the appropriateness of increasing air traffic, as decided by the GTAA and the Federal Government. It is wrong for this information to be used to determine if air traffic should be allowed to increase because it is not accurate.

Pearson Airport Runways:

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Here is an information from Pearson Airport that can be obtained on their website:

In periods of low traffic, we can operate in a single or a Land 1/Depart 1 configuration. Why is this important? Our north/south runways can't be used in a dual mode because of their proximity to one another, which means our capacity is impacted when we are on that configuration.

Planes are much larger now than they were many years ago when the airport and runways were built, and Pearson Airport is flawed in its design today because of it.

What does my community do about the noise Prime Minister Trudeau and Minister of Transportation Pablo Rodriguez because it affects our health?

Night Flight Program, which limits nighttime noise and balances growing regional demand. Specifically, it limits the number of movements during the restricted hours of

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

12:30 am to 6:29 am. For more information, you may wish to visit Night Flights, Noise Management Program and Toronto InsightFull (torontopearson.com).

Akram can you please let me know how many hours of sleep Health Canada recommends? You realize 12:30 am to 6:29 am Night Flight Program is not followed on many mornings by NAV Canada and Pearson Airport. It is terrible!

Pickering Lands refers to the 75 km2 (18,600 acres) of land in Pickering, Markham and Uxbridge, Ontario, which has been owned by the Government of Canada since 1972.

Premier Doug Ford is working with Mayor of Pickering Kevin Ashe to develop land for housing very close to this Federal Government land due to the so-called housing shortage attributed to immigration. I suspect that if Premier Doug Ford approves Mayor of Pickering Kevin Ashe's housing project, which includes Greenbelt land, the Federal Government land will never be considered for an airport again. Mayor of Pickering Kevin Ashe opposes the airport due to airplane noise. Pickering will save thousands of dollars in legal fees by preventing an airport from being built there. If a decision is made not to use this Federal Government land for an airport, the Federal Government stands to benefit significantly from real estate revenue. Didn't Premier Doug Ford run his last election campaign on the promise that he would protect Ontario's Greenbelt?

It really sickens me to see the people we have elected to lead us into the future. I do not believe they are honest, and I truly think they are only in it for their own prosperity. It look like Premier Doug Ford and Prime Minister Trudeau have been getting along quite well lately.

Hopefully, MP Judy Sgro will call me back by next Wednesday, and we can work on a questionnaire regarding concerns about airplane noise in this community. The completed questionnaires may provide Prime Minister Trudeau, Minister of Transportation Pablo Rodriguez, and CEO of GTAA Deborah Flint with a clearer picture of what it is like to live with air traffic. Everyones health and well being should be a concern here before making decisions to increase air traffic.

Sincerely,

Objet : Re: Airplane Noise

Daryl,

This the preferential nighttime runway system that Pearson has developed. They started in 2018 & conducted trials during the pandemic. It's another one of these things in which they say they changed nothing but they actual have made changes in how they use runways. Especially at night.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Idea 1: Night-time approaches

torontopearson.com

Based on the feedback from your community I would say whatever system has developed for arrivals is not an improvement for your community.

At one point I was very frustrated with the presentation of data & terminology. Some of which lead to changes in the terminology and how data was presented to officials. As is typical GTAA used the data to make things appear much more positive than the reality for local communities.

I would suggest asking questions about this new nighttime system to determine if it has any influence on the nighttime impacts your community is experiencing that differ from your historical lived experience.

Take Care & hope you get some rest soon.

Irene

?

Hello Everyone,

This morning, I was woken up at 4:18 am by a loud plane that passed over my house. I called the Pearson Airport Complaints Department and MP Judy Sgro, and I left messages for both of them.

At 5:40 am, Pearson Airport began to receive incoming planes. It sounds like it will be a busy morning for airplane traffic, starting earlier than expected. The new start time had been 6:30 am. More planes are great for GTAA CEO Deborah Flint; that is why she was hired to increase activity at Pearson Airport, supported by the Federal Liberal Government. However, it's not great health-wise for the many residents living in flight paths around the airport. By 6:30 am, the planes over my house are very, very loud.

I will be awaiting a reply this week from Federal Minister of Transportation Pablo Rodriguez regarding his plans to address the airplane noise. A lack of reply would suggest that the Federal Liberal Government is not too concerned about the noise issues affecting certain communities around Pearson Airport, as it affects only a small percentage of the population.

I have left messages for MPP Tom Rakocevic to ask him why insurance rates are higher for certain postal codes, but I have not received a reply from him yet. If a correlation could ever be made between postal codes, accidents, and flight path areas, then I think it will be a bigger problem for all governments to figure out. Studies have shown that people who lose an hour of sleep are more likely to be involved in an accident. Hopefully, MPP Tom Rakocevic replies to me by the end of the week.

Plane noise does affect students' learning capabilities, and our Councillor's office is aware of this issue and is working on it.

Sincerely,

Daryl Henderson

Subject: Re: Airplane Noise

Hello Everyone,

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

The planes from Pearson Airport are extremely loud this morning... as in LOUD. The first plane screeched over my house at 6:21 am. Air traffic after midnight could be heard until 12:45 am. The morning before, planes could be heard flying until 1:30 am, and then again throughout the rest of the morning, offering me the chance at only a couple of hours of sleep. It takes work to file the complaints in the morning.

Minister of Transportation Pablo Rodriguez, please provide my community with an answer by the end of the month on how Prime Minister Trudeau plans to improve our noisy living situation here, with Pearson Airport nearby. Another airport should have been built in Pickering, and the two North and South runways need to be spaced farther apart from each other so that they can be used simultaneously. This way, we do not have to rely solely on the three East/West runways, where planes fly over the most populated parts of areas around Pearson Airport at peak times

MP Judy Sgro is aware of how plane noise becomes worse for us in warmer weather, with planes flying at lower altitudes. Nothing has been done about the plane noise in my community over the last few years. MP Judy Sgro initially stated to a few us in a meeting that we live in the city and we must learn to live with the airplane noise. I believe she has come to realize over the last few years that her initial statement to us was unacceptable.

There should be at least 7 hours between the last plane of the night and the first one of the day, with midnight as the cutoff time and 7 am as the startup time. Proper sleep is essential for a healthy life. It becomes stressful for me because I never know when the last plane will come or when I will hear the first one. I could be up until 1:30 am with airplane noise. Pearson Airport unfortunately has a significant influence on my sleep patterns, and its unpredictability adds to the challenge. I know I my days are more enjoyable when I hear fewer planes.

I don't want to call Pearson Airport to complain about the plane noise several times a day or spend time writing emails to important figures in public office. I want to enjoy my life! Former Minister of Transportation Lisa Raitt publicly criticized Pearson noise complaints, where she was vocal and honest and told people the complaints are collected and then left to collect dust. I find myself believing her more and more each day.

It would be wonderful if CEO of the GTAA, Deborah Flint, would make time for a meeting to listen to complaints and provide solutions to residents greatly affected by airplane noise. Unfortunately, it seems to me she is not readily available to engage with communities impacted by her decisions. This situation is concerning and needs to improve.

Sincerely,

Daryl Henderson

Subject: Airplane Noise

Hello Everyone,

I contacted MP Judy Sgro's office this afternoon and asked to speak with her, but I was informed that she was not in the office today. The person I spoke to, Saina, confirmed she would inform Amy, the office manager, about the emails Fabio had sent today to MP Judy Sgro.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

MP Judy Sgro presented the airplane noise petition for Humber River - Black Creek to the House of Commons, and it has been approved for investigation. However, I am uncertain about the duration of this process. I believe that during the review process, there should be a temporary reduction in air traffic to Pearson Airport not an increase.

It is warmer weather now, planes fly at lower altitudes and the result is increased noise. GTAA CEO Deborah Flint, MP Judy Sgro, Minister of Transportation Pablo Rodriguez, NAV Canada, and Pearson Airport are all aware of the noise issue. The noise levels are high and have negative impacts on people's health. Despite reaching out to these people over the last few years, the situation has not improved. Furthermore, GTAA CEO Deborah Flint publicly stated intentions to increase air traffic, to make the noise problem worse and Prime Minister Trudeau along with his Minister of Transportation Pablo Rodriguez did not say no to this plan.

What can our community do about the airplane noise? I understand it is Friday, and I may not receive a response today. However, Minister of Transportation Pablo Rodriguez, this question is directed to you, not MP Judy Sgro who should not be taking responsibility of handling your job. What is your proposed solution?

Prime Minister Trudeau, if Minister of Transportation Pablo Rodriguez does not address our noise concerns regarding airplane traffic and noise from Pearson Airport for Humber River - Black Creek by the end of the month, I will be deeply disappointed once again in the Federal Liberal Government. Perhaps it is time for new leadership in the federal government, and now is the opposition's opportunity to voice their stance on this issue. I have not heard a reply from the opposition parties here.

MP Judy Sgro wrote a detailed letter about the airplane noise issues faced in Humber River - Black Creek a couple of years ago to Prime Minister Trudeau and the then Federal Minister of Transportation, Omar Alghabra, but neither of them responded to MP Judy Sgro. I asked MP Judy Sgro if she could find out why her letter was not replied to, and she seemed hesitant and afraid to approach either of them to ask. It is not good!

I would love to see the noise complaints handled differently, as Fabio described a new plan to everyone here, where residents of this community could give consent for NAV WebTracker to file a complaint if the decibel reading reaches a certain level in our community. I hope Cynthia Woods, the Manager of Pearson Airport Complaints Department, has considered adopting this idea. Why should I, a resident of this community affected by airplane noise, have to take time out of my day to contact Pearson Airport Complaints Department when technology exists to file a complaint on my behalf? When I am woken up early in the morning, it takes time to check the date and time and then find the device to file the complaint on. It's not easy to file a noise complaint, and sometimes I'm too upset with the airplane noise to bother doing it.

MP Judy Sgro, can you follow up with Cynthia Woods and provide Humber River - Black Creek with an answer by the end of this month to see if she have Pearson Airport adopt this new complaint format? I give this responsibility to you MP Judy Sgro or your

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

office to speak to Manager of Pearson Airport Complaints Department Cynthia Woods by the end of this month and give Humber River - Black Creek an answer.

CEO of GTAA Deborah Flint needs to make herself available to speak to communities where her decisions with increases to air traffic are affecting the health and well being of the residents living in flight paths to Pearson Airport.

I hope the weekend is quiet with little airplane noise because this morning was hell. Humber River - Black Creek wants improvement and answers, not to be ignored!

Take care,

Daryl Henderson

Subject: Ask the Courts of Justice to place an Injunction

God day Honourable Judy Sgro,

I do not intend to be disrespectful, but as a responsible citizen, I feel it is important to bring the following to your attention.

You should rely on people like me to bring attention to an issue, not to perform your job. It is utterly unfair to place the onus on the people to do the job our representatives have been elected and are being paid to perform.

I would like to request that, as our representative at the federal level, you ask the Courts of Justice to place an injunction on Pearson Airport. Specifically, I request the suspension of all night traffic, except for emergencies, and the imposition of a cap to stop any increase in air traffic.

The rationale for these requests is as follows:

1. **Irreparable Damage to Students**: Students living in the communities surrounding the airport are experiencing detrimental impacts from airplane noise. Numerous empirical studies demonstrate the negative effects of such noise on students' academic performance and overall well-being.
2. **Irreparable Damage to Health**: The health of citizens living in the surrounding communities is being compromised. There is a wealth of empirical studies showing the harmful effects of airplane noise on people's health, including increased risk of cardiovascular diseases, sleep disturbances, and other health issues.
3. **Potential for Irreparable Damage**: Consider a scenario where a truck driver from my community falls asleep at the wheel due to sleep deprivation caused by airplane noise, leading to a tragic accident involving a bus with 40 school children. The insurance company would likely determine that Transport Canada policies permitting the airport to operate 24/7 contributed to the sleep deprivation. In such a case, the courts would likely hold the state responsible. The policymakers would not personally bear the costs; instead, the state would, meaning that the financial burden would ultimately fall on the taxpayers. To put it simply, it is the people who would have to pay for the consequences of these policies.

I urge you to take immediate action to address these concerns and protect the well-being of our community.

Subject: Request for immediate changes to complaint form

To all individuals in positions of power associated with YYZ,

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to express my concerns regarding the current complaint form for noise disturbances. The existing form is overly cumbersome and effectively discourages individuals from filing complaints.

As someone who experiences adverse effects from aircraft noise exceeding 55dB, the current system is impractical. Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 8 events per submission, I would need to complete it 62.5 times daily. At an estimated 15 minutes per form, this amounts to 937.5 minutes or approximately 15.6 hours each day.

This cumbersome process seems designed to discourage complaints. Therefore, I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding 55dB, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, particularly for those you are making vulnerable, traumatized, humiliated, and marginalized individuals.

Thank you for your attention to this matter.

Fabio Ovettini (M9M 2J4)

Subject: [External/Externe]: RE: Another WebTrak Failure — Another Reminder of Your Corruption

XA-2025-541112

Good afternoon Fabio,

Please find below the response from our vendor regarding WebTrak:

July 28
The issue was caused by an unscheduled disruption in the aircraft operations data feed from NAV CANADA, the upstream provider of flight tracking data. As this feed is externally managed, Envirosuite (EVS) does not have advance visibility or control over such outages.
However, once the feed was restored, our engineering team promptly initiated our data recovery and backfill process, successfully restoring the missing data for that period. We are actively monitoring the system to ensure all data is accounted for and to detect any further inconsistencies.
While EVS cannot anticipate or prevent third-party data feed interruptions, we have robust processes in place to restore and backfill data as soon as the feed resumes. We remain committed to supporting GTAA in ensuring that WebTrak continues to provide complete and accurate operational data.
July 30
We want to provide a clear update on the service interruption that began on August 1st, 2025, affecting WebTrak and ANOMS systems hosted in our Australian Data Centre (AU-DC).
At approximately 8:12 PM EDT on July 31st, we experienced an unexpected hardware failure in the AU-DC, specifically within the storage infrastructure that supports our virtual machines. This issue impacted all WebTrak clients hosted on the AU-DC, resulting in:

- Interruption to live flight and noise data
- Disruption in the batch processing of noise data

By 10:30 PM EDT on July 31st, we successfully restored live flight tracking and resumed batch processing of noise data.
We're pleased to share that as of 12:45 a.m. EDT, Aug 1, live noise data has now been fully restored. WebTrak sites previously affected are now back to full operational status.
As part of our mitigation strategy, we migrated all affected WebTrak sites to our AWS-hosted backend servers, ensuring greater stability and resilience going forward. Additionally, we are actively exploring long-term options to reduce reliance on the AU-DC and further enhance system redundancy.
We sincerely apologize for the disruption and thank you for your continued patience.

Kind regards,
Gijs

Subject: Another WebTrak Failure — Another Reminder of Your Corruption

CAUTION: External Sender. Do not click on any links or open any attachments unless you trust the sender and know the content is safe.

Subject: No Mandate to Corrupt — No Excuse for the Damage

Dear Ms. Flint, Mr. Thomas,

It's happened again — and this time, we're done pretending it's anything but corruption.

Once more, your systems failed. I have **screenshots** documenting the outage, the gaps, the manipulation. But more importantly, I have something you seem to have lost entirely: memory. I remember what this airport was **before you arrived**. Before the lies. Before the silence. Before the decay.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

You fill your mouths with the phrase *"mandated to meet demand"* — as if that somehow justifies the destruction you've unleashed. **Where is that mandate?** It's not in your lease. It's not in any act of Parliament. No one — no government, no community, no democratic process — ever gave you the authority to wreck the largest international airport in Canada and **shatter public trust** in the process.

Who gave you permission to turn Pearson into a symbol of dysfunction and decay? Who told you it was acceptable to dismiss complaints, manipulate data, lock out the public, and silence dissent?

No one. You gave yourselves that permission — and **you have abused it.**

The corruption starts at the top, and **you are the source.** You haven't simply lost control. You've remade the entire organization in your image: evasive, deceitful, self-serving. A place where data disappears, monitors break, public records shift in the night, and community meetings are just smoke and mirrors for your charade of engagement.

Ms. Flint, you've humiliated the office you hold.
Mr. Thomas, you've humiliated every notion of accountability and community trust
Together, you have brought shame to the people of Canada.

You have even **humiliated Canada itself** — dragging our name through the mud with a level of arrogance and incompetence that betrays every value we claim to stand for. Canada was once known for honesty, humility, and generosity. Your actions tell the world we are none of those things.

You are not stewards. You are saboteurs.

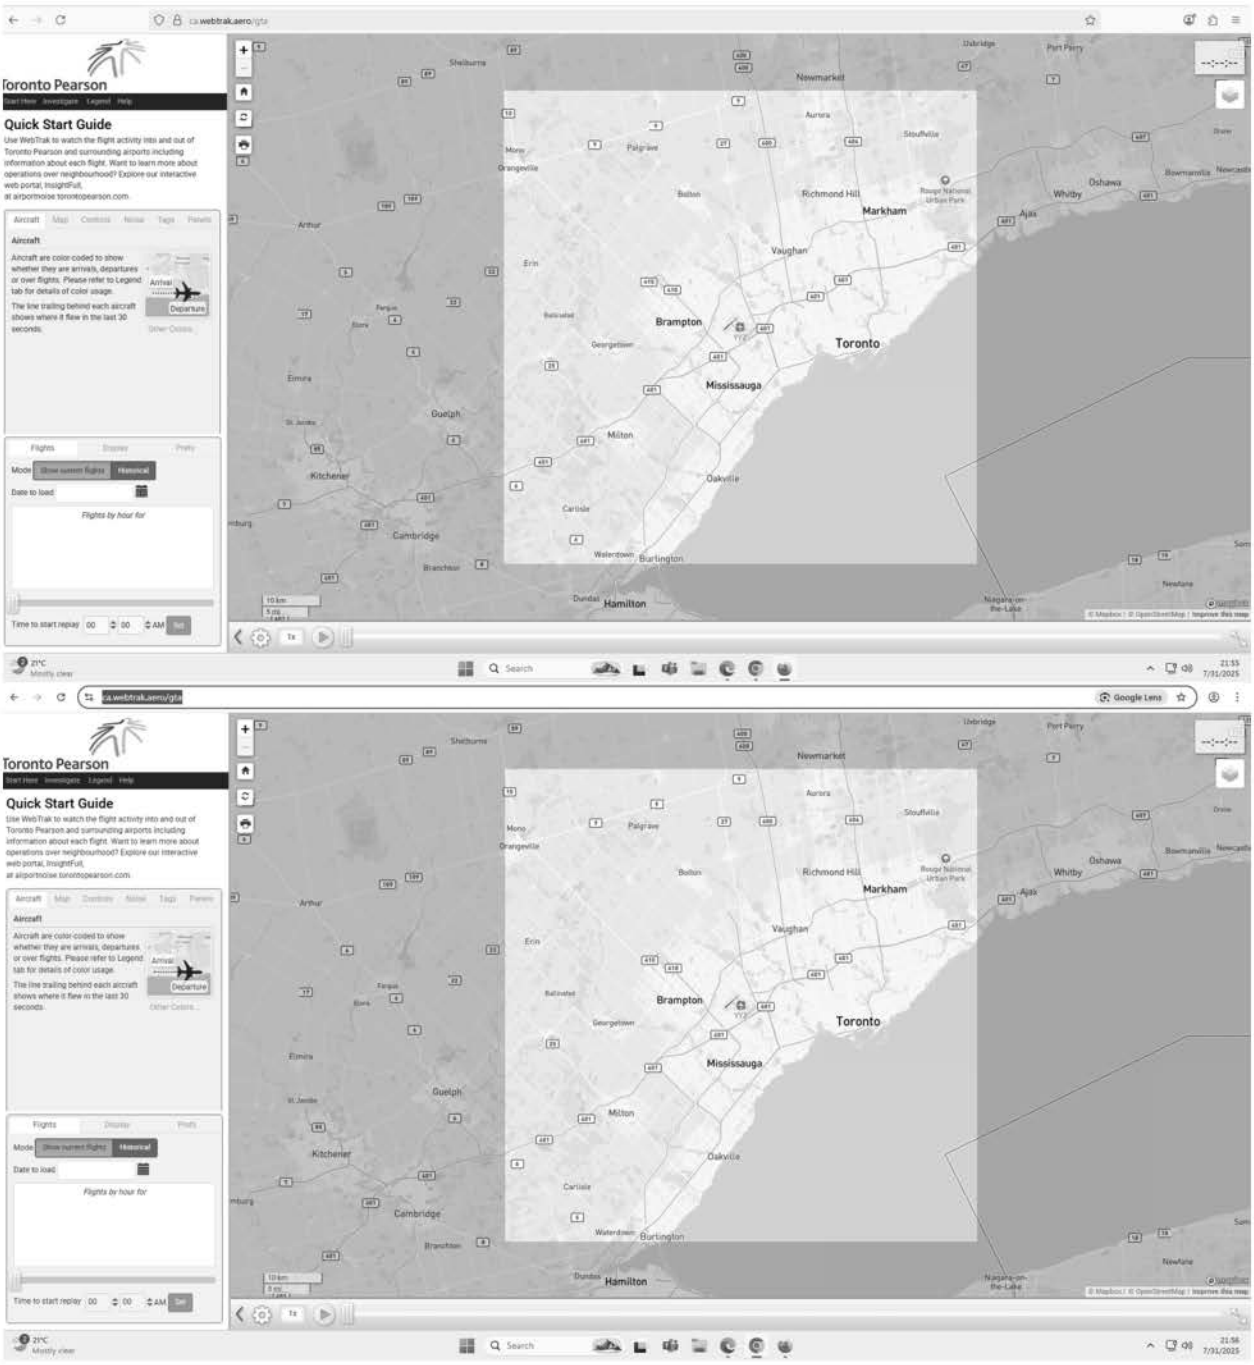

And I hope — truly, deeply hope — that someone in the federal government wakes up and stops you before you inflict more irreparable damage to our beloved country.

We, the people of this community, reject your corruption.
We reject your lies.
We stand **for Canada**, even if you no longer do.

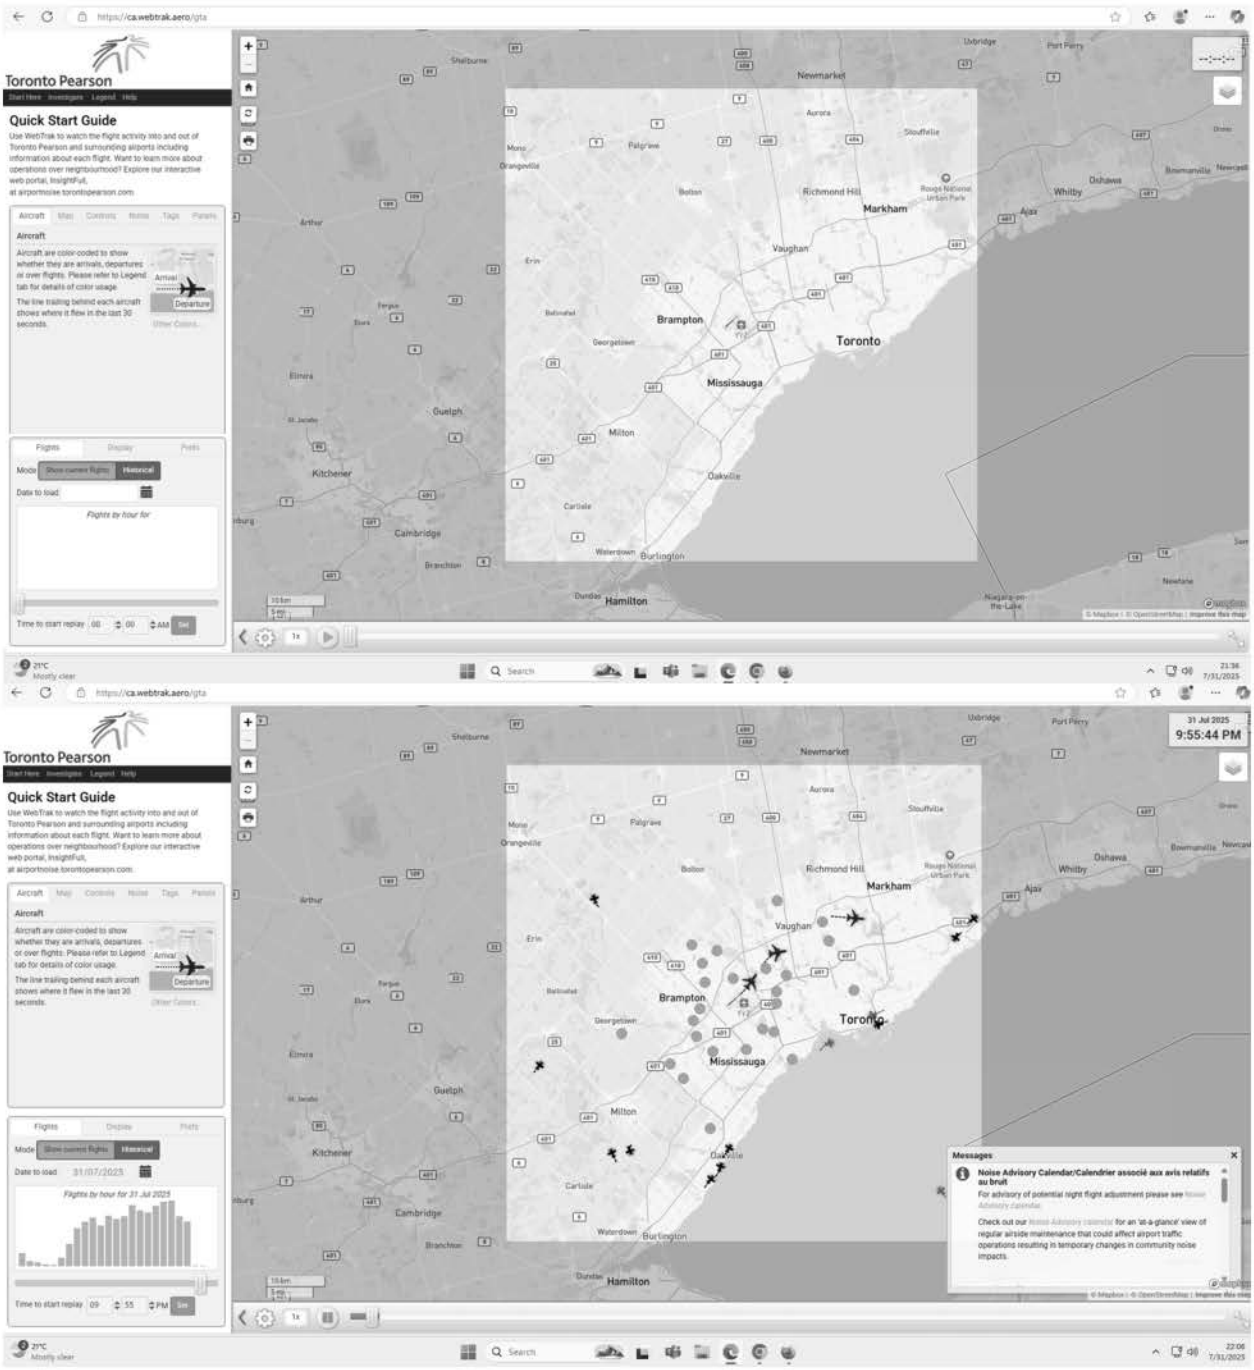

O Canada, we stand on guard for thee.

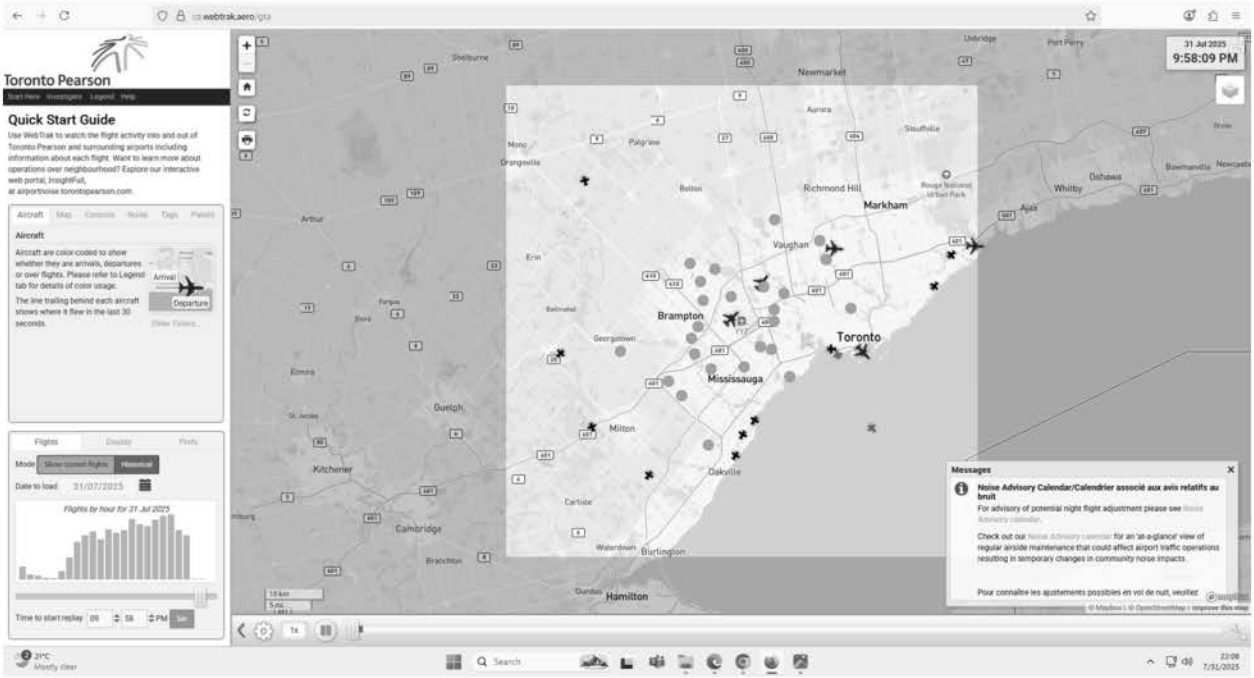

Sincerely,
Fabio Ovettini

P.S.
I ask that this message — along with the screenshots documenting your repeated failures — be shared in full with the GTAA Board of Directors. They deserve to see the consequences of your leadership, and to understand the level of public outrage and institutional distrust you've cultivated.

Subject: [External/Externe]: Re: Ask the Courts of Justice to place an Injunction

XAP-2024-534713

I am writing to express my concern that everyone in the "To" field of this email may be in breach of duty as public officials.

It has been over10 days since you were alerted to the irreparable damage that the policies of Transport Canada, allowing the GTAA to operate 24/7, are directly causing to numerous communities surrounding airports across the country. Indirectly, the entire Canadian population is at risk of irreparable damage, as sleep deprivation significantly increases the likelihood of accidents.

I would like to remind everyone in the "To" field of this email of the following:

Misfeasance: The unintentional act of causing harm while performing a legal act or responsibility.

Malfeasance: Intentional conduct that is wrongful or unlawful, especially by officials or public employees.

Failures to Act: May be unlawful even where there is no positive duty to act.

In Canada, when an elected official becomes aware of imminent irreparable damage to people, they are expected to act promptly and responsibly to protect public safety and mitigate harm. This involves several steps:

1. **Immediate Action**: They must take immediate action to prevent or minimize the damage. This could include issuing warnings, activating emergency response systems, or taking direct measures to address the threat.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

2. **Communication**: They must inform relevant authorities, such as local emergency services, public health officials, and other governmental bodies. Clear and timely communication is crucial.
3. **Public Notification**: They must communicate with the public to provide essential information and instructions. This could be through press releases, social media, public announcements, or other communication channels.
4. **Collaboration**: They should work collaboratively with other officials, agencies, and organizations to coordinate an effective response. This may involve federal, provincial, and municipal levels of government.
5. **Legal and Ethical Responsibilities**: They must act in accordance with legal and ethical standards, ensuring that their actions are lawful and in the best interests of the public.

I urge you to take the necessary actions immediately to address this critical issue.

Regards,
Fabio Ovettini

Subject: Detrimental effects caused by poor sleeping

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

What does Canadian Centre for Occupational Health and Safety have to say about sleep deprivation? Check below

https://www.ccohs.ca/newsletters/hsreport/issues/2007/11/ezine.html

Fatigue - The Foe You Don't Want to Know at Work

CCOHS: Health and Safety Report - Past Issues

The Canadian Centre for Occupational Health and Safety (CCOHS) promotes a safe and healthy working environment b...

Staying awake for 21 hours straight affects the human body almost exactly like a blood alcohol level of 0.1%, which exceeds Canada's legal limit for drivers. Sleep researchers say drowsy drivers may cause as many automobile crashes as impaired drivers.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Now let's translate that to the workplace where someone might have to make important decisions, handle dangerous chemicals, operate heavy equipment or use a sharp knife. It's not hard to realize that work and fatigue don't mix.

Fatigue is the state of feeling very tired, weary or sleepy because of too little or inadequate sleep, prolonged mental or physical work, or extended periods of stress or anxiety. It varies, but on average we need at least 7.5 to 8.5 hours everyday. While it's always possible to reverse a short-lived or "acute" state of fatigue by catching up on sleep and rest, chronic fatigue may require a doctor's intervention.

Besides tiredness and drowsiness, other telltale symptoms of fatigue include irritability, depression, giddiness, loss of appetite, digestive problems, and an increased susceptibility to illness.

A recipe for shoddy, unsafe work

Fatigue affects:

- judgement,
- concentration,
- hand-eye coordination,
- visual perception,
- communication skills,
- productivity,
- performance, and

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

- ability to make decisions, do complex planning, and handle stress.

Subject: June 21st Morning Plane Traffic

Hello Everyone,

Planes after midnight this morning were very loud, flying at low altitudes and were frequent. This continued from midnight to 1:00 am.

It is now 1:30 am and there have been a few more planes.

A message on Webtracker states that maintenance is being done to the noise monitoring stations, and some readings may not be correct. One noise monitoring station has been inactive for a few days now. Hopefully, by the end of today, all maintenance will be completed, and a message will indicate this to everyone.

MP Judy Sgro mentioned to me the other day that another noise monitoring station was to be added to Humber River-Black Creek. She was going to look into why it has not been activated.

It is now 1:50 am, and another very loud plane flew over my house. At 1:54 am, here comes another plane.

At 6:30 am, we had loud planes taking off from Pearson Airport.

I would like to know if the pre-authorized complaint form has been discussed. I don't want to spend my time calling or emailing Pearson Airport to file complaints throughout the day. I now question if all my complaints are actually recorded due to inaccuracies that Pearson Airport Complaints Department may use to dismiss a complaint.

There has to be a limit to the number of planes that Pearson Airport is allowed to take each day, and there have to be time restrictions on flights into and out of Pearson Airport imposed by our Federal Government.

GTAA, Deborah Flint, Pearson Airport, and the Liberal Federal Government the noise from Pearson Airport is not acceptable and it is unhealthy for many.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Take care,

Daryl

Subject: [External/Externe]: RE: Noise Complaint Report Manipulation – Under Flint and Thomas, Corruption Becomes Grotesque

541112(2)

Good morning Fabio,

The reports are made in Power BI, the callout boxes on the right hand side will change based on the data selected by you.
You can clearly see the totals in the table in each set of months in your screen shots remain the same:
April 2025:
Total number of individuals: 233
Total number of complaints: 75,473

March 2025:
Total number of individuals: 252
Total number of complaints: 56,145

February 2025:
Total number of individuals: 173
Total number of complaints: 33,780

I hope that clears up your misunderstanding.
Kind regards,
Gijs

Gijs Van Laethem, Senior Officer Noise Management

Subject: Noise Complaint Report Manipulation – Under Flint and Thomas, Corruption Becomes Grotesque

To whom it may concern,

The noise complaint reports have once again been altered — and not discreetly. Most now show thousands fewer complaints than previously recorded. Are we supposed to believe this is a routine update? A glitch? Or is this yet another deliberate manipulation to serve some obscure internal agenda?

Let's stop pretending: this is corruption.

Under the leadership of Ms. Deborah Flint and Mr. Steven Thomas, the corruption has taken on a grotesque, theatrical quality. There's no longer even an attempt to conceal it. The data has been twisted in broad daylight — and the proof is in the reports themselves.

You fired Robyn Connelly and Cynthia Woods for tampering with reports. So why is Mr. Thomas still in charge of complaints?

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This man is not a professional — he is a chewing gum–popping, eye-rolling distraction performer who appears more qualified for a midway magic act than for public accountability. He hasn't even finished his illusionist training, and yet he's been entrusted with the very system designed to reflect public harm.

The result? A system that now exists to deceive, not inform.

And Ms. Flint? She installed him. She owns this. The erosion of trust, the manipulated numbers, the disappearing complaints — this is her legacy too.

I am attaching a series of reports that prove the tampering. The edits are not hypothetical. They are timestamped, archived, and undeniable.

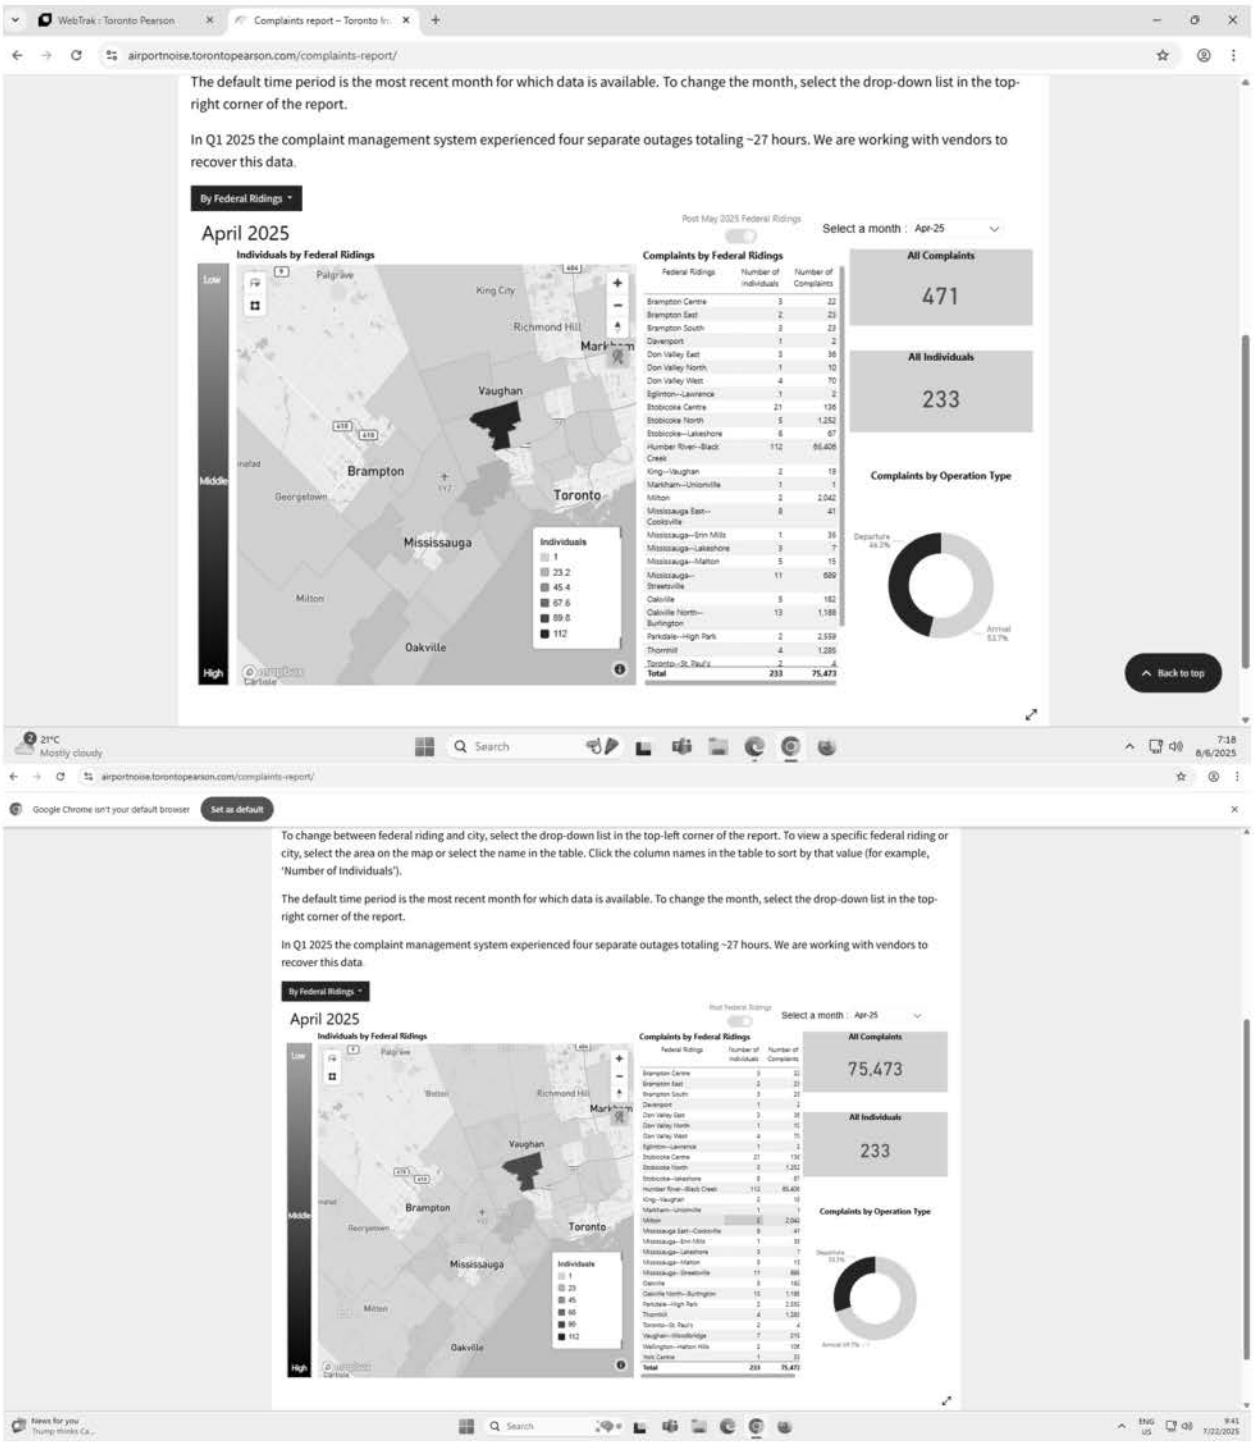

This isn't modernization. This isn't streamlining. This is data laundering under the banner of "community engagement."

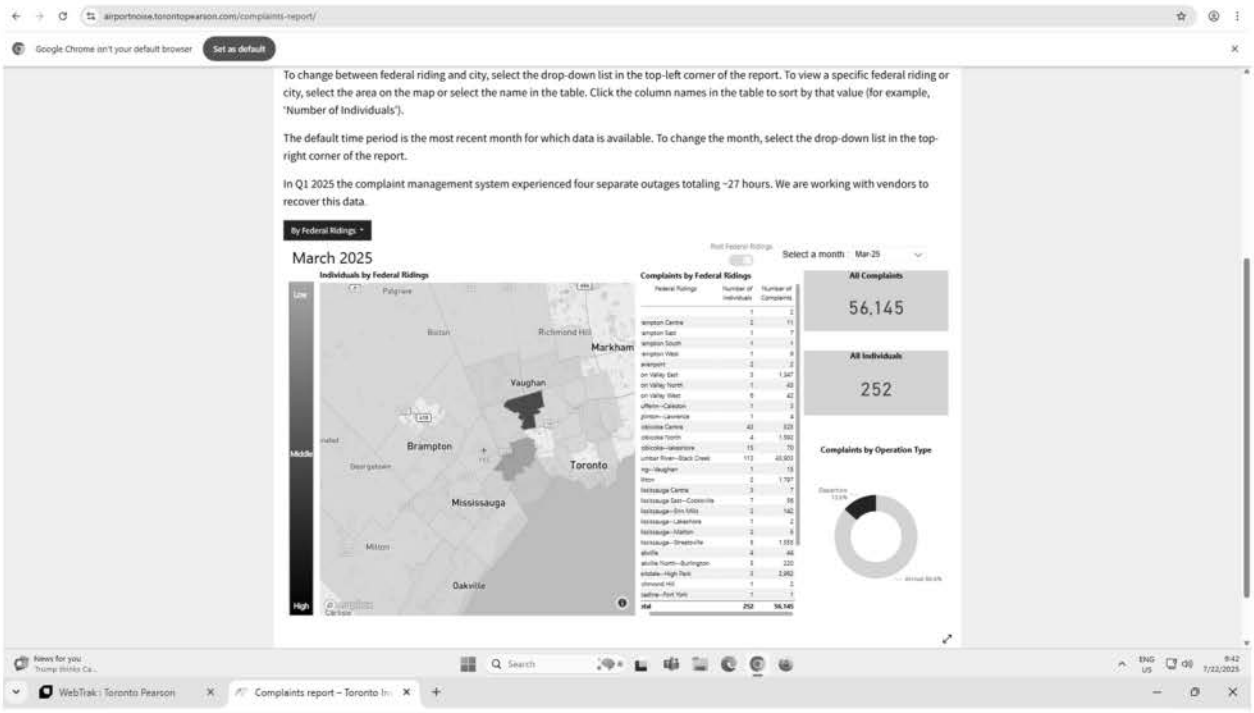

If there is any remaining shred of integrity left in your leadership, then Steven Thomas must be removed immediately.

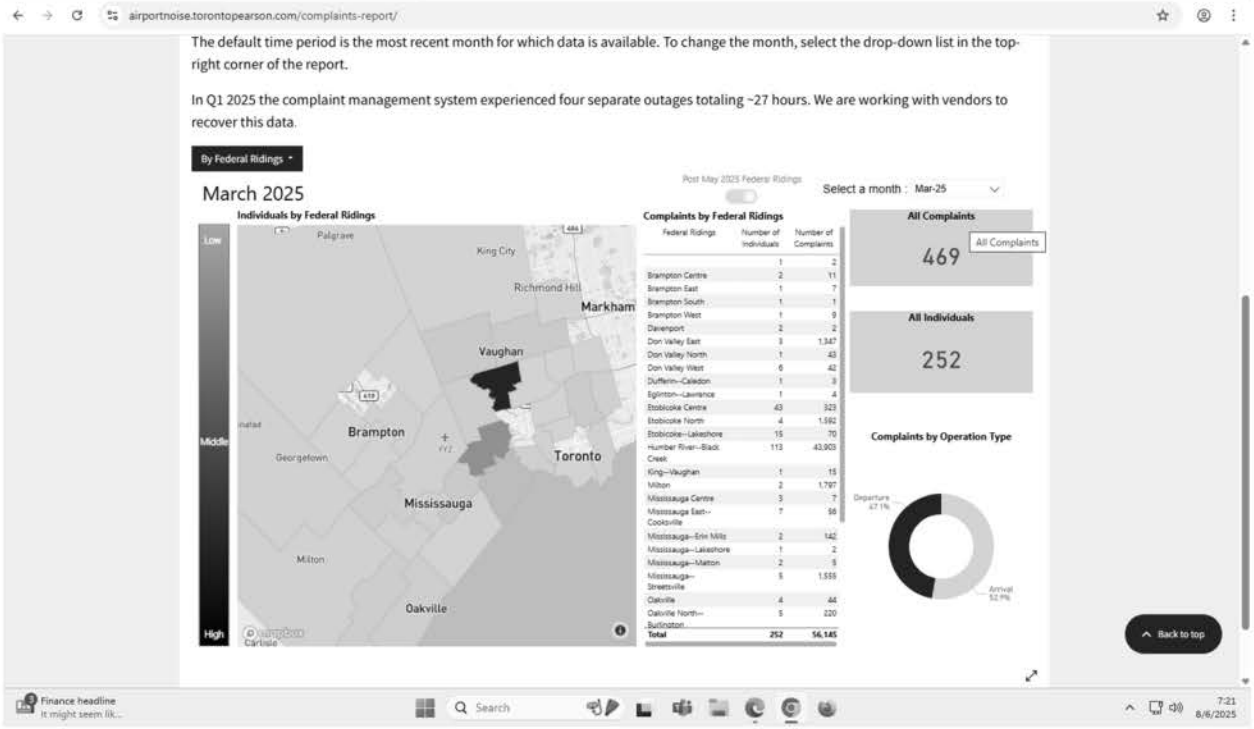

Sincerely,
Fabio Ovettini

P.S.
I ask that this message — along with the screenshots documenting your repeated failures — be shared in full with the GTAA Board of Directors. They deserve to see the consequences of your leadership, and to understand the level of public outrage and institutional distrust you've cultivated.

Good afternoon Fabio,

I apologize for the misunderstanding on my part. Thank you for bringing the issue with the callout boxes to our attention, we acted immediately and have had our vendor rectify the issue. The callout boxes were displaying incorrect values, but you'll see the table values remain the same.

Again, we acknowledge there was an issue which has been rectified, and thank you for bringing it to our attention.

Kind regards,
Gijs

Subject: Re: Noise Complaint Report Manipulation – Under Flint and Thomas, Corruption Becomes Grotesque

CAUTION: External Sender. Do not click on any links or open any attachments unless you trust the sender and know the content is safe.

Subject: No Apology. No Accountability. Just Another Cover-Up.

Mr. Gijs,

Let's recap what just happened — not that you'll admit it.

You dismissed a legitimate, evidence-based concern as a "misunderstanding." You waved away factual discrepancies with condescension and corporate fluff about "Power BI interactivity," as if that magically erases the manipulation in front of our eyes.

Then — like clockwork — the report was changed. Quietly. Silently. No correction notice. No public acknowledgement. No admission that anything was ever wrong. Just a quiet midnight rewrite, like it was a bad blog post and not a document of public record.

You didn't correct the data. **You tampered with the evidence.**

And what's worse — **this is now the standard under Ms. Flint and Mr. Thomas.**

Let's talk about *them* for a moment.

Deborah Flint — the absentee CEO, permanently lost in a fog of self-promotion and empty catchphrases. A leader so disconnected from the consequences of her decisions, she might as well be running GTAA from a marketing firm in L.A. Her greatest talent? Hiding behind the failures of others and pretending they're innovations.

Steven Thomas — the illusionist who hasn't even finished his act. A gum-chewing, eye-rolling distraction artist who treats data like a deck of cards — shuffle here, vanish there — hoping no one notices the sleight of hand. He was installed to "rebuild trust." Instead, he's become the living embodiment of **why the public no longer trusts a word GTAA says.**

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

And you, Gijs — you've chosen to stand beside them. You had an opportunity to show integrity, to admit a mistake, to speak truth. Instead, you chose to join the long list of institutional enablers — defenders of the lie.

So here's where we are now:

- Reports are being rewritten in real time to serve whatever narrative GTAA needs in the moment.
- The public is being treated like fools.
- Accountability is a word you people toss around like a brand slogan, while behind the scenes you're running a spin machine.

"You think you're saving the institution. But all you're doing is protecting a fraud."

That fraud wears three names: Flint. Thomas. And now — Gijs.

You have turned a public noise reporting system into a **propaganda tool**. You have disrespected every resident who loses sleep because of your failures. And you have insulted the intelligence of everyone who catches you in the act — by pretending it didn't happen.

But you know what? **It did happen.**

And I have the proof. Screenshots. Records. Archives. Statements like yours — written in arrogance and preserved for accountability.

I won't forget this. And I won't let others forget either.

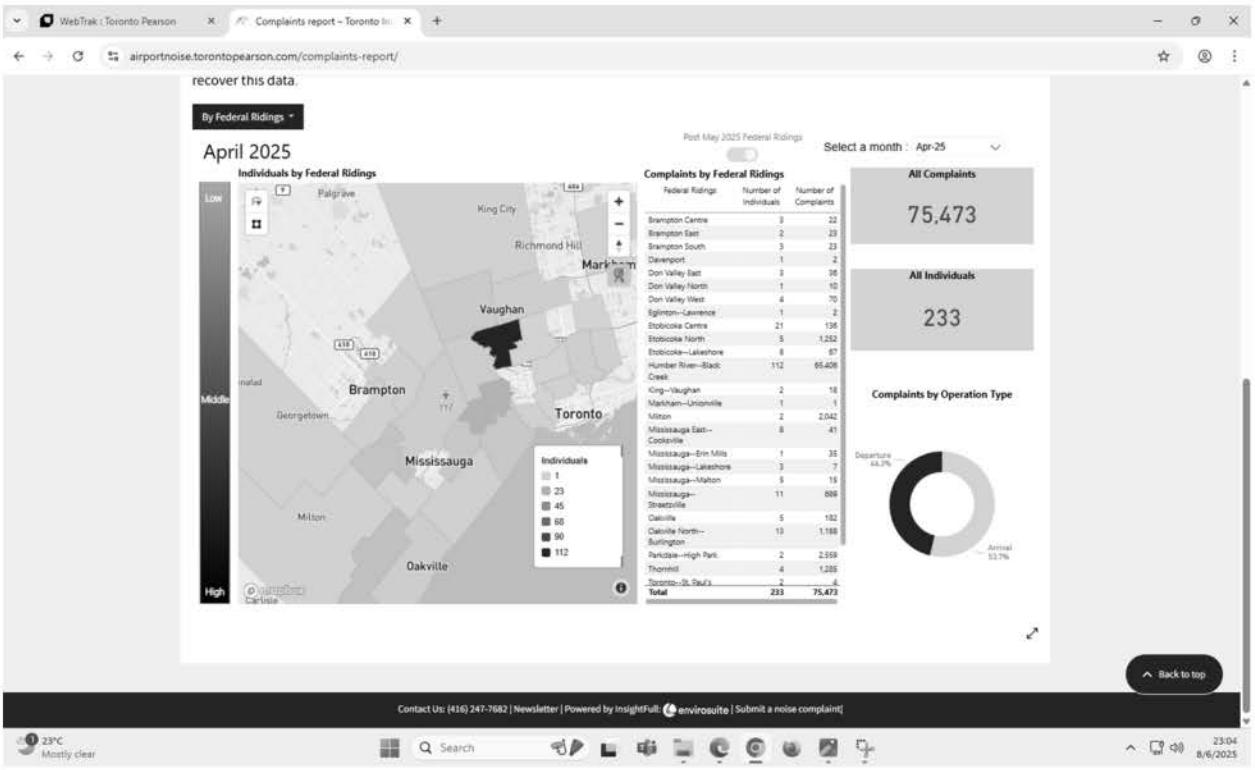

This is going to follow you. Every report. Every meeting. Every decision you try to pass off as "transparent." This stunt — this tampering — will be there in the background, a reminder of how deep the rot goes.

You chose to bury the truth.

Now you get to wear it.

Sincerely,
Fabio Ovettini

"And if I were the man I was five years ago, I'd take a flamethrower to this place!"

Subject: Misrepresentation of Complaint Data Functionality – Apology Expected

Gijs,

Your response is yet another example of the confusion, deflection, and incompetence that have come to define GTAA's noise management team under Deborah Flint and Steven Thomas.

You state that the callout boxes in Power BI "change based on the data selected." Yes, Gijs — that's how it's *supposed* to work. But that's not what is happening. The reality, as demonstrated in the two attached screenshots, is that the data changes *without any user interaction*. We are not talking about filters being applied. We are talking about total complaint numbers being silently rewritten, without any notification, versioning, or audit trail.

Worse yet, you reference a total of **471 complaints**. Where, exactly, does this number come from? There is no riding, row, or summary on the screen showing **471 complaints**. Are you now pulling numbers out of thin air to defend a broken report?

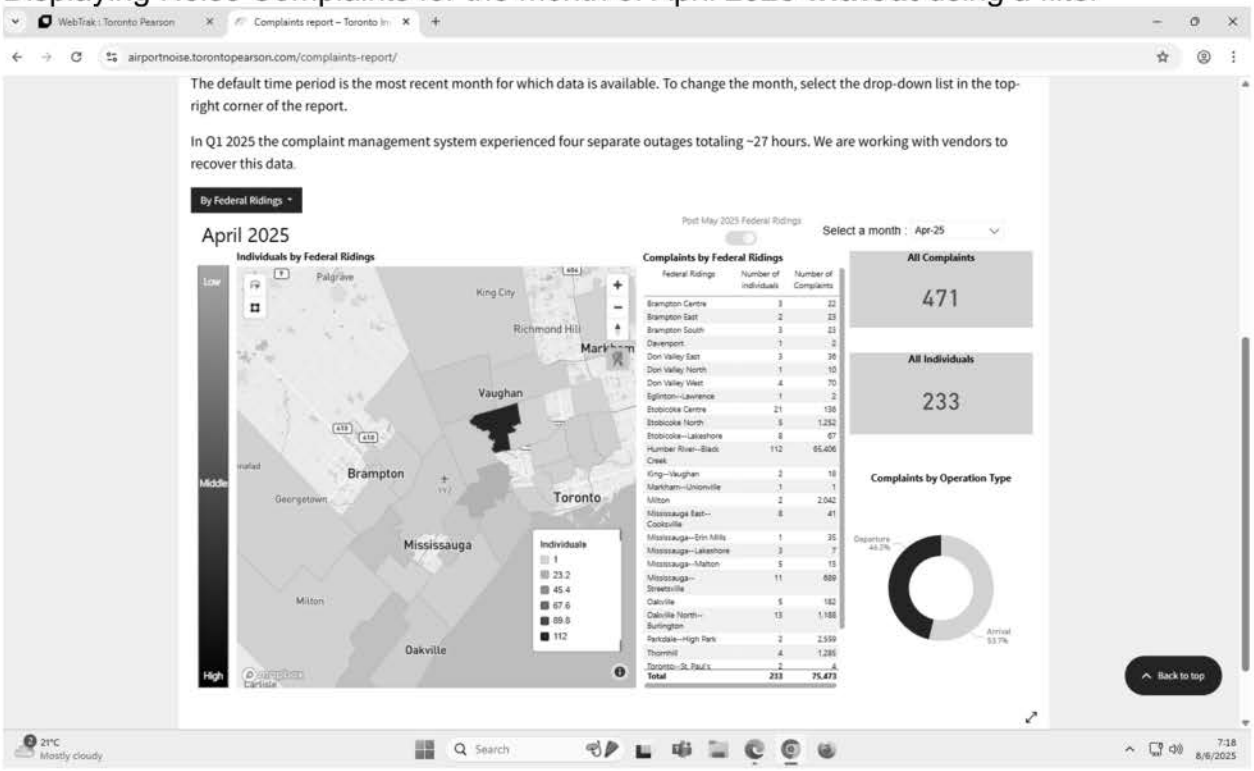

This is not a "misunderstanding" on my part. It is a technical failure, a transparency failure, and frankly, a professional failure on yours. Your dismissive tone — brushing off legitimate, evidence-backed concerns as "confusion" — only adds insult to injury.

Your job is not to gaslight the public. Your job is to provide accurate, consistent, and accountable reporting. If you are not capable of doing that — or of understanding the very system you're supposed to be managing — then you are as unfit for your role as those who appointed you.

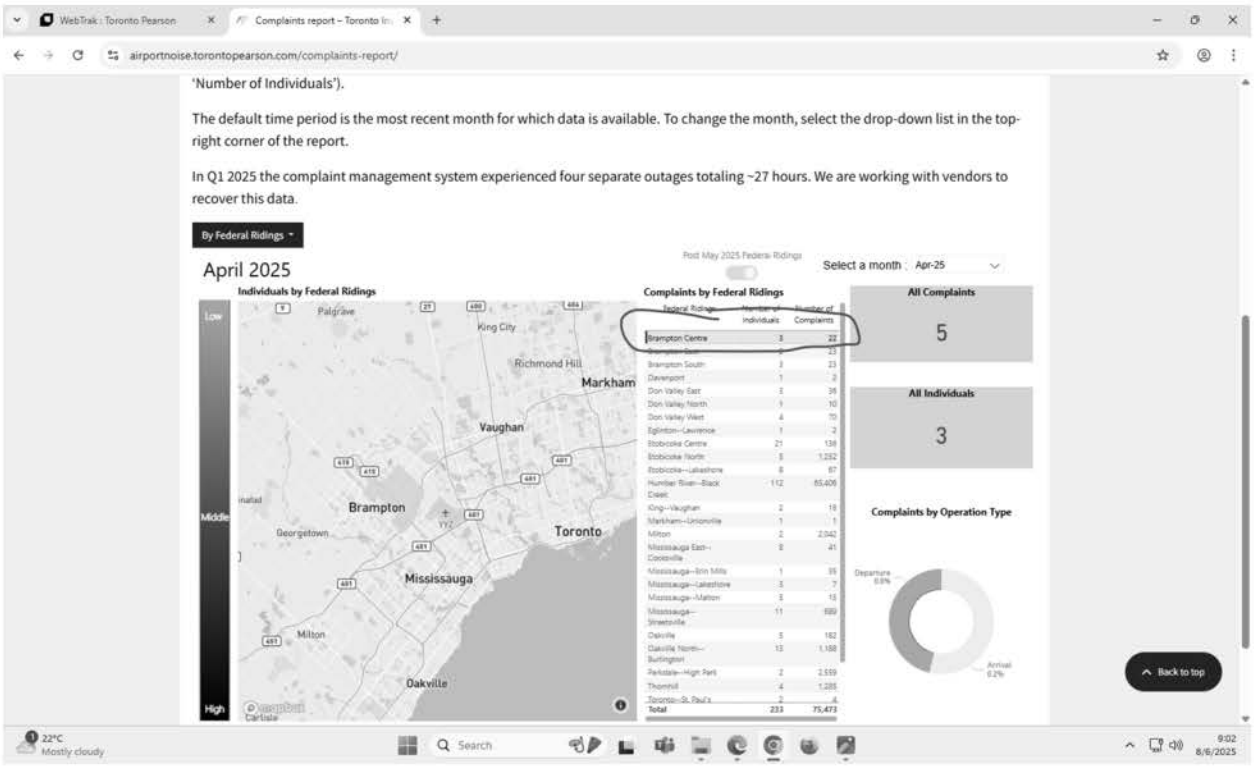

I expect a formal acknowledgment of the discrepancy shown in the attached screenshots, and an apology for the misleading and dismissive nature of your last message.

Sincerely,
Fabio Ovettini

Displaying Noise Complaints for the month of April 2025 **without** using a filter

Displaying Noise Complaints for the month of April 2025 using "Brampton Centre" as a filter

Good morning Fabio,

The reports are made in Power BI, the callout boxes on the right hand side will change based on the data selected by you.

You can clearly see the totals in the table in each set of months in your screen shots remain the same:

April 2025:

Total number of individuals: 233

Total number of complaints: 75,473

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

March 2025:

Total number of individuals: 252

Total number of complaints: 56,145

February 2025:

Total number of individuals: 173

Total number of complaints: 33,780

I hope that clears up your misunderstanding.

Kind regards,

Gijs

Subject: Noise Complaint Report Manipulation – Under Flint and Thomas, Corruption Becomes Grotesque

To whom it may concern,

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

The noise complaint reports have once again been altered — and not discreetly. Most now show thousands fewer complaints than previously recorded. Are we supposed to believe this is a routine update? A glitch? Or is this yet another deliberate manipulation to serve some obscure internal agenda?

Let's stop pretending: this is corruption.

Under the leadership of Ms. Deborah Flint and Mr. Steven Thomas, the corruption has taken on a grotesque, theatrical quality. There's no longer even an attempt to conceal it. The data has been twisted in broad daylight — and the proof is in the reports themselves.

You fired Robyn Connelly and Cynthia Woods for tampering with reports. So why is Mr. Thomas still in charge of complaints?

This man is not a professional — he is a chewing gum–popping, eye-rolling distraction performer who appears more qualified for a midway magic act than for public accountability. He hasn't even finished his illusionist training, and yet he's been entrusted with the very system designed to reflect public harm.

The result? A system that now exists to deceive, not inform.

And Ms. Flint? She installed him. She owns this. The erosion of trust, the manipulated numbers, the disappearing complaints — this is her legacy too.

I am attaching a series of reports that prove the tampering. The edits are not hypothetical. They are timestamped, archived, and undeniable.

This isn't modernization. This isn't streamlining. This is data laundering under the banner of "community engagement."

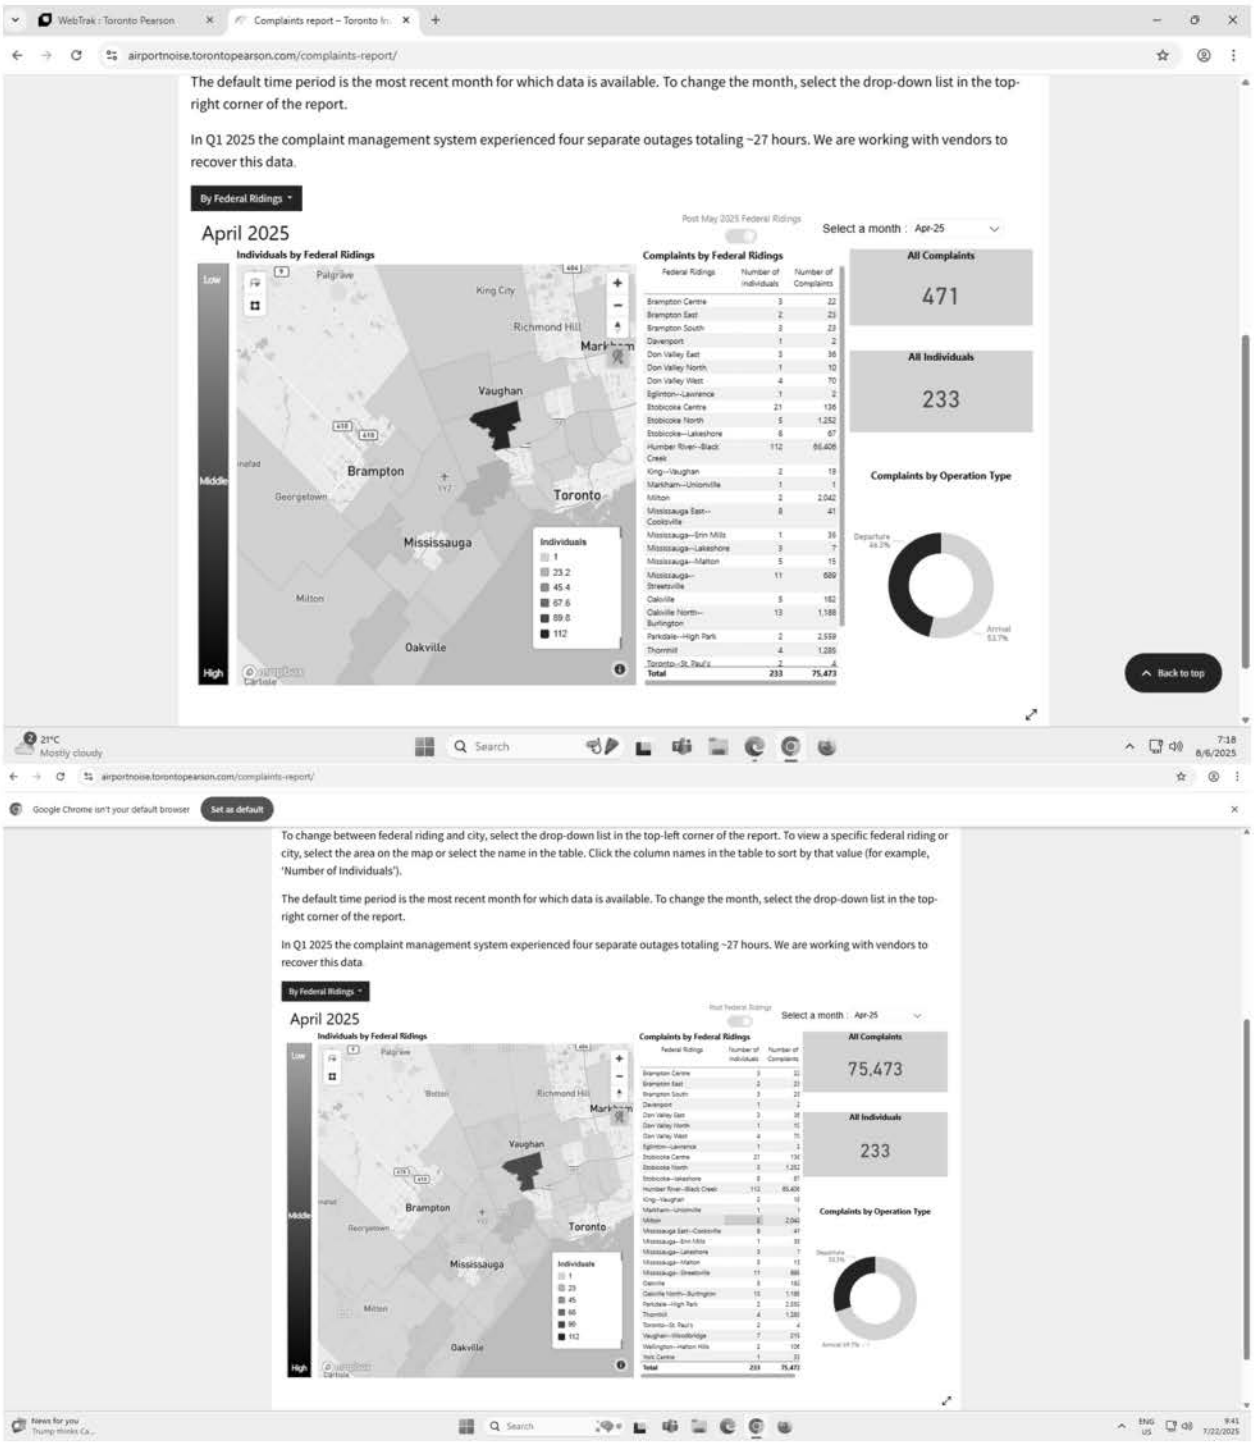

If there is any remaining shred of integrity left in your leadership, then Steven Thomas must be removed immediately.

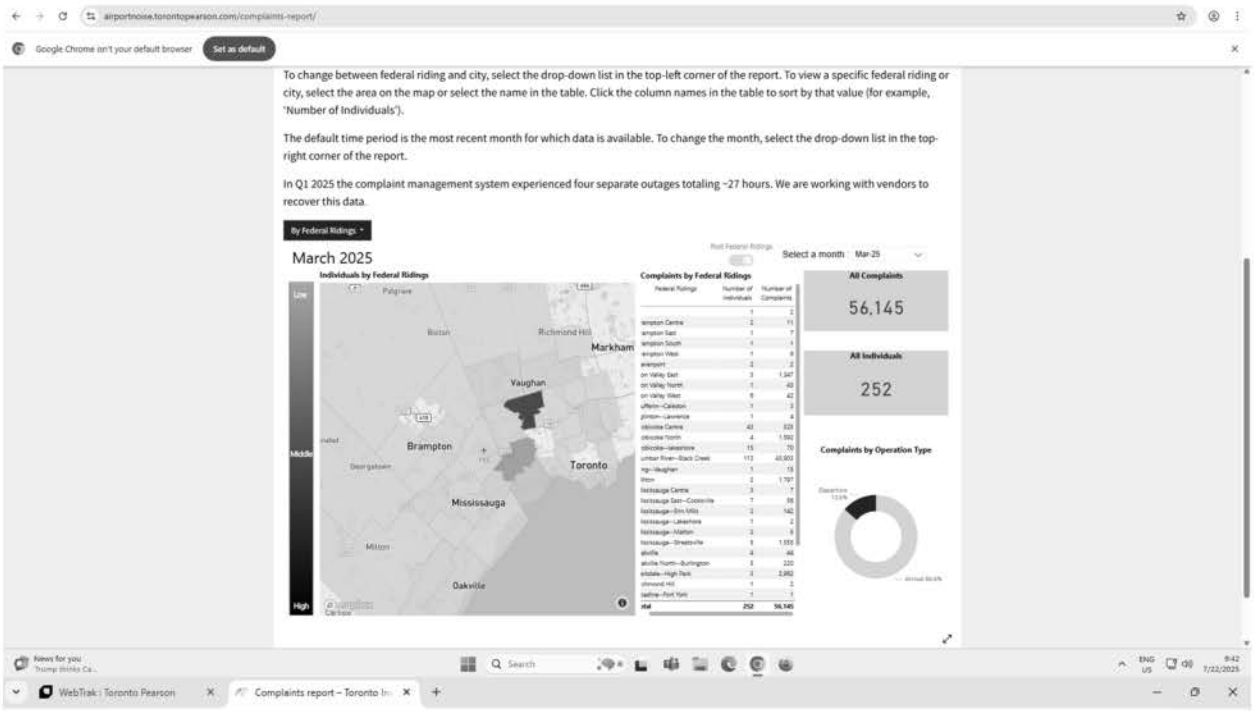

Sincerely,

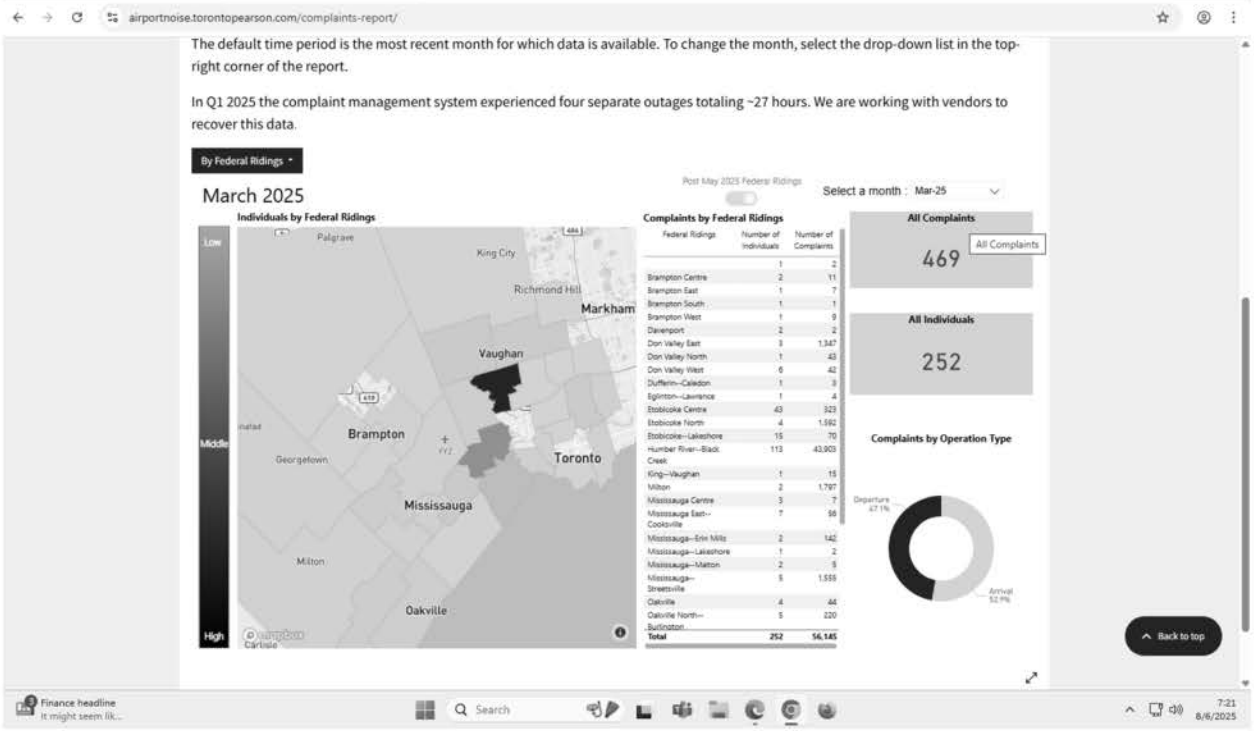

Fabio Ovettini

P.S.

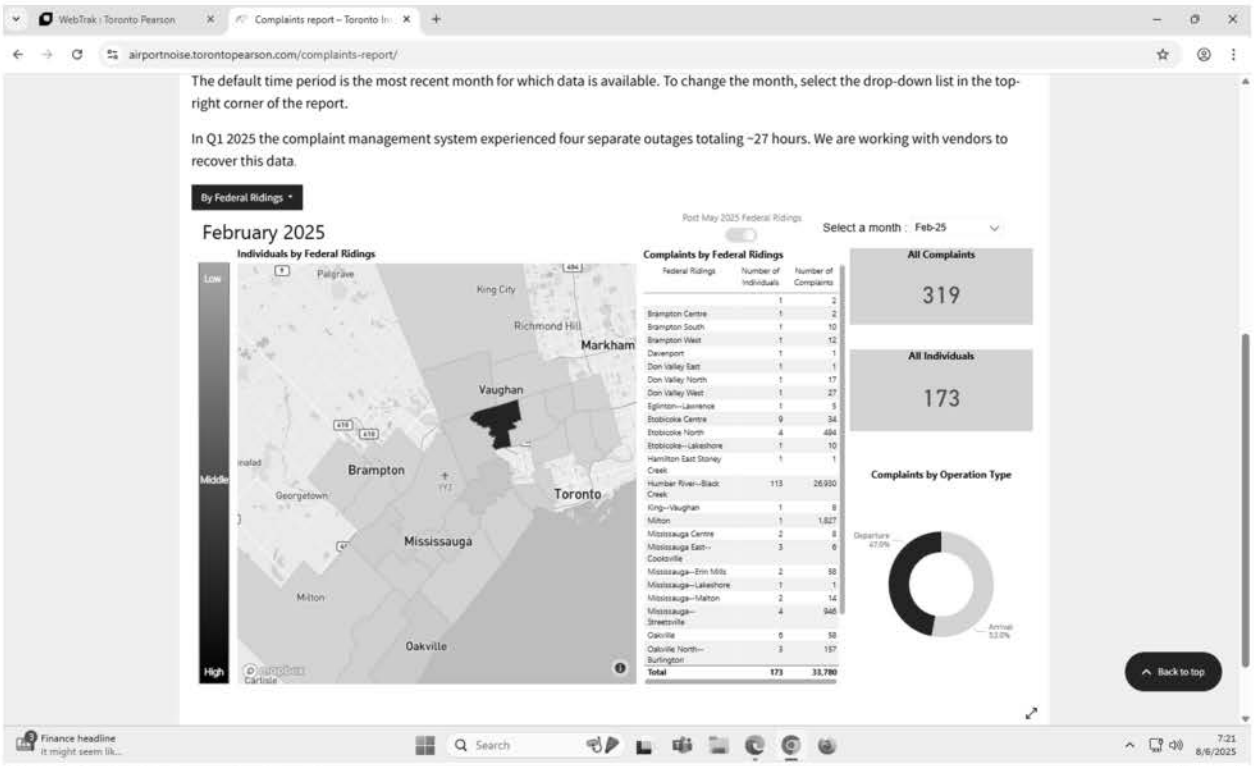

I ask that this message — along with the screenshots documenting your repeated failures — be shared in full with the GTAA Board of Directors. They deserve to see the consequences of your leadership, and to understand the level of public outrage and institutional distrust you've cultivated.

Subject: [External/Externe]: Re: Regarding issues pertaining to the Greater Toronto Airports Authority (GTAA)

XAQ-2025-538318(2)

Christine,

Thank you for your response. While I acknowledge that the Greater Toronto Airports Authority (GTAA) operates as a private entity, I must emphasize that it does so under a lease agreement with Transport Canada. As the regulatory authority, Transport Canada holds oversight responsibilities, including ensuring compliance with the terms of that lease—especially those related to integrity, transparency, and proper governance.

Our community has uncovered **serious concerns regarding the GTAA's conduct**, including **evidence of reports being altered in the middle of the night, lack of transparency, and indications of potential corruption.** These actions undermine public trust and violate the principles of accountability that should govern the operation of such a critical national infrastructure.

It is concerning that an official response from Transport Canada on such a serious matter would be signed with only a first name, lacking full accountability. Transparency starts with clear and responsible communication, and I would appreciate knowing who, within Transport Canada, is taking responsibility for addressing these concerns.

The lease agreement between Transport Canada and GTAA requires that the airport be managed in a **reputable and responsible manner.** If the GTAA is failing to uphold these obligations, then Transport Canada has a **duty** to intervene and investigate. Dismissing these concerns outright does not align with your mandate to ensure proper governance of Canada's airport system.

Key Integrity-Related Provisions from the Lease Agreement

- **Reputable Management:** The lease requires the GTAA to "actively manage and operate Pearson at our own cost and expense, in a reputable manner as a First-Class Facility and a Major International Airport."

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

- **Performance Reviews:** Section 9.02 of the Ground Lease mandates regular performance analyses of the GTAA's management of the airport, ensuring compliance with lease terms and maintaining operational integrity.

I urge Transport Canada to:

1. **Clarify its role in ensuring GTAA compliance with the lease agreement**, particularly regarding integrity and transparency.
2. **Investigate concerns of misconduct** related to altered reports and lack of accountability.
3. **Engage with the community** to address these serious allegations rather than dismissing them without due consideration.

The expectation is not that Transport Canada micromanages GTAA but rather that it fulfills its regulatory responsibilities by ensuring that lease obligations—including those related to ethical management—are being met.

I look forward to your response and to understanding how Transport Canada intends to address these pressing concerns.

Sincerely,
Fabio Ovettini

Dear Daryl and Fabio:

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

I am responding to your emails to the Minister of Transport and Internal Trade regarding issues pertaining to the Greater Toronto Airports Authority (GTAA).

While the Minister appreciates receiving your views, it is important to note that the GTAA is not a federal agency or department, but rather a private entity that operates an airport. This being the case, we have no additional comments or information to provide you at this time.

Please continue to raise your concerns with the GTAA. Transport Canada will not be replying to further correspondence from you on this matter.

Sincerely,

Christine

Executive Correspondence Unit

Transport Canada/Government of Canada

Hello Fabio;

We certainly reply emails and respond phone calls from our constituents.

I will reach out to you directly and help you to direct your community issues to the right place.

Sorry if you feel you are not heard.
Your concerns were already sent to Minister Anand.
Onurcan

Subject: Re: Request for Assistance in Addressing GTAA Complaint Reporting Discrepancies

Hello Fabio,

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

It would be wonderful if our MP, Judy Sgro, who represents our riding of Humber River - Black Creek, would start doing the things she was elected to do and serve the people who voted for her. When I call her office and receive no response for three months, it is simply unacceptable. When someone from her office advises me that I need to kiss my MP's feet and be nice to her if I want her to do anything for me, then there is clearly a problem. MP Judy Sgro should not be treated like royalty or considered a guaranteed winner in the next election just because she appears to be a nice elderly person. Humber River - Black Creek needs an MP who will work to improve our community.

Minister of Transport Anita Anand lives in Oakville, and MP Judy Sgro lives in Thornhill. Why can't MP Judy Sgro reach out to Anita and ask to meet with her to discuss her ridings problem? Anita Anand was considering running for Federal leader of the Liberals, so I assume she knows Judy very well. It seems to me that MP Judy Sgro is working in a semi-retired mode, and I question whether she is the right MP for us.

If Mark Carney is elected Federal Liberal leader, he will need to clean up his party to regain the support and trust of the Canadian people. Anita Anand and Mark Holland do not respond to emails; they simply ignore them and it is a big, big concern.

I still remember the day Councillor Perruzza visited this neighbourhood and the shock on his face when he heard his first plane fly over his head. He looked up at the sky in disbelief from the noise he heard. I guess maybe he has forgotten about that day and the continuous noise from the planes, which made a simple conversation difficult to have. Sometimes it is easy to forget things when you're not reminded of them each and every day, night and morning.

There is no question that business and money rule the world. The GTAA and Pearson Airport are big businesses with lots of money. They can wine and dine our politicians like no one else and make them feel good. I wish I could invite our politicians over to share a box of KD and have the same impact on them.

Deborah Flint, Robyn Connelly, and the Pearson Airport Complaints Department all receive below-average scores in response to our concerns and their efforts to improve the situation regarding our health and well-being due to the noise from increasing air traffic.

Robyn Connelly told me the planes are going to get busier and there is nothing I can do about it. She does not understand the infrastructure around Pearson Airport is failing to support the passengers that Pearson Airport receive now. She does not care about you or me or anyone else in this matter except that of the GTAA and Pearson Airport.

Thank you for emails that you sent out today.

Take care,

Daryl

Subject: Re: Request for Assistance in Addressing GTAA Complaint Reporting Discrepancies

Good day Ms. Sgro,

We appreciate your response and your stated intention to contact GTAA. However, we must express our growing frustration with the ongoing pattern of delays and inaction. This is not the first time we have been assured that steps would be taken, yet after years of discussions, we have yet to see any meaningful resolution or accountability from GTAA.

Our community has uncovered clear instances of report manipulation and data discrepancies, yet GTAA continues to evade transparency. Simply stating that you will reach out is not enough—we need results. What concrete actions have you taken beyond making contact? Have they provided any justification for their continued lack of transparency? If so, we would like to know exactly what they have said. If not, what steps will you take to escalate the matter further?

At this point, we are not looking for more reassurances—we are looking for decisive action. The time for delays has long passed. We urge you to demonstrate real

leadership in holding GTAA accountable, rather than allowing this issue to be endlessly pushed aside.

Please provide an update on what has been done and what immediate steps you will take to ensure this matter is properly addressed.

We look forward to your prompt response.

Sincerely,
Fabio Ovettini

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

We firmly believe that GTAA must be held accountable for their actions and provide transparent answers to the community they serve. We kindly request that you advocate on our behalf to ensure:

- An explanation is provided for the discrepancies in the July and August 2024 complaint reports.
- Clarification is given regarding the exclusion of Q3 2024 complaints.
- Measures are implemented to prevent future inconsistencies and ensure transparency.

Your support in this matter is essential to restoring trust and upholding accountability. We trust in your commitment to advocating for our community and ensuring fairness in this ongoing matter.

Thank you for your attention to this urgent issue, and we look forward to your response.

Sincerely,
Fabio Ovettini

Subject: [External/Externe]: RE: Request for immediate changes to complaint form

XAP-2024-534385

Hello All,
I am responding to some questions that have been raised in recent emails.

Toronto Pearson Noise Complaint Form and Noise Monitoring Reports
In regard to suggestions to amend the noise complaint form and process - we have previously updated the form based on community feedback asking for a simplified form with the ability to submit several complaints at once. Residents can now submit up to 50 complaints per form.

We'd be happy to consider new ideas from those using the form to make it quicker and easier to use within the context of the purpose of the form, which is to accept resident complaints into our Aircraft Noise and Operations Management System (ANOMS) where it is then linked with operational data, including aircraft overhead.

The system doesn't generate complaints based on a noise threshold; however, we do publish a noise monitoring report that includes the number of aircraft noise events above specified thresholds for each monitor. This is just one of the interactive noise monitor reports that we developed with input from community members. The result is a set of reports that are easy to use and interpret, and that represent the data in different ways to best understand aircraft noise exposure.

You can find all of these reports here

WebTrak functionality
We are pleased to hear that WebTrak has been helpful for community members. As with our other tools, we seek to make improvements to make them more useful.

One of the emails suggested that a change has been made to WebTrak to reduce noise monitor data. There has been no change to WebTrak functionality or the information available; the data needs time to process. Once processing is finalized all the noise data information populates in WebTrak.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

InsightFull
InsightFull is another valuable online tool. It provides interactive, location-specific facts about the operations at Toronto Pearson and how they may impact your neighbourhood. It also hosts a Noise Advisory calendar to share information on airport maintenance activities with potential to affect runway operations.

You will also find a variety of interactive operational and complaint reports by month, quarter, and year.

Please reach out to us at communityengagement@gtaa.com if you would like a demo on how the system works.

Pearson Public Meeting
Please consider joining our upcoming Pearson Public meeting which will be held at the Toronto Congress Centre on Thursday, July 25th from 6:00 to 8:00pm. Additionally, Toronto Pearson Noise Team members are available to speak one on one with residents between 5:00 and 5:45pm. There is also an option to join the main meeting remotely.

Registration will be posted on the Noise Forum webpage on June 28th.

Thank you,
Cynthia

Subject: Request for immediate changes to complaint form

You don't often get email from fabio217@yahoo.com. Learn why this is important

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to express my concerns regarding the current complaint form for noise disturbances. The existing form is overly cumbersome and effectively discourages individuals from filing complaints.

As someone who experiences adverse effects from aircraft noise exceeding 55dB, the current system is impractical. Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 8 events per submission, I would need to complete it 62.5 times daily. At an estimated 15 minutes per form, this amounts to 937.5 minutes or approximately 15.6 hours each day.

This cumbersome process seems designed to discourage complaints. Therefore, I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding 55dB, based on data from the community noise monitor.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, particularly for those you are making vulnerable, traumatized, humiliated, and marginalized individuals.

Thank you for your attention to this matter.
Fabio Ovettini (M9M 2J4)

Subject: [External/Externe]: Re: Request for immediate changes to complaint form

XAP-2024-534251(2)

Rectification, Max allowed is 50 complaints per form.

Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 50 events per submission, I would need to complete it 10 times daily. At an estimated 30 minutes per form, this amounts to 300 minutes or approximately 5 hours each day.

Subject: [External/Externe]: Re: Request for immediate changes to complaint form

XAP-2024-534385(2)

Ms. Cynthia Woods,

Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the complaint form allows a maximum of 50 events per submission, I would need to complete it 10 times daily. At an estimated 30 minutes per form, this amounts to 300 minutes, or approximately 5 hours each day.

Additionally, to collect the information required for the 500 events, I would need to record the time of each plane passing by. Since 80 of these events occur while I should be sleeping, I would have to turn on a light, put on my glasses, and note the time. At an average of 1 minute per event, this adds an extra 500 minutes, or 8 hours and 20 minutes.

In total, the current complaint system would require me to spend 13 hours and 20 minutes daily.

Using the phone option would take even longer.

Does it make sense to expect someone to spend over 13 hours a day filing complaints?

I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding a number of dBs determined by the user, based on data from the community noise monitor.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, especially for vulnerable, traumatized, humiliated, and marginalized individuals.

Issue with the callback option in the web complaint form

Additionally, I have noticed an issue with the callback option in the web complaint form. The form includes a field asking if the user wants to receive a callback regarding their noise complaint. I have requested a callback several times but have never received one.
Could you please explain why this is happening? Could you please tell me why I have never received a callback?

Significant reduction in the amount of publicly available information at https://webtrak.emsbk.com/gta

Below I will copy the content of an email I sent you on: On Wednesday, June 19, 2024 at 02:56:19 p.m. EDT,

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

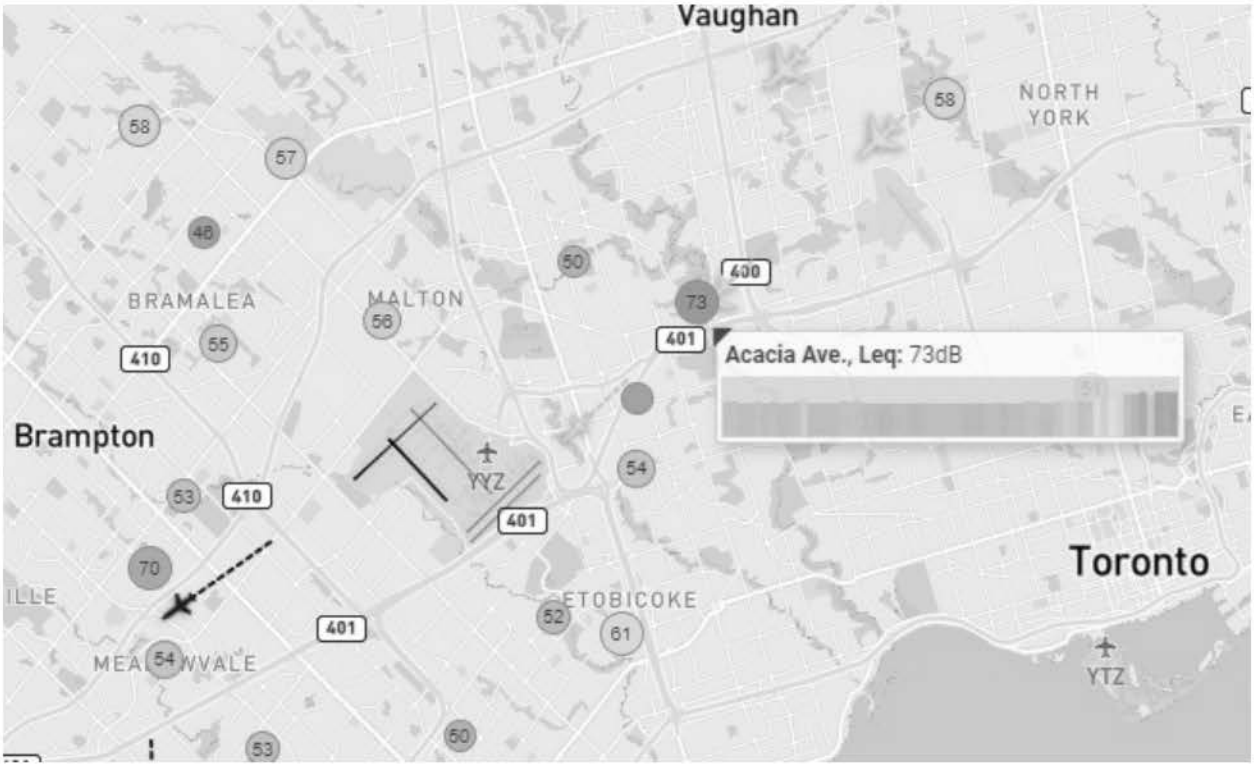

I am writing to formally request an explanation for the recent changes made to the WebTrak GTA portal (https://webtrak.emsbk.com/gta), which have significantly reduced the amount of publicly available information.

As a regular user of the portal, I rely heavily on the comprehensive data previously provided for tracking and analysis purposes. The reduction in available information has raised concerns among myself and other users who depend on this resource.

Information offered by portal up to last week

Information offered by portal since changes were made last week

Could you please explain the rationale behind the decision to reduce the amount of public information available?

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Regards,
Fabio Ovettini (M9M 2J4)

Hello All,

I am responding to some questions that have been raised in recent emails.

Toronto Pearson Noise Complaint Form and Noise Monitoring Reports

In regard to suggestions to amend the noise complaint form and process - we have previously updated the form based on community feedback asking for a simplified form with the ability to submit several complaints at once. Residents can now submit up to 50 complaints per form.

We'd be happy to consider new ideas from those using the form to make it quicker and easier to use within the context of the purpose of the form, which is to accept resident complaints into our Aircraft Noise and Operations Management System (ANOMS) where it is then linked with operational data, including aircraft overhead.

The system doesn't generate complaints based on a noise threshold; however, we do publish a noise monitoring report that includes the number of aircraft noise events above specified thresholds for each monitor. This is just one of the interactive noise monitor reports that we developed with input from community members. The result is a set of reports that are easy to use and interpret, and that represent the data in different ways to best understand aircraft noise exposure.

You can find all of these reports here

WebTrak functionality

We are pleased to hear that WebTrak has been helpful for community members. As with our other tools, we seek to make improvements to make them more useful.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

One of the emails suggested that a change has been made to WebTrak to reduce noise monitor data. There has been no change to WebTrak functionality or the information available; the data needs time to process. Once processing is finalized all the noise data information populates in WebTrak.

InsightFull

InsightFull is another valuable online tool. It provides interactive, location-specific facts about the operations at Toronto Pearson and how they may impact your neighbourhood. It also hosts a Noise Advisory calendar to share information on airport maintenance activities with potential to affect runway operations.

You will also find a variety of interactive operational and complaint reports by month, quarter, and year.

Please reach out to us at communityengagement@gtaa.com if you would like a demo on how the system works.

Pearson Public Meeting

Please consider joining our upcoming Pearson Public meeting which will be held at the Toronto Congress Centre on Thursday, July 25th from 6:00 to 8:00pm. Additionally, Toronto Pearson Noise Team members are available to speak one on one with residents between 5:00 and 5:45pm. There is also an option to join the main meeting remotely.

Registration will be posted on the Noise Forum webpage on June 28th.

Thank you,

Cynthia

Subject: Request for immediate changes to complaint form

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

You don't often get email from fabio217@yahoo.com. Learn why this is important

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to express my concerns regarding the current complaint form for noise disturbances. The existing form is overly cumbersome and effectively discourages individuals from filing complaints.

As someone who experiences adverse effects from aircraft noise exceeding 55dB, the current system is impractical. Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 8 events per submission, I would need to complete it 62.5 times daily. At an estimated 15 minutes per form, this amounts to 937.5 minutes or approximately 15.6 hours each day.

This cumbersome process seems designed to discourage complaints. Therefore, I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding 55dB, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, particularly for those you are making vulnerable, traumatized, humiliated, and marginalized individuals.

Thank you for your attention to this matter.

Subject: [External/Externe]: Re: Request for immediate changes to complaint form

XAP-2024-534251(3)

Hello Fabio,

This is a brilliant idea to capture the true story, the big picture of plane noise for me and others. I wouldn't have to worry about interrupting what I was doing every time I hear very loud planes passing over my house and then feel I must call or email the Pearson Airport Complaints Department to express my displeasure with the noise, only to likely hear more noisy, frequent planes after the call and then try to resume what I was doing beforehand. It is sometimes hard to go back to doing what I was doing because the plane noise upsets me, especially sleeping. Here, I simply consent to allow my complaint to be registered once the noise reaches a certain decibel at a monitoring station in my area that NAV Canada and Pearson Airport have set up....I love it!

One time, a person at Pearson Airport Complaints Department told me that based on the number of noise complaints they actually receive from residents in areas affected by air traffic, along with GTAA, the Federal Government, and NAV Canada, they do not believe it is a significant concern, and they use statistics to prove it. I tried to explain to this person that filing a complaint takes time and it is hard to find the time, and that some people in my community are unaware of how to do it. They responded that filing a complaint doesn't take much time and that they have simplified the process to make it easier. I usually feel frustrated after these conversations because unless you experience dealing with plane noise firsthand, it's hard to truly understand.

Hopefully, Cynthia Woods, manager at Pearson Airport Complaints Department, reads your email on Monday and initiates the simplified process to register a noise complaint. The new complaint process, I pray, will show truer evidence to the Federal Government and GTAA of how airplane noise truly affects and disrupts people's lives where they will be prompted to

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

make the air industry more friendly for everyone. GTAA CEO Deborah Flint can't come out in a meeting and announce plans to a room full of business owners and let everyone know how she will increase air traffic substantially and get a rah-rah of approval without acknowledging the negative impacts these plans may have on people who have to deal with airplane noise pollution. Mayor of Pickering doesn't want plane noise for his residents and Mayor Olivia Chow doesn't want plane downtown Toronto and I know I am not as important as these two people but me Daryl Henderson doesn't want plane noise either.

Thank you so much for your continued efforts to try and make improvements. It sure means a lot to me and others as well!

Take care,

Daryl Henderson

XAP-2024-534385(3)

Dear Ms Woods

It is well known the Bureau of Complaints does not respond to the complainant and if and when they do it is the party line of self justification in net zero - better get used to it - we re not changing things - so sorry for your luck.

To issue more efficient complaint process seems to me to be more of an issue of disposal to the recycle bin than it is to grab your attention to act . Affirmative reaction to 'our' complaints has been zero . Nothing.

My issue is 'evident accountability' to a single or a thousand complaints. Numbers matter but one complaint is as important and deserving of attention as thousands. Suffering is occurring in the underbelly of your issuance. It is very very disturbing. Please hear - listen - acknowledge and act in fairness . Share the earth space .

The planes fly over my roof non stop using the same track ad nauseum. I don't have any interest in becoming proficient in air plane speak. I just know it hurts and the same flight path is used. Why not shake it up. Planes redirect 1 km apart I can only use simple concepts here but north south land marks I.e. 407 - Derry - 401 so we all get equal distribution of the effluent except not All of them in the same flight path trajectory - day in day out - second in and second out .

Since my unaddressed complaints have been issued online I do notice we have been getting a noise break. Planes exiting - outgoing have been balanced with flight entering - incoming which has mitigated perpetual noise on a daily basis. This has been well received. My neighbours to the east and south still

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

suffer greatly and NEED to be heard . A long term solution for mutual satisfaction is absolutely necessary. This will not go away any time too soon.

Subject: Re: Request for immediate changes to complaint form

Hello Fabio,

This is a brilliant idea to capture the true story, the big picture of plane noise for me and others. I wouldn't have to worry about interrupting what I was doing every time I hear very loud planes passing over my house and then feel I must call or email the Pearson Airport Complaints Department to express my displeasure with the noise, only to likely hear more noisy, frequent planes after the call and then try to resume what I was doing beforehand. It is sometimes hard to go back to doing what I was doing because the plane noise upsets me, especially sleeping. Here, I simply consent to allow my complaint to be registered once the noise reaches a certain decibel at a monitoring station in my area that NAV Canada and Pearson Airport have set up....I love it!

One time, a person at Pearson Airport Complaints Department told me that based on the number of noise complaints they actually receive from residents in areas affected by air traffic, along with GTAA, the Federal Government, and NAV Canada, they do not believe it is a significant concern, and they use statistics to prove it. I tried to explain to this person that filing a complaint takes time and it is hard to find the time, and that some people in my community are unaware of how to do it. They responded that filing a complaint doesn't take much time and that they have simplified the process to make it easier. I usually feel frustrated after these conversations because unless you experience dealing with plane noise firsthand, it's hard to truly understand.

Hopefully, Cynthia Woods, manager at Pearson Airport Complaints Department, reads your email on Monday and initiates the simplified process to register a noise complaint. The new complaint process, I pray, will show truer evidence to the Federal Government and GTAA of how airplane noise truly affects and disrupts people's lives where they will be prompted to make the air industry more friendly for everyone. GTAA CEO Deborah Flint can't come out in a meeting and announce plans to a room full of business owners and let everyone know how she will increase air traffic substantially and get a rah-rah of approval without acknowledging the negative impacts these plans may have on people who have to deal with airplane noise pollution. Mayor of Pickering doesn't want plane noise for his residents and Mayor Olivia Chow doesn't want plane downtown Toronto and I know I am not as important as these two people but me Daryl Henderson doesn't want plane noise either.

Thank you so much for your continued efforts to try and make improvements. It sure means a lot to me and others as well!

Take care,

Daryl Henderson

Subject: Request for immediate changes to complaint form

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to express my concerns regarding the current complaint form for noise disturbances. The existing form is overly cumbersome and effectively discourages individuals from filing complaints.

As someone who experiences adverse effects from aircraft noise exceeding 55dB, the current system is impractical. Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 8 events per submission, I would need to complete it 62.5 times daily. At an estimated 15 minutes per form, this amounts to 937.5 minutes or approximately 15.6 hours each day.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This cumbersome process seems designed to discourage complaints. Therefore, I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding 55dB, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, particularly for those you are making vulnerable, traumatized, humiliated, and marginalized individuals.

Thank you for your attention to this matter.

Ms. Cynthia Woods,

Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the complaint form allows a maximum of 50 events per submission, I would need to complete it 10 times daily. At an estimated 30 minutes per form, this amounts to 300 minutes, or approximately 5 hours each day.

Additionally, to collect the information required for the 500 events, I would need to record the time of each plane passing by. Since 80 of these events occur while I should be sleeping, I would have to turn on a light, put on my glasses, and note the time. At an average of 1 minute per event, this adds an extra 500 minutes, or 8 hours and 20 minutes.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

In total, the current complaint system would require me to spend 13 hours and 20 minutes daily.

Using the phone option would take even longer.

Does it make sense to expect someone to spend over 13 hours a day filing complaints?

I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding a number of dBs determined by the user, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, especially for vulnerable, traumatized, humiliated, and marginalized individuals.

Issue with the callback option in the web complaint form

Additionally, I have noticed an issue with the callback option in the web complaint form. The form includes a field asking if the user wants to receive a callback regarding their noise complaint. I have requested a callback several times but have never received one.
Could you please explain why this is happening? Could you please tell me why I have never received a callback?

Significant reduction in the amount of publicly available information at https://webtrak.emsbk.com/gta

Below I will copy the content of an email I sent you on: On Wednesday, June 19, 2024 at 02:56:19 p.m. EDT,

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

I am writing to formally request an explanation for the recent changes made to the WebTrak GTA portal (https://webtrak.emsbk.com/gta), which have significantly reduced the amount of publicly available information.

As a regular user of the portal, I rely heavily on the comprehensive data previously provided for tracking and analysis purposes. The reduction in available information has raised concerns among myself and other users who depend on this resource.

Information offered by portal up to last week

Information offered by portal since changes were made last week

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Could you please explain the rationale behind the decision to reduce the amount of public information available?

Regards,
Fabio Ovettini (M9M 2J4)

Hello All,

I am responding to some questions that have been raised in recent emails.

Toronto Pearson Noise Complaint Form and Noise Monitoring Reports

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

In regard to suggestions to amend the noise complaint form and process - we have previously updated the form based on community feedback asking for a simplified form with the ability to submit several complaints at once. Residents can now submit up to 50 complaints per form.

We'd be happy to consider new ideas from those using the form to make it quicker and easier to use within the context of the purpose of the form, which is to accept resident complaints into our Aircraft Noise and Operations Management System (ANOMS) where it is then linked with operational data, including aircraft overhead.

The system doesn't generate complaints based on a noise threshold; however, we do publish a noise monitoring report that includes the number of aircraft noise events above specified thresholds for each monitor. This is just one of the interactive noise monitor reports that we developed with input from community members. The result is a set of reports that are easy to use and interpret, and that represent the data in different ways to best understand aircraft noise exposure.

You can find all of these reports here

WebTrak functionality

We are pleased to hear that WebTrak has been helpful for community members. As with our other tools, we seek to make improvements to make them more useful.

One of the emails suggested that a change has been made to WebTrak to reduce noise monitor data. There has been no change to WebTrak functionality or the information available; the data needs time to process. Once processing is finalized all the noise data information populates in WebTrak.

InsightFull

InsightFull is another valuable online tool. It provides interactive, location-specific facts about the operations at Toronto Pearson and how they may impact your neighbourhood. It also hosts a Noise Advisory calendar to share information on airport maintenance activities with potential to affect runway operations.

You will also find a variety of interactive operational and complaint reports by month, quarter, and year.

Please reach out to us at communityengagement@gtaa.com if you would like a demo on how the system works.

Pearson Public Meeting

Please consider joining our upcoming Pearson Public meeting which will be held at the Toronto Congress Centre on Thursday, July 25th from 6:00 to 8:00pm. Additionally, Toronto Pearson Noise Team members are available to

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

speak one on one with residents between 5:00 and 5:45pm. There is also an option to join the main meeting remotely.

Registration will be posted on the Noise Forum webpage on June 28th.

Thank you,

Cynthia

Subject: Request for immediate changes to complaint form

> You don't often get email from fabio217@yahoo.com. Learn why this is important

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to express my concerns regarding the current complaint form for noise disturbances. The existing form is overly cumbersome and effectively discourages individuals from filing complaints.

As someone who experiences adverse effects from aircraft noise exceeding 55dB, the current system is impractical. Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 8 events per submission, I would need to complete it 62.5 times daily. At an estimated 15 minutes per form, this amounts to 937.5 minutes or approximately 15.6 hours each day.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This cumbersome process seems designed to discourage complaints. Therefore, I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding 55dB, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, particularly for those you are making vulnerable, traumatized, humiliated, and marginalized individuals.

Thank you for your attention to this matter.

XAP-2024-534251(5)

Hello Josie,

The Federal Government typically pays attention when people speak in numbers. I hope we receive a response from them soon, including from GTAA's Deborah Flint. Our summer will be difficult again with the plane noise.

Take care,

Daryl

Subject: Re: Request for immediate changes to complaint form

Hello Fabio,

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This is a brilliant idea to capture the true story, the big picture of plane noise for me and others. I wouldn't have to worry about interrupting what I was doing every time I hear very loud planes passing over my house and then feel I must call or email the Pearson Airport Complaints Department to express my displeasure with the noise, only to likely hear more noisy, frequent planes after the call and then try to resume what I was doing beforehand. It is sometimes hard to go back to doing what I was doing because the plane noise upsets me, especially sleeping. Here, I simply consent to allow my complaint to be registered once the noise reaches a certain decibel at a monitoring station in my area that NAV Canada and Pearson Airport have set up....I love it!

One time, a person at Pearson Airport Complaints Department told me that based on the number of noise complaints they actually receive from residents in areas affected by air traffic, along with GTAA, the Federal Government, and NAV Canada, they do not believe it is a significant concern, and they use statistics to prove it. I tried to explain to this person that filing a complaint takes time and it is hard to find the time, and that some people in my community are unaware of how to do it. They responded that filing a complaint doesn't take much time and that they have simplified the process to make it easier. I usually feel frustrated after these conversations because unless you experience dealing with plane noise firsthand, it's hard to truly understand.

Hopefully, Cynthia Woods, manager at Pearson Airport Complaints Department, reads your email on Monday and initiates the simplified process to register a noise complaint. The new complaint process, I pray, will show truer evidence to the Federal Government and GTAA of how airplane noise truly affects and disrupts people's lives where they will be prompted to make the air industry more friendly for everyone. GTAA CEO Deborah Flint can't come out in a meeting and announce plans to a room full of business owners and let everyone know how she will increase air traffic substantially and get a rah-rah of approval without acknowledging the negative impacts these plans may have on people who have to deal with airplane noise pollution. Mayor of Pickering doesn't want plane noise for his residents and Mayor Olivia Chow doesn't want plane downtown Toronto and I know I am not as important as these two people but me Daryl Henderson doesn't want plane noise either.

Thank you so much for your continued efforts to try and make improvements. It sure means a lot to me and others as well!

Take care,

Daryl Henderson

Subject: Request for immediate changes to complaint form

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to express my concerns regarding the current complaint form for noise disturbances. The existing form is overly cumbersome and effectively discourages individuals from filing complaints.

As someone who experiences adverse effects from aircraft noise exceeding 55dB, the current system is impractical. Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 8 events per submission, I would need to complete it 62.5 times daily. At an estimated 15 minutes per form, this amounts to 937.5 minutes or approximately 15.6 hours each day.

This cumbersome process seems designed to discourage complaints. Therefore, I propose the following changes to the complaint form:

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding 55dB, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, particularly for those you are making vulnerable, traumatized, humiliated, and marginalized individuals.

Thank you for your attention to this matter.
Fabio Ovettini (M9M 2J4)

Dear Ms Woods

It is well known the Bureau of Complaints does not respond to the complainant and if and when they do it is the party line of self justification in net zero - better get used to it - we re not changing things - so sorry for your luck.

To issue more efficient complaint process seems to me to be more of an issue of disposal to the recycle bin than it is to grab your attention to act . Affirmative reaction to 'our' complaints has been zero . Nothing.

My issue is 'evident accountability' to a single or a thousand complaints. Numbers matter but one complaint is as important and deserving of attention as thousands. Suffering is occurring in the underbelly of your issuance. It is very very disturbing. Please hear - listen - acknowledge and act in fairness . Share the earth space .

The planes fly over my roof non stop using the same track ad nauseum. I don't have any interest in becoming proficient in air plane speak. I just know it hurts and the same flight path is used. Why not shake it up. Planes redirect 1 km apart I can only use simple concepts here but north south land marks I.e. 407 - Derry - 401 so we all get equal distribution of the effluent except not All of them in the same flight path trajectory - day in day out - second in and second out .

Since my unaddressed complaints have been issued online I do notice we have been getting a noise break. Planes exiting - outgoing have been balanced with flight entering - incoming which has mitigated perpetual noise on a daily basis. This has been well received. My neighbours to the east and south still suffer greatly and NEED to be heard . A long term solution for mutual satisfaction is absolutely necessary. This will not go away any time too soon.

Hello All,
I am responding to some questions that have been raised in recent emails.

Toronto Pearson Noise Complaint Form and Noise Monitoring Reports
In regard to suggestions to amend the noise complaint form and process - we have previously updated the form based on community feedback asking for a simplified form with the ability to submit several complaints at once. Residents can now submit up to 50 complaints per form.

We'd be happy to consider new ideas from those using the form to make it quicker and easier to use within the context of the purpose of the form, which is to accept resident complaints into our Aircraft

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Noise and Operations Management System (ANOMS) where it is then linked with operational data, including aircraft overhead.

The system doesn't generate complaints based on a noise threshold; however, we do publish a noise monitoring report that includes the number of aircraft noise events above specified thresholds for each monitor. This is just one of the interactive noise monitor reports that we developed with input from community members. The result is a set of reports that are easy to use and interpret, and that represent the data in different ways to best understand aircraft noise exposure.

You can find all of these reports here

WebTrak functionality
We are pleased to hear that WebTrak has been helpful for community members. As with our other tools, we seek to make improvements to make them more useful.

One of the emails suggested that a change has been made to WebTrak to reduce noise monitor data. There has been no change to WebTrak functionality or the information available; the data needs time to process. Once processing is finalized all the noise data information populates in WebTrak.

InsightFull
InsightFull is another valuable online tool. It provides interactive, location-specific facts about the operations at Toronto Pearson and how they may impact your neighbourhood. It also hosts a Noise Advisory calendar to share information on airport maintenance activities with potential to affect runway operations.

You will also find a variety of interactive operational and complaint reports by month, quarter, and year.

Please reach out to us at communityengagement@gtaa.com if you would like a demo on how the system works.

Pearson Public Meeting
Please consider joining our upcoming Pearson Public meeting which will be held at the Toronto Congress Centre on Thursday, July 25th from 6:00 to 8:00pm. Additionally, Toronto Pearson Noise Team members are available to speak one on one with residents between 5:00 and 5:45pm. There is also an option to join the main meeting remotely.

Registration will be posted on the Noise Forum webpage on June 28th.

Thank you,
Cynthia

Subject: [External/Externe]: Re: Request for immediate changes to complaint form

XAP-2024-534251(6)

Hello Everyone,

This morning, I was woken up by plane noise at 6:25 am, and it was very loud. I called Pearson Airport to file a few complaints and requested a call back regarding Fabio's idea for a pre-authorization system for noise complaints. Additionally, I called MP Judy Sgro's office expecting to leave a message, but she answered the phone as she was preparing to catch a plane. Thank you, Judy, for taking my call.

I spoke with MP Judy Sgro for 9 minutes, and she was wonderful where she listened to me. I mentioned that Fabio had sent an email to her, and she informed me that she hadn't read it yet but would do so regarding the suggestion for a pre-authorization complaint system. I discussed the situation in Pickering, where the Mayor of Pickering, Kevin Ashe, is working with Premier Doug Ford to approve the development of land, which includes some Green Belt around the area designated for building an airport. Judy informed me that she was unaware of this deal. She agreed with me on the potential consequences of approving land for development for housing would essential close the idea of an airport ever being built in Pickering. What will happen with the designated airport land once was housing development is approve around it? It will be a good for the Federal Government if they can free up this land designated for the airport too.

MP Judy Sgro did mention to me that she had to look into why a noise monitoring station promised to Humber River - Black Creek has not been installed yet.

I asked MP Judy Sgro about the number of condos planned for this area and whether the current roads would be able to handle the population increase. She confirmed her awareness of the many condo developments and expressed concern about whether the infrastructure would

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

be sufficient. Judy informed me that she had to end the call, and I wished her a good day. Unfortunately, I forgot to inquire about arranging a meeting with GTAA CEO Deborah Flint.

I had an email open in the background, of a video that Sergei had recorded of the plane noise in his neighborhood over the weekend. I had to turn it off when I started to write this email because it was distracting and made it hard to concentrate. I strongly recommend that people who are not too aware of how disturbing plane noise can be listen to Sergei's video and try to read a book or type an email with it playing.

Have a wonderful day!

Take care,

Daryl Henderson

XAP-2024-534385(6)

Good morning all.

A big thank you to Fabio for taking on an issue that is a burden on our community that we all knowingly, live with that has gotten worse over the years, a great job on that City News interview. It's that interview that I speak to. When complaints were mentioned and only a small number of people complain and thousands don't, my wife turned to me and said. " I didn't know we can complain about the airplane noise". I myself did not know until recently that we can and there is a system in place to complain. How many more people in our community are unaware of this. Knowing this it should mute the GTAA's mention of thousands don't complain. Those in our community who are not aware of this, a headline in our community "Emery Newsletter" would probably help to bring attention to the importance of complaints to help in resolving our issues with airplane noise. Less than 10% of people complaining may not help the cause.
Good luck to our community that we may hear quieter nights and days.
Fabio would you mind sharing the link to file complaints. Thank you

Greg

Ms. Cynthia Woods,

Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the complaint form allows a maximum of 50 events per submission, I would need to complete it 10 times daily. At an estimated 30 minutes per form, this amounts to 300 minutes, or approximately 5 hours each day.

Additionally, to collect the information required for the 500 events, I would need to record the time of each plane passing by. Since 80 of these events occur while I should be sleeping, I would have to turn on a light, put on my glasses, and note the time. At an average of 1 minute per event, this adds an extra 500 minutes, or 8 hours and 20 minutes.

In total, the current complaint system would require me to spend 13 hours and 20 minutes daily.

Using the phone option would take even longer.

Does it make sense to expect someone to spend over 13 hours a day filing complaints?

I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding a number of dBs determined by the user, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, especially for vulnerable, traumatized, humiliated, and marginalized individuals.

Issue with the callback option in the web complaint form

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Additionally, I have noticed an issue with the callback option in the web complaint form. The form includes a field asking if the user wants to receive a callback regarding their noise complaint. I have requested a callback several times but have never received one.
Could you please explain why this is happening? Could you please tell me why I have never received a callback?

Significant reduction in the amount of publicly available information at https://webtrak.emsbk.com/gta

Below I will copy the content of an email I sent you on: On Wednesday, June 19, 2024 at 02:56:19 p.m. EDT,

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

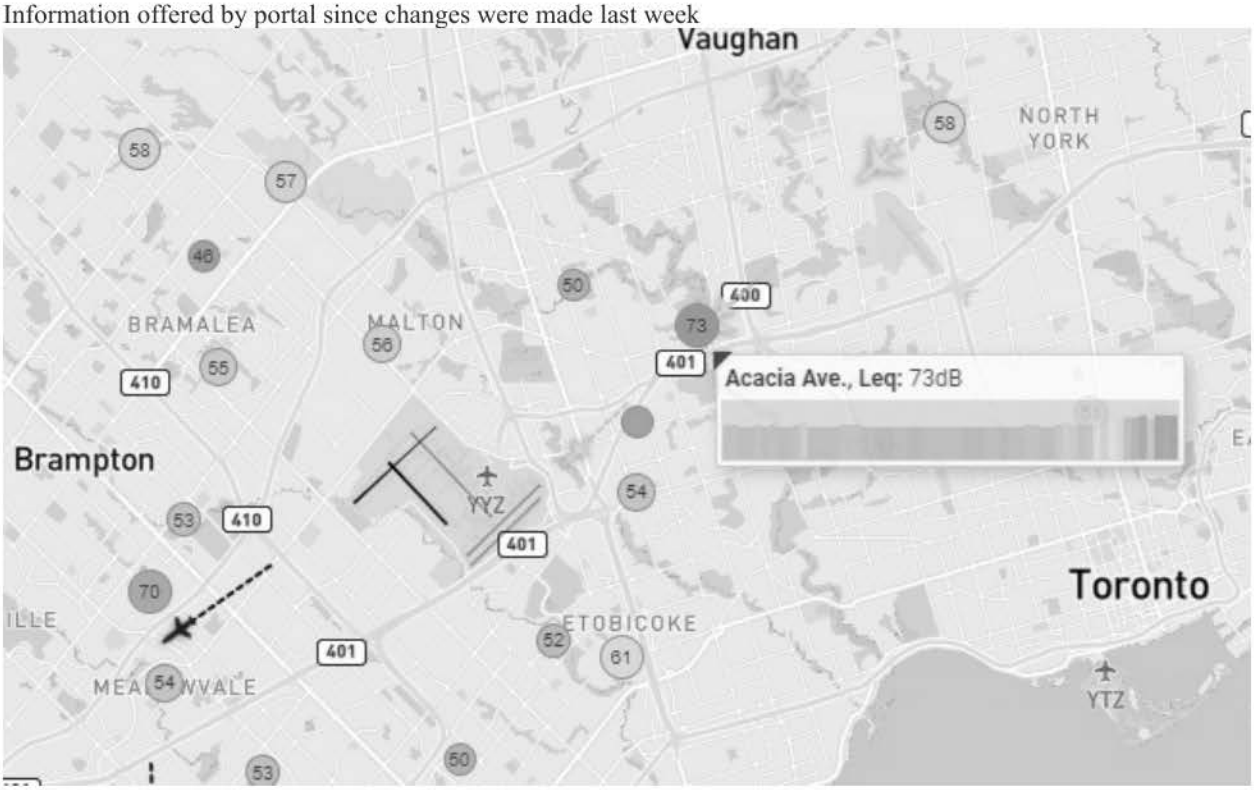

I am writing to formally request an explanation for the recent changes made to the WebTrak GTA portal (https://webtrak.emsbk.com/gta), which have significantly reduced the amount of publicly available information.

As a regular user of the portal, I rely heavily on the comprehensive data previously provided for tracking and analysis purposes. The reduction in available information has raised concerns among myself and other users who depend on this resource.

Information offered by portal up to last week

Information offered by portal since changes were made last week

Could you please explain the rationale behind the decision to reduce the amount of public information available?

Regards,
Fabio Ovettini (M9M 2J4)

Hello All,

I am responding to some questions that have been raised in recent emails.

Toronto Pearson Noise Complaint Form and Noise Monitoring Reports

In regard to suggestions to amend the noise complaint form and process - we have previously updated the form based on community feedback asking for a simplified form with the ability to submit several complaints at once. Residents can now submit up to 50 complaints per form.

We'd be happy to consider new ideas from those using the form to make it quicker and easier to use within the context of the purpose of the form, which is to accept resident complaints into our Aircraft Noise and Operations Management System (ANOMS) where it is then linked with operational data, including aircraft overhead.

The system doesn't generate complaints based on a noise threshold; however, we do publish a noise monitoring report that includes the number of aircraft noise events above specified thresholds for each monitor. This is just one of the interactive noise monitor reports that we developed with input from community members. The result is a set of reports that are easy to use and interpret, and that represent the data in different ways to best understand aircraft noise exposure.

You can find all of these reports here

WebTrak functionality

We are pleased to hear that WebTrak has been helpful for community members. As with our other tools, we seek to make improvements to make them more useful.

One of the emails suggested that a change has been made to WebTrak to reduce noise monitor data. There has been no change to WebTrak functionality or the information available; the data needs time to process. Once processing is finalized all the noise data information populates in WebTrak.

InsightFull

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

InsightFull is another valuable online tool. It provides interactive, location-specific facts about the operations at Toronto Pearson and how they may impact your neighbourhood. It also hosts a Noise Advisory calendar to share information on airport maintenance activities with potential to affect runway operations.

You will also find a variety of interactive operational and complaint reports by month, quarter, and year.

Please reach out to us at communityengagement@gtaa.com if you would like a demo on how the system works.

Pearson Public Meeting

Please consider joining our upcoming Pearson Public meeting which will be held at the Toronto Congress Centre on Thursday, July 25th from 6:00 to 8:00pm. Additionally, Toronto Pearson Noise Team members are available to speak one on one with residents between 5:00 and 5:45pm. There is also an option to join the main meeting remotely.

Registration will be posted on the Noise Forum webpage on June 28th.

Thank you,

Cynthia

Subject: Request for immediate changes to complaint form

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

You don't often get email from fabio217@yahoo.com. Learn why this is important

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to express my concerns regarding the current complaint form for noise disturbances. The existing form is overly cumbersome and effectively discourages individuals from filing complaints.

As someone who experiences adverse effects from aircraft noise exceeding 55dB, the current system is impractical. Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 8 events per submission, I would need to complete it 62.5 times daily. At an estimated 15 minutes per form, this amounts to 937.5 minutes or approximately 15.6 hours each day.

This cumbersome process seems designed to discourage complaints. Therefore, I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding 55dB, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, particularly for those you are making vulnerable, traumatized, humiliated, and marginalized individuals.

Thank you for your attention to this matter.

Thank you Daryl for all the energy and follow-up you are doing!
Fabio also, and other community residents.
Much appreciated,
Judy (Fricker)
Sent from my iPhone

On Jun 17, 2024, at 10:13 AM, Daryl Henderson <dhenderson37@live.com> wrote:

Hello Everyone,

This morning, I was woken up by plane noise at 6:25 am, and it was very loud. I called Pearson Airport to file a few complaints and requested a call back regarding Fabio's idea for a pre-authorization system for noise complaints. Additionally, I called MP Judy Sgro's office expecting to leave a message, but she answered the phone as she was preparing to catch a plane. Thank you, Judy, for taking my call.

I spoke with MP Judy Sgro for 9 minutes, and she was wonderful where she listened to me. I mentioned that Fabio had sent an email to her, and she informed me that she hadn't read it yet but would do so regarding the suggestion for a pre-authorization complaint system. I discussed the situation in Pickering, where the Mayor of Pickering, Kevin Ashe, is working with Premier Doug Ford to approve the development of land, which includes some Green Belt around the area designated for building an airport. Judy informed me that she was unaware of this deal. She agreed with me on the potential consequences of approving land for development for housing would essential close the idea of an airport ever being built in Pickering. What will

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

happen with the designated airport land once was housing development is approve around it? It will be a good for the Federal Government if they can free up this land designated for the airport too.

MP Judy Sgro did mention to me that she had to look into why a noise monitoring station promised to Humber River - Black Creek has not been installed yet.

I asked MP Judy Sgro about the number of condos planned for this area and whether the current roads would be able to handle the population increase. She confirmed her awareness of the many condo developments and expressed concern about whether the infrastructure would be sufficient. Judy informed me that she had to end the call, and I wished her a good day. Unfortunately, I forgot to inquire about arranging a meeting with GTAA CEO Deborah Flint.

I had an email open in the background, of a video that Sergei had recorded of the plane noise in his neighborhood over the weekend. I had to turn it off when I started to write this email because it was distracting and made it hard to concentrate. I strongly recommend that people who are not too aware of how disturbing plane noise can be listen to Sergei's video and try to read a book or type an email with it playing.

Have a wonderful day!

Take care,

Daryl Henderson

Subject: Re: Request for immediate changes to complaint form

Ms. Cynthia Woods,

Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the complaint form allows a maximum of 50 events per submission, I would need to complete it 10 times daily. At an estimated 30 minutes per form, this amounts to 300 minutes, or approximately 5 hours each day.

Additionally, to collect the information required for the 500 events, I would need to record the time of each plane passing by. Since 80 of these events occur while I should be sleeping, I would have to turn on a light, put on my glasses, and note the time. At an average of 1 minute per event, this adds an extra 500 minutes, or 8 hours and 20 minutes.

In total, the current complaint system would require me to spend 13 hours and 20 minutes daily.

Using the phone option would take even longer.

Does it make sense to expect someone to spend over 13 hours a day filing complaints?

I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding a number of dBs determined by the user, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, especially for vulnerable, traumatized, humiliated, and marginalized individuals.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Issue with the callback option in the web complaint form

Additionally, I have noticed an issue with the callback option in the web complaint form. The form includes a field asking if the user wants to receive a callback regarding their noise complaint. I have requested a callback several times but have never received one.
Could you please explain why this is happening? Could you please tell me why I have never received a callback?

Significant reduction in the amount of publicly available information at https://webtrak.emsbk.com/gta

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

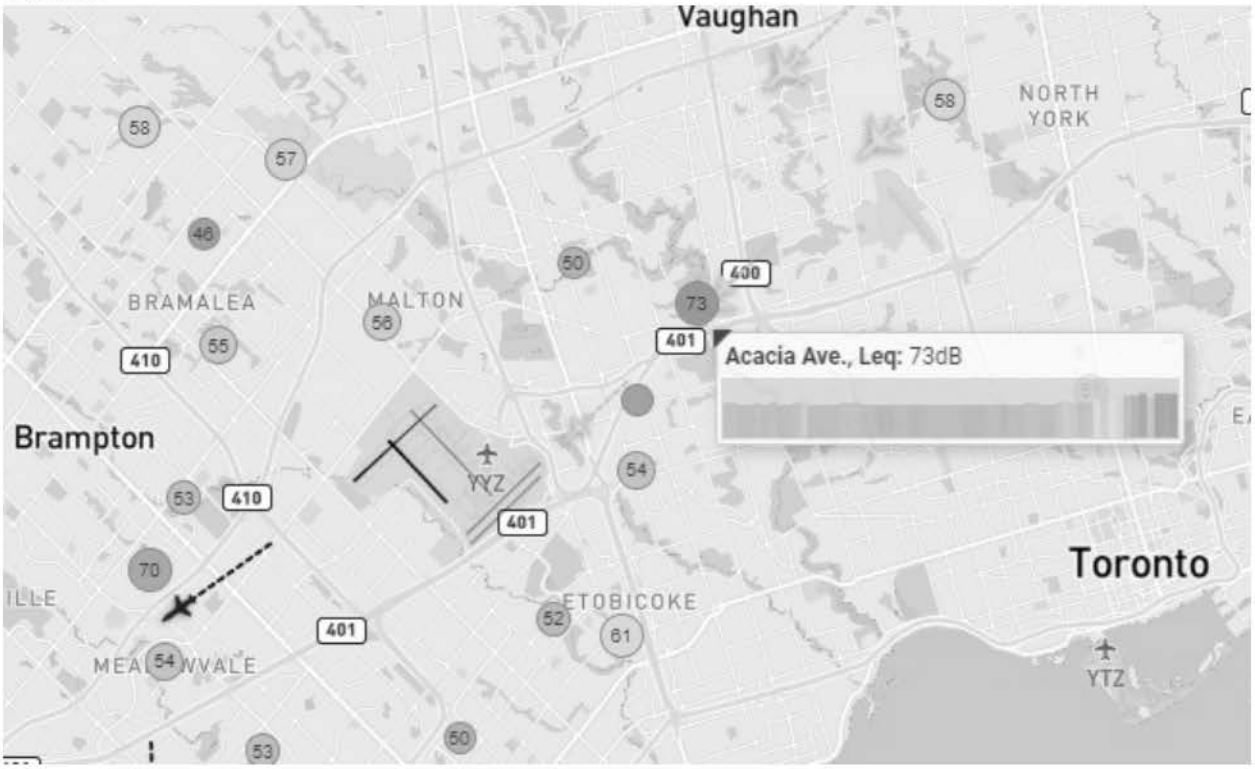

I am writing to formally request an explanation for the recent changes made to the WebTrak GTA portal (https://webtrak.emsbk.com/gta), which have significantly reduced the amount of publicly available information.

As a regular user of the portal, I rely heavily on the comprehensive data previously provided for tracking and analysis purposes. The reduction in available information has raised concerns among myself and other users who depend on this resource.

Information offered by portal up to last week

Information offered by portal since changes were made last week

Could you please explain the rationale behind the decision to reduce the amount of public information available?

Hello All,

I am responding to some questions that have been raised in recent emails.

Toronto Pearson Noise Complaint Form and Noise Monitoring Reports

In regard to suggestions to amend the noise complaint form and process - we have previously updated the form based on community feedback asking for a simplified form with the ability to submit several complaints at once. Residents can now submit up to 50 complaints per form.

We'd be happy to consider new ideas from those using the form to make it quicker and easier to use within the context of the purpose of the form, which is to accept resident complaints into our Aircraft Noise and Operations Management System (ANOMS) where it is then linked with operational data, including aircraft overhead.

The system doesn't generate complaints based on a noise threshold; however, we do publish a noise monitoring report that includes the number of aircraft noise events above specified thresholds for each monitor. This is just one of the interactive noise monitor reports that we developed with input from community members. The result is a set of reports that are easy to use and interpret, and that represent the data in different ways to best understand aircraft noise exposure.

You can find all of these reports here

WebTrak functionality

We are pleased to hear that WebTrak has been helpful for community members. As with our other tools, we seek to make improvements to make them more useful.

One of the emails suggested that a change has been made to WebTrak to reduce noise monitor data. There has been no change to WebTrak functionality or the information available; the data needs time to process. Once processing is finalized all the noise data information populates in WebTrak.

InsightFull

InsightFull is another valuable online tool. It provides interactive, location-specific facts about the operations at Toronto Pearson and how they may impact your neighbourhood. It also hosts a Noise Advisory calendar to share information on airport maintenance activities with potential to affect runway operations.

You will also find a variety of interactive operational and complaint reports by month, quarter, and year.

Please reach out to us at communityengagement@gtaa.com if you would like a demo on how the system works.

Pearson Public Meeting

Please consider joining our upcoming Pearson Public meeting which will be held at the Toronto Congress Centre on Thursday, July 25th from 6:00 to 8:00pm. Additionally, Toronto Pearson Noise Team members are available to speak one on one with residents between 5:00 and 5:45pm. There is also an option to join the main meeting remotely.

Registration will be posted on the Noise Forum webpage on June 28th.

Thank you,

Cynthia

Subject: Request for immediate changes to complaint form

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

You don't often get email from fabio217@yahoo.com. Learn why this is important

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to express my concerns regarding the current complaint form for noise disturbances. The existing form is overly cumbersome and effectively discourages individuals from filing complaints.

As someone who experiences adverse effects from aircraft noise exceeding 55dB, the current system is impractical. Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 8 events per submission, I would need to complete it 62.5 times daily. At an estimated 15 minutes per form, this amounts to 937.5 minutes or approximately 15.6 hours each day.

This cumbersome process seems designed to discourage complaints. Therefore, I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding 55dB, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, particularly for those you are making vulnerable, traumatized, humiliated, and marginalized individuals.

Thank you for your attention to this matter.

Hello Everyone,

The conversation I had with MP Judy Sgro the other morning included my mention once again that former Federal Minister of Transportation Lisa Raitt had stated Pearson Airport noise complaints are shelved and collect dust. MP Judy Sgro told me that's not true and she doesn't know why the former Minister of Transportation would say that. However, it's evident that CEO of GTAA Deborah Flint does not listen to the noise complaints because she has already announced plans to increase traffic by 3 to 4 percent each year over the next couple of years. The airplane noise petition that MP Judy Sgro presented in the House of Commons is currently in process of review, but the airplanes continue to fly uninterrupted or decrease in number. No one even knows how long the process will take.

If you don't actually have to live with airplane noise, you might imagine what it's like, but it's really not the same.

Subject: Re: Request for immediate changes to complaint form

Hello Everyone,

This morning, I was woken up by plane noise at 6:25 am, and it was very loud. I called Pearson Airport to file a few complaints and requested a call back regarding Fabio's idea for a pre-authorization system for noise complaints. Additionally, I called MP Judy Sgro's office expecting to leave a message, but she answered the phone as she was preparing to catch a plane. Thank you, Judy, for taking my call.

I spoke with MP Judy Sgro for 9 minutes, and she was wonderful where she listened to me. I mentioned that Fabio had sent an email to her, and she informed me that she hadn't read it yet but would do so regarding the suggestion for a pre-authorization complaint system. I discussed the situation in Pickering, where the Mayor of Pickering, Kevin Ashe, is working with Premier Doug Ford to approve the development of land, which includes some Green Belt around the area designated for building an airport. Judy informed me that she was unaware of this deal. She agreed with me on the potential consequences of approving land for development for housing would essential close the idea of an airport ever being built in Pickering. What will happen with the designated airport land once was housing development is approve around it? It will be a good for the Federal Government if they can free up this land designated for the airport too.

MP Judy Sgro did mention to me that she had to look into why a noise monitoring station promised to Humber River - Black Creek has not been installed yet.

I asked MP Judy Sgro about the number of condos planned for this area and whether the current roads would be able to handle the population increase. She confirmed her awareness of the many condo developments and expressed concern about whether the infrastructure would be sufficient. Judy informed me that she had to end the call, and I wished her a good day. Unfortunately, I forgot to inquire about arranging a meeting with GTAA CEO Deborah Flint.

I had an email open in the background, of a video that Sergei had recorded of the plane noise in his neighborhood over the weekend. I had to turn it off when I started to write this email because it was distracting and made it hard to concentrate. I strongly recommend that people who are not too aware of how disturbing plane noise can be listen to Sergei's video and try to read a book or type an email with it playing.

Have a wonderful day!

Take care,

Daryl Henderson

Subject: Re: Request for immediate changes to complaint form

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Hello Everyone,

This morning, I was woken up by plane noise at 6:25 am, and it was very loud. I called Pearson Airport to file a few complaints and requested a call back regarding Fabio's idea for a pre-authorization system for noise complaints. Additionally, I called MP Judy Sgro's office expecting to leave a message, but she answered the phone as she was preparing to catch a plane. Thank you, Judy, for taking my call.

I spoke with MP Judy Sgro for 9 minutes, and she was wonderful where she listened to me. I mentioned that Fabio had sent an email to her, and she informed me that she hadn't read it yet but would do so regarding the suggestion for a pre-authorization complaint system. I discussed the situation in Pickering, where the Mayor of Pickering, Kevin Ashe, is working with Premier Doug Ford to approve the development of land, which includes some Green Belt around the area designated for building an airport. Judy informed me that she was unaware of this deal. She agreed with me on the potential consequences of approving land for development for housing would essential close the idea of an airport ever being built in Pickering. What will happen with the designated airport land once was housing development is approve around it? It will be a good for the Federal Government if they can free up this land designated for the airport too.

MP Judy Sgro did mention to me that she had to look into why a noise monitoring station promised to Humber River - Black Creek has not been installed yet.

I asked MP Judy Sgro about the number of condos planned for this area and whether the current roads would be able to handle the population increase. She confirmed her awareness of the many condo developments and expressed concern about whether the infrastructure would be sufficient. Judy informed me that she had to end the call, and I wished her a good day. Unfortunately, I forgot to inquire about arranging a meeting with GTAA CEO Deborah Flint.

I had an email open in the background, of a video that Sergei had recorded of the plane noise in his neighborhood over the weekend. I had to turn it off when I started to write this email because it was distracting and made it hard to concentrate. I strongly recommend that people who are not too aware of how disturbing plane noise can be listen to Sergei's video and try to read a book or type an email with it playing.

Have a wonderful day!

Take care,

Daryl Henderson

Subject: Request for immediate changes to complaint form

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to express my concerns regarding the current complaint form for noise disturbances. The existing form is overly cumbersome and effectively discourages individuals from filing complaints.

As someone who experiences adverse effects from aircraft noise exceeding 55dB, the current system is impractical. Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 8 events per submission, I would need to complete it 62.5 times daily. At an estimated 15 minutes per form, this amounts to 937.5 minutes or approximately 15.6 hours each day.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This cumbersome process seems designed to discourage complaints. Therefore, I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding 55dB, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, particularly for those you are making vulnerable, traumatized, humiliated, and marginalized individuals.

Thank you for your attention to this matter.
Fabio Ovettini (M9M 2J4)

XAP-2024-534251(10)

Ms. Cynthia Woods,

Urgent: Noise Monitoring Station at Blackfriar Park Offline

I regret to inform you that Noise Monitoring Station at Blackfriar Park has been offline for over two weeks now.

Given the importance of this monitoring station for accurate noise level assessments and community well-being, I urge you to take immediate action to bring it back online.

Your prompt attention to this matter would be greatly appreciated.

Regards,
Fabio Ovettini

Ms. Cynthia Woods,

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the complaint form allows a maximum of 50 events per submission, I would need to complete it 10 times daily. At an estimated 30 minutes per form, this amounts to 300 minutes, or approximately 5 hours each day.

Additionally, to collect the information required for the 500 events, I would need to record the time of each plane passing by. Since 80 of these events occur while I should be sleeping, I would have to turn on a light, put on my glasses, and note the time. At an average of 1 minute per event, this adds an extra 500 minutes, or 8 hours and 20 minutes.

In total, the current complaint system would require me to spend 13 hours and 20 minutes daily.

Using the phone option would take even longer.

Does it make sense to expect someone to spend over 13 hours a day filing complaints?

I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding a number of dBs determined by the user, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, especially for vulnerable, traumatized, humiliated, and marginalized individuals.

Issue with the callback option in the web complaint form

Additionally, I have noticed an issue with the callback option in the web complaint form. The form includes a field asking if the user wants to receive a callback regarding their noise complaint. I have requested a callback several times but have never received one.
Could you please explain why this is happening? Could you please tell me why I have never received a callback?

Significant reduction in the amount of publicly available information at https://webtrak.emsbk.com/gta

Hello All,

I am responding to some questions that have been raised in recent emails.

Toronto Pearson Noise Complaint Form and Noise Monitoring Reports

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

In regard to suggestions to amend the noise complaint form and process - we have previously updated the form based on community feedback asking for a simplified form with the ability to submit several complaints at once. Residents can now submit up to 50 complaints per form.

We'd be happy to consider new ideas from those using the form to make it quicker and easier to use within the context of the purpose of the form, which is to accept resident complaints into our Aircraft Noise and Operations Management System (ANOMS) where it is then linked with operational data, including aircraft overhead.

The system doesn't generate complaints based on a noise threshold; however, we do publish a noise monitoring report that includes the number of aircraft noise events above specified thresholds for each monitor. This is just one of the interactive noise monitor reports that we developed with input from community members. The result is a set of reports that are easy to use and interpret, and that represent the data in different ways to best understand aircraft noise exposure.

You can find all of these reports here

WebTrak functionality

We are pleased to hear that WebTrak has been helpful for community members. As with our other tools, we seek to make improvements to make them more useful.

One of the emails suggested that a change has been made to WebTrak to reduce noise monitor data. There has been no change to WebTrak functionality or the information available; the data needs time to process. Once processing is finalized all the noise data information populates in WebTrak.

InsightFull

InsightFull is another valuable online tool. It provides interactive, location-specific facts about the operations at Toronto Pearson and how they may impact your neighbourhood. It also hosts a Noise Advisory calendar to share information on airport maintenance activities with potential to affect runway operations.

You will also find a variety of interactive operational and complaint reports by month, quarter, and year.

Please reach out to us at communityengagement@gtaa.com if you would like a demo on how the system works.

Pearson Public Meeting

Please consider joining our upcoming Pearson Public meeting which will be held at the Toronto Congress Centre on Thursday, July 25th from 6:00 to 8:00pm. Additionally, Toronto Pearson Noise Team members are available to

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

speak one on one with residents between 5:00 and 5:45pm. There is also an option to join the main meeting remotely.

Registration will be posted on the Noise Forum webpage on June 28th.

Thank you,

Cynthia

Subject: Request for immediate changes to complaint form

You don't often get email from fabio217@yahoo.com. Learn why this is important

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to express my concerns regarding the current complaint form for noise disturbances. The existing form is overly cumbersome and effectively discourages individuals from filing complaints.

As someone who experiences adverse effects from aircraft noise exceeding 55dB, the current system is impractical. Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 8 events per submission, I would need to complete it 62.5 times daily. At an estimated 15 minutes per form, this amounts to 937.5 minutes or approximately 15.6 hours each day.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This cumbersome process seems designed to discourage complaints. Therefore, I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding 55dB, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, particularly for those you are making vulnerable, traumatized, humiliated, and marginalized individuals.

Thank you for your attention to this matter.

Good morning Greg,

Sorry for taking so long to respond.

Here is the link to the Noise Complaint Form: https://complaints-ca.emsbk.com/gta6

Here is the Phone # to place a noise complaint: 1-416-247-7682

Take Care,
Fabio

On Friday, June 28, 2024 at 12:55:02 p.m. EDT, Greg Colacitti <gregster63@rogers.com> wrote:

Good morning all.

A big thank you to Fabio for taking on an issue that is a burden on our community that we all knowingly, live with that has gotten worse over the years, a great job on that City News interview.
It's that interview that I speak to. When complaints were mentioned and only a small number of people complain and thousands don't, my wife turned to me and said. " I didn't know we can complain about the airplane noise". I myself did not know until recently that we can and there is a system in place to complain. How many more people in our community are unaware of this. Knowing this it should mute the GTAA's mention of thousands don't complain. Those in our community who are not aware of this, a headline in our community "Emery Newsletter" would probably help to bring attention to the importance of complaints to help in resolving our issues with airplane noise. Less than 10% of people complaining may not help the cause.
Good luck to our community that we may hear quieter nights and days.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Fabio would you mind sharing the link to file complaints. Thank you

Greg

The result is a set of reports that are easy to use and interpret, and that represent the data in different ways to best understand aircraft noise exposure.

You can find all of these reports here

WebTrak functionality

We are pleased to hear that WebTrak has been helpful for community members. As with our other tools, we seek to make improvements to make them more useful.

One of the emails suggested that a change has been made to WebTrak to reduce noise monitor data. There has been no change to WebTrak functionality or the information available; the data needs time to process. Once processing is finalized all the noise data information populates in WebTrak.

InsightFull

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

InsightFull is another valuable online tool. It provides interactive, location-specific facts about the operations at Toronto Pearson and how they may impact your neighbourhood. It also hosts a Noise Advisory calendar to share information on airport maintenance activities with potential to affect runway operations.

You will also find a variety of interactive operational and complaint reports by month, quarter, and year.

Please reach out to us at communityengagement@gtaa.com if you would like a demo on how the system works.

Pearson Public Meeting

Please consider joining our upcoming Pearson Public meeting which will be held at the Toronto Congress Centre on Thursday, July 25th from 6:00 to 8:00pm. Additionally, Toronto Pearson Noise Team members are available to speak one on one with residents between 5:00 and 5:45pm. There is also an option to join the main meeting remotely.

Registration will be posted on the Noise Forum webpage on June 28th.

Thank you,

Cynthia

Subject: Request for immediate changes to complaint form

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

You don't often get email from fabio217@yahoo.com. Learn why this is important

To all individuals in positions of power associated with YYZ,

This includes those at Nav Canada, the Greater Toronto Airports Authority (GTAA), and Canadian government officials,

Needless to say I expect you to reply to my emails.

I am writing to express my concerns regarding the current complaint form for noise disturbances. The existing form is overly cumbersome and effectively discourages individuals from filing complaints.

As someone who experiences adverse effects from aircraft noise exceeding 55dB, the current system is impractical. Pearson Airport handles approximately 1,850 flights daily, with around 500 of these flights passing over my residence. Given that the form allows a maximum of 8 events per submission, I would need to complete it 62.5 times daily. At an estimated 15 minutes per form, this amounts to 937.5 minutes or approximately 15.6 hours each day.

This cumbersome process seems designed to discourage complaints. Therefore, I propose the following changes to the complaint form:

1. **Automated Complaint Submission**: Include a field where individuals can authorize the system to automatically file a complaint for every aircraft exceeding 55dB, based on data from the community noise monitor.
2. **Accessible Noise Data**: Provide detailed information at each noise monitoring station, including the number of flights exceeding noise thresholds, categorized by departures and arrivals, along with corresponding dB levels and timestamps.

These changes are essential to ensure that the process is accessible and fair, particularly for those you are making vulnerable, traumatized, humiliated, and marginalized individuals.

Thank you for your attention to this matter.

Fabio Ovettini (M9M 2J4)

Subject: [External/Externe]: **The Right to Quality Sleep: A Fundamental Right Protected by International Law**

XAP-2024-534373

Good Morning,

The Right to Quality Sleep: A Fundamental Right Protected by International Law

Our policymakers and elected officials are once again violating a fundamental right through their policies, delays, and evasions: the right to eight hours of quality sleep.

In the 2008 case **Canada (Prime Minister) v. Khadr**, the Honourable Supreme Court of Canada found the Canadian Government responsible for the violation of Mr. Khadr's rights by interviewing him knowing that he had been subjected to sleep deprivation, a recognized form of torture. The court stated:

"The appropriate remedy in this case is to declare that Khadr's Charter rights were violated, leaving it to the government to decide how best to respond in light of current information, its responsibility over foreign affairs, and the Charter."

This case clearly illustrates how our incompetent or corrupt elected officials violated The Charter of Rights, specifically the right to life, liberty, and security of the person. As taxpayers, we ended up paying for the incompetence of our Canadian Government.

Everyone in the world is entitled to the same fundamental human rights. These rights include the right to live free from torture, the right to live free from slavery, the right to own property, the right to equality and dignity, and the right to live free from all forms of discrimination.

Given the recurring violations, it would be interesting to explore the possibility of requesting charges to be cast over individual government officials and GTAA managers, instead of holding

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Canada collectively responsible. This approach could ensure that those directly responsible for these actions are held accountable, rather than all Canadian citizens bearing the consequences.

Imagine if the court rules in our favour, only to then ask us, the taxpayers, to use our money to pay ourselves for the violations committed by our officials. This paradox highlights the need for a more just approach, where the individuals directly responsible for such actions are held accountable and bear the financial burden.

Canada's Federal Human Rights Court is one potential avenue where we could most likely prove beyond a doubt the torturing we are experiencing and seek justice against specific individuals responsible for these violations.

Subject: Re: Request for Assistance in Addressing GTAA Complaint Reporting Discrepancies

Hello Fabio,

It would be wonderful if our MP, Judy Sgro, who represents our riding of Humber River - Black Creek, would start doing the things she was elected to do and serve the people who voted for her. When I call her office and receive no response for three months, it is simply unacceptable. When someone from her office advises me that I need to kiss my MP's feet and be nice to her if I want her to do anything for me, then there is clearly a problem. MP Judy Sgro should not be treated like royalty or considered a guaranteed winner in the next election just because she appears to be a nice elderly person. Humber River - Black Creek needs an MP who will work to improve our community.

Minister of Transport Anita Anand lives in Oakville, and MP Judy Sgro lives in Thornhill. Why can't MP Judy Sgro reach out to Anita and ask to meet with her to discuss her ridings problem? Anita Anand was considering running for Federal leader of the Liberals, so I assume she knows Judy very well. It seems to me that MP Judy Sgro is working in a semi-retired mode, and I question whether she is the right MP for us.

If Mark Carney is elected Federal Liberal leader, he will need to clean up his party to regain the support and trust of the Canadian people. Anita Anand and Mark Holland do not respond to emails; they simply ignore them and it is a big, big concern.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

I still remember the day Councillor Perruzza visited this neighbourhood and the shock on his face when he heard his first plane fly over his head. He looked up at the sky in disbelief from the noise he heard. I guess maybe he has forgotten about that day and the continuous noise from the planes, which made a simple conversation difficult to have. Sometimes it is easy to forget things when you're not reminded of them each and every day, night and morning.

There is no question that business and money rule the world. The GTAA and Pearson Airport are big businesses with lots of money. They can wine and dine our politicians like no one else and make them feel good. I wish I could invite our politicians over to share a box of KD and have the same impact on them.

Deborah Flint, Robyn Connelly, and the Pearson Airport Complaints Department all receive below-average scores in response to our concerns and their efforts to improve the situation regarding our health and well-being due to the noise from increasing air traffic.

Robyn Connelly told me the planes are going to get busier and there is nothing I can do about it. She does not understand the infrastructure around Pearson Airport is failing to support the passengers that Pearson Airport receive now. She does not care about you or me or anyone else in this matter except that of the GTAA and Pearson Airport.

Thank you for emails that you sent out today.

Take care,

Daryl

Subject: Re: Request for Assistance in Addressing GTAA Complaint Reporting Discrepancies

Good day Ms. Sgro,

We appreciate your response and your stated intention to contact GTAA. However, we must express our growing frustration with the ongoing pattern of delays and inaction. This is not the first time we have been assured that steps would be taken, yet after years of discussions, we have yet to see any meaningful resolution or accountability from GTAA.

Our community has uncovered clear instances of report manipulation and data discrepancies, yet GTAA continues to evade transparency. Simply stating that you will reach out is not enough-we need results. What concrete actions have you taken beyond making contact? Have they provided any justification for their continued lack of transparency? If so, we would like to know exactly what they have said. If not, what steps will you take to escalate the matter further?

At this point, we are not looking for more reassurances-we are looking for decisive action. The time for delays has long passed. We urge you to demonstrate real leadership in holding GTAA accountable, rather than allowing this issue to be endlessly pushed aside.

Please provide an update on what has been done and what immediate steps you will take to ensure this matter is properly addressed.

We look forward to your prompt response.

Sincerely,
Fabio Ovettini

I hope this email finds you well. I am reaching out on behalf of our community to seek your support in addressing ongoing issues with the Greater Toronto Airports Authority (GTAA) related to discrepancies in their complaint reporting processes.

As our representative at the federal level, we believe it is crucial for you to intervene to ensure we receive clear and transparent answers that GTAA has so far failed to provide. Based on past correspondence, you will recall that our community was able to uncover a corruption case involving GTAA, where reports were manipulated to favor their interests. Unfortunately, the current situation raises similar concerns.

There are two pressing issues:

1. **Exclusion of Q3 2024 Complaints**:
   Complaints submitted by our community during Q3 2024 were excluded from Toronto Pearson's quarterly reports. Despite aligning with the process in effect at the time, these complaints were omitted without adequate explanation. This lack of transparency undermines confidence in GTAA's processes and accountability.
2. **Significant Discrepancies in Monthly Reports**:
   - The **July report** saw a **27.85% increase in complaints** compared to its initial version.
   - The **August report** experienced an even more dramatic change, with a **42.64% increase in complaints**.

   These are not routine adjustments but substantial anomalies that demand a clear and detailed explanation. The vague and insufficient responses we've received so far have done little to address the root causes of these discrepancies.

We firmly believe that GTAA must be held accountable for their actions and provide transparent answers to the community they serve. We kindly request that you advocate on our behalf to ensure:

- An explanation is provided for the discrepancies in the July and August 2024 complaint reports.
- Clarification is given regarding the exclusion of Q3 2024 complaints.
- Measures are implemented to prevent future inconsistencies and ensure transparency.

Your support in this matter is essential to restoring trust and upholding accountability. We trust in your commitment to advocating for our community and ensuring fairness in this ongoing matter.

Thank you for your attention to this urgent issue, and we look forward to your response.

Sincerely,

Subject: [External/Externe]: Re: Departures, Rumoured New Runway?

Deputy Minister Thangaraj,

The recent update to the noise complaint form is a clear example of how the GTAA is attempting to suppress the voices of those raising concerns about airplane noise. The new form now demands more personal information, including an email address, and requires users to refill **all** their information with each new submission—previously, this data was saved. Additionally, the inclusion of both visible and invisible CAPTCHAs seems designed to prevent individuals from automating the process, especially for those who would otherwise need to spend up to 14 hours a day filing complaints manually

Please find below my response to Ms. Connelly's email addressed to Irene. It will give you a clear understanding of how the GTAA is managing airport operations—by inflicting abuse and terrorizing a large number of communities.

Robin Connelly,

Your organization seems to justify an outdated approach to business, suggesting that high demand alone is enough to do whatever it takes to meet it, regardless of the consequences.

Ms. Conley, there is a high demand for many things in this world, including cheap labour. Does that mean we should start raiding small villages in Africa and shipping people around the world to satisfy this demand?

Countries like the United States, Canada, and others in the free world are implementing regulations on developing nations to prevent the abuse of their people if they wish to continue trading with us. Yet, your organization appears to take the stance that as long as there is demand, it justifies any means, even if it involves torturing or abusing people.

Similarly, just because there is a huge demand for oil, it doesn't mean we should allow oil companies to contaminate the Earth. Meeting demand should never come at the expense of the environment, human health, or the well-being of our planet. Responsible practices, stringent regulations, and a commitment to sustainability are essential to ensuring that economic goals do not lead to irreparable harm. Companies must be held accountable for minimizing their negative impact. When minimizing that impact isn't possible, they should be required to compensate for the damage caused and invest in restorative initiatives to mitigate the harm done.

In 1972, foreseeing the adverse effects caused by Pearson Airport, policymakers purchased land in Pickering to build a new airport. Now, the GTAA has two options:

1. Move the airport to Crown land, where it can have a buffer of 50 kilometres of forests around it, connected to major city centres via bullet trains.

2. Appropriate the land surrounding Pearson Airport.

When you proudly announce reductions in your organization's carbon footprint, do you consider the traffic bottlenecks you create on Highway 401? Countless cars and trucks are stuck there, idling for hours.

And when you calculate net profit, do you factor in the costs you impose on our healthcare system? Empirical evidence shows that people living near airports suffer from poorer health, with a higher rate of hospitalizations compared to areas without airplane traffic.

Finally, when you calculate net profit, do you consider the vast number of children whose academic potential you are hindering? This not only impacts their futures but also affects the future of all Canadians.

Fabio Ovettini

On Saturday, September 28, 2024 at 08:44:45 a.m. EDT, IRENE FORD <ireneford@rogers.com> wrote:

Deputy Minister Thangaraj,

Ms. Connelly's response is unsatisfactory and basically she told me to go stuff it for lack of better words. **Transport Canada must stop being absent and acknowledge the community impacts that are no longer sustainable, acceptable or reasonable as they are extending far beyond the AOA, NEF and federal regulated zoning area of the airport.**

Please provide the legislation that permits GTAA to operate as of right using a variance when running DEDICATED departures eastbound from 05/23?

This variance has fundamentally shifted where planes turn and make noise. IT HAS NOT ALWAYS BEEN THIS WAY, IT IS A SIGNIFICANT SHIFT AS A RESULT OF AN OPERATION DECISION MADE BY NAVCAN TO RUN DEDICATE DEPARTURES AND ARRIVALS. This is a change that was made in the absence of any updates to the NEF, AOA, federal zoning by-law, locations of noise monitors or any other documentation that would identify, document or try to limit the impacts of the GTAA operations on local communities. THERE IS ZERO WAY THAT I COULD HAVE KNOWN IN 1019 WHEN I PURCHASED MY HOME, THAT PLANES WOULD TURN NON-STOP IN THE VICINICITY OF MY HOME BECAUSE THE VARIANCE ISN'T REFLECTED ON ANY APPROVED INFORMATION SHARED WITH THE PUBLIC ABOUT NOISE. Plus departures do not have approved flight paths, so there is nothing documenting where, how many, how often they turn nor any predictability about runway usage.

This morning I was awoken by roaring planes at 6:45am.This is a taste of what was happening and will continue all day. Note the PCA is less then or just over 5,000 ft for 5 planes in 6 minutes turning on a Saturday morning before 7am. This is unreasonable and unsustainable at a distance of 15km from the airport.

An investigation should be launched immediately into the abuse of operating procedures as directed by NavCan to GTAA.

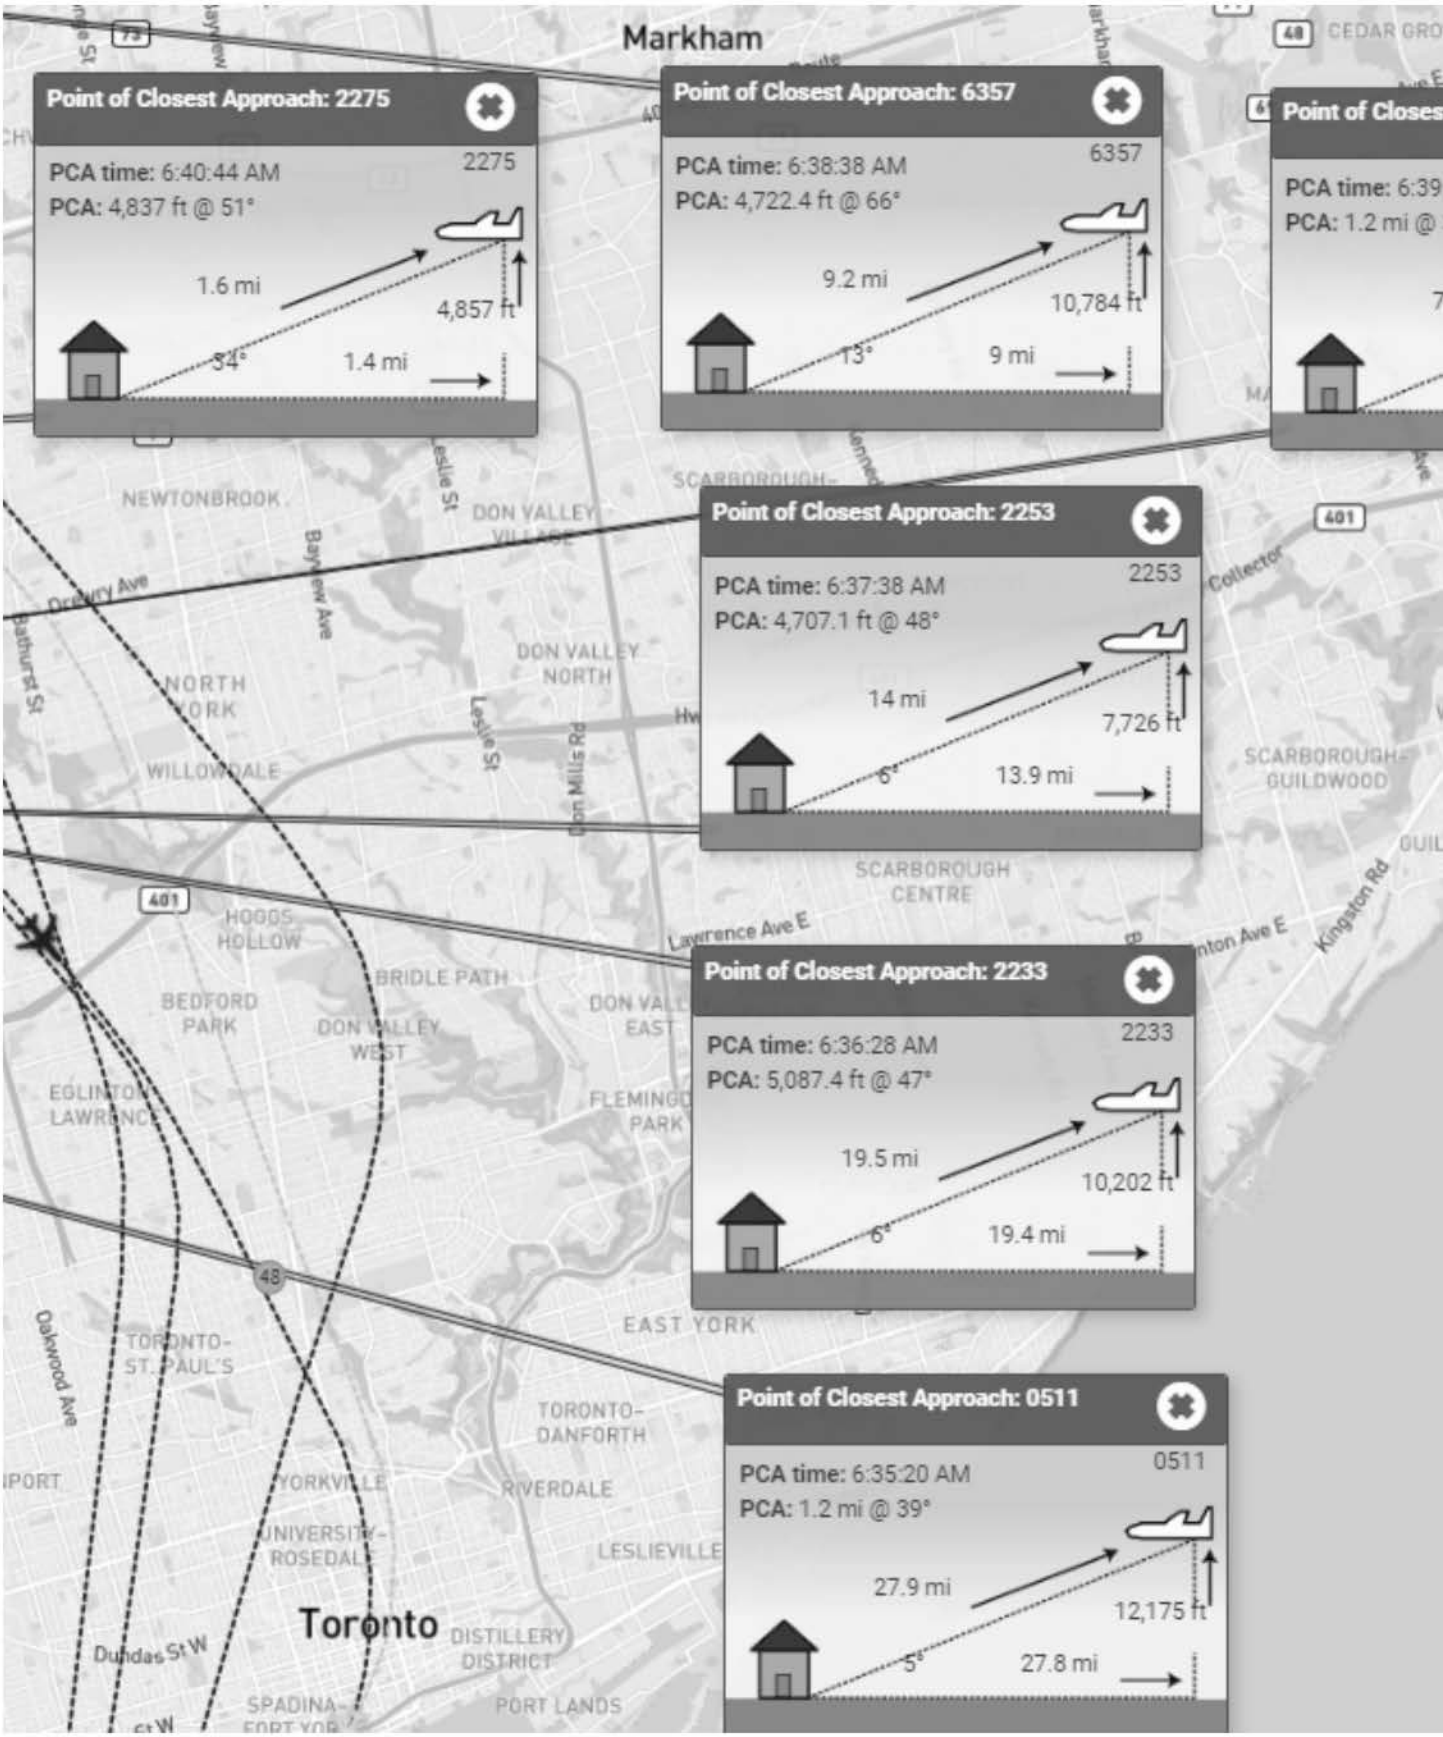

The response to update the complete form is ridiculous. It glitches, loses multiple times, makes you start over.

Regards,

Subject: Departures, Rumoured New Runway?

CAUTION: **External Sender. Do NOT click on any links or open any attachments unless you trust the sender and know the content is safe.**

Dear Ms. Connelly,

As Director of Sustainability and Social Impact for GTAA this email is directed to your attention for action and response. I would appreciate a written response acknowledging my email and an explanation on if the 6 requests below will be followed up upon or ignored.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

I have seen reference to a new east/west runway being constructed at Pearson. My understanding was the 2008 Master Plan referenced this but the 2017 Master Plan pg. 7 states the following:

"Because of an industry-wide shift to larger, high-density and more fully occupied aircraft, over the next two decades, proportionally fewer flights will move greater volumes of people and goods. We therefore project faster growth in passenger and cargo traffic than in aircraft movements – which we expect to grow at about 1.5 per cent annually. Our most likely scenario for 2037 suggests that aircraft movements (takeoffs and landings) will increase to 632,000 from today's 478,000. At the same time, the average number of passengers on a plane passing through Toronto Pearson will be 140, compared to 108 today. This represents a 30 per cent increase in the productivity of our runway system. Where our 2008 Master Plan anticipated the need for a new runway, we now expect to be able to meet demand with existing capacity throughout our 20-year planning period"

I have the following questions/comments/requests based on this paragraph.

1. **Is Pearson considering any new runway as referenced in some emails I have received of late from local residents? Have they moved away from what is outlined in the 2017 Master Plan?**
2. **Please update the Letter of Agreement between Transport Canada and GTAA to be based on the amount of flights and not total passenger volume. This would coincide and be proportional to the strategy in the Master Plan to use larger planes and the increased runway utilization explained above. I would also like to express my extreme frustration that the Preferential Runway System was approved in the absence of reviewing and updating this letter. The formula is fundamentally flawed.**
3. **Please consult with airline manufacturers, Health Canada, Transport Canada, Environment Canada to review the permitted altitude at which larger planes (airbuses/boeing 747 etc) are allowed to start their turns and acceptable noise impacts upon departure - 3,000 ft is to low. Also for arrivals using the continuous descent operations. These planes are heard and this is evident by who is complaining, where they are complaining..**
4. **Please follow up with Health Canada regarding GTAA request to update the 2010 Aircraft Noise in the Vicinity of Airports, consistent with the 2019 Report Assessing the Impact of Aircraft Noise in the Vicinity of Major Canadian Airports recommendations 9 and 12a. Inform Health Canada that NavCanada and Transport Canada have made significant decisions that have changed flight paths and operations in the absence of any updated guidelines and this is of extreme concern to the local community who has been impacted by these decisions. Refer to list of changes below.**

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

5. **Please provide a copy of the MSE NEF referenced on pg. 10-11 of the Master Plan and opportunities to be involved in consultation mentioned.**
6. **Please provide an update on additional health studies on the impacts of nanoparticles for local communities that considers dispersion pattern changes that may resulting from new flight paths, operational decisions for runway usage as well as procedures that result in planes flying at lower altitudes eg. continuous descent operations, RNP etc.**

    1. **Refer to this Toronto Star article indicating that nanoparticles have flown under the radar.**
    2. **As well as the New York Times article documenting the the impacts of e-commerce creating pollution spikes. GTAA's cargo operations are predicted to be an increasing component of operations and have broader regional impacts creating increased demand for surrounding trucking and warehouses - Regional Transit Center (refer to Section 9 Cargo and Logistics in the 2017 Master Plan)**

This email was stimulated by a flight #ACA1103 around 9:15 am this morning. I reviewed flight tracker because I wasn't sure, if it was a lawnmower on my street or a plane overhead. While there has been a marked improvement I fear it has nothing to do with the GTAA/NavCanada and is only the result of prevailing wind conditions (equals less departures to the east) and warmer weather (thicker air results in higher and different turning areas). Here's what's really interesting about this plane.

- **It departed from 06, the runway, further south from Vaughan**
- **It was the top of the turn and webtracker says the plane was 1.1m at 81 degrees and an altitude of 6550ft in comparison to my home**
- **The Plane was going to Nashville - why did it turn north from 06 just to fly over Vaughan to go south?**
- **The Acacia Ave Noise Monitor measured 68.3 DB**
- **Wade Gate Park and Robert Hicks Noise Monitors (west of Hwy 400) measured 56 and 57 Db respectively.**
- **Matthew Park Noise Monitor (closest to me) didn't register but I heard the equivalent of a lawn mower running on my street**

Every time departures run eastbound I wonder if I should stop investing in the home I purchased in 2019 before the pandemic. I reinforce the following for all authorities and decision makers - there was no way for me to know or make an informed decisions about the degree and level of aircraft traffic that has resulted in negative health impacts from myself and family. To NavCanada and GTAA's own admissions departures do not follow flight paths so it's impossible to know if

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

you would have planes turn non-stop over your home. Since I purchased my home the following has occurred.

1. **NavCanada/Transport Canada approved a flightpath change impacting arrivals on 05/23 which has planes flying at lower altitudes closer to my home Nov, 2022**
2. **NavCanada has approved operational changes that significantly and profoundly changed the volume and types of movements that occur in the vicinity of my home. In particular non-stop turning planes - Nov, 2022**
3. **Transport Canada's Approval of the preferential nighttime runway system which also significantly changes the amount of planes that fly during preferential hours (midnight to 6:30 am) in the vicinity of my home. On Tuesday morning I was awoken by a plane at 6:22 am.**
4. **Increasing use of continuous descent operating procedures resulting in larger planes turning at lower altitudes closer to my home. While I do not hear these planes I still worry about cumulative health impacts especially with the dispersion of pollutants at lower altitudes, such as nanoparticles, increasingly recognized as impacting communities living near major airports. I have asthma as does my daughter.**
5. **A shift to larger planes arriving and departing resulting in more profound noise impacts - irregardless of technical efficiencies larger planes still move more air and make more noise**

There has not been reasonable due diligence by any authority to understand the implications for local communities based on the following.

1. **Transport Canada, NavCanada nor GTAA did anything to understand or attempt to mitigate the new negative health impacts enforced upon new communities. This is evident because there is no monitoring that would capture the new impacts created by the above decisions. (NavCanada actually lied at the Vaughan Open House March, 2023 they told residents nothing has changed when in fact they had directed operational decisions (procedures & runway usage))**
2. **Health Canada considers themselves an 'advisory body' and has been absent**
3. **Airport operations appear exempt from any federal environmental legislation with regard to air pollution, Environmental Assessment or Environmental Impact Assessments so even though Pearson is planning to increase operations by 30% over 2017 operations there will be no formal approval or health studies required.**

I look forward to your response.

Dear Daryl and Fabio:

I am responding to your emails to the Minister of Transport and Internal Trade regarding issues pertaining to the Greater Toronto Airports Authority (GTAA).

While the Minister appreciates receiving your views, it is important to note that the GTAA is not a federal agency or department, but rather a private entity that operates an airport. This being the case, we have no additional comments or information to provide you at this time.

Please continue to raise your concerns with the GTAA. Transport Canada will not be replying to further correspondence from you on this matter.

Sincerely,

Christine

Executive Correspondence Unit
Transport Canada/Government of Canada

Subject: [External/Externe]: Community Response - Airport
Attachments: 03-20-25 - Community Response Airport.pdf

XA-2025-538766

Good day,

As the Member of Parliament of Humber River-Black Creek, I take seriously my responsibility to represent the interests of all residents. For some, the airport represents providing stable jobs, supporting local businesses, and connecting our community to the world. It also plays a vital role in delivering the packages and goods we rely on in our daily lives. For others, it raises concerns about noise, traffic, and environmental impact.

My role is to advocate for a balanced approach—one that acknowledges the benefits while addressing the challenges, facilitating dialogue to ensure that the airport's operations align with the needs and well-being of our community.

That is why I have consistently worked to maintain an open dialogue with both the airport and residents, advocating for the interests of this community and pushing for meaningful engagement and mitigation measures where possible. My role is to listen, to engage, and to work toward a fair balance that reflects the needs of our diverse and growing community.

Here is an overview of my efforts to advocate for residents and ensure their concerns about aircraft noise are heard:

- As a founding member of the GTAA caucus, I work alongside fellow MPs to ensure local communities and stakeholders have a voice in discussions on airport policies, development projects, and noise management strategies. Through these discussions with the GTAA, I advocate for balanced solutions that reflect both community concerns and the airport's operational realities.

- As Chair of the Standing Committee on Transport, Infrastructure and Communities (February 3, 2016 – September 11, 2019), I led a comprehensive study on aircraft noise near major Canadian airports, examining its impact on surrounding communities and potential mitigation measures. We gathered extensive testimony from experts, community representatives, and industry stakeholders, resulting in a report with 16 recommendations to the federal government. These recommendations remain a vital roadmap for managing aircraft noise and advancing efforts to balance aviation needs with community concerns. Link: https://www.ourcommons.ca/Content/Committee/421/TRAN/Reports/RP10366059/tranrp28/tranrp28-e.pdf

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

- Advocated for our community during the 2018 consultation on noise mitigation initiatives, particularly opposing the Weekend Runway Alternation Program, which was not implemented due to a lack of community benefit and support.

- Our office has diligently worked on addressing the aircraft noise issue through various channels. We have utilized social media, paper mailout newsletters, and digital newsletters to keep the community informed.

- Furthermore, we have actively engaged with the GTAA and NAV CANADA through multiple meetings and open houses to address this issue. Facilitating dialogue between a core group of engaged community members, including yourself, and representatives from both organizations has been a key priority. Maintaining this dialogue is one of my most important responsibilities, as it ensures that community concerns continue to be heard and considered in discussions about airport operations.

- In 2024, we executed two comprehensive door-to-door mailings—first to provide information about the airport, and second to provide information on how to create and submit a petition. The petition signatures were collected by the community, and presented by myself to the House of Commons.

Despite significant efforts to address your concerns, you continue to assert that our actions have been inadequate. While I respect every resident's right to voice their views, the ongoing misrepresentation of conversations, including the attribution of statements that were never made, undermines productive dialogue.

My priority remains advocating for the community as a whole, and I will continue to focus on meaningful engagement that reflects the broader interests of residents. Addressing aircraft noise remains an important issue, alongside other key priorities for Humber River–Black Creek, including poverty reduction, crime prevention, and economic growth.

Yours sincerely,

Hon. Judy A. Sgro, MP
Humber River-Black Creek

Dear Fabio,

Thank you for your follow-up and for expressing the community's ongoing concerns regarding the transparency and accountability issues with GTAA. The health impacts of aircraft noise is a serious issue.

I have forwarded your concerns directly to the GTAA, and ask that they respond directly to you. I understand the frustration regarding the lack of progress, and I hope for a more meaningful and timely response.

Regarding the open house, I have inquired about any developments on this front and will let you know when I hear back.

I have copied the Hon. Anita Anand, Minister of Transportation, on this email and request her assistance in addressing this important issue.

Thank you again for your continued engagement on this important issue.

Best regards,

Judy Sgro

Ms.Judy Sgro,

I am following up on my previous email regarding the ongoing concerns about transparency and accountability from GTAA. As of now, we have not received a meaningful response addressing the specific issues raised.

While we appreciate your stated intention to contact GTAA, the community remains frustrated by the ongoing delays and lack of concrete action. We need to know what steps have been taken beyond simply reaching out. Have you received any substantive response from GTAA? If so, please share their justification for the continued lack of transparency. If not, what actions will you take to escalate this matter?

Additionally, we understand there has been discussion about an open house for the community. Can you provide any updates on this, including potential timing and format?

At this stage, reassurances are not enough—we need decisive action. Please provide an update on the progress made and the immediate next steps you will take to ensure this matter is properly addressed.

We look forward to your prompt response.

Sincerely,
Fabio Ovettini

Dear Hon. Anita Anand and GTAA Representative,

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

On behalf of Mr. Fabio Ovettini and the community, I am reaching out to formally request an update on the ongoing concerns related to transparency and accountability from the GTAA. Despite multiple discussions and assurances over the years, the community continues to face delays and a lack of meaningful resolution on this matter.

We understand that GTAA has provided some responses to previous inquiries, and we appreciate the communication to date. However, our office continues to receive numerous inquiries from the community regarding this issue, which remains unresolved. Transparency is vital to the community, and there are still significant concerns about the handling of complaints and data inconsistencies. Therefore, we respectfully request the following:

1. A detailed response addressing the reported data discrepancies and concerns regarding the complaint reporting process.
2. A clear explanation as to why the requested information has not been made available or fully clarified.
3. The next steps GTAA will take to ensure transparency, accountability, and that the community's concerns are appropriately addressed.

Additionally, we acknowledge that GTAA has communicated a willingness to host another open house for the community. This would be a valuable opportunity to engage directly with residents, provide further clarity, and address any outstanding concerns. Please provide further details on the potential timing and format of this event so that we can assist in ensuring broad community participation.

While we recognize that GTAA is best positioned to handle operational concerns, it is essential that we see concrete actions to ensure transparency and a meaningful resolution. The community deserves clarity, and we urge you to treat this matter with the urgency it requires.

Please provide a response at your earliest convenience.

I look forward to your prompt reply.

Best regards,

Judy Sgro

Subject: Re: Request for Assistance in Addressing GTAA Complaint Reporting Discrepancies

Good day Ms. Sgro,

We appreciate your response and your stated intention to contact GTAA. However, we must express our growing frustration with the ongoing pattern of delays and inaction. This is not the first time we have been assured that steps would be taken, yet after years of discussions, we have yet to see any meaningful resolution or accountability from GTAA.

Our community has uncovered clear instances of report manipulation and data discrepancies, yet GTAA continues to evade transparency. Simply stating that you will reach out is not enough—we need results. What concrete actions have you taken beyond making contact? Have they provided any justification for their continued lack of transparency? If so, we would like to know exactly what they have said. If not, what steps will you take to escalate the matter further?

At this point, we are not looking for more reassurances—we are looking for decisive action. The time for delays has long passed. We urge you to demonstrate real leadership in holding GTAA accountable, rather than allowing this issue to be endlessly pushed aside.

Please provide an update on what has been done and what immediate steps you will take to ensure this matter is properly addressed.

We look forward to your prompt response.

Sincerely,

Fabio Ovettini

> Good day Ms Sgro,
>
> I hope this email finds you well. I am reaching out on behalf of our community to seek your support in addressing ongoing issues with the Greater Toronto Airports Authority (GTAA) related to discrepancies in their complaint reporting processes.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

As our representative at the federal level, we believe it is crucial for you to intervene to ensure we receive clear and transparent answers that GTAA has so far failed to provide. Based on past correspondence, you will recall that our community was able to uncover a corruption case involving GTAA, where reports were manipulated to favor their interests. Unfortunately, the current situation raises similar concerns.

There are two pressing issues:

1. **Exclusion of Q3 2024 Complaints**:
   Complaints submitted by our community during Q3 2024 were excluded from Toronto Pearson's quarterly reports. Despite aligning with the process in effect at the time, these complaints were omitted without adequate explanation. This lack of transparency undermines confidence in GTAA's processes and accountability.
2. **Significant Discrepancies in Monthly Reports**:

   - The **July report** saw a **27.85% increase in complaints** compared to its initial version.
   - The **August report** experienced an even more dramatic change, with a **42.64% increase in complaints**.

   These are not routine adjustments but substantial anomalies that demand a clear and detailed explanation. The vague and insufficient responses we've received so far have done little to address the root causes of these discrepancies.

We firmly believe that GTAA must be held accountable for their actions and provide transparent answers to the community they serve. We kindly request that you advocate on our behalf to ensure:

- An explanation is provided for the discrepancies in the July and August 2024 complaint reports.
- Clarification is given regarding the exclusion of Q3 2024 complaints.
- Measures are implemented to prevent future inconsistencies and ensure transparency.

Your support in this matter is essential to restoring trust and upholding accountability. We trust in your commitment to advocating for our community and ensuring fairness in this ongoing matter.

Thank you for your attention to this urgent issue, and we look forward to your response.

Sincerely,

Fabio Ovettini

Dear GTAA Community Engagement Team,
I'm writing on behalf of my constituent, [redacted] who lives in the [redacted] and [redacted] area. I know there have been ongoing discussions about organizing a community meeting to talk about noise mitigation, but I wanted to flag that the situation over the past few days has gotten noticeably worse.
According to [redacted] planes have been flying overhead roughly every 30 seconds the noise is constant and extremely disruptive. Understandably, he's very frustrated. He's submitted multiple complaints using the proper channels, but the issue doesn't seem to be improving. In fact, it's getting harder for residents to believe that this level of air traffic is necessary, especially at such high frequency.
With that in mind, I'd appreciate it if your office could provide:

1. An explanation for the spike in overhead traffic recently, especially this past week.
2. A timeline or confirmed date for the proposed community meeting with GTAA, NAV CANADA, and Transport Canada.
3. Any immediate steps that can be taken to reduce the impact while those conversations are still being planned.

Residents are doing their part by documenting what they're experiencing. It would really help to see some clear, timely responses from your end to show that those efforts are being taken seriously.
Looking forward to your reply,

Albert Meneses

Hi [redacted]
I completely understand how frustrating it must be to experience such frequent disturbances, especially when it feels like little progress is being made.
As mentioned before, we are in the process of organizing a community meeting that will bring together representatives from the GTAA, NAV CANADA, and the Minister of Transport's office to discuss noise mitigation and hear directly from affected residents like yourself.
Amy, could you please provide an update on the status of the meeting request? If there hasn't been any progress, please emphasize the urgency of this matter with the relevant parties.
Thank you.

Hi Amy,
Can we please look into scheduling a community meeting to address the ongoing aircraft noise issues impacting residents in the Islington and Steeles area?
We've continued to receive concerns from constituents, including [redacted] and it's clear that the community is eager for an opportunity to have their voices heard. As previously discussed, we would like to invite representatives from the GTAA, NAV CANADA, and the Minister of Transport's office to attend and provide updates on noise mitigation efforts, flight path reviews, and opportunities for public engagement.
Let's try to identify a few potential dates in mid-to-late July that could work for all parties. Once we confirm availability, we can begin outreach to affected residents and local stakeholders.
Thanks so much for your help with organizing this.
Best,

Hello [redacted]
Thank you for reaching out and for sharing your concerns regarding the ongoing aircraft noise in the Islington and Steeles area.
You're absolutely right—this has remained a significant issue for many residents in our community, and I appreciate you taking the time to follow up. I did previously circulate a

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

petition to bring greater attention to this matter, and I continue to raise it with the appropriate federal and aviation authorities.
I remain actively engaged with NAV CANADA and the Greater Toronto Airports Authority (GTAA) to advocate for better noise mitigation strategies. This includes reviewing current flight paths, operational hours, and holding those responsible accountable for their impact on surrounding neighbourhoods. I also continue to work with fellow MPs representing affected areas so our collective voice remains strong and unified.
In the meantime, I encourage you and other residents to continue documenting your experiences. Toronto Pearson has a dedicated **Noise Management Office** that is committed to engaging with residents and improving transparency around airport operations. Here are several ways you can connect with them and track or report issues:

 Website: www.torontopearson.com/en/community/noise-management

 Phone: Call **416-247-7682** to share concerns directly.

 WebTrak Flight Tracking Tool: Monitor aircraft in real time and check noise levels in your area.

 Online Noise Complaint Form: Submit up to 50 noise complaints at once via their online form.

 Online Portal (Insightful): Learn more about aircraft operations and noise management strategies.

 Stay Informed: Sign up for **"Checking In"**, their community newsletter.

 Public Meetings: Attend Pearson's regular public meetings on noise management to ask questions and voice your concerns.
I will also be organizing a **local community meeting this summer** where representatives from GTAA and NAV CANADA will be invited to address these concerns directly with constituents like yourself. I'd be happy to notify you when the date is confirmed.
Again, thank you for taking the time to raise your voice on this important issue. Please feel free to reach out to my office at any time—we are here to help.

Good day,

As the Member of Parliament of Humber River-Black Creek, I take seriously my responsibility to represent the interests of all residents. For some, the airport represents providing stable jobs, supporting local businesses, and connecting our community to the world. It also plays a vital role in delivering the packages and goods we rely on in our daily lives. For others, it raises concerns about noise, traffic, and environmental impact.

My role is to advocate for a balanced approach—one that acknowledges the benefits while addressing the challenges, facilitating dialogue to ensure that the airport's operations align with the needs and well-being of our community.

That is why I have consistently worked to maintain an open dialogue with both the airport and residents, advocating for the interests of this community and pushing for meaningful engagement and mitigation measures where possible. My role is to listen, to engage, and to work toward a fair balance that reflects the needs of our diverse and growing community.

Here is an overview of my efforts to advocate for residents and ensure their concerns about aircraft noise are heard:

- As a founding member of the GTAA caucus, I work alongside fellow MPs to ensure local communities and stakeholders have a voice in discussions on airport policies, development projects, and noise management strategies. Through these discussions with the GTAA, I advocate for balanced solutions that reflect both community concerns and the airport's operational realities.

- As Chair of the Standing Committee on Transport, Infrastructure and Communities (February 3, 2016 – September 11, 2019), I led a comprehensive study on aircraft noise near major Canadian airports, examining its impact on surrounding communities and potential mitigation measures. We gathered extensive testimony from experts, community representatives, and industry stakeholders, resulting in a report with 16 recommendations to the federal government. These recommendations remain a vital roadmap for managing aircraft noise and advancing efforts to balance aviation needs with community concerns. Link: https://www.ourcommons.ca/Content/Committee/421/TRAN/Reports/RP10366059/tranrp28/tranrp28-e.pdf

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

- Advocated for our community during the 2018 consultation on noise mitigation initiatives, particularly opposing the Weekend Runway Alternation Program, which was not implemented due to a lack of community benefit and support.

- Our office has diligently worked on addressing the aircraft noise issue through various channels. We have utilized social media, paper mailout newsletters, and digital newsletters to keep the community informed.

- Furthermore, we have actively engaged with the GTAA and NAV CANADA through multiple meetings and open houses to address this issue. Facilitating dialogue between a core group of engaged community members, including yourself, and representatives from both organizations has been a key priority. Maintaining this dialogue is one of my most important responsibilities, as it ensures that community concerns continue to be heard and considered in discussions about airport operations.

- In 2024, we executed two comprehensive door-to-door mailings—first to provide information about the airport, and second to provide information on how to create and submit a petition. The petition signatures were collected by the community, and presented by myself to the House of Commons.

Despite significant efforts to address your concerns, you continue to assert that our actions have been inadequate. While I respect every resident's right to voice their views, the ongoing misrepresentation of conversations, including the attribution of statements that were never made, undermines productive dialogue.

My priority remains advocating for the community as a whole, and I will continue to focus on meaningful engagement that reflects the broader interests of residents. Addressing aircraft noise remains an important issue, alongside other key priorities for Humber River–Black Creek, including poverty reduction, crime prevention, and economic growth.

Yours sincerely,

Hon. Judy A. Sgro, MP
Humber River-Black Creek

Dear Fabio,

Thank you for your follow-up and for expressing the community's ongoing concerns regarding the transparency and accountability issues with GTAA. The health impacts of aircraft noise is a serious issue.

I have forwarded your concerns directly to the GTAA, and ask that they respond directly to you. I understand the frustration regarding the lack of progress, and I hope for a more meaningful and timely response.

Regarding the open house, I have inquired about any developments on this front and will let you know when I hear back.

I have copied the Hon. Anita Anand, Minister of Transportation, on this email and request her assistance in addressing this important issue.

Thank you again for your continued engagement on this important issue.

Best regards,

Judy Sgro

Ms.Judy Sgro,

I am following up on my previous email regarding the ongoing concerns about transparency and accountability from GTAA. As of now, we have not received a meaningful response addressing the specific issues raised.

While we appreciate your stated intention to contact GTAA, the community remains frustrated by the ongoing delays and lack of concrete action. We need to know what steps have been taken beyond simply reaching out. Have you received any substantive response from GTAA? If so, please share their justification for the continued lack of transparency. If not, what actions will you take to escalate this matter?

Additionally, we understand there has been discussion about an open house for the community. Can you provide any updates on this, including potential timing and format?

At this stage, reassurances are not enough—we need decisive action. Please provide an update on the progress made and the immediate next steps you will take to ensure this matter is properly addressed.

We look forward to your prompt response.

Sincerely,
Fabio Ovettini

Dear Hon. Anita Anand and GTAA Representative,

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

On behalf of Mr. Fabio Ovettini and the community, I am reaching out to formally request an update on the ongoing concerns related to transparency and accountability from the GTAA. Despite multiple discussions and assurances over the years, the community continues to face delays and a lack of meaningful resolution on this matter.

We understand that GTAA has provided some responses to previous inquiries, and we appreciate the communication to date. However, our office continues to receive numerous inquiries from the community regarding this issue, which remains unresolved. Transparency is vital to the community, and there are still significant concerns about the handling of complaints and data inconsistencies. Therefore, we respectfully request the following:

1. A detailed response addressing the reported data discrepancies and concerns regarding the complaint reporting process.
2. A clear explanation as to why the requested information has not been made available or fully clarified.
3. The next steps GTAA will take to ensure transparency, accountability, and that the community's concerns are appropriately addressed.

Additionally, we acknowledge that GTAA has communicated a willingness to host another open house for the community. This would be a valuable opportunity to engage directly with residents, provide further clarity, and address any outstanding concerns. Please provide further details on the potential timing and format of this event so that we can assist in ensuring broad community participation.

While we recognize that GTAA is best positioned to handle operational concerns, it is essential that we see concrete actions to ensure transparency and a meaningful resolution. The community deserves clarity, and we urge you to treat this matter with the urgency it requires.

Please provide a response at your earliest convenience.

I look forward to your prompt reply.

Best regards,

Judy Sgro

Subject: Re: Request for Assistance in Addressing GTAA Complaint Reporting Discrepancies

Good day Ms. Sgro,

We appreciate your response and your stated intention to contact GTAA. However, we must express our growing frustration with the ongoing pattern of delays and inaction. This is not the first time we have been assured that steps would be taken, yet after years of discussions, we have yet to see any meaningful resolution or accountability from GTAA.

Our community has uncovered clear instances of report manipulation and data discrepancies, yet GTAA continues to evade transparency. Simply stating that you will reach out is not enough—we need results. What concrete actions have you taken beyond making contact? Have they provided any justification for their continued lack of transparency? If so, we would like to know exactly what they have said. If not, what steps will you take to escalate the matter further?

At this point, we are not looking for more reassurances—we are looking for decisive action. The time for delays has long passed. We urge you to demonstrate real leadership in holding GTAA accountable, rather than allowing this issue to be endlessly pushed aside.

Please provide an update on what has been done and what immediate steps you will take to ensure this matter is properly addressed.

We look forward to your prompt response.

Sincerely,

Fabio Ovettini

> Good day Ms Sgro,
>
> I hope this email finds you well. I am reaching out on behalf of our community to seek your support in addressing ongoing issues with the Greater Toronto Airports Authority (GTAA) related to discrepancies in their complaint reporting processes.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

As our representative at the federal level, we believe it is crucial for you to intervene to ensure we receive clear and transparent answers that GTAA has so far failed to provide. Based on past correspondence, you will recall that our community was able to uncover a corruption case involving GTAA, where reports were manipulated to favor their interests. Unfortunately, the current situation raises similar concerns.

There are two pressing issues:

1. **Exclusion of Q3 2024 Complaints**:
   Complaints submitted by our community during Q3 2024 were excluded from Toronto Pearson's quarterly reports. Despite aligning with the process in effect at the time, these complaints were omitted without adequate explanation. This lack of transparency undermines confidence in GTAA's processes and accountability.
2. **Significant Discrepancies in Monthly Reports**:

   - The **July report** saw a **27.85% increase in complaints** compared to its initial version.
   - The **August report** experienced an even more dramatic change, with a **42.64% increase in complaints**.

   These are not routine adjustments but substantial anomalies that demand a clear and detailed explanation. The vague and insufficient responses we've received so far have done little to address the root causes of these discrepancies.

We firmly believe that GTAA must be held accountable for their actions and provide transparent answers to the community they serve. We kindly request that you advocate on our behalf to ensure:

- An explanation is provided for the discrepancies in the July and August 2024 complaint reports.
- Clarification is given regarding the exclusion of Q3 2024 complaints.
- Measures are implemented to prevent future inconsistencies and ensure transparency.

Your support in this matter is essential to restoring trust and upholding accountability. We trust in your commitment to advocating for our community and ensuring fairness in this ongoing matter.

Thank you for your attention to this urgent issue, and we look forward to your response.

Sincerely,

Fabio Ovettini

Good day:

Thank you for your email of March 5, 2025, in which you made representation on behalf of a constituent, Fabio Ovettini, regarding the Greater Toronto Airports Authority (GTAA).

Transport Canada has received and responded to numerous emails from Fabio Ovettini, noting that the GTAA is a private entity and that the department is not in a position to assist with these concerns. I have attached a copy of our final response for your information.

Thank you again for writing.

Sincerely,

Melanie

Dear Hon. Anita Anand and GTAA Representative,

On behalf of Mr. Fabio Ovettini and the community, I am reaching out to formally request an update on the ongoing concerns related to transparency and accountability from the GTAA. Despite multiple discussions and assurances over the years, the community continues to face delays and a lack of meaningful resolution on this matter.

We understand that GTAA has provided some responses to previous inquiries, and we appreciate the communication to date. However, our office continues to receive numerous inquiries from the community regarding this issue, which remains unresolved. Transparency is vital to the community, and there are still significant concerns about the handling of complaints and data inconsistencies. Therefore, we respectfully request the following:

1. A detailed response addressing the reported data discrepancies and concerns regarding the complaint reporting process.
2. A clear explanation as to why the requested information has not been made available or fully clarified.
3. The next steps GTAA will take to ensure transparency, accountability, and that the community's concerns are appropriately addressed.

Additionally, we acknowledge that GTAA has communicated a willingness to host another open house for the community. This would be a valuable opportunity to engage directly with residents, provide further clarity, and address any outstanding concerns. Please provide further details on the potential timing and format of this event so that we can assist in ensuring broad community participation.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

While we recognize that GTAA is best positioned to handle operational concerns, it is essential that we see concrete actions to ensure transparency and a meaningful resolution. The community deserves clarity, and we urge you to treat this matter with the urgency it requires.

Please provide a response at your earliest convenience.

I look forward to your prompt reply.

Best regards,

Judy Sgro

Subject: Re: Request for Assistance in Addressing GTAA Complaint Reporting Discrepancies

Good day Ms. Sgro,

We appreciate your response and your stated intention to contact GTAA. However, we must express our growing frustration with the ongoing pattern of delays and inaction. This is not the first time we have been assured that steps would be taken, yet after years of discussions, we have yet to see any meaningful resolution or accountability from GTAA.

Our community has uncovered clear instances of report manipulation and data discrepancies, yet GTAA continues to evade transparency. Simply stating that you will reach out is not enough—we need results. What concrete actions have you taken beyond making contact? Have they provided any justification for their continued lack of transparency? If so, we would like to know exactly what they have said. If not, what steps will you take to escalate the matter further?

At this point, we are not looking for more reassurances—we are looking for decisive action. The time for delays has long passed. We urge you to demonstrate real leadership in holding GTAA accountable, rather than allowing this issue to be endlessly pushed aside.

Please provide an update on what has been done and what immediate steps you will take to ensure this matter is properly addressed.

We look forward to your prompt response.

Good day Ms Sgro,

I hope this email finds you well. I am reaching out on behalf of our community to seek your support in addressing ongoing issues with the Greater Toronto Airports Authority (GTAA) related to discrepancies in their complaint reporting processes.

As our representative at the federal level, we believe it is crucial for you to intervene to ensure we receive clear and transparent answers that GTAA has so far failed to provide. Based on past correspondence, you will recall that our community was able to uncover a corruption case involving GTAA, where reports were manipulated to favor their interests. Unfortunately, the current situation raises similar concerns.

There are two pressing issues:

1. **Exclusion of Q3 2024 Complaints**:
   Complaints submitted by our community during Q3 2024 were excluded from Toronto Pearson's quarterly reports. Despite aligning with the process in effect at the time, these complaints were omitted without adequate explanation. This lack of transparency undermines confidence in GTAA's processes and accountability.
2. **Significant Discrepancies in Monthly Reports**:
   - The **July report** saw a **27.85% increase in complaints** compared to its initial version.
   - The **August report** experienced an even more dramatic change, with a **42.64% increase in complaints**.

   These are not routine adjustments but substantial anomalies that demand a clear and detailed explanation. The vague and insufficient responses we've received so far have done little to address the root causes of these discrepancies.

We firmly believe that GTAA must be held accountable for their actions and provide transparent answers to the community they serve. We kindly request that you advocate on our behalf to ensure:

- An explanation is provided for the discrepancies in the July and August 2024 complaint reports.
- Clarification is given regarding the exclusion of Q3 2024 complaints.
- Measures are implemented to prevent future inconsistencies and ensure transparency.

Your support in this matter is essential to restoring trust and upholding accountability. We trust in your commitment to advocating for our community and ensuring fairness in this ongoing matter.

Dear Daryl and Fabio:

I am responding to your emails to the Minister of Transport and Internal Trade regarding issues pertaining to the Greater Toronto Airports Authority (GTAA).

While the Minister appreciates receiving your views, it is important to note that the GTAA is not a federal agency or department, but rather a private entity that operates an airport. This being the case, we have no additional comments or information to provide you at this time.

Please continue to raise your concerns with the GTAA. Transport Canada will not be replying to further correspondence from you on this matter.

Sincerely,

Christine

Good day:

Thank you for your email of March 5, 2025, in which you made representation on behalf of a constituent, Fabio Ovettini, regarding the Greater Toronto Airports Authority (GTAA).

Transport Canada has received and responded to numerous emails from Fabio Ovettini, noting that the GTAA is a private entity and that the department is not in a position to assist with these concerns. I have attached a copy of our final response for your information.

Thank you again for writing.

Sincerely,

Melanie

Dear Fabio,

Thank you for your follow-up and for expressing the community's ongoing concerns regarding the transparency and accountability issues with GTAA. The health impacts of aircraft noise is a serious issue.

I have forwarded your concerns directly to the GTAA, and ask that they respond directly to you. I understand the frustration regarding the lack of progress, and I hope for a more meaningful and timely response.

Regarding the open house, I have inquired about any developments on this front and will let you know when I hear back.

Ms.Judy Sgro,

I am following up on my previous email regarding the ongoing concerns about transparency and accountability from GTAA. As of now, we have not received a meaningful response addressing the specific issues raised.

While we appreciate your stated intention to contact GTAA, the community remains frustrated by the ongoing delays and lack of concrete action. We need to know what steps have been taken beyond simply reaching out. Have you received any substantive response from GTAA? If so, please share their justification for the continued lack of transparency. If not, what actions will you take to escalate this matter?

Additionally, we understand there has been discussion about an open house for the community. Can you provide any updates on this, including potential timing and format?

At this stage, reassurances are not enough—we need decisive action. Please provide an update on the progress made and the immediate next steps you will take to ensure this matter is properly addressed.

We look forward to your prompt response.

Sincerely,
Fabio Ovettini

Subject: Re: Request for Assistance in Addressing GTAA Complaint Reporting Discrepancies

Good day Ms. Sgro,

We appreciate your response and your stated intention to contact GTAA. However, we must express our growing frustration with the ongoing pattern of delays and inaction. This is not the first time we have been assured that steps would be taken, yet after years of discussions, we have yet to see any meaningful resolution or accountability from GTAA.

Our community has uncovered clear instances of report manipulation and data discrepancies, yet GTAA continues to evade transparency. Simply stating that you will reach out is not enough—we need results. What concrete actions have you taken beyond making contact? Have they provided any justification for their continued lack of transparency? If so, we would like to know exactly what they have said. If not, what steps will you take to escalate the matter further?

At this point, we are not looking for more reassurances—we are looking for decisive action. The time for delays has long passed. We urge you to demonstrate real leadership in holding GTAA accountable, rather than allowing this issue to be endlessly pushed aside.

Please provide an update on what has been done and what immediate steps you will take to ensure this matter is properly addressed.

We look forward to your prompt response.

Good day Ms Sgro,

I hope this email finds you well. I am reaching out on behalf of our community to seek your support in addressing ongoing issues with the Greater Toronto Airports Authority (GTAA) related to discrepancies in their complaint reporting processes.

As our representative at the federal level, we believe it is crucial for you to intervene to ensure we receive clear and transparent answers that GTAA has so far failed to provide. Based on past correspondence, you will recall that our community was able to uncover a corruption case involving GTAA, where reports were manipulated to favor their interests. Unfortunately, the current situation raises similar concerns.

There are two pressing issues:

1. **Exclusion of Q3 2024 Complaints**:
   Complaints submitted by our community during Q3 2024 were excluded from Toronto Pearson's quarterly reports. Despite aligning with the process in effect at the time, these complaints were omitted without adequate explanation. This lack of transparency undermines confidence in GTAA's processes and accountability.
2. **Significant Discrepancies in Monthly Reports**:
   - The **July report** saw a **27.85% increase in complaints** compared to its initial version.
   - The **August report** experienced an even more dramatic change, with a **42.64% increase in complaints**.

   These are not routine adjustments but substantial anomalies that demand a clear and detailed explanation. The vague and insufficient responses we've received so far have done little to address the root causes of these discrepancies.

We firmly believe that GTAA must be held accountable for their actions and provide transparent answers to the community they serve. We kindly request that you advocate on our behalf to ensure:

- An explanation is provided for the discrepancies in the July and August 2024 complaint reports.
- Clarification is given regarding the exclusion of Q3 2024 complaints.
- Measures are implemented to prevent future inconsistencies and ensure transparency.

Your support in this matter is essential to restoring trust and upholding accountability. We trust in your commitment to advocating for our community and ensuring fairness in this ongoing matter.

Dear Daryl and Fabio:

I am responding to your emails to the Minister of Transport and Internal Trade regarding issues pertaining to the Greater Toronto Airports Authority (GTAA).

While the Minister appreciates receiving your views, it is important to note that the GTAA is not a federal agency or department, but rather a private entity that operates an airport. This being the case, we have no additional comments or information to provide you at this time.

Please continue to raise your concerns with the GTAA. Transport Canada will not be replying to further correspondence from you on this matter.

Sincerely,

Christine

Dear Fabio,

Thank you for your email of June 2, 2024, to the Minister of Transport regarding air traffic noise and its effects on the community. Your correspondence has been forwarded to me for a response.

Transport Canada is responsible for developing and overseeing the transportation policies, programs, and goals set by the Government of Canada to ensure the national transportation system is safe, efficient, and accessible to all users. The mission of Transport Canada's Civil Aviation branch is to develop and administer policies and regulations for the safest civil aviation system for Canada and Canadians with a vision of an integrated and progressive civil aviation system that promotes a proactive safety culture.

As the safety regulator for the transportation system in Canada, the department exercises its authority through the *Aeronautics Act* and the Canadian Aviation Regulations (CARs).

One of the tools to assist airports includes a process through which airport operators develop noise abatement procedures and operating restrictions by consulting aviation stakeholders and local communities. We advise that noise abatement procedures for Toronto Pearson International Airport are in place, in addition to the Night Flight Program, which limits nighttime noise and balances the growing regional demand. This program limits the number of movements during the restricted hours of 12:30 am to 6:29 am. For more information, you may wish to visit Night Flights, Noise Management Program and Toronto InsightFull (torontopearson.com).

Unfortunately, noise management is a complicated and often difficult issue faced by airport authorities and communities around the country. It is an issue that must be managed while ensuring that aviation safety is not compromised. Transport Canada's experience has shown that noise issues are most effectively addressed at the local community level. Therefore, in this instance the department encourages dialogue with the airport authority directly, as Transport Canada is not involved in the daily operations at Toronto Pearson International Airport.

The airport operator, the Greater Toronto Airports Authority, may be reached at 416-247-7682 or through its website at Toronto Pearson- Contact Us.

Matias,

There is a wealth of empirical studies demonstrating the detrimental impact of airplane noise on students. I firmly believe that this factor contributes to the lower academic performance of schools in our area. It's imperative that we address this issue seriously.

Did you know that our area experiences over 10,000 noise events ,per month,exceeding the threshold of >65dB, with over 3,500 events surpassing 70dB? These statistics underscore the severity of the problem.

I propose collaborating with Councillor Peruzza and Tom Rakosevic to mitigate airplane noise levels. We must advocate for measures that not only reduce noise pollution but also ensure compensation for the affected community.

Unfortunately, our efforts to engage Federal Government representatives have been met with delays and evasion.

To delve deeper into this issue, I've included a couple of links below to provide additional context:

Ms. Marcia George,

Thank you for addressing my concerns in your recent email. Your response has helped me better understand the role of Transport Canada in overseeing and developing transportation policies to ensure a safe, efficient, and accessible national transportation system. However, I am troubled by the adverse effects these policies have on the communities surrounding airports.

It is perplexing that Transport Canada, tasked with developing and overseeing transportation policies, appears to disregard the detrimental impacts these policies have on entire communities to achieve its objectives. It is equally concerning that, in today's society, our government seems to consciously choose economic objectives at the expense of the health and quality of life of its citizens.

Societal attitudes towards previously normalized harmful behaviors or substances have undergone significant transformations, reflecting progress in public health and social awareness. Here are a few examples:

1. **Smoking**: Once glamorized and widely accepted, cigarette smoking is now largely stigmatized due to its severe health risks. Efforts now focus on prevention, cessation, and creating smoke-free environments.
2. **Drinking and Driving**: Previously brushed off as reckless behavior, drinking and driving are now widely condemned, thanks to awareness campaigns, stricter laws, and harsher penalties. There is now a greater emphasis on designated drivers, public transportation, and ride-sharing services.
3. **Noise Pollution**: Once seen as an inevitable part of city life, noise pollution is now recognized for its adverse effects on health and well-being. Urban planning initiatives and community advocacy are increasingly focused on mitigating noise pollution and promoting quieter, more livable cities.
4. **Fast Food and Nutrition**: Fast food consumption was once considered convenient and affordable, despite its poor nutritional quality. Rising awareness of obesity, heart disease, and other health issues linked to excessive fast food consumption has shifted attitudes towards healthier eating habits and better access to fresh foods.
5. **Environmental Conservation**: Exploitation of natural resources and pollution were once seen as necessary for economic growth. However, the need for sustainability and conservation is now widely recognized, with efforts to protect ecosystems, reduce carbon emissions, and mitigate climate change.

These examples highlight the power of education, advocacy, and policy interventions in reshaping societal norms and behaviors for the better. By challenging outdated attitudes and promoting healthier, more sustainable alternatives, communities can foster positive change and improve public health and well-being.

Transport Canada, responsible for the policies governing air traffic, should take these considerations into account. Allowing 24/7 airport operations that cause harm and suffering raises significant ethical and moral questions about policy-making. This situation can be likened

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

to how criminals and terrorists justify causing harm to achieve their objectives, which must be seen as state-criminal or terrorist activity.

Furthermore, there is a stark contradiction in your policies:

Transport Canada's Sleep Recommendations:

- **8 Hours of Consecutive Sleep**: While regulations provide for 8 consecutive hours off-duty, this time should ideally be used for sleep to ensure adequate rest.
- **Total Off-Duty Time**: In addition to the 8 consecutive hours, the additional 2 hours of off-duty time can be used for short naps, meals, and relaxation to help manage fatigue.

Health Canada's Sleep Recommendations by Age Group:

1. **Adults (18-64 years)**: 7-9 hours per night is considered optimal for maintaining good health, cognitive function, and overall well-being.
2. **Older Adults (65+ years)**: 7-8 hours per night is recommended, but adequate rest remains crucial for health and functioning.

How can these sleep recommendations be met when the noise levels in my community, caused by airplane traffic, are consistently disruptive throughout the night? Here are the noise levels recorded on a typical night in my community (M9M 2J4): June 13, 2024

- 12:05: 70dB
- 12:16: 64dB
- 12:20: 74dB
- 12:23: 71dB
- 12:26: 70dB
- 12:30: 69dB
- 12:31: 72dB

Acacia's Noise Monitor started working again at **8:52:40** on June 13, 2024.

Given the above, how can anyone in my community efficiently perform any activity, work, or study? How can you expect a truck driver living in my community to meet Canada's Transport recommendation of 8 hours of consecutive sleep? How can you expect a person living in my community to meet Canada's Health recommendation of 7-9 hours of quality sleep?

I look forward to your reply.

Regards,

Fabio Ovettini

Hi Stephanie,

Please see a draft below for your review.

Thanks,
Gurpreet

Hello Fabio Ovettini,

Thank you for contacting Transport Canada.

Transport Canada is responsible for developing and overseeing the transportation policies, programs, and goals set by the Government of Canada to ensure the national transportation system is safe, efficient, and accessible to all its users. The Transport Canada Civil Aviation mission is to develop and administer policies and regulations for the safest civil aviation system for Canada and Canadians with a vision of an integrated and progressive civil aviation system that promotes a proactive safety culture.

As the safety regulator for the transportation system in Canada, the department exercises its authority through the *Aeronautics Act* and Canadian Aviation Regulations (CARs). The CARs are available to the public at the following website: Canadian Aviation Regulations (justice.gc.ca)

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Unfortunately, noise management is a complicated and often difficult issue faced by airport authorities and communities around the country. It is an issue that must be managed while ensuring that aviation safety is not compromised. Transport Canada's experience has shown that noise issues are most effectively addressed at the local community level. Therefore, the department encourages dialogue with the airport operator directly as Transport Canada is not involved in the daily operations at Ottawa International Airport Authority.

The contact for the airport operator, Ottawa International Airport Authority is noted below:
Phone: 613-248-2000

Should you wish to report noise concerns or if you have additional questions about the Airport's noise management procedures, I would recommend that you complete the Airport's Feedback/Noise Complaint form, which can be found at: Contact Us | YOW

If at any time you suspect that a pilot is operating an aircraft in an unsafe manner and in contravention of the CARs, I encourage you to take down as much information as possible (photos, videos, the date and time, the registration number, the colour of the aircraft, and other identifying marks) and report that information to Civil Aviation Communications Centre Contact Form at: Civil Aviation Communications Centre Contact Form .

Thank you for writing.

Thank you,

Hi,

Airplane noise is managed by the Airport Operator. I'm unsure which Airport this is referring to as it only states the street name.

Internally, at TC the **noise portfolio** is with the TPEC group in HQ.

Unfortunately, I'm unable to assist here.

Regards,

Subject: [External/Externe]: Airplane Noise Pollution documented over a period of three consecutive days.

I have put a lot of effort into documenting the noise pollution generated by airplane traffic in our community

I manually noted airplane activity as given by the local noise monitoring station located in Acacia Avenue.

The findings reveal that the high volume of airplane traffic and the exorbitant noise levels they produce are both harmful to our health.

Attached you will find the results in a .pdf format.

Sincerely,
Fabio Ovettini

Subject: FOR APPROVAL: Ministerial- Impact of airplane noise on students

UNCLASSIFIED / NON CLASSIFIÉ

Good afternoon Marcia,

Please see the below ministerial draft regarding air traffic noise, for your approval.

Thanks,
Steph

DRAFT:

Dear Fabio Ovettini,

Thank you for your email of June 2, 2024, to the Minister of Transport, Pablo Rodriguez regarding the air traffic noise concerns and its effects on the community. Your correspondence has been forwarded to me for a response.

Transport Canada is responsible for developing and overseeing the transportation policies, programs, and goals set by the Government of Canada to ensure the national transportation system is safe, efficient, and accessible to all its users. The Transport Canada Civil Aviation mission is to develop and administer policies and regulations for the safest civil aviation system for Canada and Canadians with a vision of an integrated and progressive civil aviation system that promotes a proactive safety culture.

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

As the safety regulator for the transportation system in Canada, the department exercises its authority through the *Aeronautics Act* and Canadian Aviation Regulations (CARs). The CARs are available to the public at the following website: Canadian Aviation Regulations (CARs).

One of the tools to assist airports includes a process through which airport operators develop noise abatement procedures and operating restrictions by consulting aviation stakeholders and local communities. We advise that noise abatement procedures for the Toronto Pearson International Airport are in place, in addition to the Night Flight Program, which limits nighttime noise and balances the growing regional demand. This night flight restriction program limits the number of movements during the restricted hours (12:30 am to 6:29 am).

For more information, you may wish to visit: Night Flights, Noise Management Program and Toronto InsightFull (torontopearson.com).

Unfortunately, noise management is a complicated and often difficult issue faced by airport authorities and communities around the country. It is an issue that must be managed while ensuring that aviation safety is not compromised. Transport Canada's experience has shown that noise issues are most effectively addressed at the local community level. Therefore, the department encourages dialogue with the airport authority directly, as Transport Canada is not involved in the daily operations at the Toronto Pearson International Airport.

The airport operator, the Greater Toronto Airports Authority (GTAA) may be reached at the following:
Phone: 416-247-7682
Website: Toronto Pearson- Contact Us

Thank you for writing.

Regards,

Stephanie Quach

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Ms. Marcia George,

Thank you for addressing my concerns in your recent email. Your response has helped me better understand the role of Transport Canada in overseeing and developing transportation policies to ensure a safe, efficient, and accessible national transportation system. However, I am troubled by the adverse effects these policies have on the communities surrounding airports.

It is perplexing that Transport Canada, tasked with developing and overseeing transportation policies, appears to disregard the detrimental impacts these policies have on entire communities to achieve its objectives. It is equally concerning that, in today's society, our government seems to consciously choose economic objectives at the expense of the health and quality of life of its citizens.

Societal attitudes towards previously normalized harmful behaviors or substances have undergone significant transformations, reflecting progress in public health and social awareness. Here are a few examples:

1. **Smoking**: Once glamorized and widely accepted, cigarette smoking is now largely stigmatized due to its severe health risks. Efforts now focus on prevention, cessation, and creating smoke-free environments.
2. **Drinking and Driving**: Previously brushed off as reckless behavior, drinking and driving are now widely condemned, thanks to awareness campaigns, stricter laws, and harsher penalties. There is now a greater emphasis on designated drivers, public transportation, and ride-sharing services.
3. **Noise Pollution**: Once seen as an inevitable part of city life, noise pollution is now recognized for its adverse effects on health and well-being. Urban planning initiatives and community advocacy are increasingly focused on mitigating noise pollution and promoting quieter, more livable cities.
4. **Fast Food and Nutrition**: Fast food consumption was once considered convenient and affordable, despite its poor nutritional quality. Rising awareness of obesity, heart disease, and other health issues linked to excessive fast food consumption has shifted attitudes towards healthier eating habits and better access to fresh foods.
5. **Environmental Conservation**: Exploitation of natural resources and pollution were once seen as necessary for economic growth. However, the need for sustainability and conservation is now widely recognized, with efforts to protect ecosystems, reduce carbon emissions, and mitigate climate change.

These examples highlight the power of education, advocacy, and policy interventions in reshaping societal norms and behaviors for the better. By challenging outdated attitudes and promoting healthier, more sustainable alternatives, communities can foster positive change and improve public health and well-being.

Transport Canada, responsible for the policies governing air traffic, should take these considerations into account. Allowing 24/7 airport operations that cause harm and suffering raises significant ethical and moral questions about policy-making. This situation can be likened

Record released pursuant to the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

to how criminals and terrorists justify causing harm to achieve their objectives, which must be seen as state-criminal or terrorist activity.

Furthermore, there is a stark contradiction in your policies:

Transport Canada's Sleep Recommendations:

- **8 Hours of Consecutive Sleep**: While regulations provide for 8 consecutive hours off-duty, this time should ideally be used for sleep to ensure adequate rest.
- **Total Off-Duty Time**: In addition to the 8 consecutive hours, the additional 2 hours of off-duty time can be used for short naps, meals, and relaxation to help manage fatigue.

Health Canada's Sleep Recommendations by Age Group:

1. **Adults (18-64 years)**: 7-9 hours per night is considered optimal for maintaining good health, cognitive function, and overall well-being.
2. **Older Adults (65+ years)**: 7-8 hours per night is recommended, but adequate rest remains crucial for health and functioning.

How can these sleep recommendations be met when the noise levels in my community, caused by airplane traffic, are consistently disruptive throughout the night? Here are the noise levels recorded on a typical night in my community (M9M 2J4): June 13, 2024

- 12:05: 70dB
- 12:16: 64dB
- 12:20: 74dB
- 12:23: 71dB
- 12:26: 70dB
- 12:30: 69dB
- 12:31: 72dB
- 12:33: 71dB
- 12:37: 74dB
- 12:59: 72dB
- 01:01: 68dB
- 01:04: 72dB
- 01:14: 72dB
- 01:23: 68dB
- 01:33: 73dB
- 02:00: 77dB
- 02:14: 74dB
- 03:49: 75dB
- 04:39: 75dB
- 04:42: 73dB
- 05:01: 77dB
- 05:05: 69dB
- 05:08: 69dB

- 05:19: 72dB

Acacia's Noise Monitor started working again at **8:52:40** on June 13, 2024.

Given the above, how can anyone in my community efficiently perform any activity, work, or study? How can you expect a truck driver living in my community to meet Canada's Transport recommendation of 8 hours of consecutive sleep? How can you expect a person living in my community to meet Canada's Health recommendation of 7-9 hours of quality sleep?

I look forward to your reply.

Regards,

Fabio Ovettini
